The Publishers cannot be responsible for Remittances unless made by Drafts or Post-Office Money Orders.

The A nest file for holding current numbers of the Chronicle is seld at the office for 50 cents. Volumes bound for subscribers at \$1 25. The first and second volumes of the Chronicle are wanted by the publishers.

THE DEBT AND THE CURRENCY.

The debt statement throws light on a mystery which has puzzled Wall street for some time past; namely, the continued sale of gold by the Treasury, notwithstanding that bonds could not be bought at par to an equivalent amount. As the explanation that the five-twenties are so scarce as to rule too high for the Treasury limit of price was not sufficient to satisfy the critics, we have now the further fact that the Treasury has really had no surplus during the month of December to invest in paying off its bonds. the contrary, the aggregate of the debt has risen from \$2,160,568,036 to \$2,162,252,338. The increase of \$1,684, 337 is the first interruption we have had of the monthly process of debt liquidation, which some persons have regarded with so much complacency during the last four or five years. Since March 1, 1869, we have paid off 363 millions of the public obligations; and during the earlier portion of that period the liquidation was no doubt of consider-

able service to the public credit abroad. The time has long passed away when such aid was of any essential use to the Government credit at home or in foreign markets; and our people look with much satisfaction on the approaching cessation of the heavy monthly decrease in the debt to which they have become of late accustomed. It is much better that the money should remain to fructify in the pockets of the people than that it should be collected by a wasteful oppressive tax system, and hoarded in the Treasury or spent in redeeming bonds which are not due, and which the public creditors do not want paid.

It is true this paying off of the debt has had the effect of lessening the interest payments; but these burdens can be otherwise lightened. Our six per cent bonds are now 1,342 millions. When we fund these at 4 per cent, which, with good management, will in good time be possible, we shall annually save \$26,840,000 in interest. This would be better in some points of view than even the payment of 363 millions of the principal, for the saving on these liquidated funds, if they bore interest at 6 per cent, would amount but to \$21,780,000 a year, or 5 millions less than the amount we should save by funding the sixes at 4 per cent. This 4 per cent project was much more talked of a year or two ago than now, and one reason why it failed then was that bonds with double dates of maturity are unusual and out of favor in Europe. The Government bonds to which investors are accustomed have no such contingencies. The consols of England and the rentes of France would sell at much lower rates if they were converted into Five-twonties or Ten-forties. If we want to borrow in the money markets of Europe on terms which fairly represent the stability of our credit, we must offer bonds without such contingencies. If we could borrow at four per cent we should save 26 millions a year on our six per cents alone. But at this low rate we shall never borrow on Five-twenties or Tenforties, or any such contingent securities. We must prepare to offer long bonds of much greater attractiveness, or be content to pay as we have paid for the last five or six years, a vast sum every year for the pleasure of knowing that whenever we like we can compel our creditors to take back the principal of their bonds, and that we can thus prevent these bonds from rising much above par. This part of our fiscal policy is attracting more attention, and early next session a bill will probably be introduced for its reform. It costs too much to hold its place much longer. With regard to the falling off in the revenue receipts of December, the explanation is given that the laterruption of travel by the snow has prevented heavy remittances from reaching Washington in time to be included in their usual order. But the general fact is undoubted that we have reduced our taxes to a point which will leave us little if any surplus for

debt liquidation. If there should be any surplus still remaining a new demand for tex relief will soon absorb it, and for any considerable diminution of the burden of the debt we must for some time look less to the paying off of the principal than to a lowering of the rate of interest by some such expedient as we have suggested.

The only remaining topic of importance suggested by the debt statement is the loss of some 24 millions of gold during the year. The coin balance is new \$74,359,275, of which \$23,263,000 belong to private depositors, and are re presented by coin certificates. Consequently the government gold balance is only 51 millions against nearly 76 millions a year ago. The question is where this gold has gone. If it is dispersed in this country, and has buried it self in the hoards of the people or taken its place in the cur. rent of business, then its loss by the Treasury is not of so much account. But if it has gone abroad we are so much the poorer in gold, and the stock of the precious metals on which we can rely has been weakened. In this connectlon it is pointed out that our specie exports last year were 72 millions, while our' whole production is estimated at 50 millions. If these latter figures be correct we have exported 22 millions of specie more than we produced during the year, and the German demand for bullion, for her new coinage has begun already to tell on the specie reserves of this country. As to the deductions from these facts, they are very conflicting. The best opinion seems to be that there is no export demand for gold, either past or prospective, which is at all likely to produce much embarrassment in our general finances.

The currency balance has undergone little change. It is now \$9,876,573, against \$10,118,111 a month ago. The greenbacks have been slightly increased, and are now \$358, 642,294, against \$358,135,643. The fractional currency has also increased two millions, and is now \$45,722,061; so that we closed the year with two and a half millions of currency, outstanding, in excess of the aggregate of the previous month, and about six millions in excess of the amount at the close of the previous year. To offset this emission, the three per cent. certificates have run down to \$2,780,000, and over one million were redeemed in December, while the last lot called yesterday will cease to bear interest on the 28th of February next.

These certificates two years ago amounted to \$43,550,000 so that 41 millions have been returned from circulation to make way for an equivalent amount of bank notes. The certificates redeemed last year were 20 millions. The currency balance in the Treasury shows a notable decrease. Two years ago it was \$30,284,291, and last year it had fallen to \$15,861,493. It is now reduced to \$9,876,573 which low average shows with the new currency issued that the Treasury has been paying out more currency that it has received during the last month, contrary to the statements of those persons who have reproached the Secretary with locking up greenbacks and increasing the trouble in the money market.

A SOUND BASIS.

Instability and over-expansion are the two besetting sins of paper-money finance, and the ingenuity of financial statesmanship is put to a frequent and severe test in devising correctives and safeguards against each of these two forms of monetary perturbation. We have received a communication from the president of one of our largest National Banks relative to some of these safeguards. He calls our attention to the undoubted fact that the Fall increasing. It is now harder to bear, and as the banks are with the free movements of business.

less able than last year to render adequate aid to the growing business of the country, he thinks they may perhaps fall short next Autumn to a still greater degree. The vulgar remedy for this bank restriction is inflation. "Let us have more greenbacks," cries one section of the unreflecting crowd. "Give us more bank currency," clamors another. "Release our speculative banks," demands a third, "from the obligation to keep ample reserves." To listen to these cries would be to pour oil on the flame, and convert a future stringency into a general panic. Our correspondent very ably shows that such inflation would cause more instability than prevails at present. He argues that the protracted stringency is due to the general causea thus growing year by year. Partly, however, it is, no doubt, caused by the Chicago fire. the effects of which have not reached our money market completely until a recent period. Fifty millions of dollars he computes as 'the sum of which Chicago has depleted the floating supplies of capital by bor. rowing in our loan market. Then there is the Boston fire, of which perhaps the money market will bear the brunt next Fall. as it is slightly agitated by it at present. Next come the railroads, which in the estimate of our correspondent have swallowed up 100 millions of floating capital from the losn market, in consequence of their having been unable to negotiate abroad for the last six months the bonds on which they depended for funds to carry on their works. These works will become productive soon; but on the present supplies of the loan market the drain is exhausting. Our railroads absorb up a good deal of capital, and for the present withdraw it from other uses. They are, no doubt, worth to the country all that they cost, and many of them vastly more; but they have none the less depleted the money market of funds which would otherwise have been available for loans to our merchants, manutacturers and organizers of industry.

By what means is this immense drain on the reservoir of our money market to be met? Obviously by refilling it with more capital. But how? What are the sources from which the reservoir of loanable capital is fed? Are the prospects good that we shall be able to meet the exhausting drain, and to bear the prodigious movement of our float. ing capital into fixed capital without some panic? Obviously our hope of exemption from future trouble and financial stringency is based in some degree on the immigration of foreign capital, for which we can offer more profit to the owners than with equal safety they can find anywhere else in the world. Our correspondent seems to have less confidence than we have expressed in the power of this country soon to attract enough foreign capital to make up for this absorption of the supplies of our money market. But he has more confidence in the inherent productive powers of our national wealth and industrial life which, if properly sustained, will be adequate to bear any present and prospective strain that is threatening to invade them.

Such are the general views of our correspondent, which are well worthy of note, both for their own sake, and especially because they coincide in the main with the opinions of the most influential part of our representative financial authorities. We pass on, however, to the practical measures by which to deal with the difficulties of the situation. The first is to give stability to our monetary machinery, so far as we can do this by legislative interference, or, what is of still more importance, by abstaining from such interference. For the surport of the banking mechanism and financial confidence of a country like ours, it is of the last importance that no violent reforms or sudden monetary changes be attempted, by legispressure in the money market has for several years been lative acts, or executive intermeddling with the currency, or

Stability is of more importance in the monetary organism than conformity to any theoretic system, and the practical statesman will bring better results out of an imperfect financial scheme than can be achieved by more symmetrical machinery, if the former have stability, while the latter is inconstant, unsettled, and liable to sudden jenks and unfore seen changes. Such fickleness and instability were formerly the bane of our monetary policy. They have been partially but not wholly got rid of during the last four years. In proportion as Mr. Boutwell has firmly resisted all temptations to revive them, he has contributed to the popularity of his financial policy and to the strength and prosperity of the country. Whatever else our financial system lacks it should have stability. Any policy leading thereto will always be justified by the results. The fall of gold, the steady growth of our credit, the progress we have made during the last four years in wealth, in population, and in all the elements of industrial strength, are due quite as much to this financial stability as to the more conspicuous causes which oftener challenge attention.

Stability, however, is not that characteristic of a sound monetary policy which our correspondent chiefly discusses. His object is to lay special stress on reserves, redemption of bank notes, and practical reforms which act directly to restrain the overexpansion of credits. On this branch of the subject he makes the following remarks, the main purport of which is that we should get gentle contraction of the currency and of credits, if possible, but should resist infla tion at all hazards:

As to the Bank reserves, I have never been able to reconcile with sound financial statesmanship the opinion that the framers of the Currency Law intended the required reserve of the banks should at all times be kept on hand, thus rendering this large sum of money as valueless for business purposes as the brick and iron vaults containing it. We should pay too indifferent a compliment to their intelligence did they not rather intend that the reserve should be laid aside to meet any unexpected pressure in the money market from movement of crops or other causes, and be returned when the storm had passed. Financial writers, members of Congress, and reports of financial officers all have their specific for the restoration of our currency to a sound basis, while at every move we seem to get farther and farther from so desir-As to the Bank reserves, I have never been able to reconcile at every move we seem to get farther and farther from so desirable a result.

Resumption of specie payments can only take place when the coin in the country bears a proper proportion to obligations payable in coin, and when the condition of our foreign trade reable in coin, and when the condition of our foreign trade requires no shipments of coin to settle balances. Experience has also taught us more than once in our history that the amount of coin now available in the country will not float one half the obligations now existing, payable in coin. Consequently the present is not a favorable time for a radical change in our currency, and at the same time we should not lose sight of the fact that sooner or later our currency must be based on coin. legislation should have special reference to placing the country in a condition to resume at the earliest period practicable.

The first step towards resumption of specie payments will be to prepare the banks and people by gradual contraction of avail-able loanable funds which can be reached as far as now expedient by provision, at the expense of Government, for prompt redemp tion of National Bank currency, and its return to the place of issue. Such legislation would put an effectual stop to the con-stant desire, for its increase would limit its volume to the exact wants of the country, would give that clasticity it does not now possess; would limit the accumulation of money at this point and restrict speculation, and provide the necessary means in local banks for moving crops without the usual disturbance at money centres in the last three or four months of every year.

The redemption of national currency is too formidable and expensive to be attempted by any bank or association of banks, and of right should be performed by Government and the expenses paid out of the taxes collected from the banks now vastly in excess of the expenses of the Currency Department.

Adopt this provision, and we have all the contraction the country can bear for a year or two. It will go far to prepare us for such further contraction as may be necessary to reach a sound specie basis.

In these times of agitation, when the whole country is suffering from stringency, and Congress is urged to give relief by forbidden means, which would leave us a legacy of trouble hereafter, it is of importance to the whole country that the main elements of a sound financial policy and of specie payments should be kept before us as the haven rom which our financial barque in all its tacking and drift- May 3 ... 8 p. 6 7 gold | Sept. 6 .. 4 p. 6 p

ing must not recede. We must after steadily toward it, no matter what storms, or currents, or disasters retard and threaten our progress. Among the conditions of such a sound policy the most prominent are stability in regard to the financial administration of the Government, and a strengthening of the banks by ample reserves, metropolitan redemption, a watchful restriction of unexpanded credits, and a steadfast resistance to every sort of ourrency expansion.

FINANCIAL REVIEW OF THE YEAR 1872—TABLES OF PRICES OF GOLD, FOREIGN EXCHANGE, U.S. GOVERNMENT SECURITIES, STATE BONDS, RAILROAD BONDS, AND BAIL-ROAD AND MISCELLANEOUS STOCKS.

[Entered according to Act of Congress, in the year 1873, by WILLIAM B. DANA & Co., in the office of the Librarian of Congress, Washington, D.C.]

In the tables given on following pages we present a complete review of the range of prices in the financial markets during the year 1872. The history of the year is, of course, reflected to a great extent in the prices themselves, though there are several points which deserve some comment or explanation.

In regard to the money market, there has probably never been a year of such general stringency in Wall street-excessively high rates have rather been the rule than the exception. In the first half of the year rates began to harden as early as February; in March and April money was excessively stringent, and both call loans and those on commercial paper were made at very high rates; not until the middle of May was money readily obtainable at a moderate rate. The summer period of easy money was short, and about the middle of September, with the renewal of active speculative operations, the spasmodic stringency again set in, and from that time until the close of the year there was, with very little intermission, an extraordinarily severe market.

The Bank Statements at or about the commencement of each quarter of the year were as follows, compared with the same periods of two previous years:

JANUARY 1.

	Dec. 30, 1871.	Dec. 31, 1970.	Dec. 3t, 1869

United States securitles maintain their prices with firmness as a general rule, though influenced for a time by the Alabama treaty negotiations, and at other periods by such circumstances as had a bearing upon all the financial markets. Upon the whole, United States securities are increasing in favor every year, and one of the most important features in regard to them is the remarkable scarcity in the floating supply of bonds which is frequently noticed in our market. The following interesting table shows the highest and lowest points touched during the year and the date thereof:

State Bonds, so far as the Southern list is concerned, are now classed rather with the speculative than with investment securi. ties, and have fluctuated widely.

Railroad Bonds during the early part of the year were in great favor, and a large amount of new bonds were placed both in this market and abroad; in the last four months of the year the movey m trket worked so closely as to interfere seriously with the negoti tion of new loans. The great popularity of railroad bonds with private investors has not diminished, however, and notwithstanding some unfortunate defaults in interest, the best class of these securities is looked upon with much favor. The highest and lowest points touched during the year by the leading State and Railroad Bonds were as follows:

	Lowest.	Highest.
6s Tennessee, old	63% Jan. 5	823€ Dec. 12
6s Teunessec, new	63% Jan. 4	83 Dec. 12

Railroad and Miscellaneous stocks were, at times, very active and speculative transactions were of enormous volume. There is n) space here to notice all the salient points of the year, and we w.ll refer only to the following comments made in our monthly z :views :

"The month of March, 1872, will be long remembered at the Stock Exchange as the eventual period which witnessed the Eric "revolution," and brought sgain into prominent notice that old favorite of etock speculation. The overthrow of the old board of directors and the resignation of Jay Gould as President of the company, took place previous to the middle of the month, and the dealings in the stock subsequent to that time were of enormous extent."

Of the month of June we wrote:

"The sales of Pacific Mail stock in the mouth were probably several times greater than the whole amount of the capital. The law passed for reduction of the capital from \$20,000,000 to \$10,000,000, and the increase by Congress of the company's subside to \$1,000,000, in consideration of doubling the service between China and Sao Francisco, were important influences causing this activity, and also the annual election of the company, in regard to which there was some contest, although the former directors were elected by a large majority."

Of the month of September:

"Eric Railwsy stock had previously (to Sept. 17) been made very scorce, and was loaning at high rates from day to day, in consequence of the heavy purchases of a leading speculator, who had thus "cornered" a clique which had sold the stock short to a very large amount. For the purpose of compelling the party who was carrying Eric to sell out, and at the same time to barass the gold party, the clittle locked up money and succeeded in making the high rates of interest above noticed, while borrowers of gold also had to pay & per cent a day for its use.
"That day—the 17th of Sept-mber—when money commanded % per cent a day, gold % per cent a day, and Eric stock as high as 2% per cent, will be remembered in Wall street as the day of the "three corners."

Of November we wrote:

"Railroad stocks were comparatively dull until the period of the Boston fire, when on Monday the 1ith, prices declined very sharply, under the fears of a depression such as occurred after the Chicago fire. These fears, however, proved to be unfounded, and prices recovered as rapidly as they had declined. Subsequent to this there was no special movement in the stock market fill the calcanted "corner" in Northwest common, by which that stock advanced to \$5 on Wednesday the 20th, touched 230 in purchases at the Board on Saturday the 23d, (for the account of parties who had failed to deliver on their contracts), and again collapsed to \$5 bid, on Tuesday."

In addition to the matters above referred to may be mentioned t is lestitution in December of about \$9,000,000 by Jay Gould to the Erie Railway Company, in settlement of their suits against him. The highest and lowest points touched during the year by leading stocks, and the dats thereof, were as follows:

	-Lowest.	-Highest-

In gold there was no great movement; the highest point was 1154 on the 8th of August, and the lowest 1084 on the 11th of January. Extraordinarily high rates were at times exacted on loans. The export of the year was large, the total from New York comparing as follows with previous years:

1872\$71,553,326	1969 \$32,108,448	1966 \$62,553,700
187163,865,547	19/8	186530.003.683
187058,191,475	186751,801,948	

The total values of exports and imports, both of specie and merchandise, for the whole United States, in the two fiscal years ending June 30, 1872 and 1871 respectively, were as follows:

FOREIGN IMPORTS-GOLD VALUES.

	Merch	andise		Gold and	Grand
Years ending- Jane 30, 1872			Total. \$626,593,654	Silver.	Total.
June 30, 1871				21,900,024

[From our own correspondent.]

London, Saturday, December 14.

The leading feature of the week is the reduction in the Bank rate of discount to six per cent. The movement was unexpected, but the Bank return which has been published shows that any other course was unavoidable. The changes in the weekly return are of a very satisfactory character, the increase in the reserve of notes and coin being £1,400,000; and in the stock of bullion, £450,000. The year is likely to close, therefore, with money at a reasonable price, and with the trade of the country, in most respects, sound.

Undoubtedly, the bad harvest, and the adverse season for Autumu sowing have largely diminished the purchasing power of the country. The farmers of this country, in spite of free trade, are a well-to-do class, and are far from being that poverty-stricken section of the community which some would represent them to be. In average and in abundant seasons they are able to make large iquestments between harvest and Christmas, but such cannot have been the case this year. A season like the present is just the one in which they suffer from the effects of free trade; but happily such seasons are by no means frequent. The prices of sound produce of all kinds are indeed high, but to one "ruu" of good dry English wheat offered for sale at market, there are hundreds the intrinsic value of which is hard to determine. The produce was harvested damp, and since harvest the rain has been almost inceasant so that there has been no chance for improvement. Then again, with regard to potatoes. Really sound parcels sell at the high price of £10 and £10 10s. per ton, but the districts which have yielded such a quality of produce could with ease be counted, so few are they in number. It follows, therefore, that while fine qualities of produce are very dear, the larger proportion of this year's crops can only be disposed of at irregular prices, and at prices which are more convenient to the buyer than the seller. for it must be borne in mind that there is a good selection of foreign produce offering in our markets, the result of which is that the inferior growths of England are almost altogether discarded.

I mentioned in my letter last week that many persons were of the opinion that the rise in the Bank rate to seven per cent. had very little to do with the influx of gold from Paris. That opinion is still entertains, and in one sense, it appears to be correct. The do cons. conv 88%-903 not so much to bring gold from Paris for cons. conv 88%-903 not so much to bring gold from Paris for cons. conv 88%-903 not so much to bring gold from Paris for cons. conv 88%-903 not so much to bring gold from Paris for cons. Conv. 108. 74 - 83 rectors to refuse to discount financial paper. West Un. Tele, 1st M 90 - 96 f such paper has of late been in circulation, to German hands, one, and indeed the

leading source of trouble is at once apparent. But the question may be fairly asked. Why did not the Bank refuse such paper at an earlier date, while the rate was at five per cent.? Had such a course been adopted there would have been no occasion for the advance to seven per cent, with all its attendant excitement; and with the facilities which the Bank have in judging for themselves the nature of the operations which are in progress, they would have been quite justified in demanding for such paper a rate considerably above the existing minimum. To prevent, if possible, a repetition of such disturbances during the period that the Indemnity payments last, some such course should be adopted, so as to in the interests of our trade give stability to the rates for money.

There has been a good demand for money during the week, and that circumstance led few to expect a change in the official minimum. The inquiry since Thursday has been active at the reduction Annexed are the quotations:

Per cent. 1	Per cent.

There has been scarcely any demand for gold for export, and a moderate supply has been sent into the Bank. The silver market has been quiet, but the recent advance in prices has been maintained. The foreign exchanges are rather less favorable to this country. The following prices of bullion are from the circular of Messrs, Pixley, Abell, Langley & Blake:

GOLD.	D.	u.			u,

Messrs. Clews, Habicht & Co. announce that they are authorized by the Burlington, Cedar Rapids and Minnesota Railroad Com. pany to receive subscriptions to an issue of £440,000 in first mortgage 7 per cent convertible sterling bonds of £200 each. The price of issue will be £166 per bond, and interest will date from the 1st of August last. An accumulative sinking fund of £4.000 per annum will be applied half yearly from the 1st of February 1878, for the redemption of the loan. The main line, which is 260 miles in length, was opened on the 1st of February last, and the loan now offered for subscription is required to form a con. nection with the Milwaukee and St. Paul Railway. The total cost of the main line and the extensions will be £2,730,000.

The suspension of the Banque de l'Union of Brussels and Ant werp (Messrs. Jacob, Freres et Cie.), has created some little sensation, more especially on the Continent. The losses which will be sustained on this side, if any, will be small. The proprietary is rich, and the last accounts say that by calling up £480,000 of unpaid capital, each creditor's claim will be satisfied. Two persons holding important positions at the Bank have been arrested, on the charge, I hear, of speculating with the proprietors money in oil and other produce.

As usual towards the close of the year the stock markets have been quiet, but chesper money has given a firm tone to them-Many classes of eccurities are high in price, especially in the railway department. The railway traffic receipts continue satisfactory, so that though quotations are high, speculators for the fall see no present chance of operating. In French scrip there has been a marked recovery, owing chiefly to the termination of the political crisis. The price is now 2% to 2% premium United States Government Securities are very firm: and American railway shares, excepting Illinois Central, which are dull, have improved in value. The following were the closing prices of consols and the principal American securities this afternoon;

Through the Spanish Financial Commission the Spanish Gov. ernment have been inviting subscriptions to a loan of £10,000,000 of cash, in a 3 per cent stock, at 28\$. Lists were opened on Thursday at the principal financial centres of Europe, and it is stated that the amount has been more than subscribed. Only a short time since the Spanish Government offered, and the bondholders accepted their interest, as follows: Two-thirds in cash and one-third in stock. In addition to this there have been republican risings in various parts of Spain, and the news has just been received of an insurrection in Madrid, in which about twenty persons lost their lives. Spain may, therefore, consider herself fortunate in obtaining £10,000,000 of money at no higher rate of interest than about 10 per cent. The price of the scrip has averaged 1 premium.

The trade for wheat has been quiet, but there has been a steady consumptive demand for good and fine foreign produce, and the quotations have ruled firm. There is no improvement in the weather, and very slow progress has been made in consequence with agricultural work. It is quite expected that a large average of land which had been intended for wheat will lay fallow till the spring, and be sown with barley,

The following statement shows the Imports and exports of cereal produce into and from the United Kingdom since harvest, viz., from September 1 to the close of last week, compared with the corresponding periods in the three previous years:

IMPORTS.

	1872.	1871.	1870.	1869.

The following relates to the trade of Manchester:

The narket is strong in tone, and producers generally require an advance. The reduction in the Bank rate has strengthened the position of holders, without leading to any perceptible improvement in the demand. Export yarns have been firmly held, and spinners decline taking orders at Tuesday's prices. Buyers have been deterred opening to any extent in consequence of the advance required. Heme trade yarns have gone off slowly, but there is no weakness in prices. Goods have exhibited a hardening tendency, though the demand has been inactive. A moderate inquiry has prevailed for shirting goods. Madapollams, mulls and jacconetts have been in quieter request, but prices are forward—in some cases quotably dearer.

From the coal and iron districts the following reports have been

From the coal and iron districts the following reports have been

NEWOASTLE-ON-TYNE.—The coal and iron trades bave recuvered a little of their former tone, although there does not appear to be any definite cause for it, beyond the fact that a few contracts have been made for next year at something below the current rates. This is taken as an indication that high prices will rule next year, but the contracts made at this time last year did not at all indicate the extraordinary rise that subsequently took place. Iron is more in demand, although the production is lessened, and consequently

prices keep firmer than they would do were the average quantity produced. Chemicals in fair demand, and prices remain unchanged. The shipping, of which at present there is very little in the Tyne, is much inquired after, but the rates do not improve. The heavy losses from the Tyne is said to have some effect both on freights and on the value of shipping.

SOUTH WALES—CARDIFF.—In the iron trade things remain much the same as for some two or three we, ke past, makers not being overburdened with orders, but they continue to keep their establishments in pretty regular employ. It is not unlikely that many of the less sanguine prophets will find that after all the trade is not destined to sink to so low a state as some predicted. There is, in fact, a revival in the tone of the trade, and immediate prospects are undoubtedly brighter. Buvers are already beginning to better themselves, and seem much more disposed to place orders at current rates than for several weeks past. The timplate works present a fair degree of than for several weeks past. The timplate works present a fair degree of activity, but there is no material change to report. The position of the coal trade is without material alteration. The demand for steam and house coals continues extensive, and good prices are obtained.

Surrender of Bills of Lading .- In The CHRONICLE of Dec. 28, on page 858, we referred to the case recently decided in Massachusets, upon the subject of the surrender of bills of lading, and intended to insert at the same time the following opinion upon the subject by eminent counsel in Philadelphia.

The opinion of counsel above mentioned is as follows:

The opinion of counsel above mentioned is as follows:

"Str: The Massachusetts case of which a report is published in this morning's Ledger, is one of great practical importance, and it is desirable that our banks and business men should not hastily adopt an erroseous practice in such matters. It does not appear that the question of law was decided by the Court, and the jury may have been allowed to assess the damages, subject to the opinion of the Court on the point of law reserved for further consideration. Of course if the surrender was, as the report says, contrary to the orders given, the verdict may possibly be sustained, but even this is unlikely. The question frequently presents itself where no special instructions have been given, and there it would seem to be plain that the bill of lading given, and there it would seem to be plain that the bill of lading should be surrendered on the acceptance of the draft, though doubts have been entertained on the subject. The reasons for the delivery are found both in a consideration of the rights of the parties to a contract of sale on credit and of the position of the subject. scceptor of a draft, or bill of exchange, accepted on the faith of scopiol of a draft, of old of exchange, accepted of the fact of the consignment of goods. A sale upon credit is inconsistent with now right of lien, and hence it has been held, where goods were sold, "to be paid for by cash, in one month," the vendee was entitled to have the goods delivered immediately, but was not bound to pay till the end of the month, and evidence of a contrary usage was inadmissable—the contract having been in writing. As the purchaser would, therefore, be able to take the goods by replevin, or to bring trover for their conversion, it would seem to be clear that he would be entitled to demand the surrender of the hill of lading.

On the other hand, it is equally plain that where a draft is accepted against a bill of lading, the acceptor, in the absence of an express agreement to the contrary, is entitled to the possession of the goods, in order to obtain the means with which to pay the draft at maturity. Hence it was held, as far back as Lord Mansfield's day, that where the drawee accepted, in consideration of a future consignment of goods, and the holder of the bill of exchange, with knowledge of such agreement, received and retained the bill of lading, he discharged the acceptor.

The bank which und-riakes, therefore, to hold on to the bill of lading, without express instructions to do so, puts itself in a very

lading, without express instructions to do so, puts itself in a very awkward position. If the consignee be a purchaser on credit and wishes the goods, he can take them on tendering acceptance, or if wishes the goods, he can take them on tendering acceptance, or if he chooses to let them remain in its possession, he can put upon the bank the risk of fluctuations in the market, while the property may be changeable or perishable—hogs on the hoof, but.er, eggs or peaches; or, on the other hand, if it be not the interest of the drawer to accept, a refusal to deliver the bill of lading would justify him in refusing acceptance and rescinding his contract of purchase. It may be added that, on the Continent, the law is well settled that the bill of lading must always be surrendered on acceptance of a bill exchange payable after right unless

December 10, 1872. I am, sir, &c., S. D."

At a meeting of the Board of Presidents of the Banks of Philadelphia, held December 2, 1872, it was unanimously Resolved, That the following circular be adopted and for-

warded to our corression lents as indicative of, and defining the custom to be hereafter pursued by the Philadelphia banks in relation to the delivery of bills of lading and shipping receipts accompanying time drafts:

accompanying time drafts:

Dear Sir: Tine drafts are frequently sent to the banks of this city for acceptance by the drawees, accompanied by shipping receipts or bills of lading for goods shipped to the drawee, without instructions whether the bills of lading shall be surrendered to the drawee, upon his accepting the draft or not. We are advised that npon such drafts being accepted it is the duty of the bank to surrender the bill of lading to the acceptor of the draft, in the absence of instructions to the contrary. To prevent any misapprehension arising in the course of our business transactions in these matters, we have thought it proper to address this circular to our correspondents, and state that we will in all such cases deliver the bills of lading to the drawee, upon his acceptance of the draft, unless instructed to the contrary by our correspondent at the time of sending us the draft and bill of lading.

Please note the contents of this circular, and hear in mind that we shall be governed by the above stated rule in all cases to which it is applicable.

Lind Decision by the Attorney-General.—Washington, December 27.—Attorney-General Williams has given an opinion to the effect that the lands in dispute between the Sioux City and Saint Paul and McGregor and Missouri River Railroad Companies should be patented for the use of the company which shall first

should be patented for the use of the company which shall first construct its road to the point at which it would then entitle them, as being then within the prescribed limits on each side.

Neither road is constructed far enough to touch the lands in

question

Mr. Williams decides, as a general principle, that the claim of any railroad company to have patents issued for all lands designated to aid in its construction when a part of the road is incom-plete, cannot properly be allowed, and that the priority of loca-tion of the road does not entitle it to patents for land; also, that it cannot obtain patents except where the road is actually conatructed.

This decision overrules one given by Secretary Delano, to the effect that the McGregor and Missouri River road was entitled to

the lands in controversy.

Chicago, Burlington & Quiney, and the Burlington & Missouri Railroads.—The consolidation of these companies we have heretofore noticed; the terms as ratified embrace the follow-

ing points:

The two companies retain for the present their distinctive titles and organizations, and for the purpose of equalizing the value of the atocks according to the contract, the Chicago, Burlington and Qui cy Company proposes to issue to stockholders, whose names were of record on the 10th inst., bonds to the amount of \$1,000 and \$500, and will bear interest from January 1at. 1873. Any person holding 40 shares of the stock will be entitled to a \$1,000 and a \$500 head will be invested to the holder of \$0. bond, and a \$500 bond will be issued to the holder of 20 shares. Fractional interests may be consolidated, or the bonds will be issued on the payment of the deficiency at the rate of \$25 per share, so that the holders of 39 shares may obtain a \$1,000 bond by paying \$25, or the owner of 15 shares will receive a \$500 bond on the payment of \$125.

payment of \$125.

Sale of the Lonisville, New Albany and Chicago Railroad.—The Hon. John D. Howland. Clerk of the United States
Courts and Special Commissioner for the sale, sold this week the
Lonisville, New Albany and Chicago Railroad. George L.
Schuyler, Esq., of New York, was the purchaser for himself and
the bondholders, at \$5,000, the only bid offered. The decree of
sale was in consequence of suits long pending against the road,
and but lately and finally decided against it. The amount of
judgment against the road is \$6,129,311 12.

Columbus and Hocking Valley Railroad.—This com-

Columbus and Hocking Valley Railroad.—This company has declared a cash dividend of 5 per cent, and a stock dividend of 10 per cent, both payable February 1, 1873. An increase of capital stock amounting to 10 per cent of the present capital is authorized to be subscribed for pro rata by the present stockholders, to be paid for in two instalments, payable February 1 and March 1, 1873. This issue is to provide new and much needed rolling stock. This will increase the capital stock from \$1.250,000 to \$1,500,000.

The Logansport, Crawfordsville and Southwestern Railroad was completed and fully equipped in August. 1872, and reported to be doing a large business; moreover, it has leased that portion of the Evansville & Crawfordsville Road, between Rockville and Terre Haute, and runs daily freight and passenger trains from Logansport to Terre Haute, a distance of 115 miles.

Eastern Railroad of Mass.-Mesars. Henshaw & Brother offered at auction, recently, in Boston 2,000 shares of Eastern Railroad stock, by order of the corporation. The terms of the sale were 25 per cent, cash at sale, 25 per cent, Jan. 1, 25 per cent Jan. 15, and 25 per cent Feb. 1, no stock to be delivered till Jan. 1.

Philadelphia and Reading Railroad.-Notice is given that the Bonds for the new Convertible Loae of the Philadelphia and Reading Railroad Company are ready for delivery on January 2d, 1873, to such subscribers as have paid, or will have paid by that

time, their subscriptions in full.

Interest upon all installments paid prior to January 1st, 1873, will be paid at the office of the company, upon presentation of receipts on or after January 2d, 1873.

—The last rail on the Buffalo, New York and Philadelphia Railway was laid Dec. 23, near Emporium, Pa. There was a general excursion over the road on Saturday, the 28th ult. Coal from the Cameron mines will be brought over the road at once.

-The last rail on the Shore Line, connecting the West Wisconsin and Chicago and Northwestern railways, was laid Dec. 22.

-The Owensboro and Russelville Railroad has been consolidated with the Cumberland and Ohio road,

-Mr. Francis O. French, who has had charge of the foreign exchange department of the banking-house of Jay Cooke & Co. since the establishment of their London house, becomes a member of the firm Jan. 1.

BANKING AND FINANCIAL.

BANKING OFFICE OF FISK & HATCH,

NEW YORK, Jao. 2, 1873.

The CHESAPEAKE and OHIO, the CENTRAL and WEST-ERN PACIFIC BONDS, all of which have been negotiated by us, we believe to be among the best and most desirable Invest ment Securities in the market, which in time must become very scarce; especially as the Government will probably, during this year, pay off in gold another large lot of FIVE-TWENTIES, and issue in their place FIVE PER CENT. BONDS.

The CHESAPEAKE AND OHIO SIX PER CENT. GOLD BONDS, the total amount of which is only \$15,000,000, are secured upon a property worth \$35,000,000 to \$40,000,000, and are fully equal in intrinsic value to the CENTRAL PACIFIC BONDS. They are issued in denominations of \$100, \$500 and \$1,000, coupon or registered, and at their present market price, 86 and accrued interest, are very desirable.

The CENTRAL PACIFIC SIX PER CENT. GOLD BONDS are too well known to require description or commendation Their total amount is \$25,885,000; they have for a long time ranged in market price near or above par.

The WESTERN PACIFIC SIX PER CENT. GOLD BONDS amount to \$2,735,000. This road is now consolidated with the CENTRAL PACIFIC, and the payment of its bonds, principal and interest, is assumed by the latter. Coupon Bonds, \$1,000 cach. Their market price to day is 89 to 891. As they have recently been introduced on the Stock Exchange, we expect to see them rapidly rise to the price of CENTRAL PACIFICS, being substantially the same in character and value.

We buy and sell, as usual, Government Bonds, receive deposits. on which we allow interest, make collections, and conduct a general banking business in all its branches.

FISK & HATCH.

TO INVESTORS.

To those who wish to REINVEST JANUARY COUPONS OR DIVIDENDS, and those who wish to INCREASE THEIR IN-COME from means already invested in other less profitable securities, we recommend the Seven-Thirty Gold Bonds of the Northern Pacific Railroad Company as well secured and unusually produc-

The bonds are always convertible at Ten per cent, premium (1:10) into the Company's Lands at Market Prices. The Rate of Interest (seven and three-tenths per cent. gold) is equal now to about 81 currency-yielding an income more than one-third greater than U. S. 5-20's. Gold Checks for the semi-annual inter est on the Registered Bonds are mailed to the Post Office address of the owner. All marketable stocks and bonds are received in exchange for Northern Pacifics ON MOST FAVORABLE TERMS. JAY COOKE & CO.,

> New York, Philadelphia, and Washington, Financial Agents Northern Pacific Railroad Co.

A FIRST MORTGAGE SEVEN PER CENT. GOLD BOND upon a railroad that is earning a dividend upon stock, besides

interest upon its bonds, is seidom offered at so low a price as 90 and interest. THE CHICAGO, DANVILLE AND VINCENNES RAILROAD

is making such earnings, and we have a small amount of its bonds to sell at the above price. Maps, statement of earnings, and full particulars furnished upon application to

> W. B. SHATTUCK & CO., BANKERS, 23 Nassau street, New York, GENERAL AGENTS.

TO GUARDIANS AND EXECUTORS.

THE EQUITABLE TRUST COMPANY-Capital, \$1,000,000are offering First Mortgage Real Estate Bonds, guaranteed by themselves, at par and accrued interest. Every Bond is secured by Real Estate of double value, appraised under the most rigid rules, and approved by the following Executive Committee: ROBERT LENOX KENEDY, ADRIAN ISELIN, JOHN D. MAXWELL' CHARLES BUTLER, SAMUEL WILLETS, EUGENE KELLY, PETER McMartin, WM. Remsen and Henry P. Haven.

Bankino House of Henry Clews & 32 Wall street, N. Y.

Bills of Exchange, Circular Notes, Travelers' and Commercial Credits issued available in all parts of the world.

Deposits received, subject to check on demand. allowed on all Daily Balances, every accommodation and facility afforded usual with City Banks.

We offer the balance of the First Mortgage (only \$16,000 per mile) Eight Per Cent. Gold Quarterly Coupon Bonds of the Logansport, Crawfordsville and Southwestern Railway of Indiana. This road is finished and equipped, and already does a large business in the transportation of block coal.

JONES & SCHUYLER, 12 Pine street.

FRIDAY EVENING, Jan. 3, 1872.

The Money Market .- There had been no important relaxation in the money market previous to this afternoon, when a tendency toward easier rates was perceptible, and some loans toward the close were made at 7 per cent, currency, and even lower than that. The ruling rates on call loans have previously been 7 per cent. gold per annum, and sometimes I-16, + and up to + of one per cent. a day. The disburse. ments on account of dividends and interest are progressing rapidly, and it is estimated that the payments lu this city dur ing thirty days from date will not fall much short of \$65,000,000 while the payments in Boston and Philadelphia would swell the amount to about \$100,000,000. The effect of these enormons sums disbursed by corporations, States and cities, will naturally be to increase largely the amount of loanable funds and produce an easier money market. If we may judge, however, by previous years, a material relaxation can hardly be expected before the 10th of January.

For commercial paper the quotations on prime endorsed are 9@ 12 per cent., and there is no pressure to sell at these rates. It is evident that there is an expectation of coming ease in the money market, and that lower rates on paper are expected soon.

The advices from London are favorable to-day, although there were some contradictory reports about the London money marke t on a previous day of this week. The Bank of England gains £347,000 in bullion, and the rate remains at 5 per cent.; the Bank of France gains 500,000 francs.

In regard to the European money markets, it is stated that on January 1st another instalment of £8,000,000 is paid the German Government by the French. On February 1, still another instalment of £3,000,000 is due; also the same amount March 1, and ngain April 1. On the other hand, the German Government JONATHAN EDWARDS, President, No. 76 CEDAR STREET, N.Y. | begin January 1 to pay off from £12,000,000 to £15,000,000 of their loans, contracted during the war with France, so that the effect of these large January payments is rather in favor of case in the Enropean markets.

The last statement of our New York City Banks (Dec. 28) showed an increase of \$1,172,575 in the excess of reserves. The total liabilities stood at \$226,102,600; the total reserve at \$58,361,400, being \$1,835,750 more than 25 per cent. of the lia bilities.

The following statement shows the changes from previous week and a comparison with 1871 and 1870:

	1872		1871.	1970.
Dec. 21.	Hec. 28.	Differences.	Dec. 32.	Dec. 31.
Loans and dis \$275,8(1.49)	#271.572.400	Dec. #1,239,030	#270,531,0 0	\$263,417,415
Specie	17 241 303	Inc. 4,168,700	25,049,500	20,825,548
Circulation 27,5:2,7:0	27,573,000		29,512,8(k)	82,153,511
Net deposits 199,123,500	19 - 529,6 10		200,401,800	194,223,995
Legal tenders 41,636,700	41,119,6 10		40,283,800	45,245,058

United States Bonds .- Government securities were rather dull early in the week, and a little weaker on Thursday, in sympathy with gold, but to-day there was a more active demand, and prices were steady. It is to be expected that the market will be pretty active during the present month, as there are many individuals and corporations who still adhere to governments as their favorite investments. The offerings to the Treasury on the advertisement for \$1,000,000 of 5-20's for the sinking fund, on Thursday, amounted to only \$266,250, none of which were accepted as below par in gold. The Assistant Treasurer has called in another lot of the three per cent. certificates, on which interest will cease after Feb. 28, 1973.

Closing prices daily have been as follows, to which we add the range during the year 1872:

Closing prices of securities in London have been as follows:

	Dec.	Dec. 27.	Jan.	Lowest.	Highest.
U. 8. 5a, 5.20a, '65. U. 8. 6a, 5.20a, '67. U. 8. 5s, 10.40a. New 5a.	9214 86%	92% 92 88% 89%	923/ 923/ 89 90	90% Nov.11 91 June 19 86% Nov. 11 86% Feb. 8	94% Dec. 12 92% Jan. 17

State and Rallroad Bonds .- Southern State bonds have been quite inactive, as these bonds can hardly be classed now as investment securities, and the speculative demand is held in check by the uncertainty as to what action may be taken by the check by the uncertainty as to what action may be taken by the respective Legislatures, and also by the unfortunate political disturbances in several of the States. It has been announced to-day that the Louisiana State interest due January I will not be paid at present, owing to the non-collection of taxes; also that default is made in interest payment on the Buchanan county bonds of Missouri, the Lafayette county bonds of Missouri, and the Kuob Noster school bonds of Missouri.

Railroad bonds have been in favor, and we hear of numerous inquiries from investors, particularly from parties out of town. There is a good demand both for old bonds and for the new loans now offering in our market. Several of the latter are quite attractive in their terms, and are apparently sound securities.

Closing prices daily have been as follows, to which we add the

Railroad and Miscellaneous Stocks.-Stocks have Railroad and Miscellaneous Stocks.—Stocks have not shown extraordinary activity, but prices are generally pretty firm. The situation of the market is said to be such that the majority of operators on a moderate scale and holders of stocks and cousequently favorable to a rise in prices; on the other hand some of the heaviest speculators are reported to have been unwilling to buy in at the prices lately current, and are not committed on either side. It does not appear, however, that there is any strong party decidedly on the bear side, and it is therefore concluded that higher prices are the most probable. In addition to the influence of an easier money market which is every day expected, the large disbursements at this time stimulate activity by furnishing funds both for investment and speculation.

The tollowing were the highest and lowest prices of the active

The Gold Market.—Gold has been free from speculative excitement, and the price tends downward, closing at 111\$\frac{1}{2}\text{ this evening.} In the absence of any important speculative support to the market, the price will now be left to take a natural course as regulated by the supply and demand both for mercantile purposes and for export. Our export during the past year has been large, and the relative amount sent abroad during 1873 will depend, of course, very largely upon the amount of American securities which will be taken in the foreign markets. The bids for the Treasury gold on Tharsday amounted to \$3,425,000, the amount sold being \$1,000,000. The lowest bid was 111, and the highest 111.69. The rate paid for carrying to-day were 7, 7 gold, 1.32, 6\frac{1}{2}, 5, 4, and 6 per cent, and 1.64 for borrowing. Customs receipts for the week amount to 1,618,000.

The following table will show the course of the gold premium each day of the past week:

each day of the past week:

Foreign Exchange.-Exchange has been alternately firm and weak; to-day the tendency was toward easier rates, as the demand weak; to-day the tendency was toward easier rates, as the demand was moderate and prices had already been advanced to tolerably high figures. Business was generally done at a concession of \(\frac{1}{2}\) from the prices quoted below. A cable transfer of \(\pm(2100,000\) was sold at 110 7-16 on Thursday. The smaller supply of cotton bills during the past few weeks, and the demand to make remittances at the first of the year, have recently been favorable to firmness in prices. An evening newspaper reports a rumor to-day that \(\pm(2700,000\) of sixty days' sterling had been loaned on stock collaterals. erals.

STATE, CITY AND CORPORATION FIVANCES.

EXPLANATION OF STOCK AND BOND TABLES.

- 1. Prices of the most Active Stocks and Bonds are given in the "Bankers' Gazette," previously. Full quotations of all other securities will be found on preceding pages.
- 2. Government Sceurities, with full information in regard to each issue, the periods of interest payment, size or denomination of houds, and numerons other details, are given in the U.S. Debt statement published in The Chronicle on the first of each month.
- THE CHRONICLE on the first of each month.

 3. City Blonds, and Hank, Insurance, City Railroad and Gas Stocks, with quotations, will usually be published the first three weeks of each month, on the page immediately preceding this.

 4. The Complete Tables of State Scentities, City Securities, and Hailroad and Miscellancous Stocks and Blonds will be regularly published on the last Saturday in each month. The published on the last Saturday in each month. The publication of these tables, occupying fourteen pages, requires the issue of a supplement, which is neally stitched in with the asual edition and furnished to all regular subscribers of The Chronicle.

INVESTMENTS.

The attention of all purchasers of s ocks and bonds is directed to our extensive tables of prices for the year 1872, as recorded on previous pages. An examination of the course of prices for the year will prove exceedingly interesting and instructive both to speculators and purchasers for investment.

As to speculative stocks and bonds-which are known to be influenced to a very great extent by the influences bearing immediately upon the market, without any regard to their actual value-the wide fluctuations show what great uncertainty must attend all dealings io such securities. As to investment securities, the variations in price during the year are in some cases very small, hardly amounting to anything beyond the semi-annual interest accumulation. In other cases the variation in prices of some very good bonds has been considerable, and suggests to investors the possibility of sometimes purchasing a good bond so as to make legitimate profits by a subsequent rise in price, as well as by a good rate of annual interest. It should be the chief object of investors, however, to select safe bonds, paying a satisfactory rate of annual interest, without much regard to future variations

In the next column will be found a table giving the details of every new loan now offering in our market. Many of these bonds offer superior inducements in the way of a good rate of annual in terest, and are offered by banking-houses of high standing. As to selecting new bonds for purchase, we would make the following suggestions:

That investors should examine as to the several features of such bonds and the basis upon which they rest, and in making such examination satisty themselves upon the following points:

1. What proportion of the whole cost of road is raised by bonds,

1. What proportion of the whole cost of read is raised by bonds, and what proportion from actual stock subscriptions or other cash resources?

2. What amount of bonds is issued per mile of road; and whether this amount is excessive, considering the nature of the country traversed, and the probable traffic of the road.

3. How soon will the road be completed, what amount of gross earnings per mile may be expected when it is completed, and allowing 60 to 75 per cent. for operating expenses, will the net earnings be sufficient to pay interest on the bonds?

4. If bonds are based in whole or in part upon a land grant, inquiry should be made as to the title to such grant and as to the

quiry should be made as to the title to such grant and as to the character of the lands, and a fair estimate made of the price which can probably be realized per acre, and the length of time which will be required to sell the lands.

5. It is also important to consider the character of the officers and directors of the company offering bonds; whether they are well known financial men, whose names furnish a guarantee of soundness to the enterprise, and who will feel bound to protect the Londs after they are issued.

Virgina Finances.—The Richmond Whig has the following: The partial reassessment of lands reduced the total value seven The partial reassessment of lands reduced the total value soventeen millions seven hundred thousand dollars. The amount of personal property listed for taxation is \$77,850,540 71; real extate, \$261,411 108 \$9; total, \$339,261.649 60. A tax on that sun at 50 cents in the hundred would—if collected—give \$1,603,082 24. A tax of \$1 in the hundred would give just double—that is, if collected. But as the amounts of levy is increased, the number of delinquents is increased in a still greater proportion. It is probable that a levy of \$1 25 on the hundred would not yield more than \$1 in money. We are not yet advised by any of the authorities what sum will be necessary to meet the obligations of the State, or how it is to be raised. The interest at six percent, is \$1,810,540 73. During the past year, \$584,222 15 have been paid, leaving a balance due the 1st of January, 1873, of \$1,226,218 58—equal to a total on the 1st of January, 1874, of \$3,036,859 33. It requires about \$1,200,000 to support the government—and \$450,000 for the public schools—a total of \$3,686,859 33 to be raised next year—less the cash on hand. We have heard no one speak of increasing the present rate of taxahave heard no one speak of increasing the present rate of taxa-

NEW LOANS.

We bring forward again to-day a full list of the new loans at present offering, or which have until very recently been offering in this market. This compilation, by bringing together in compact shape the leading points of every new enterprise inviting the attention of investors, will be found a valuable guide in suggesting to them the bonds which are apparently the most satisfactory, and which seem to be worthy of their apeclal investiga

In regard to prices it should be remembered that they are always sold with the addition of accrued interest to the nominal

Georgia State Finances.—The Daily Bulletin had in December an article upon this subject, containing the following: The oilicial statement to which we allude (that of Treasurer Angier) makes the following exhibit of that portion of the debt now recognized as valid:

Currency Bonds.	
Issued Due. 1842 and 1843 1873 1841 and 1848 1874 1853 1888 1859 1889 1860 1880 1841 1881 1866 1886 1867 1887 1872 1862	251,500 100,000 200,000 200,000 100,000 3,734,500 265,000
Total currency bonds	\$5,688,500 2,598,000
Total direct indebtedness	0,010,000
Contingent debt regarded valid	3,158,400
Total direct and contingent debt	\$11,444,900
ASSETS.	
The State holds the following property as assets: The Western and Atlantic Raifroad, valued at	1,000.000
Total assets	\$8,018,800
REVENUE RESOURCES.	
Taxable property, exclusive of railroads, banking, exp	iess and insurance
companies, \$231,492,465. General tax-s on this amount at 4-10ths of one per cent Estimated receipts from taxes on corporations Half rental of Western und Atlantic Railroad	80,000
Total tax for ordinary purposes. Estimated ordinary State expenses for 1872.	\$1,117,969 800,000
Balance for payment of loans and interest. The Common School Fund is independent of the above, ing sources of revenue: One-tenth of 1 p. c. on taxable property of State. Hulf rental of Western and Atlantic Railroad Estimated from special poll tax	and has the follow- \$234,492 150,000

Thus it appears that the direct debt, as now acknowledged by the State, amounts to only \$8,286,500; while the liabilities accruing on State endorsements, after the repudiation of \$3,875,000 of such indebtedness, stand at \$3,153,400; making a total for which the State now acknowledges its responsibility amounting to \$11,444,900. Against these liabilities, it holds over \$8,000,000 of assets, which yield a revenue of \$300,000 in the form of rental of the Western and Atlantic Railroad.

Indiana State Bonds — Nearly forty years ago the State of Indiana engaged extensively in the work of building canals, issuing bonds therefor. Ten or fifteen years later, the State having ing bonds therefor. Ten or fifteen years later, the State having in the meantime suspended paying interest, a compromise was effected with the creditors, whereby new bonds for one-half the original debt were issued, and the canal and its revenues were pledged to the creditors to pay the other half. Mr. John W. Garrett, now president of the Baltimore and Obio Railroad, is the owner of \$40,000 of the original bonds, and refused to accept the settlement then made. Since then the State has paid its share of the debt represented by the new bonds, but the canal has proved to be valueless to the creditors who had accepted the mortgage on its revenues. Mr. Garrett has recently obtained indement against to be valueless to the creditors who had accepted the mortgage on its revenues. Mr. Garrett has recently obtained judgment against the State for the amount of the bends held by him, and was about to sell the canal under execution. To prevent this the Governor of Indiana convened the Legislature in order to have the sum appropriated to pay him. Had the canal been thus taken away from the creditors, the State would again become liable for the other half of the debt, which now amounts to about \$20,000,000. As a further protection, an amendment to the State constitution has been submitted to the people, in which any recognition or payment of that debt is peremptorily prohibited.

County Bonds in Missouri.—A suit has been decided at Springfield, Mo., by the District Court. The style of the case was the State er. rcl. Attorney-General rs. the County Court of Green County, and others, and its object the levy of a tax to pay the interest on \$400,000 of bonds issued by the county for the benefit of the Kansas City and Memphis Railroad. The point raised was that the bonds had been illegally issued, as the question had not been submitted to a vote of the people of the county.

The Court granted the injunction asked. Defendants took an appeal to the Supreme Court.
Other counties that have issued bonds in the same manner will

probably follow suit.

Milwaukec Bonds to Railroads.—No. 56. James City of Milwankee—Error to the Circuit Court for the District of Wisconsin.—This was an action to recover on certain bonds issued Wisconsin.—This was an action to recover on certain bonds issued by the city in aid of the Milwaukee and Superior Railroad Company, and to the Milwaukee and Beloit Railroad Company. The general act of the State authorizing such aid to railroads by municipal corporations prohibited subscriptions in aid of roads not duly incorporated and organized; and as the roads in question were not at the date of the act incorporated and organized, the question was whether the bonds issued in their aid were valid. The Court below held that they were not, and the judgment was for the city. The writ of error maintained that the legislation did not mean that aid should be extended only to roads then incorporated and organized, but that aid should not be at any time

extended to roads which were not incorporated and organized; and the theory was that whenever at any future time a should be incorporated and organized it was competent for municipal corporations to subscribe its aid. The U.S. Superior Court of the United States austains this construction of the legislation, and reverses the judgment. Mr. Justice Swayne delivered the epinion.

County!Bonds in Wisconsin.—The Chicago Tribune says:
The counties of Wisconsin which some fifteen years ago voted aid bonds to railroads and afterwards were unable to pay them, are now experiencing the severe requirements of the law. The authorities of Iowa county, and of several towns in that county, were brought before Judge Drummond, of the United States District Court, in Milwaukee, a few days ago, charged with contempt in not having levied the tax for the payment of judgments on the in not having levied the tax for the payment of judgments on the bends, and not having placed the tax-warrant in the hands of the treasurer for collection, as previously ordered by the Court. The officers answered that they had levied the tax but that the treasurer had been unable to give an additional security bond, as required by the Court. The officers answered that they had levied the tax, but that the treasurer had been unable to give an additional security bond, as required by the Court. To this the Court answered that the treasurer having failed to give the required bend the office should have been declared vacant, and another person appointed. If no person could be found to give bond as a person appointed. If no person could be found to give bond as a treasurer, then the tax list should have been given to the sheriff. For failure in their duty the Court imposed a fine of \$100 on each of the officers. Public opinion is against paying the tax, and it is doubtful whether any officer can be found who will seek to enforce its collection.

Boston Dividends.—Mr. Joseph G. Martin, Stock Broker, No. 10, State street, Boston, furnishes us his usual list of semi-annual dividends. He remarks:

. "Railroad dividends generally run very even. The Michigan Central divides four per cent. in stock. The Eastern resumes Central divides four per cent. in stock. The Eastern resumes dividends after having passed twice in consequence of the accident at Revere, August, 1871. The Eastern in N. H., and the Portsmouth, Great Falls and Conway follow as a matter of course. The Attiteboro' Branch Railroad pays 3½ per cent. January 1. Hanover Branch \$3 January 1. New York, New Haven & Hartford 5 per cent. January 2. Philadelphia & Reading 5 per cent. on common and preferred January 24, in Philadelphia.

"The gold payments at the Boston Sub-Treasury will be about \$4,553,624, coupons and registered. The entire issue of \$64,623,512 currency bonds (to the Pacific Railroads) is registered. The total gold interest maturing January 1 on Government bonds will amount to about \$26,000,000. The payments will be on Coupon 6s of 1881, Five-twenty 6s of 1865-7-8, and old five per cent. bonds of 1874. The State of Massachusetts and City of Boston pay in coin as usual. The gold payments in Boston amount to \$5,421,532.

Burlington, Cedar Rapids and Minnesota Ballroad.— The London Daily News, in its financial article, says: Messrs. Clews, Habicht & Co. will receive subscriptions for £140,000 first mortgage seven per cent, coevertible sterling bonds of the Burlington, Cedar Rapids, and Minnesota Railroad Company, convertible at the option of the holder at any time prior to the 1st February ruary, 1880, into shares of the company at par, and redeemable in February, 1902. The price of issue is £83 per cent., or £166 per £200 bond, including interest from the 1st of August last.

Total net income above operating expenses.....

Milwankee and St. Paul Railway. The following notices

Milwaukee and Si. Paul Railway. The following notices have been given to the Stock Exchange:

MILWAUKEE AND ST. PAUL RAILWAY CO. 1

New Yolds, December 27, 1872. 1

To the President of the N. Y. Stock Exchange:

Sire—The Milwaukee and St. Paul Railway Company have purchased the new line of railway between Milwaukee and Chleage, and there connecting with all the principal fines of the country; in part payment for which they are to pay two million dollars in their common stock. You will therefore please take notice that the first said company will issue twenty thousand shares of their common stock thirty days from the date.

I am, yours respectfully, JAMES M. McKINLAY,
Assistant Treasurer and Transfer Agent Milwaukee and ist. Faul Railway, Co. Milwaukee AND ST. Paul Railway, Co. 1

Assistant Treasurer and Transfer Agent Milwaukee and ist Faul Rallway Co-Milwaukee and St. Paul Rallway Co. 1

Milwaukee and St. Paul Rallway Co. 1

New York, December 28, 1672

To the President of the N. Y. Stock Exchange:
Sin-The scrip preferred stock of the Milwaukee and St. Paul Rallway Company will, after thirty days be increased 25,000 Annes, or \$2,000,000, to necompany the like amount of bonds issued by the company in part payment of the new line of rallway between Milwaukee and Chicago, and for the parchaee of equipments for the general uses of the company chase of steel rails and equipments for the general uses of the company Assistant Secretary and Transfer Agent of said Company

The Milwaukee and St. Paul Railway Company do not issue any new preferred stock. The \$2,500,000 scrip preferred stock is steel at attached to a like amount of bonds, which will be is used in thirty days to the Construction Company in part payment for

issued is attached to a like amount of bonds, which will be a sued in thirty days to the Construction Company in part pays, ent for the new road bought from them, which connects Cri. cago and Milwankee. The scrip has no value exc. pt as attached to the bonds, and simply authorizes the holders of the bonds to vote.

Atlantle, Mississippl and Ohlo Railre, ad.—The Peters burg Index extracts the following figures from the annual report of the Atlantic, Mississippl and Ohio Railro, and Company:

During the past year the floating dolar of the various companies merged in the Atlantic, Mississippi and Ohio has been met and extinguished with a portion of the proceeds of the loan effected upon the loads of the company. upon the bonds of the company,
In the road department there las been expended:

folk and Petersburg division. \$67,698 09; on the Southside division, \$387,761 57; on the Virginia and Tennessee division, \$508,791 09. Total, \$509,250 75.

\$508,791 09. Total, \$509,250 75.

In the transportation department the receipts have been: From passenger trains, \$569,042 91; from tomage trains, \$1,355,278 89.

Total, \$1,954,278 89. The transportation of passengers has increased during the year \$19,415, or 4½ per cent., while the freight transportation has increased \$48,668, or 4 per cent., this Lamber derived mainly from local business. The cost per mile of unning the trains was this year 48.77 cents against 58 64 cents the year before, a decrease of nearly 17 per cent., by which the improved condition of the road is fully shown. The gross revenue of the line has been \$1,969,053 06; its current exprasses, \$1,284,725 14. Balance, \$734,327 92. An increase of net revenue of over 15 per cent. over 15 per cent.

wilmington and Weldon.—At a special meeting of the stockholders of this company, it was resolved that the franchised and property of the company be leased to the Wilmington, Columbia and Augusta Railroad Company for a term of 99 years, upon such terms as will provide for the payment of the regular interest on all the bonded debt of that company and the assumption of all its assets, including stock and interest in the Wilmington Railway Bridge Company, and the payment of all its liabilities other than its funded debt, and the payment to this company. ties other than its funded debt, and the payment to this c supany of five per cent. on its capital stock for the current year, and the of the per cent, on its capital stock for the current year, and the further payment of six per cent, on its capit 1 stock for the next year, and seven per cent, for each succeeding year during the continuance of the lease; said payments to be free of United States tax. The stockholders of the Wilmington, Columbia and States tax. The stockholders of the Wilmington, Columbia and Augusta Railroad Company, at a meeting held the same day, also ratified the agreement, and the lease will be executed at once. The road thus leased extends from Wilmington, N. C., north to Weldon, 163 miles, with a branch from Rocky Mount to Tarboro, 19 miles, making in all 181 miles of railroad.

The Memphis and Charleston Ratiroad .- In the Nashville Banner of the 13th December, we find the following

ville Banner of the 13th December, we find the following:

"By reference to an advertisement elsewhere in to-day's issue, it will be seen that the time for the sale of the Winchester and Alabama and McMinnvile and Manchester roads has been postponed from December 31, 1872, to February 1, 1873—thirty one days. This results from the fact that there was a 'mistake in the terms of sale.' On the day of purchase, the purchaser will have to pay \$75,000 in bonds of the State of Tennessee, with coupons of and after January 1, 1871, attached, and will have to give bond for a compliance with the terms of the original contract 'to the extent of the purchaser's bid.

"From a statement published recently by John D. Rather, Esq., President, and G. P. Beirne, John C. Bradley, and J. J. Donegan.

President, and G. P. Beirne, John C. Bradley, and J. J. Donegan. Directors of the Memphis and Charleston read, which company purchased, this year, the Winchester and Alabama read, we are nclined to think that this company will not be likely to renew

the purchase.

"They call on the stockholders for a subscription of 10 per cent on the stock of the company, which would raise \$531,272. Whether this call will meet with a favorable response remains to be seen, but we rather expect to see the Winchester and Alabama road pass into new hands.

Cairo and Vincennes. The Cairo and Vincennes Railroad was opened for passage of through trains on Friday, Dec. 13. This road, 157 miles in length, across (in part) the most rugged portion of the State of Illinois, has been completed, practically, since April 1 last. It connects the city of Cairo, at the junction of two of the three great rivers of the United States, with all points contracts and particularly states. east and northeast, by a direct line, affords a new outlet to the South, and is destined to be a main channel of communication between the railway system of the Eastern and Central States, and that reaching to Texas, Mexico and the Pacific Ocean,

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, Jan. 3, 1873.

The hollday festivities and the obstructions to transportation caused by the recent heavy fall of snow, have greatly diminished the volume of business in the past week. Stocks of domestic produce are (with Indian corn a conspicuous exception) generally smaller than last year; but of foreign goods the quantity in warehouse is said to be larger than last year. What effect these facts are to have upon the commerce of the port and of the country the next few months will probably demonstrate.

The following is a statement of the stocks of leading articles of domestic and foreign merchandise, at dates given:

	18	72	1973.
	Jan. 1.	Dec. 1.	Jan. 1.
Beeftes. and bbls.	64,280	43,054	50 152

Manila Hempbales.	2,440	41,964	53,830

Cotton has been higher, and closes with a decided improve. ment, at 20ac. for middling uplands. Flour has advanced to \$7@7 40 for shipping extras, and wheat to \$1 58@1 65 for No. 2 spring, but closed dall. Corn without essential change, closing at 664c. for prime mixed affoat. Coffee has been very active, and other groceries in better demand.

Freights have been dull and rates weak. Yesterday the Liverpool steamers took cotton at f@11-16d., and corn at 81d.; and two vessels were chartered to Cork for orders with grain at 7s. 6d. To-day, corn was shipped to Liverpool by steam at 8d., and bacon by sail at 35s.

Tallow has remained nearly nominal at 8fc. for prime. Whiskey has declined and closes at 941@95c., under free supplies. Cloverseed has advanced to 94@94c. Naval stores dull; strained roain \$3 70; spirits turpentine, 60c.

Provisions have been variable. Pork has ruled easier and generally only moderately active. New mess has sold in a jobbing way at \$13 50, and in a wholesale way on the spot and for January at \$13; Western prime mess has sold at \$14 75, and city at \$15 50. Lard has been variable but has latterly shown more firmness, with a good demand for future; Western has sold at 74c. on the spot and for January, 7 15-16c. for February, and 8 1-16@8tc. for March, while city has latterly brought 7\$@7\$c. on the spot. Bacon has been in good demand for short clear on the spot, and this with a small supply caused an accurace, and sales have been made at 8c., but subsequently when December contracts had been filled cut was offered quently when December contracts had been filled cut was offered at 7½c. for short delivery; long clear has sold at 6½c. for January. Cut Meats have been in good demand, dry salted shoulders have sold at 4½c. on the spot, pickled hams at 9@10c., short cut dry salted do, at 8½c. Beef hus heen quiet but prices steady, with a stock considerably less than last year. Butter has heen very firm but quiet as usual during holiday week. Pork was firmer, with new mess quoted at \$13 50@13 75, cash, and \$13 25@13 50 for the future. Lard was also higher at 7½c. for prime Western steam on the spot. Box meats unchanged. Cheese quoted at 420444c. for prime to choice factories.

13 50 for the fitting. Land was also aligner at 13c. for prime western steam on the spot. Box meats unchanged. Cheese quoted at 14@14½c. for prime to choice factories.

Wool has ruled very dull, except some large sales of Cape at about 37@33c. currency. Petroleum has continued inactive; buyers and sellers apart; held at 11c. for Crude in bulk; 27½c. for refined in bbls, and 29c for ditto in cases. Hops have been dull.

In Kaptucky Leaf alloyeant the loss lets damaged by the fire in

In Kentucky Leaf, all except the loose lots damaged by the fire in In Kentucky Leaf, all except the loose lots damaged by the fire in Jersey City have been closed out, mostly at private sule, but including 168 hhds at auction at 2½/010½c; in round dots the sales have been limited to about 200 hhds at full prices; lugs, 10@10½c; common to fine leaf, 10½/016c. Seed leaf has been only moderately active, the sales including 166 cases, crop 1870, 9@15c; 200 cases, crop 1871, Connecticut, 45/060½c; 80 cases, crop 1871, New York, 9½c; 153 cases, crop 1871, Ohio, private terms; 83 cases, crop 1871, Wisconsin, 9½c. In Hav ma Tobacco, with a large stock, the only transactions have been 500 bales at 1/21.07. sactions have been 500 bales at 1@1.07.

In metals, copper has been active and higher, but closing quiet at 3 lc. cash for Lake. Tin has sold at 31c., gold, for straits; English scarce, quoted at 31 c., gold. Tin plates closed quiet

and stendy.

Exports of Leading Articles from New York.

The following table, compiled from Custom House returns, shows the exports of leading articles from the port of New York since January 1, 1872, to all the principal foreign countries, and also the totals for the last week, and since January 1. The last two lines show total values, including the value of all other articles besides those mentioned in the table.

COTTON

FRIDAY, P. M., January 3, 1873.

By special telegrams received to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, Jan. 3. appears that the total receipts for the seven days have reached 104,703 bales against 103,443 bales last week, 125,357 bales the previous week and 125,564 bales three weeks since, making the total 1,486,412 bales for the same period of 1872, 1,734,219 oales against 1,486,412 bales for the same period of 1871-72, showing an increase since September 1, 1872, of 247,807 bales. The details of the receipts for this week (as per telegraph) and for the corresponding weeks of the five previous years are as follows:

Received this week at-	1873.	1872.	1871.	1870.	1869.	1868.
New Oriosos bales. Mobile Carrieston Savannah Texas Texas Florita North Carolina	11,594 8,417 589	49,264 12,881 8,390 15,993 6,281 6,325 419 1,106	45.617 15.850 10,433 27,819 11,643 11,017 40 8,781	4 .632 14 941 9,149 21.101 7,819 5,092 671 1,549	\$1,696 19,244 9,645 20,461 8,072 5,101 421 1,454	22,194 10,201 9,642 20,461 3,012 5,104 421 1,15;
Virginia	8,164	11,417	12,899	8,799	4,912	4,913
Total this week	104,703	110,828	137,631	114,090	86.906	17,70;

The market the past week has developed considerable strength, The market the past week has developed considerable strength, due chiefly to the small receipts at our ports which have forced up Liverpool, and this has reacted upon ourselves. At the opening there was considerable buoyancy on account of the small arrivals for the previous week, strengthening the views of believers in a small crop. Monday the quotations for spots advanced to to 20tc. for Middling Uplands with a good export demand. Tuesday the market was dull; but yesterday (Thursday) Liverpool having shown increased animation at better rates, our quotations were to higher with only a moderate export and speculative demand. The almost impassible condition of the streets during the whole week checked business. To day the opening was firm but the close was more quiet noder the inflence of private telegrams that the receipts at New Orleans were likely to show an immediate large increase notwithstanding the move ment in that direction from Memphis has been stopped by the ice. For future delivery the market has been quite irregular. The lowest prices of the week were made on Thursday morning when the opening sales were 19 9-16c. for January to 20½c. for April, but there was some recovery towards the close. To-day

there was decided buoyancy, and the highest prices of the week were was decided buoyancy, and the highest prices of the week were paid. Closing, however, with a portion of the advance lost. The prices for intures last reported were (tasis low middling) 19-15-16 for January, 20½c, for February, 20½c, for March, 21c, for April, 21½c, for May, 21¾c, for June, and 22c, for July The total sales of this description for the week are 102,700 bales, including — free on board. For immediate delivery the total value foot by this week 11.122 below isolation for the total sales foot up this week 11,132 bales, including 6,875 for export, 3,215 for consumption, 698 for speculation, and 344 in transit. Of the above 377 bales were to arrive. The follow ing are the closing quotations to-day:

	Upland and Florida.	Mobile.	Originals,	Texas

WEATHER REPORTS BY TELFORAPH.—At Mobile it has rained on two days; to-day it is clear and pleasant. It has also mined two days at Schua, Montgomery and Charleston, and one day at Macon. At Memphis there have been five rainy days; our telegram adds that the bad weather is retarding marting. It has rained more than half the week at Nashville. The thermometer at Memphis has averaged 28. Schwa and Savangeb 55 Mem. at Memphis has averaged 28; Selma and Savannah 55, Montgomery 53, Charleston 45, Macon 44.

INDIA CROP.—Our mail dates from India are brought down one week later to night. Messrs. W. Nicol & Co. write, November 23, that "crop accounts from all the districts continue very ber 20, that erop accounts from an the districts continue very favorable. In the Surat district the plants are certainly a little backward, but that is all that can be said against them. Paking is being carried on to a small extent in the Berars and Khandish, but it will be quite a month before the various markets received full supplies. Hingunghaut will, we expect, be coming forward freely in about a fortnight or three weeks. Samples received from Comrawuttee lately are not so good as the first handluls from Comrawuttee lately are not so good as the first handfuls forwarded, being very harsh in feel and possessing little staple. Khamgaum musters are much better; they are more silky and longer in fibre." Messrs. Fiulay, Mair & Co., under same date, say: "We continue to receive favorable reports regarding the weather and state of the plants in the interior. The report of the Government Inspector in Khandish gives the area under cotton as 32 per cent larger than last year. The yield per acre is, however, estimated to be under an average, but the quality is expected to be very good. Cotton picking is progressing. A few Boins are being brought into the Hingunghaut market and Rom. expected to be very good. Cotten picking is progressing. A few Bojas are being brought into the Hingunghaut market, and Bombay dealers are paying very extreme prices for them. In the Berurs the plants are ripening slowly, and this is in favor of a large yield of fine quality. In Akote a very considerable increase over an average yield is looked for. In Guzerat and Kattywar the weather is most favorable, and present appearances indicate an early and full crop from those districts. In Dharwar the voung plants are said to look very healthy and to give proping of young plants are said to look very healthy and to give promise of an unusually good cotton crop."

VISIBLE SUPPLY OF AMERICAN COTTON .- A corre pondent VISIBLE SUPPLY OF AMERICAN COTTON.—A correspondent wishes not to give a detailed statement of the visible supply of American cotton. The figures we receive each week by cable do not state separately the American portion of the stocks, except for Liverpool. This week's mail however, has brought us the statements which we published on the 14th of December. Using those returns, as of to-day, and applying them to our cable figures, just received, the following would show about the present condition of the American supply compared with Jan. 5, 1872;

21	2873		872
American.	Total,	American.	Total.
Stock in Liverpool 63,000	421,000	167,000	569,000
All other stocks 56,594	628,200	47,200	457,827
Afloat for Liverpool 204,000	254,000	122,000	358,000
All other affoat 75,500	83,500	103,671	152,394
U. States out ports	481,972	500,180	500,180
U. States inland towns 91,584	91.581	92.933	92,933
Expor'd from U.S. this week 71,003	71,003	45,572	45,573
•	-		

....1,046,653 2,034,259 1,138,556 2,145,906 These figures would indicate a visible supply of American cotton, 91,903 bales less than at this time a year ago. It should be remembered also that European spinners Jan. 1873 are supposed

remembered also that European spinners Jan. 1873 are supposed to have held more American cotton than they now do.

New York Stock, Jan. 1.—We are indebted to Charles A. Easton, Chairman of the Committee on Statistics of the Cotton Exchange, for the following official count of stock, Jan. 1, declared this morning: In warehouses, 39,443; in Brooklyn, 1,315; on wharves, 6,351; on shipboard, not cleared, 11,304; total, 58,413.

BOMBAY SHIPMENTS.—According to our cable dispatch received to-day, there have been no shipments from Bombay to Great Britain the past week and none to the continent, while the receipts at Bombay, during the same time have been 8,000 bales. The movement since the first of January is as follows. These are the figures of W. Nicol & Co., of Bombay, and are for the week ending Thursday, Jan. 2:

These are the figures of W. Nicol & Co., of Bombay, and are for the week ending Thursday, Jan. 2:

Supments this week to—
Great ConBritain, tineat. Total. Britain. Then.

1872... none none none none 659,000 228,000 917,000 8,000

1871... 8,000 3,000 11,000 808,000 339,000 1,147,000 25,000

From the foregoing it would appear that compared with last year there is a decrease this year in the week's shipments to Great Britain of 8,000 bales, and that the total movement since Jan. 1 now shows a decrease in shipments of 230,000 bales over the corresponding period of 1871.

Our dispatch also states that the injury to the crop from the storm reported three weeks since has been greatly exaggerated.

storm reported three weeks since has been greatly exaggerated.

GUNNY BAOS, BAGGING, &C.—Bagging has ruled quiet and steady the past week. But little, if anything, has been done during the holidays. The only sales that have transpired are 150 rolls Boston at 12½ cash, immediate delivery; 100 rolls New York at 12½@ 13c cash, immediate delivery. Future deliveries can still be bought for March, April and May at 13½@14c, c. o. d. from second hands. India bales dull and neglected. Borneo also dull and nominal. We hear of a sale of 135 bales bags on private terms, thought to be in vicinity of 11½c. There is some little inquiry, and quite a brisk trade might result if helders would concede a little in price; but stocks are small, 5,200 bales in New York, 2,000 bales in Boston, making a total of about 7,200 bales, so that holders are not disposed to yield. We quote price at close 14½c, with firm feeling on the part of holders. The market for butts has rule t quiet and steady throughout the past week or ten days. Free arrivals have caused a slight relaxation in price, and sales has rule i quiet and steady throughout the past week or ten days. Free arrivals have caused a slight relaxation in price, and sales have been made from ship at 2 1-16@2½ cash. We hear of sales of 500 bales at former price ex. Pearl of India, and 500 bales at latter price ex. Charlotte White. We quote prices at the close at 2½ cash from ship, and 2 3-16@2½ cash and time from store. Contracts for future delivery we quote at 2½ c gold, and 2½@2½ cash and the contracts for future delivery we quote at 2½ c gold, and 2½ cash and the contracts for future delivery we quote at 2½ c gold, and 2½ cash and the contracts for future delivery we quote at 2½ c gold, and 2½ cash and the cash and the contracts for future delivery we quote at 2½ c gold, and 2½ cash and the cash an

VISIBLE SUPPLY OF COTTON MADE UP BY CABLE AND TELE-GRAPH.—By cable we have to-night the stocks at the different European ports, the India cotton affoat for all of Europe, and the American affect for each port as given below. From figures thus received, we have prepared the following table, showing the quantity of cotton in sight, at this date (Jan. 3) of each of the two past seasons:

	1873.	1872.
Stock in Liverpool bales.	421,000	569,000
Stock in London	226,000	167,809
Stock in Havre	227,000	160,000
Stock in Marseilles	13,000	16,000
Stock in Bremen	35,000	12,505
Stock in Amsterdam	66,000	27,306
Stock at Antwerp	32,000	12,343
Stock at Barcelona	28,000	55,000
Stock at Trieste	1,200	6,870
Afloat for Great Britain (American)	204,000	182,000
Afloat for Havre (American and Brazil)	38,000	83,000
Afloat for Bremen (American)	35,000	14.071
Atloat for Amsterdam (American)	2,500	6,600
"stal ladian cotton affoat for Europe	58,000	194,723
in United States ports	484,972	500,180
pluca inland towns	91,584	92,933
United States this week	71,003	45,572
Exports from		10,012
	2 034 259	2 145 906

These figures indicate a decrease in cotton in sight to-night

These neures indicate a the cotton in sight to-night of 111,647 bales compared with the same date of 1873.

MOVEMENTS OF COTTON AT THE INTERIOR PORTS.—Below we give the movements of cotton at the interior ports—receipts and shipments for the week, and stock to-night and for the corresponding week of 1871.

ing week of	III note one	Jing Jan.	3, 1873 -	-Week e	nding Jan	. 5, '72 -
	Receipts.	Shipment	s. Stock.	Receipts.	Surfunent	s. Diock.

SHIPPING NEWS .- The exports of cotton from the United States the past week, as per latest mail returns, have reached 77,437 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in The CHRON-icle last Friday, except Galveston, and the figures for that port are the exports for two weeks back. With regard to New York, we include the manifests of all vessels cleared up to Wednesday night of his week:

night of 'dis week:
NEW YORK-To Liverpool, per steamers City of Limerick, 1,733City
of Paris, 1,070Adriatic, 2,029 Wisconsin, 3,264per ship

Below we give all news, received during the week, of disasters to vessels carrying cotton from any port of the United States;

Eight bales of cotten, supnose I to be part of the cargo of the ateamer St. Louis from New Orleans for New York, were picked ap Dec. 16, between the Southwest Pasa and Tortugas.

LEONE (Fr.) from New Orleans for Havre, before reported struck on Tennessee reef, neur Indian Key. Dec. 15, was lightened of 1,000 b less of cotton, when she floated and was taken into Key West on the 18th. The 1,000 bales would be freighted to Key West.

J. B. Buffins (Br.), Kil'am, at Charleston, SC, with 2,219 bules cotton, (at last accounts) on board for Bremen, took fire in the cotton forward night of Dec 28. She was filled with water and sank alongside the wharf. Cargo insured; it is all damaged by sait water. The vessel was being pumped out on the 29th.

STAFFORD, Curry, from New York, before reported drave from her anchors at Sa'erno during a gale Dec. 4, and drifted on the rocks, smashing her port side and bottom; of the cargo, consisting of 84t bules of cotton, 602 had been landed previous to the casualty: 211 bales have since been taken from the vessel, and it was supposed, Dec. 7th, that 18 more could be saved; the rigging and a great part of the ship's apparel have been saved, and her cupper sheathing was being stripped.

London, Jannary 2.—The log of the steamship Minnesota, which arrived at Liverpool on Thesday last from New York, shows that the cargo of cotton was on fire when the vessel was five days out from the latter port. One hundred and fifty bales were destroyed.

GOLD, EXCHANGE AND FREIGHTS.—Gold has fluctuated the

port. One hundred and fifty bales were destroyed.

GOLD, EXCHANGE AND FREIGHTS.—Gold has fluctuated the past week between 111\(\frac{1}{2}\) and 112\(\frac{1}{2}\), and the close was 111\(\frac{1}{2}\). Foreign Exchange market is steady. The following were the last quotations: London bankers', long, 109\(\frac{1}{2}\)(@10\(\frac{1}{2}\), ghort. 110\(\frac{1}{2}\)(@110\(\frac{1}{2}\), and Commercial, 108\(\frac{1}{2}\)(@10). Freights closed at \(\frac{1}{2}\)(@2-16d), by steam and 5.16\(\partial^2\)(\frac{1}{2}\)d. was its Liveryool, 1\(\frac{1}{2}\)(\frac{1}{2}\)c. gold by steam and 5.16\(\partial^2\)(\frac{1}{2}\)d. we sail to Harre and \(\frac{1}{2}\)d. comp by steam by steam and 1c. comp. by sail to Havre, and &d. comp. by steam to Hamburg.

BY TELEORAPH FROM LIVERPOOL.—
LIVERPOOL, January 3-5 P.M. The market opened firm and closed active and firmer to-day, with sales foother up 18,000 bales, including 4,000 bales for export and secentation. Of the sales to-day 8,000 bales were American. The sales of the week have been 76,000 bales, of which 5,000 bales were taken for export and 2,000 hales on speculation. The stock in port is 421,000 hales, of which 63,000 hales are American. The stock of cotton at ses, bound to this port is 254,000 bales of which 204,000 bales are American.

BREADSTUFFS

FRIDAY P. M., Jun. 3, 1873.

The markets have been moderately active, and prices have shown some improvement during the past week, closing, however, comparatively quiet, and the advance barely supported. The following is a comparative statement of stocks on hand, January 1:

	1872.	1871.
Flour, bhls	. 342,717	428,584
Wbeat, bush	. 1,976,956	4,150,675
Corn, bash	. 5.658,074	1,171,121
Oats, bush	. 1.584,803	3,023,702
Rye, bush	93,063	550,720
Barley, bush	. 1,204,743	617,378
Peas, busb	5,293	9,528
Malt, bash	276,004	258,402
		
Total grain, bush	. 10,698,935	9,655,163

Receipts of flour bave been interrupted by the recent heavy fall of snow, and the same influence has greatly reduced the home demand; but shippers have been able to operate more freely, and in grades under \$8 there has been an advance of 10@ 25c. per bbl. Very few good shipping extras have been obtained under \$7 25. West India brands have brought \$7 50@\$8 pretty freely, and superfine for the Provinces, \$6@\$6 25. The better grades have been dull, with occasional concessions to effect sales. To-day the streets were in a worse condition than ever, and business almost at a stand still; nevertheless prices were very firm.

The wheat market has been more active, and in spring growths there has been a further advance in prices. The demand has been mainly for export, favored by higher foreign accounts; but there has been a fair business to local millers. Winter wheats on the contrary, have been more freely offered, with moderate sales at inside prices; in fact, late nominal quotations have not been fully supported. Late transactions embraced amber Michigan, \$1 90; red winter, \$1 75; No. 1 spring, \$1 70; No. 2 Milwaukre, \$1 65@1 66, afloat; No. 2 Chicago, \$1 58@1 60, and No. 3 spring, \$1 48@1 53. To-day, there was a disposition to demand some further advance and prices were lrregular, with little doing.

Corn has been variable. Yesterday there was a revival of demand for export at 64@664c. for prime old mixed in store and affoat. Receipts at the West continue to show a marked falling off as compared with lasi year, and the stocks in store are undergoing a rapid depletion. To-day the market was quiet and unchanged.

Rye has remained quiet and nominal. In barley there has been a movement aggregating a quarter million bushels, including Canada West, \$1 12@1 17; No. 2 Western, \$1 05; and No. 3 do-92@95c, which prices show a considerable advance over late quotations, especially for Western.

Oats have been dull and unsettled.

GROCERIES.

FRIDAY EVENINO, Jan. 3, 1873.

There has been a fair business in most lines, notwithstanding all that has occurred to retard trade. The close of the year, aside from the fact of its being closely associated with holidays, is always given up to the closing of accounts, and there is very little business done, as the rule, for at least a week or ien days following the opening of a new year. There has been a good deal of activity in coflees during the past week, with an especially animated demand for the Rio grades. Sugars have sold a little more freely at a shade better prices. Other goods are without important change.

TEA.

Rolders of teas have shown very little disposition to press sales during the week, though there has been some in quiry, and a slight concession would probably have the effect of moving considerable amounts. After the year has fairly opened, however, a much better demand a looked for, and it is in an. ticipation of this that importers are now holding back their stocks. There is scarcely a probability of prices going any lower under any circumstances, while if the supplies in the interior be as light as is generally supposed, the consumptive requirements of the trade are likely to be sufficiently heavy to result in better rates. The offerings are solely at full rates, and the market while dull exhibits a very strong tone. The sales are 3,900 half chests Greens, 1,000 do. Souchong, and 8,000 do. Oolong.

There have been no imports at New York the past week.

The following table shows the imports of Tea into the United States from January 1 to date, in 1872 and 1871:

Green.	dapan.	Tota'.
19.120.993	8,174,264	45,977,126
	10.012.132	42,663,896
	19,120,999 14,643,856	19,120,999 8,174,264

The indirect receipts at New York, principally overland receipts from San Francisco, have been 213,123 pkgs, since January 1, against 186,567 last year. Imports at San Francisco from Jan. 1 to Dec. 16 were 1,273,209 lbs. of China and 2,212,128 lbs. of Japan tea.

COFFEE.

This has been a broken week in all of the markets, and the usual holiday caluess has prevailed. There has been an active call for coffee, however during the few days upon which there was really any business done. Brazil descriptions, of course, came in for the bulk of the trade, and the movement in these grades shows more activity than could reasonably have been Cargoes are taken up as fast as they arrive, and many .ooked for this week. transactions are effected previous to arrival, where the vessels are soon due. Considerable Santos has been sold here and at the outports during the week, in vessels at hand and to arrive, the receipts of this grade being more liberal just now than for some time previous. The business of 1872 showed a smaller increase in the sales of Rio and Santos over those of 1871 than was anticipated. The cheapening of the other grades of coffee increased their sale and reduced the demand for Brazils somewhat, though the transactions at New York aggre-The receipts for the past year were 561,337 bags. gated 568,241 bags. trade in West India grades since our last report has been light, owing to the restrictions placed upon the jobbing business by the severe storm and the holidays. East Indies are quiet, but the market is strong on all descriptions, fiolidays. East lides are quiet, but the market is strong on an descriptions, and we repeat former quotations. The sales here are 4,700 bags Rio, ex "Endymion;" 3,000 do., ex "Paramount," to go to New Orleans; 1,800 do., ex "Maggie V. Hugg;" 1,000 do., the balance ex "Contest;" 2,000 do. ex "Merrimack"; 3,160 do. Santos, ex "England's Rose"; 891 per "Antilope," to arrive; 3,200 Rio, per "Linus"; 4,857, per "Lord Baltimore"; "Antilope," to arrive; 3,260 Rio, per "Linns"; 4.857, per "Lord Baltimore"; 4,078 Santos, per "Giulia"; 43,602 Rio, per "Edena"; 1,500 do., per "Brazil," to come here from the Roads; 5,500 per "Lubra," at Baltimore, and 3,501 per "J. Boyd," also at Baltimore.

Imports at this port the past week have included 5,782 bags Rio, per "Lord Baltimore," 3,200 do. do., per "Linus," 2,172 do. do., per "Antilope;" 803 mats Singapore, per "Ariadne:" 1,820 bags Ceylon, per "Southern Belle;" 1,284 do. St. Domingo, per "Weybosset," and 49 do. anndries.

Refiners have been looking around more during the past week, although the demand for their goods has not increased materially, and there is nothing in the position of the market to encourage very much activity on their part. The outlook is said to be favorable, it is true, and a strong feeling is manifested by refiners generally, but in the face of the current extreme dulness it is with the ntmost difficulty that rates are fully maintained. The market for raws is not very bnoyant at the moment, owing to the absence of an active business, but there is a pretty strong undertone, and with a general demand from refiners again, the market would advance materially. The mere prospect of increased activity during the current week has had the effect of stiffening riws a fraction, and we quote the market fairly steady at the close of a basis of ic. improvement, or say \$95\cdot \cdot a.c. for fair to good refluing. The sales of refining qualities during the week have been light, but there has been rather mere doing in good-sized lots, a comparatively bare

changed since our last report, but are fairly steady at the close, with rather more inquiry reported. Sales have been made of 264 hhds. Cubaat 9%c., 2,500 hhds. Cuba molasses to good refining at 7%@9%c., 179 do. Centrifugal at 9%c., 230 do. Porto Rico at 9%@9%c., 2,500 hoxes Havana at 8@9%c., and 4,100 bags Pernambneo at 9%c.

Imports at New York, and stock in first hands, Dec. 26, were as follows:

MOLASSES.

There is as yet very little doing in foreign grades of molasses. Refiners have been looking about for a day or so, but have not operated as yet to an considerable extent. Their wants are not pressing, and they naturally show an indisposition to purchase much stock beyond what they actually require until after the year is fairly opened. The stock of bolling molasaes has in creased but little, and is not excessive, though, with the market ruling as dul as it has for some weeks past, prices have naturally yielded a trifle; and while the quotable range is not materially changed, lots for boiling purposes could be picked up at rather easier figures. There has been a good call for grocery qualities in lots for the trade, but the transactions have not extended much beyond domestic parcels. The sales of New Orleans have been fair, and very full prices have been realized. Sales at auction brought 68%c, and the high cost of these goods is having a tendency to increase the sale of syrups, which can be hought much lower. The sales foot up about 1,000 bbla at 67@70e.

The receipts at New York, and stock in first hands, Dec. 26, were as follows:

Cuba, *hhds. Limports this week. 293 35,550 4 ame time 1871. 77,619	P. Rico, *hhds. 339 25,367 87,226	Demerara, *hhds. 3,228 3,582	Other hhds 32 14,761 27,175	N.O. bbla. 3,983 43,989 51,239

THE DRY GOODS TRADE.

FRIDAY, P. M., Jan. 3, 1873,

The dry goods market as well as most other branches of trade has felt the effects of the heliday season during the pust week and trade in all classes of goods has been extremely dull. Re tailers found no trade beyond what they were able to supply from their stocks. Jobbers, therefore, had little to do, and their time has been given up to the annual accounting of stocks. The closing of 1872 was generally satisfactory to merchants, as regards the showing of their trade, but the year was not one or fully average profits. The Presidential campaign, and the series of disasters to the mercantile community in different parts of the country that occurred during the year, naturally had a bad effect upon trade, and to effect the distribution of goods it has been necessary to make concessions in prices. Domestic manufacturers of goods did not suffer to any serious extent, excepting those confining themselves to woolens. The cotton business was fairly profitable, although goods were relatively low during portions of the year as compared with the cost of the staple. Still manufacturers were able to obtain fair prices during the greater part of the year, and came out at the end with not a bad showing. Woolen manufacturers suffered during the entire year. The year opened unfavorably for them, and as wool took a downward turn during the early summer months, goods instead of paying a slight profit, as they might have done had prices been maintained, were reduced a point, and remained stagnant even at the reduction. It was not until after the opening of the fall season that woolens began to show more strength, and indeed the market improved but slightly until after the Besten fire. That disaster, by relieving the market of large accumulations of goods at a time when the raw material had a strong upward tendency, stimulated trade, and resulted in a greatly increased demand which has enabled holders to maintain rather better rates since.

The changes in business firms on the 1st inst. were few, and the new year epens with the trade in a very good condition, and prices favorable for holders of goods.

DOMESTIC COTTON GOODS.—The week has been extremely quiet, and there are few new features to record in connection with any branch of trade. Large package buyers have been operating to a limited extent in anticipation of future wants, but small purchasers are not doing anything as yet. Prints have been very dull, and only small selections of the choicest effects have been made. Prices are without important alteration, and are fully maintained.

DOMESTIC WOOLEN GOODS.—The demand for fiannels is about over, and the month opens with the usual absence of trade. Spring weelens are inquired for in a small way at the close of the week, and there is a prospect of a more liberal distribution early in the month. It is yet early to speak of the lighter descriptions of spring fabrics, but these will all be noted in our columns as the season advances.

Foreign Goods.-A very small trade has been done during the past week, either with importers or jebbers. Even the heliday branches became quiet in consequence of the dullness ruling in the retail trade owing to the almost impassible condition of the streets. The markets for all staple fabrics abroad are remarkably firm, and in some instances prices have been materially advanced more particularly on worsted textiles of British manufacture, such as alpacas, mehair lustres, and Orleans cleths. The regular dry goods auctioneers held no sales during the week, but some of the cash houses disposed of numerous lots of sundries at very low prices. Jobbers' stocks are pretty well depleted of desirable dress fabrics, and none of them have as yet brought forward spring styles. Chene effects of worsted and cotton mixture are likely to be in vogue next season, and in low-priced British goods Japanese stripe will again become candidates for popular favor. A large demand is expected to continue for fine black mohair lustres, which are in great request.

We annex a few particulars of leading articles of domestic manufacture, our prices quoted being those of leading Jobbers:

The Chronicle.

THE COMMERCIAL AND FINANCIAL CHRONICLE is issued on Satur day morning, with the latest news up to midnight of Friday.

TERMS OF SUBSCRIPTION-PAYABLE IN ADVANCE.

The Publishers cannot he responsible for Remittances unless made by Drafts or Post-Office Money Orders.

To A neat file for holding current numbers of the Chronicle is sold at the office for 50 cents. Volumes hound for subscribers at \$1.25. The first and second volumes of the Chronicle are wanted by the publishers.

"THE RAILWAY MONITOR."

We have long felt the want of additional space for developing the Railroad Department of our paper. With each succeeding year this great interest is becoming more and more important, not alone in its relations to commerce but also as an element affecting all monetary movements. Hence we have from year to year devoted to this subject increased space, and finally, in October, 1871, began the monthly issue of a supplement, so as to present a statement as nearly perfect as possible of all the bonds and stocks of every road which forms a part of the complex system of the country. These tables, however, show more clearly the necessity for further information on the same subjects. To make them complete one needs comparative detailed statements of the reports of the roads, with all the current news and changes in any way affecting the bonds, stocks, roadway or management of the companies. This has in part been attempted heretofore by yearly volumes. We all see, however, the comparative uselessness of information coming at such infrequent periods; before it reaches the reader his interest in it has been supplanted by later news.

Seeing the existence of this want, and the impossibility of fully satisfying it within the pages of THE CHRONICLE, we have determined to begin next week the issue of a new paper, to be continued on the fifteenth of each succeeding month, called "THE RAILWAY MONITOR," which, with the weekly railroad department and bond and stock lists of THE CHRONICLE, will, we think, supply all necessary facts. We propose that "The Monitor" shall contain a yearly history of every railroad in the United States, so arranged, classified and indexed that one may readily turn to each Railway report, contract, law or decision, or nny news item as to construction, operation and progress of roads, as well as meetings and elections, &c., about which one may desire information. That this paper may obtain a wide circulation we issue it to subscribers of THE CHRONICLE at three dollars a year, and to all others at four dollars-these prices include a convenient file-cover for holding current numbers, which will be given the first year to every subscriber. The first number will be ready for delivery on Wedneeday of next week.

GERMAN CAPITAL AND OUR MONEY MARKET.

The reduction in the rate of the Bank of England to 41 per cent has produced very little impression here, except as suggesting some prospect that with the return of easy money the foreign demand may revive for our railroad securities. This, however, is a result which will probably be deferred while so much uncertainty hangs over the London loan market about the payment of the German indemnity, and the effect it may have on the foreign exchanges. The recent stringency of money in London has very naturally produced a number of heavy failures, which must have spread much impoverishment and distress. As the stringency was wholly due to the failure of the Bank of England to provide beforehand the ample reserve of gold which was needful for its functions and stability, it is gratifying to find that the bullion reserve is increasing, and has reached 24 millions sterling. So far as our money market is concerned, there is little prospect that any trouble from that source will threaten us at an early day. The only event of this sort that is likely is a demand for gold for shipment. And this we shall be able to meet to a moderate extent without rny serious inconvenience to the general mercantile interests of the country.

It is reported that the German government, after a lull in the coinage operations, is beginning to buy gold again for that purpose. The growing ease of money in London in face of this news is ascribed to the belief that some understanding has been arrived at which will prevent the bullion in the Bank of England from being seriously depleted from this cause. Another method of protecting its bullion is

mentioned by our London correspondent in the letter we published last week. He intimates that the rise in the rate of discount to 7 per cent was not supposed to be the only or the chief force which compelled the recent flow of gold from Paris to London; but the real cause of this active movement was that the bank authorities refused to discount finance paper. This fact, which is the common talk in London, confirms our suggestion, and very nearly carries out the plan that we recommended, six or eight months ago as a preventive against the monetary trouble which, as appeared to us, the indemnity payments must inevitably bring on the European money markets. Our recommendation was that the Back of England, instead of waiting to check a drain of gold by raising its rate, should anticipate that drain, and should either refuse to add financing obligations to its other liabilities, or should get a supply of gold by special purchase or otherwise, so that, by preparation beforehand, the English money markets might be kept free of disturbance from foreign financial operations and international payments of great magnitude, which properly had nothing whatever to do with the interior trade of Great Britain. Had this hint been taken, and this obvious policy been adopted by the Bank last summer, the late disastrous stringency there would probably have been averted altogether, and multitudes of reputable English families, whose ruin or impoverishment has thus been precipitated through no fault of theirs, might still have been in comfort and prosperity.

If the gold which Germany wants for its coinage operations cannot be got from Eugland, it is supposed that the intention is next to try this market. How much of truth there may be in the conjecture, we do not affirm. What seems to be certain is that we have a large amount of capital from Germany lending in Wall street on call. Hence if they wish to buy up a little of our gold, they have abundant means here for that purpose. It is this German capital thus lending here that has in a considerable degree helped to supply our money market during the stringency of the past four months.

This monetary tightness here has not yet passed off. though it is slowly weakening its hold, as is shown by the improvement of mercantile credits. It is worthy of note, that the stringency which was partly brought on by the refusal of Germany to buy our securities was partly relaxed and alleviated by supplies of German capital emigrating hither and investing itself at high rates in loans on call. How far it may tend to our interest, and to the quiet of our money market for such foreign capital thus to be absorbed here in call loans instead of in more permanent forms of investment, is a question which claims more consideration than it has heretofore had from our financial observers. It adds another illustration of the important connections between the finances of Germany and of this country, which are now so rapidly multiplying. This close sympathy of mutual good offices began to command grateful recognition early in the history of our war-loans, and is destined, without doubt, to play an important part in the future industrial growth and financial progress of the two nations.

THE POLICY OF INFLATION.

Never since the close of the war have the infiationists made such vehement efforts as at present to give us a ruin ous issue of more currency. Their efforts are directed with the most impartial indifference towards both the greenback currency and the National bank circulation. As to the greenbacks the sum in circulation reached its highest point in August 1865 when it was \$433,160,569. At that time the greenbacks were allowed to fluctuate within certain

limits at the discretion of the Secretary of the Treasury, who, in obedience to the popular excitement against inflation, reduced the aggregate to \$422,749,253 when the act of April 12, 1866 was passed ordering a monthly reduction of not more than ten millions in six months, and a further reduction of not more than four millions a month after that time. The discretion placed in the hands of the Secretary was opposed, and on the 4th February, 1868, the further contraction of the currency was suspended and has never again been resumed. The greenbacks outstanding at that date were 356 millions of dollars which is the legal aggregate at present, and has been so regarded without question for the last five years. Quite lately, however, and for the first time since the administration of the present government, the right has been claimed for the issue of 44 millions of new greenbacks, chiefly on the ground that it was possible to revive the war powers of currency-issue conferred by the laws of 1862 and 1863 which fixed the aggregate of the currency at 450 millions, but contemplated according to Chief Justice Chase "a permanent circutation of 400 millions until resumption of payment in coin." As the contraction laws of 1866 and 1868 recognise no such large aggregate of greenbacks, and as no officer of the government is authorized to make any new issues, or to emit a single dollar of new greenbacks except in exchange for mutilated notes, this dictum of the Chief Justice on a point not before the the Court or within its jurisdiction does not seem to help. the inflationists much.

Without giving up wholly their task of getting inflation of the currency through greenback issues if possible, they next betook themselves to the work of National bank expansion. Here their task was, if possible, more difficult still. There is a large party opposed to the national banks, and anxious to rob them of the large profits of issuing notes. We have often defended the banks against such attacks which are renewed every year, and have once or twice seemed very likely to be passed by Congress. If any attempt be made to enlarge the issues of bank notes, this party will be sure to take the alarm, a public excitement could scarcely fail of being stirred up, and the project would be defeated by the combined efforts of the friends of the banks and the advocates of a sound currency.

In this contingency what was to be done? The expansionists could not hope to have the bank note aggregate increased from 354 millions to 375 or 400 millions. A project to do this is before Congress, and was received in such a significant way that it can scarcely find resusci-A more plausible tation during the present Congress. plan was adopted. T ey got up a scheme for what they called "free banking." These ingenious and busy gentlemen, many of whom are equally enthusiastic and disinterested, profess much anxiety that Congress should relieve banking from the restrictions which surround it. But they forget that in this country banking is more free than almost anywhere else in the world. It they want to open a banking house, and have money to lend, they are perfectly free to do it. If they can gain the public confidence, and any one will trust them with deposits, they are free to receive this money and to lend it in addition to their own. And this is free banking. For everybody knows that banking proper consists essentially of these two things, receiving deposits and lending out the money to those who wish to borrow.

But this sort of free banking does not suit our retormers, although it is the only free banking worthy of the name. Their proposition is to have the Treasury issue to them bank notes on deposit of five or six per cent bonds. Thus, if they buy \$100,000 of govern ment securities they wish that \$90,000 of notes should be

given back to them by the government on condition that they deposit the bonds in the Treasury. This is what they call "free banking." Every individual, firm, or corporation that can get \$100,000 or any other sum in bonds is to have permission to avail himself of this privilege, and on application to the Treasury may get 90 per cent of notes in exchange for his bonds, without any restraint or condition except that he is to promise to redcem his notes on demand-But this hopeful scheme is not yet complete. An Assorting House is to be established to enforce redemption. Now in regard to our National bank notes we know how impossible it has been to get any such machinery for re demption into working order, though efforts for that purpose have been making for eight or nine years past. For the most part the National bank notes never go home for redemption, and if they do they are essily put out again, and they can be kept affoat without difficulty, because they are a legal tender for certain purposes, and thus enjoy a forced circulation.

There are some other features of this scheme, which we will omit for the present. Meanwhile we cannot congratulate the expansionists on the accuracy of the name which they have adopted for their newest scheme of currency inflation. They call it free banking. They mean really a new issue of legal-tender bank notes. It is the old cry for more paper-money, more inflation of prices, more premium fon gold, more disturbance of general values. Congress for some years has earnestly spurned every such plan for plunging the nation into an abyss of bankruptey. We believe they will save the country from the overwhelming disasters which would attend a revival of the defunct policy of inflation.

COURT OF APPEALS, THE USURY LAW, AND THE LEGISLATURE.

The Legislature at Albany has lost no time in responding to the general demand for a repeal of the usurv laws, and the lills introduced for that purpose should be carefully watched. The agitation of the public mind must not be to cool until success is complete Chamber of Commerce, the Union League Club, and the Law Reform Association, may all render valuable help. A new impulse has just been given to the public mind against the usury laws by the late decision of the Court of Appeals. For years it has been held that the National Banks are not subject to the State laws against usury; but to the previsions of the national currency law, which are much less stringent. Under the State law, usury voids the contract, forfeits both principal and interest, and subjects the party to six months' imprisonment and to one thousand dollars fine. The penalty of the national currency law being much lighter, forfeiting only the interest, it has been a sort of protection to the national banks to be thus shielded. The courts have always ruled that the State laws against usury do not apply to the national banks, and the decisions till now have been all one way.

This uniform course of things has, however, been disturbed. The First National Bank of Whitehall sued the maker and endorser of a protested note. The defence set up was usury in corruptly taking more than seven per cent per annum for the loan of the money for which the note was given. The decision was in favor of the bank, and was appealed to the General Term where it was affirmed. It was then carried up to the Court of Appeals, by whom the judgment has just been reversed, and a new trial ordered, aix of the seven judges concurring. This decision has again unsettled the law, and pending the appeal which It is said will be taken to the Supreme Court of the United issue, organized under State laws, the rate so limited shall be

States, nobody knows for certain what the penalty may really be in this State for taking usury. This uncertainty gives point to the other arguments for the immediate abolition, in this great metropolitan State, of the antiquated barbarous laws which are of no imaginable use except to oppress borrowers, to drive capital away when it is most wanted, and to give violence to the spanns of the money market in seasons of stringency. As there are many similar cases pending it may be well to examine the chief points in the decision which was pronounced by Judge Rapallo.

One of the fundamental principles on which the Court relied was that the National banks are subject to the Federal law in respect only to their relations with the National Treasury as depositories, fiscal agents, and privileged functionaries. and not for their private dealings with third parties. In these the banks are held to be on the same footing with natural persons, and are subject to the laws of the States in which they carry on their business. The bank act does not place these corporations on any different footing from natural persons chosen by the government, authorized to perform some special public function, and permitted at the same time to carry on a private business on their own account. In support of this view the decisions of the Supreme Court of the United States is cited in the case of the National Bank vs. Commonwealth, 9 Wall. 362, where it is said of National banks, "They are subject to the laws of the States, and are governed in their daily course of business far more by the laws of the State than of the Union. All their contracts are governed and construed by State laws. Their acquisition and transfer of property, their right to collect their debts, and their liability to be sucd for debt are all governed by State laws. It is only when a State law incapacitates them from discharging their duties to the government that it becomes unconstitutional."

The effect of this is to divide the functions of the Na tional Banks into two distinct parts (1) that concerned with the business of the Treasury as fiscal agents or otherwise, and (2) that pertaining to their contracts with the public as banks of deposit and discount. In the former the acts of Congress override all other statutes; in the latter those acts do not apply, but the banks are subject to the jurisdiction of the States. In conformity with this view Judge Rapallo cites the various sections of the National Currency law which make the capital stock and real estate of the national banks liable to State taxation, and subject the corporations themselves to the jurisdiction of the State courts, and even to the visitorial powers of the Courts of Chancery. From this fundamental principle, which underlies the whole banking law, and makes the banks liable to State jurisdiction whenever their business with the Treasury does not absolutely demand exemption from such jurisdiction, the inference is drawn that "none of the subordinate provisions of the act should be so construed as to exempt contracts made by these corporations from the operation of a particular State law, unless the intention to do so is so clearly apparent as to leave no room for doubt. If, by any reasonable construction, the provision now in question can be barmonized with the laws of the State, that construction should be adopted."

Applying this principle to the interpretation of the usury section of the National bank law, Judge Rapallo gives it a totally different meaning from that usually ascribed to it. The section is in these words:

SECTION 30. And be it further enacted, that every association may take, receive, reserve, and charge on any loan or discount made, or upon any note, bill of exchange, or other evidence of debt, interest at the rate allowed by the laws of the State or territory where the bank is located, and no more, except that where by the laws of any State a different rate is limited for banks of allowed for associations organized in any such State under this act. And when no rate is fixed by the laws of the State or terril tory, the bank may take, receive, reserve, or charge a rate not exceeding seven per centum, and such interest may be taken in advance, reckening the days for which the note, bill, or other evidence of debt has to rue. And the knowingly taking, receiving, reserving, or charging a rate of interest greater than afores aid shall be held and adjudged a forfeiture of the entire interest which the note, bill, or other evidence of debt carries with it, or which has been agreed to be paid thereon, and in case a greater rate of interest has been paid, the person or persons paying the same, or their legal representatives, may recover back, in any action of debt, twice the amount of the interest thus paid from the association taking or receiving the same, provided that such action is commenced within two years from the time the usurious transaction occurred. But the purchase, discount, or sale at not more than the current rate of exchange for sight drafts, in addition to the interest, shall not be considered as taking or receiving a greater rate of interest.

This section consists of four provisions, which have always been construed together. Judge Rapallo proposes to separate them. In the first, certain national banks, he argues, are put under state regulations relative to the rate of interest, and are separated from other banks which are in states having no such regulations fixing the rate of interest. These banks are provided for hy the second and third provisions, which are quite distinct from the first, and are not to be construed with it at all. On this theory the thud or penal provision has no application to any banks in states having usury laws, and the penalty is not attempted to be prescribed in this section except for banks in such states as have no usury laws and no fixed rate of interest. This new interpretation the court defends by the argument that to construe the national currency law "as undertaking to remodel the usury laws of the states would, besides other grave objections, be inconsistent with the manifest purpose of the act to subject the banks to the local policy, on the subject of the interest of money, of these states where the interest was regulated by law."

As under this construction Congress has not attempted to override the state laws against usury, the conclusion was inevitable that the defense of usury was available, and the usury laws were declared applicable to national banks as to all other corporations and individuals. Here, as we have said, the uniform decisions of the courts of this state for years past are overruled.

We have no space to discuss this decision further, and cite it chiefly as new evidence of that disgraceful and tormenting uncertainty of the law to which we have often referred as aggravating the other mischiefs of our penal statutes against usury.

The inference practical men educe from the subject is to use their whole power to get these laws repealed. Governor Dix, in his message, recommends their repeal. Intelligent borrowers all over the country are anxious to get rid of them. Strange to say, the farmers, who are among the chief sufferers from the law, are its chief friends. But for them it would have perished before now. From the country members at Albany the opposition to usury reform is now as always, the hardest to overcome. These men are consci entious, and wish to do their whole duty to the people and They argue that if Wall street to their constituents. charges 4 per cent a day for money in spite of repressive laws, the rates will run higher still if these laws be taken away. Now, nothing is more certain than that here, as in other States, the repeal of the usury laws would make money accessible to men who cannot now get it at any price, and would benefit the farmers as much as any class of borrowers by putting down and keeping steady the rates of interest. Meanwhile these usury laws are driving away large masses of loanable funds from this centre into the Western States, where there are no usury laws to fetter capital or endanger its free use at its market value.

RAILROAD EXTENSION IN 1872.

There is some disappointment with the work of railroad extension for the past year. We have done less than was expected. We have built fewer new roads than in either of the two foregoing years. We can show an increase of but 6,511 miles, against 7,961 miles of new roads in 1871; 7,433 in 1870. The whole length of railroad is now 69,158 miles; while 44,000 miles more are in various stages of incipiency, and will make our net work of railroads, when finished, 113,000 miles.

The growth of the network of iron roads in this country was very backward till the gold discoveries of 1848. At the close of that year we had less than 6,000 miles of railroad, of which 1,276 were in New England. 4,000 miles in the Middle and Southern States, and less than 700 miles in the Great West. When the troubles of 1860 began the network of railways had increased five-fold. The Western States had 11,000 miles, the Southern States over 9,000, the Middle States nearly 7,000, and New England 3,600. These 30,000 miles had cost us 1,070 millions of dollars. more than one-tenth of which, perhaps, was foreign capital, The war did not stop our railroad building as was feared. The work was only cheeked. In the second year of the war we had added nearly 2,000 miles to our railroad network, and had laid out 100 millions of dollars upon it, besides the vast cost of the war itself. At the close of 1865, the year of peace, our railroads had 35,000 miles, and now they have a length of nearly twice as much, or 69,158 miles Since the war, then, we have built new railroads of 34,000 miles long. This is more than has been built in the whole of Europe in the same time. Had we no more than these 34,000 miles that have thus been made since the war, we should have a larger mileage of railroad than Germany, Austria, France and Russia, with their 175 millions of people. This will be seen from the following tables showing the railroad developments of these and other countries of Europe compared with that of the United States:

RAILROADS OF UNITED STATES AND OF CERTAIN COUNTRIES IN EUROPE.

	Railroad, miles.	Population.	Area sq. miles.	luhabi- t'nts per sq. m.	lo RR.	RR. cost per m.
United States	69,158	38,555,983	2,992,879	14	43	\$49,592
Germany	12,207	40,111,265	212,091	189	17	109,952
Austria	5,865	35,948,592	227,234	158	40	73,915
France	10,333	36,469 875	201,900	161	19	158,714
Russia in Europe	7,044	71,207,794	1,992,574	36	284	166 477
Great Britatn	15,537	31,817,108	120,769	265	8	176,269
Belginm	1,301	4,839,094	11,412	430	9	106,987
Netherlands	836	8.858,055	13,464	236	15	97,202
Switzerland	820	2,669,095	15,233	175	19	87,134
Italy	3,667	26,273,776	107,961	225	29	89,712
Denmark	420	1,784,741	14.553	111	84	57,114
Spatn	3,401	16,301,850	162,758	90	54	107,156
Portugal	453	3,967,867	36,510	99	81	101,311
sweden and Norway	1,049	5,860,122	188,771	19	180	62,438
Greece	100	1,332,508	19,941	71	199	50,000

These figures are very suggestive. They not only illus trate what we have said as to the railroad network of this country and its great breadth as compared with those of the chief commercial nations of Europe, but they are useful in many other respects. We return to the railroad growth of the past year and to the lessons it offers us. The first of these is as to the stringency of the money market, which for several months has been unusually severe. To this cause and to the disturbance since July of the foreign demand for our securities is largely due the check which has been given our railroad construction, which, but for such hir drances would no doubt have reached 9,000 miles during the year, and perhaps more. It has been doubted by conservative men whether our railroad progress has not been too rapid since the war. In England a similar active conversion of floating into fixed capital produced the railroad panic of 1847. Our financial system is not sufficiently elastic, these persons tell us, to bear the exhausting drain o

over 400 millions of capital which has been annually absorbed by railroad investments. Hence in this temporary retarding of our railroad progress they see a wholesome change which may avert tuture trouble.

There is no doubt some truth in these reasonings. But it must not be forgotten that every well-built railroad if suitably located becomes a productive machine which adds to the wealth of the whole country, and especially of the region it traverses. Our new railroads increase the value of farms and open new markets for their products. They lessen the time and cost of travel. They give a value to commodities otherwise almost worthless. They concentrate population, stimulate production and raise wages by making labor more efficient. Our existing railroads are computed to create more wealth every year than is absorbed for the construction of new railroads. Still it is possible that we have been absorbing in these great works more of our floating capital than can be spared without injury to other enterprises which depend on the limited supply of In that case the evil will soon cure the loan market. itself, and a premature check is a much more wholesome means of recuperation than a violent revulsion two or threo years hence when the mischief has grown worse and is less susceptible of gentle remedies.

Secondly, we notice the small cost of our railroads, compared with those of other countries. This is abundantly seen in the foregoing table of the cost of foreign railways, The whole cost of our 69,000 miles of road is about \$3,436,638,749, which is a sum not very much greater than England has spent on her 16,000 miles of railroad. Still the relative cost of our railroads is increasing every year. Steel rails are taking the place of iron, light rails are taken up and heavier rails laid down. Better bridges, double tracks, solid earthworks, stone ballast, and other improvements add both to the cost and durability of the works. as well as to their economy. There have also sprung up a number of abuses and peculations which clamor to be exposed and put down. In 1867 the average cost of our railroads was \$42,770 per mile; in 1869 it had risen to \$44,255, and last year to \$49,592, showing a steady rise in the money value of railroads and of their equipment. This subject is discussed by our contemporary, the Railroad Journal, with its usual sagacity and sound judgment, as follows:

Peculation and knavery have incessantly levied heavy booty on capital used in construction in its transit from a floating to a permanent condition, and that this roguery has contribated largely to swell the cost there can be no possible doubt. But still the main conclusion must be that the character of construction and of locomotive and carrying machinery has been essentially changed and improved at a large moeity of the enhanced cost.

Taking the Boston and Albany Railroad as an instance of increased cost, we find that while at the close of 1867 this was only \$17,692,361, it had risen by the close of 1872 to \$24,301,751, an increase of \$6,609,390, or 35 per cent, no additional length of road having in the meanwhile been made. An explanation of the change exhibited is found by reference to the reports of the company for the years named, which show that in the interim there have been added to the second track and sidings about 70 miles; that a large amount of rail has been changed from iron to steel; that nearly all the bridges have been rebuilt with stone and iron; that scarcely an old structure remains, and that the equipment has been enlarged by the addition of about 60 locomotives and 2,000 cars. In fact an almost new road has been built and equipped

at the cost represented by the increased amount.

There are, however, many instances in which the increased cost is chiefly nominal, and the result of financial manipulation. The prominent of the concerns thus indicated are of too notorious a character to need special notice.

Again we observe the healthy distribution of the increase over all parts of the Union, the great valley of the Mississippi having the chief share. Thus, while the New England States, whose railroad network is almost complete, has but 162 miles of new road, the Middle States have an increase of 1,220 miles, and the Southern States 1,273 miles. This for the Pacific slope. To illustrate still further the distri- of business on the last day of December, 1872:

bution of the railroads in the various sections of the country we give a summary of the mileage (1) in the New England States: Maine, New Hampshire, Vermont, Massachusetts Rhode Island and Connection; (2) in the Middle States: New York, New Jersey, Pennsylvania, Delaware, Maryland, District of Columbia, and West Virginia; (3) in the Western States: Ohio, Michigan, Indiana, Illinois, Wisconsin, Minnesota, lowa, Nebraska, the Territories, Kansas, Missouri; (4) in the Southern States: Virginia, North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Louisiana, Texas, Kentucky, Tennessee, Arkansas and Colorado; and (5) in the Pacific States: California, Nevada and Oregon. The progress in each of these groups of States will be seen from the subjoined table.

l						

Soon after the gold discoveries, the growth of our railroad system became less irregular and partial than before. The above table illustrates the wonderful stimulus which was then imparted by the increase in our circulating medium, and shows how swiftly the advancing wave of railroad extension struck the most prominent sections of the country. The Atlantic States were the most rapid in their material growth, and they received the earliest impulse. After 1849, in New England, the railroad mileage doubled in twenty years; in the Middle States it doubled in eight years; in the Western States the mileage increased ten-fold in nine years, and twenty-fold in twenty years; in the Southern States the mileage quadrupled in eight years, and it is now eight times as much as in 1849. In the gold-producing States themselves the railroad system was slow to start its development. Till 1855 there were no railroads in the Pacific States. During eight years more but thirty miles were built, and the cost of transportation was enormous, With 1863 a new impulse began, and the railroad mileage doubled every two years except those which have just closed.

THE DEBT STATEMENT; FOR JANUARY, 1873.

The following is the official statement of the public debt leaves 3,300 miles for the Western States, and 549 miles as appears from the books and Treasurer's returns at the close

[From our own correspondent.]

London, Saturday, December 21.

The closing weeks of the year are usually remarkable for the scanty supply of news. Whether it be in monetary or commer cial circles, there is no disposition to embark largely in fresh transactions; but, on the contrary, a desire is evinced to close as far as practicable the engagements of the year. Hence business on the Stock Exchange, this week, has been of an exceedingly moderate character, and has been only augmented by the fact that in consequence of the diminished facilities accorded to speculators by the German and Austrian banks, the prices of foreign stocks in Germany have rapidly declined, the result of which has been that an absorption here has been in active progress. Money being rather abundant in this market, many firms have taken advantage of the depression existing in Germany, and have effected what appear to be very favorable investments in foreign stocks and in Lombardo Venetian shares. It is well known that there has been in Germany this year a wild speculation, and that the operators on the German and Austrian Bourses have had considerable influence upon the money markers. The introduction of new companies has been rapid; numerous investments have been made, and the banks have been freely resorted to to borrow upon stock, with a view to operate on an extensive a scale as pos sible. There has, as a matter of course, been an abundance of accommodation paper which has, as usual, been a prominent source of trouble. Latterly, however, the banks have determined to check the current, and have demanded much higher rates for advances upon stock, and also, one would presume, for "finance" bills. The effect is immediate—unhealthy speculation is ended, and those who have traded beyond their means are compelled to realize a part of their capital, or what is more probable, are forced to sell their pawned stock, and trade within their means. The German banks have only done what the Bank of England did when the rate was advanced to seven per cent, viz: to refuse to negotiate finance bills. Such a course is, perhaps, not always desirable; but that it is necessary when the resources of the bank are at a low ebb is unquestionable. The "clean out" in Germany will be productive of good, for although many weak firms will no doubt break down, a healthier state of things will exist.

Sound as the commercial position of the country appears to have been, the year is closing with numerous failures, chiefly in Mancheater. The suspensions have been latterly very numerous, and for considerable amounts, and there are, as usual, grave fears that others must follow.

There has been a steady demand for money during the week, and the rates of discount have ruled firm. To a considerable extent the inquiry has been incidental to the close of the year, but easier quotations are anticipated as soon as the year is fairly passed. The Bank return indicates this for the proportion of reserve to liabilities is now as much as 52 per cent. It is probable, therefore, that the rate of discount may be reduced to 4 per cent., a point which would no doubt give birth to a large amount of finance paper in connection with the Frence loan and Indemnity payments, and lead once more to a commotion in the money

market. There is no doubt that we shall be liable to these disturbances as long as France is so largely indebted to Germany' and influential firms here are assisting in the operation. The quotations for money are as follows:

Per cent.	Per cent.
Bank rate 5	4 months' bank bills 43/@474
Open-market rates:	6 months' bank hills 434@434
30 and 60 days' blils434@	4 and 6 months' trade bills. 434@5%
8 months' bilis	

The rates of interest allowed by the joint stock banks and discount houses for deposits are subjoined:

	Per cent.
Joint stock banks	 . 4
Discount houses at call	 . 4
Discount houses with 7 days' notice	 . 414
Discount houses with 14 days' notice	 . 434

The following are the quotations for money at the leading Continental cities:

	Bank	Open	1	Bank	Open
	rate.	market.		rate.	market
per	cent. p	er cent.		cent.	per cent
Parls	5	434-5	Lisbon and Oporto	7	7
Amsterdam	5	6	St. Petersburg	8	8
Hamhurg		434	Brusaela	6	5
Berlin	6	8	Turin, Florence and		
Frankfort	5	5	Rome	5	6
Vlenna and Trieste	736	736	Antwerp		
Madrid, Cadiz and Bar-		-	Belgium		
celona	6	6	1		

There has been a strong demand for foreign bills of exchange and the rates are lower. The large purchases of foreign stocks in Germany naturally create a demand for remittance. Gold is not wanted for export; but silver is rather dearer. The following prices of bullion are from the circular of Messrs, Pixley, Abell, Langley & Blake:

COLD.	8.			8.	
Bar Gold per oz. standard, last price.	77	9	0		
Bar Gold, fineper oz standard, do.	77	9	0		
Bar Gold, Refinable per oz. standard, do.	77	11	0		
South American Doubloonaper oz.	73	в	a	78 8	3
United States Gold Coin per oz.					
SILVER.			_		

The following statement shows the present position of the Bank of England, the Bank rate of discount, the price of Consols, the average quotation for English Wheat, the price of Middling Upland Cotton, of No. 40 Mule Yarn fair second quality, and the Bankers' Clearing House return compared with the four previous years:

The astounding news that Jay Gould has offered to refund to the Eric Railway the whole of the amount claimed by the drectors has naturally caused great excitement in the market for Eric railway shares. On Friday, dealing in them was very active, and the quotation, which was 43 on Thursday night, was as high as 51‡. The closing price last night was 49 to 49‡, and to-day the market has been quiet, the highest quotation having been 50‡.

Other departments of the Stock Exchange have been quiet, but owing to the tendency to easier money, a firm tone is apparent. Next week will be a holiday week, and in the following week there will be an account to adjust, as well as a holiday on New Year's Day, so that very little fresh business is expected this year. The new year, however, is likely to open with considerable buoyancy. The following were the closing prices of consols and the principal American securities this afternoon:

Consolax	9174@	92
United States 6 per cent 5-20 bonds, ex 4-6	90%	9134

The weather, not only here, but on the continent also, has been wetter than ever. The rainfall has been unusually severe, and many parts of the country are flooded. The quantity of land under winter wheat cultivation is much below the average, a fact of serious importance should the spring be backward and unpropitious. The wheat trade, however, has been wanting in animation as usual at this period of the year, but good and fine qualities of produce command full rates. The condition of the English supplies is still very unsatisfactory.

The following figures show the imports and exports of grain, &c., into and from the United Kingdom since harvest, viz., from September 1 to the close of last week, compared with the corresponding periods in the three previous years:

IMPORTS.

Paducah Railroad Company, to enable the company to build an independent line into the city. The road now ends at Elizabethtown, a point on the Louisville and Nashville Railroad, forty-five miles from the city.

Atlantic, Tennessee and Ohio Railroad.-The following

letter explains itself:

CHARLOTTE, N. C., Dec. 27, 1872.

Messrs. W. B. DAMA & Co., Publishers.

GENTLE-EN—I have been shown an article in your issue of Ny-Soth, under the title of "An Explanation Wanted." The writer says the designation of the "first mortgage bonds of the Atlantic, Tennessee and Ohio Railroad Company's bearing 8 per cent. interest," in an advertisement in the Charlotte Observer is a misnomer as to the bouds; if there is no fraudulent purpose in making such an advertisement.

He then states that the company executed a mortgage and issued bonds, and that a large number of such bonds are still outstanding, &c. This is true in part. In 1862 the company did execute a mortgage and issue honds, but of this confederate issue

execute a mortgage and issue honds, but of this confederate issue all have been redeemed except about \$85,000 bonds and coupons. These bonds having been issued during the late war and sold for confederate currency have been decided by the Supreme Court of the State of North Carolina to te subject to the confederate scale in the case of S. B. Alexander vs. the Atlantic, Tennessee and Ohio Railroad Company at its last June term. The scale would reduce the value of the \$85,000 outstanding to about \$52,000 in greenbacks. As by an act of Congress the United States Courts conform their decisions as far as practicable to those of the State Courts but little doubt can be entertained of the result in the case pending. Had the holders of these bonds agreed to accept payment according to this decision of the Supreme Court the company would have paid the last one of them as they are now ready to do; although some of the bonds are not yet due.

yet due.

Besides, before offering to sell one of their mortgage gold bonds the company caused to be placed in the hands of R. A. Lancaster (Trustee in the mortgage), of the House of Lancaster, Brown & Co., New York, \$90,000 of its 8 per cent. gold bonds as a security for the redemption of the 6 per cent. confederate bonds and coupons of the nominal or par value of \$85,000. * * * * WILLIAM JOHNSTON, President

Barnum's Last Fire .- To the Editor COMMERCIAL AND FI-NANCIAL CHRONICLE—Sir: As everybody knows Barnum, the following characteristic letter will interest the public.—Herrings & Farrel. New York, Jan. 2, 1873.—Messrs. Herrings

& Farrel, No. 251 Broadway, New York—Gentlemen: Your safes, at the burning of my museums in 1865 and 1868, preserved my books and papers intact, and I am now glad to say that the safe just dug from our ruios, when opened, gave me a like satisfactory result. Not a figure is defaced on my books or papers, and the bank notes and all other property contained therein are as fresh as when placed there. Truly yours,—P. T BARNUM.

as fresh as when placed there. Truly yours,—P. T BARNUM.

The Ætna Fire Insurance Company of Hartford, Conn.

A full meeting of the stockholders of this company was held at the office of the company on December 30, to consider the financial condition of the company with a view to supply any deficiency which should appear in its capital. It was voted to reduce the capital of the company from \$3,000,000 to \$2,000,000. It was then voted to increase the stock to \$3,000,000 by the issue of new stock, which is first to be offered pro rata to the present stockholders. The meeting was unanimous in this action.

—The United States Life Insurance Company presents its an-

—The United States Life Insurance Company presents its annual statement in this number of THE CHRONICLE, and we invite the attention of our readers to its exhibit. The business of the the attention of our readers to its exhibit. The business of the year just closed shows a very large percentage of lucrease over that of the previous year—in number of policies issued 68 her cent, and in amount of insurance 77 per cent—while its loans on policies have decreased 43 per cent. The investments of the company are such that its entire assets are available, and in an emergeocy could be used without delay or loss. Those who are familiar with the science of Lite Insurance, however, will understand that the tables of mortality are regular and exact, and the business is not liable to such disasters as have frequently of late befallen the business of Fire Insurance.

The statement shows careful management on the part of the

The statement shows careful management on the part of the officers of the company, and its surplus of \$991,558 93, or more than 33 per cent of its liabilities, speaks well for their sagacity. In studying this report our readers will bear in mind that it is not a "made up" statement, but is taken, as our bank statements are, "from the books of the company at the close of business," on the 31st of December, and was given to the public on the 4th of

January.

—In another part of this paper will be found the card of Messrs. Jacob R. Shipherd & Co., Bankers, offering for sale the first mortgage extension bonds of the South Side Railroad of Long Island. These bonds hear seven per cent interest, payable March and September, and are issued for the purpose of extending the road from Patchague to a junction with the Sag Harbor branch of the Long Island Railroad, and for extending the double track of the

-The interest due the first Monday in January on the bonds of the State of Alabama are payable on presentation of the coupons at the banking-house of Henry Clews & Co., who have recently been appointed financial agents of the State of Alabama. Messrs. Clews & Co. entertain very hopeful views of the financial prospects of the State.

—Mr. Charles W. Hassler, well known as a prominent broker in miscellaneous railroad bonds, has admitted as a partner in his business Mr. G. A. Robertson, late with McKim Brothers & Co. Having made railroad bonds a special study, Mr. Hassler has become an authority in matters pertaining thereto, particularly as to that numerous class of bonds not sold at the Exchange.

BANKING AND FINANCIAL.

BANKING OFFICE OF FISK & HATCH,

NEW YORK, Jan. 10, 1873.

The CHESAPEAKE and OHIO, the CENTRAL and WEST-ERN PACIFIC BONDS, all of which have been negotiated by us, we believe to be among the best and most desirable Invest ment Securities in the market, which in time must become very scarce; especially as the Government will probably, during this year, pay off in gold another large lot of Five-Twenties, and issue in their place FIVE PER CENT. BONDS.

The CHESAPEAKE AND OHIO SIX PER CENT. GOLD BONDS, the total amount of which is only \$15,000,000, are secured upon a property worth \$35,000,000 to \$40,000,000, and are fully equal in intrinsic value to the CENTRAL PACIFIC BONDS, They are issued in denominations of \$100, \$500 and \$1,000, coupon or registered, and at their present market price, 86 and accrued interest, are very desirable.

The CENTRAL PACIFIC SIX PER CENT. GOLD BONDS are too well known to require description or commendation Their total amount is \$25,885,000; they have for a long time

ranged in market price near or above par.

The WESTERN PACIFIC SIX PER CENT. GOLD BONDS amount to \$2,735,000. This road is now consolidated with the CENTRAL PACIFIC, and the payment of its bonds, principal and interest, is assumed by the latter. Coupon Bonds, \$1,000 each. Their market price to-day is 89½ to 89½. As they have recently been introduced on the Stock Exchange, we expect to see them rapidly rise to the price of CENTRAL PACIFICS, being substantially the same in character and value.

We buy and sell, as usual, Government Bonds, receive deposits, on which we allow interest, make collections, and conduct a gene-

ral banking business in all its branches.

FISK & HATCH.

TO INVESTORS.

To those who wish to REINVEST JANUARY COUPONS OR DIVIDENDS, and those who wish to INCREASE THEIR IN-COME from means already invested in other less profitable securities, we recommend the Seven-Thirty Gold Bonds of the Northern Pacific Railroad Company as well secured and nausually produc-

The bonds are always convertible at Ten per cent, premium (1.10) Into the Company's Lands at Market Prices. The Rate of Interest (seven and three-tenths per cent. gold) is equal now to about 81 eurrency-yielding an income more than one-third greater than U. S. 5-20's. Gold Checks for the semi-annual interest on the Registered Bonds are mailed to the Post Office address of the owner. All marketable stocks and bonds are received in exchange for Northern Pacifics ON MOST FAVORABLE TERMS. JAY COOKE & CO.,

> New York, Philadelphia, and Washington, Financial Agents Northern Pacific Railroad Co.

TO GUARDIANS AND REXECUTORS.

THE EQUITABLE TRUST COMPANY—Capital, \$1,000,000are offering First Mortgage Real Estate Bonds, guaranteed by themselves, at par and accrued interest. Every Bond is secured by Real Estate of double value, appraised under the most rigid rules, and approved by the following Executive Committee: ROBERT LENOX KENEDY, ADRIAN ISELIN, JOHN D. MAXWELL, CHARLES BUTLER, SAMUEL WILLETS, EUGENE KELLY, PETER McMartin, WM. Remsen and Henry P. Haven.

FRIDAY EVENING, Jan. 10, 18:3.

The Money Market .- The opinion which we ventured to give in our last report that there would not be a material relaxation in the money market before the 10th of the month, has proved to be tolerably correct. There was a temporary decline to easier rates on Saturday afternoon, the 4th instant, which continued to some extent on Monday, but the market soon hardened again, and rates have since ranged from 7 per cent gold to a commission of 1-64, 1-32, and in some cases to 1-16 per day. This afternoon there was a material break in the high rates, and after three o'clock loans

were made at 527 per cent per annum. These lower rates may not be permanent, though the tone has certainly arrived our money market should have a more abundant supply of able funds, and call loans be obtainable at 6@7 per cent. It has been soapected by some, that parties interested to keep up rates have endeavored to make money appear scarce in order to get daily commissions for a little while longer, but it is evident that if such has been their action this week, it cannot be kept up long when money becomes really abundant. One of the features of the market has been the appearance again of an excessive supply of National bank notes, which have been loaned for a time, within certain limitations, free of interest, provided the loans were 10turned in legal tenders.

The last instalment of the Government money put into the New York city banks to give relief to the money market early in October was withdrawn January 4. The total amount so deposited with the banks October 7 and 10 was \$6,923,387 50, and it has been withdrawn as stated below. The amount of currency resident on bond purchases and the amount of currency paid out on bond purchases and the amount taken into the Treasury on sales of gold are also shown below as condensed from a

statement in the Ecening Post:

DEPOSITS WITHDRAWN.	BOND PURCHASES.	GOLD SALER,
Date, Ainmet, November 1. \$39,000 and 15. 229,000 and 21. 621,834 and 27. 602,338 December 4. 1,201,77 and 17. 1,345,846 Jannary 4. 1,315,846	Ant of Curney 1/d our. November 6 \$\frac{\text{RY3,992}}{\text{229, 61}}\$ " 20 2229, 61 \\ " 26 51.226 \\ December 4 6 1.947 \\ " 26 496.948 \\ January 8 23,297	Ant. of Curbey Date. Nove ber 7. \$1,28,791 " 14 1,195,517 " 21 1,192,907 " 12 1,127,526 December 5. 1,129,077 " 19 1,135,650 " 2 1, 121,750 Jannary 8 1,121,538 " 9 1,124,000
Total \$6,023,387	Total \$5,529,512	Total \$11.242,486

It will thus be seen that the Treasury has taken since November 1 \$6,023,387, placed with the banks in October, and \$11,242,486 for gold sold; making a total of \$17,265,873 nearly all in legal tender notes. Against this the Treasury has paid out for 5-20s purchased \$5,529,212, making a net loss to the banks of \$11,736,611, and as this was chiefly in legal tenders, the loss to the market was very much greater.

There is quite an active business in commercial paper at 9@12

per cent as the quotable range for prime names, while a tendency towards lower rates is decidedly noticeable, and some very choice 4 months paper has been sold at 8 per cent. From London the advices are favorable; the bank rate has been

reduced to 4½ per cent from 5, the previous figure, and money in the open market is reported 1@3 per cent lower than the Bank minimum. The Bank of France loses 1,333,000 francs in specie thia week.

The last statement of our New York City Banks (Jan. 4) showed an increase of \$952,275 in the excess of reserves. The total liabilities stood at \$231,421,900; the total reserve at 60,643,500, being \$2,788,025 more than 25 per cent of the liabilities.

The following statement shows the changes from previous week

and a comparison with 1872 and 1871:

	 1873		1572.	1871.

United States Bonds .- Government securities have been strong and active during all the week until to-day, when there was a slight check to the upward movement in prices, and somewhat less business done. The advance this week up to last night was about 1½ to 2-per cent on the popular issues of five-twenties, but the reaction to-day earried prices back about ½½ per cent. As usual, in every time of sharp demand for governments in this market, a great scarcity of bonds has been developed, and parties having orders to purcha e round lots could only fill them by picking up small amounts as they could be obtained. The present demand has come both from home and foreign buyers, and in the case of a single banking house we have might have sent out several millions had the bonds been obtainable at satisfactory prices. The present upward turn in Governments, and the universal and increasing favor with which they are regarded, has an important bearing upon the subject of the negotiation of the new 5 and 4½ per cent bonds, and suggests very foreibly the inquiry, whether, under good management, it would be necessary for our Government to pay high commissions on the negotiation.

On the Treasury advertisement for the purchase of \$1,000,000. strong and active during all the week until to-day, when there negotiation

On the Treasury advertisement for the purchase of \$1,000,000 five-twenties on Wednesday, only \$71,500 were offered, and only

\$20,850 were accepted.

State and Railroad Bonds .- There has not been much activity in Southern State bonds, a limited number of transactiona in Virginias and Tennessees, and a few sales of North and South th Virginias and Tennessees, and a few sales of North and South Carelinas, having been the principal business. Missouri 6s have sold at 92\(\frac{1}{2}\)(\frac{1}{2}\)(\frac{1}{2}\)(\frac{1}{2}\)(\frac{1}{2}\), and at these rates are apparently a cheap State bond. The New York State Canal loan gold 6s of 1887 have heen placed on call at the Stock Exchange. The interest payable January 1 on Virginia bonds having been suspended by law, a committee of the State Senate is to confer with the representatives of the bondholders on February 3 proximo, and try to arrange some terms of settlement. Coupons of the Consols are quoted at 81 though they are not yet received in payment of quoted at 81, though they are not yet received in payment of

Railroad bonds are in active request for the investment of January interest and dividends, and the transactions both in old and new bonds have been of considerable amounts. Union Pacific bonds are depressed to-day by the *Credit Mobilier* investigation, though it is difficult to see how the boua fide holders of these bonds at the present time will be at all injured by the investigation. tion.

Halfroad and Miscellaneous Stocks.—The stock market has not yet shewn extraordinary activity since the commencement of the year, nor have there been very important fluctuations in prices this week, if we except the decline in Pacific Mail to 70 on Thursday, Union Pacific to 35½ to-day, and the sharp rise in New York Central and Hudson to 104 this afternoon. The general position of the market does not appear to have changed materially since our last report, and it is said that the active support of leading speculators is wanting to give the usual impetus to a regular bull compaign. The money market, however, has thus far heen so stringent as to afford little inducement for outside parties to come in as purchasers, and with a material relaxation in money, it is quite possible that stocks may advance. The special cause for an upward turn in Central to-day was found in the rumor of another stock dividend.

Railroad earnings for the month of December, so far as yet re-Railroad and Miscellaneous Stocks.-The stock market has

The Gold Market .- Gold was quiet and without any special movement of importance in the early part of the week, but has since been stronger on the renewal of an export demand. Shipments have already been made this week of about \$1,000,000 in specie, and it was estimated to-day that another \$1,000,000 might specie, and it was estimated to day that another \$1,000,000 might be shipped to-morrow; the amount, however, is uncertain. Loans have been reasonably easy, and to-day the rates paid for carrying were 6, 7, 6½, 7, gold, and 5 per cent. Time leans in gold are quoted at ½ to ½ per cent. for carrying for 30 days, ½ per cent. for 60 days, ½ to ½ for 90 days, and ½ per cent. for four to six months. For the use of gold for all the year one per cent. is paid. At the Treasury sale of \$1,000,000 on Thursday bids amounted to \$4-445,000, the highest bid was 112.30, and the lowest 111.51. Customs receipts for the week amount to \$2,601,000.

The following table will show the course of the gold premium

each day of the past week:

Foreign Exchange.—The Exchange market has been strong during most of the week, and rates have been sufficiently high to admit of renewed specie shipments, ruling to-day at 109½ @109½ for 60 days and 110½ for short sight bills. The movement of prices appears to have been the natural result of an ordinary demand, with a relatively small supply of bills to meet it, except that some slight weakness was occasioned by the sale of £100,000 of 60 days' borrowed bills on Thursday. It is anticipated that the easy money market in London will facilitate the negotiation of American railroad loans, and that some considerable amounts of exchange mark to a produced in that way as the way goes on

exchange may be produced in that way as the year goes on.

The transactions for the week at the Custom House and Snb-Treasury have been as follows:

STATE, CITY AND CORPORATION FINANCES.

EXPLANATION OF STOCK AND BOND TABLES.

- 1. Prices of the most Active Stocks and Bonds are given in the "Bankers' Gazette," previously. Full quotations of all other securities will be found on preceding pages.
- 2. Government Scenrittes, with full information in regard to each issue, the periods of interest payment, size or denomination of bonds, and numerous other details, are given in the U.S. Debt statement published in The Chronicle on the first of each month.
- THE CHRONICLE on the first of each month.

 3. City Bonds, and Bank, Insurance, City Builroad and Gas Stocks, with quotations, will usually be published the first three weeks of each month, on the pagn immediately preceding this.

 4. The Complete Tables of Sinte Securities, City Securities, and Bailroad and Miscellaneous Stocks and Bonds will be regularly published on the last Saturday in each month. The publication of these tables, occupying fourteen pages, requires the issue of a supplement, which is neatly stitched in with the usual edition and furnished to all regular subscribers of The Chronicle.

INVESTMENTS.

The demand for Government securities has been active this week from those purchasers who wish to hold bonds that are always marketable with ease, and which are most acceptable as collateral security for loans, whenever the owners may wish to borrow money. There is more and more evidence each year of a general confidence in U. S. bonds, which will probably cause their prices to gradually advance.

Railroad stocks are comparatively high in most cases, and do not at present offer as much inducement to purchasers for investment as they have done in the past.

Railroad bonds continue to be the favorite securities with private investors, who simply purchase with a view of obtaining safe bonds which pay an annual rate of interest from 7 to 8 per cent. We noticed last week all the new loans offered in our market, with the principal details of each, (the price of Logansport, Crawfordsville & Southwestern 1st Mortgage Gold 7s should have been stated as $97\frac{1}{2}$ instead of 90,) and we will now refer briefly to some of the more prominent old bonds. The Central Pacific 1st Mortgage Gold 6s, which are so favorably known among large purchasers both in this market and in Europe, are selling at 99½ ex interest. We shall probably be able to give, next week, an interesting exhibit of the financial condition and prospects of the company, from a pamphlet of Messrs. Fisk & Hatch. just published for distribution to their customers. The Western Pacific first mortgage gold 6's, are quoted at 891 bid, and as they have a security fully equal to the Centrals, must be considered relatively cheap. The Union Pacific railroad bonds have been popular for some time past on account of their low prices. The Credit Mo. bilier investigation now progressing, as to the original issue of some of these securities can hardly affect present bona fide holders, and if it should result in securing the restitution of any funds to the company (after the manner of the Jay Gould suits in Eric), the effect would be favorable. The present value of Union Pacific bonds would seem to depend chiefly on the company's net earnings, and these for eleven months ending Nov. 30, 1872, amounted to \$3,686,004, while gross earnings were \$8,134,-754, and operating expenses, including large outlays to provide against snow blockades. were \$4,448,750; the company's annual interest liabilities are now about \$3,200,000, so that if the netearnings for December are added there would be a considerable excess in the net-earnings of the year over the interest liability.

The Governing Committee of the Stock Exchange have decided in the case of the forged coupons of the Union Pacific Income Bonds, that hereafter when bonds are ordered back, coupons must tollow the same course, on satisfactory proof of their having been cut from and belonging to the bonds. Union Pacific first mortgage gold 6's are quoted at 87, Land Grant 7's at 78%, Income 10's at 791.

It is not necessary for us to give the prices of any considerable list of the substantial bonds on the Stock Exchange, as all these prices are quoted on a previous page, we may mention a few, however, which appear to be selling atreasonable rates—as the Fort Wayne 2d mortgage at 94%, 3d mortgage at 941; some of the smaller issues on sections of the Lake Shere and Michigan Southern road at 94 to 96; Albany and Susquehanna 3d mortgage, 91 to 95; Toledo, Wabash and Western St. Louis Division bonds, 921; Chesapeake and Ohio 1st mortgage geld 6's are selling by the financial agents at 86 and interest. We might enumerate many other bonds, including some that are seldem or never seld at the Exchange, but it is unnecessary to do so, as renders of the CHRONICLE will generally form an opinion as to the different bonds, by examining the statements in regard to the respective companies which are published from time to time in our columns

Purchasers should keep one fact in view, name'y, that a good 7 per cent mortgage bond, on an old and paying road, cannot often be purchased below 90 in this market. There are undoubtedly some exceptions to this rule, and it should be understood also that it does not apply, at all, to new loans.

There has been some discussion lately in regard to a decision In the suit of Adams Express Co, against Messrs, Vermilye & Co. Bankers, concerning the legal ownership of certain 7:30 notes stolen from the Express Co. and paid for by them, and afterwards bought by Messrs, Vermilye & Co, in the regular course of bustness. We learn from counsel in the case that the decision did not turn chiefly on a question of fact in regard to notice had by Vermilye & Co., but that the Court held that these notes (U.S. 7 3-10s) being 1 ast due at the time of purchase by Vermilye & Co., and not bearing interest, were not to be considered as negotiable in the usual sense of that term, but only negotiable for purposes of redemption-that the point taken by defendant's counsel that the notes were a part of the currency of the country was without force, and that purchasing them, as V. & Co. did after maturity, they acquired only the title of the vendor, which was the title of a thief. Also Adams Express Co., having paid immediately upon proof of loss the claimants of the bonds, stood properly in the place of owners. The fact of notice having been given of the loss was only incidentally mentioned by the Court.

Debt and Finances of the State of Alabama,-The fol. lowing are the chief points of the State Auditor's Report for the

year ending sept. 30, 1812:		
On the 20th of September, 1871, there was a balance of outstanding warrants against the treasury amounting to	\$217,622 1,175,932	
Making a total of	1,393,551 1,196,046	
Leaving a balance against the treasury in outstanding warrants to amount of	\$197,507 396,600	
And it will be seen that we have the full sum of		
Who alsimo proceige upon the State for liquidation s	0.0000	

The claims pressing upon the State for liquidation so soon as funds can be secured for that purpose, which are not enumerated above, are as follows:

Balance due school fund. Salaries due State officers, Judges, Chancellors, &c Balance due University on account of interest	16,440 (0
Making a total of.	\$346,175.35 591.107.8f

Fo which add items heretofore enumerated The actual receipts from State taxes during the year have been. \$767,193 38

The Comptroller estimates the total receipts into the treasury for the next year ending Sept. 30, 1873, at \$1,259,000, and disbursements at \$1,189,066.

Candor campels me to say that railroad endorsement by the State was not the chief agency in causing the decline of the State's credit.

An adequate levy of taxes, and the prompt adjustment as provided by statute of all State obligations in the matter of endorsement when default was made, would have secured the entire confidence of financiers, and enabled the corporations, whose success depended upon the soundness of the State credit, to complete their projected lines, thereby saving the people from loss and credit of the State from embarrassment.

and credit of the State from embarrassment.

It will be observed that the direct indebtedness has been increased during the year in the sum of \$301.474 28, and the contingent debt has been increased by railroad endors ment to amount of \$1,690,000, making a total increase, direct and contingent, of \$1,991.474 28. No information is on file in this office showing how much, if any, of the contingent obligation of the State has became a direct or assumed indebtedness, but, in my opinion, great misapprehension prevails in the minds of the neonle upon this subject.

people upon this subject,

The State has one mile of railroad completed and equipped for every sixteen thousand dollars of recognized endorsement (except endorsement of South and North road, which is \$22,000 per mile), and it will be seen at once that if the State will premptly dispose of each road when default is made in pryment of interest, the only loss that can accrue to the State will be the difference

between sixteen thousand dollars per mile and the amount for which the road is sold at anction.

To estimate the loss of the State at \$2,000 per mile will be deemed ample, and this amount upon all roads which may possibly make default will not exceed \$1,380,000 apon all endorsements made to date.

Add to this the straight bonds issued by the State for railread purposes (placing a low estimate upon the value of lands and other securities within the control of the State upon default), and we have an ultimate direct indebtedness, arising from aid granted to said roads, of an amount not exceeding \$3,000,000. Should this cutire amount become a burden upon the people, the public debt may be so adjusted that it can ultimately be paid off without great hardship. The amount of interest on the total Indebtedness of the State would not in such contingency exceel \$802,788, which could be discharged by a tax levy of 4-10 of one per cent.

Add to this 4-10 of one per cent for State expenses and schools Add to this 4-10 of one per cent for State expenses and senoois, and one half mill tax for sinking fund, and we will have annual tax of \$\frac{8}{2}\$ mills. This would be a per capita tax of \$\frac{8}{1}\$ 85, and allowing an equal amount for county purposes, it would be \$\frac{2}{3}\$ 70 per capita, a sum much less than the taxes now paid by New York, Penusylvania, Ohio. Massachusetts or Vermont.

The Auditor is unofficially advised of the sale of \$\frac{2}{3}\$18,000 in Alabama bonds of the last \$\frac{1}{3}\$1,000,000 loan, the proceeds of which

liave not been certified into the treasury, nor accounts for same presented for payment at this office; making the total amount of Alnbama bonds sold by financial agents, and unaccounted for at

this date, \$389,900.

The amount of tax per eapita for Sinte and county purposes in Alabama is less than one-third of that of Vermont, one-fourth of that of Ohlo, one-fifth of that of New York, and one-seventh of that of Massachusetts, all of which is fully shown by the public records of the country.

State Bonds (issue 1866) reported unsold, in hands of Financial \$17,110,000 \$782,000

Total value taxable property.......\$147,224,925 50

The average annual taxation of real and personal property is, therefore, about 6½ mills on the dollar for the use of the State.

Massachusetts Finances.—Governor Washburn's message Massachusetts Finances.—Governor Washburn's message makes a very favorable exhibit of the financial condition of his State. More than three millions of the public debt have been extinguished during 1872, or, with the addition of a two million dollar loan to the Troy and Greenfield Railroad and Hoosac Tunnel, a net reduction of about \$2,000,000 has been accomplished. The existing funded debt is now \$27,692,704. In Massachusetts no debt has been contracted of late years without the formation of a sinking fund to extinguish it, and, as a consequence, a large portion of the War Fund Loan, not absolutely maturing until 1886, was paid off last year. 1886, was paid off last year.

Pennsylvania Finances .- Governor Geary's message was submitted to the Legislature Jan. 8. He says the State debt has been reduced during the year nearly two and a half million dollars, leaving it, less assets on hand, \$16,521,039. He recommends a repeal of the enrollment tax on private acts chartering industrial institutions, and all taxes on capital stock, earnings and dividuals are the companies. dends of such companies.

Maine Finances.—The financial statement is cheering. deposits and the savings institutions have increased nearly \$2,000,000 during the past year. The finances of the State itself are also in excellent condition. The receipts last year were \$1,335,000, and the debt was reduced over \$50,000, and will be reduced the coming year more than three times that amount, while the State tax will not exceed five mills. The debt to-day is a little over \$7,000,000, which the accumulating sinking fands will promptly pay. The financial prospects of the State were never so bright as pay. The financial prospects of the State were never to originate new, for our products are undoubtedly growing in variety and

Debts of Towns, Counties, Etc., of Ohio .- In the message of Governor Noyes, of Ohio, the local indebtedness of the State on

of Governor Noyes, of Ohio, the local indebtedness of the State on the 1st of September last is stated as follows:

Debt of counties, \$3,756,000; debt of townships and Board of Education, \$447,238; debt of cities of the first and second class, \$1,495,591; debt of incorporated villages, \$616,559; debt of school districts (special), \$1,590,547, making a total of over seventeen millions and a half. Governor Noyes says the evil continues and grows upon the people, and it is not likely to be diminished until a remedy shall be found in positive prohibitory legal enactments or in constitutional provisions absolutely forbidding local public debts.

New York City Finances.—The message of Mayor Have meyer states that the actual disbursements in 1872 as compared with the expenses and liabilities of the preceding year show a

saving of \$6,037,789, or of \$8,733,866 allowing for the excess of State taxes, interest, and the amount paid or liable to be paid on account of Fourth Avenue improvements. The expenditures of the year 1872 are less than 1.81 per cent of the same valuation of 1871, being \$30,224,799 64. The city and county debt now amounts to a total of \$118,855,229, an increase in six years of \$45,187,770; and the annual taxation during that period has increased from \$16,950,767 to \$32,036,290. The taxation of 1873 has been fixed at 3.22 per cent on the valuation of 1872. The increased rate is required to meet the excess of the quota of the State tax for 1873 over 1872, amounting to \$4,016,703 49. Of this amount, \$3,644 387 72 is required to be contributed by this county to meet a deficiency in certain sinking funds of the State The inequalities of State and city taxation impose on the city of New York a large portion of the expenses which should properly saving of \$6,037,789, or of \$8,733,866 allowing for the excess of New York a large portion of the expenses which should properly full on other portions of the State. Mayor Havemeyer shows that this city will pay this year \$3,108,700 out of its local taxation for the support of local schools, and a further sum of \$761,553 for the support of schools in other parts of the State.

Brooklyn Finances.-The Mayor's Message accounts for the

 Total
 \$3,654,712 00

 debt
 \$23,006,000 00

 amount on hand, sinking fund
 2,745,070 92

The bonds issued for local improvement, and now outstanding, amount to \$9,458,055 10; certificates outstanding, \$2,293,900 50. The indebtedness under the heading of certificates outstanding is \$766,350 in excess of last year.

County Bonds, Judgment against a Repudiating County.

No. 24—Lynde vs. County of Winnebago—Error to Circuit Court for Iowa—This was an action on county bonds, and the judgment was for the county, on the ground that the bonds were issued without a vote of the people, as required by law. That judgment is here reversed, in accordance with a long line of decisions on the same point in similar cases, to the effect that where such bonds are issued reciting on their face that they are issued in pursuance of a vote of the people, and they fall into the hands of innocent parties without knowledge that the recital is false, the county issuing them is estopped to deny the fact.

Mr. Justice Swayne delivered the opinion.

Boston, Hartford and Eric Railroad.—It appears that a report of this company published in The Chronicle of Jan. 4, on page 21, has misled some parties as to the earnings, expenses, and net income of the road. It should be distinctly understood that the statements there given referred to the portion of the road in Massachusetts, and not to the whole line including the Hartford, Providence, and Fishkill road. The gross receipts on the whole property are reported to be somewhere near \$2,000,000.

Boston and Lowell and Fitchburg Railroads Consolldated.—Our special correspondent writes from Boston:

"The most important movement here at present is the consoli-"The most important movement here at present is the consolidation of the Boston and Lowell and Fitchburg roads, with the ulterior purpose of consolidating with them the Vermont and Massachusetts and the whole Hoosac Tunnel line to Troy. The consolidation of the B. and L. and the F. is favored by the managers of both roads, but the proposition has not yet been laid before the stockholders. It may meet with opposition in the Legislature, as there is a strong inclination in some quarters to have the State take this line."

Boston and Maine Railroad Seven Per Cent Loan. The proposals for \$500,000 of the above loan were opened this week. Bids were received for over \$1,600,000. The accepted bids averaged 42 per cent premium.

Midland Railroad and Delaware and Hudson Canal Company.—The Utica Observer says: The leases of the Utica and Clinton and Binghamton, and the Rome and Clinton Railroads to the New York and Oswego Midland Railroad and the Delaware and Hudson Canal Company, completed recently at New York, and signed by the Presidents of the different companies, and these important measures so long in progress have been consummated in a manner quite satisfactory to all the interested

For nearly a year past these two roads have been operated by the Midland under preliminary agreement, and now they have passed permaneutly into the hands and under the control of the lessees, the Midland operating the roads, and the Delaware and Hudson Canal Company furnishing a vast amount of coal for transportation and guaranteeing the payment of the annual

rentals.

Montelair Railway.—The completion of the Montelair branch of the New York and Oswego Railway is regarded very justly in New Jersey as an event of no small importance to that State. The road is about forty miles long, commencing at Jersey City, passing through Kearney, North Newark, Bloomfield, Montelair, Little Falls and Pompton to Greenwood Lake, where it is to connect with the short line of the New York and Oswego Midland Railroad. The Montelair Railway has two branches now building one leading to Orange and the other to Morristown. building, one leading to Orange and the other to Morristown.

—E. R. Mitchell, acting financial agent of the State of Alabama, left a few days ago to negotiate bonds issued by one of the Legislatures. It is thought that he may not stop at New York, but go

The Buffalo, Corry & Pittaburgh Railroad has been sold to Col. Phillips, of Pittaburgh, President of the Alleghany Valley and the Oil Creek and Alleghany River Railroads. The road will be laid with new fron, and be made first class in all its appointments. Through coaches will be run from Pittaburgh direct to Buffalo.

This road was sold on the 7th of December to the trustees of This road was sold on the 7th of December to the frustees of the first-mortgage bonds for \$600,000. The road is 43 inites long, extending from Brocton, N. Y. (on the Lake Shore road, 10 miles west of Dunkirk) southward to Corry, Pa. For the last year reported (ending Sept. 30, 1871) its earnings were about \$250,000, and its expenses \$195,000. Its bonded debt was \$700,000, but it had a floating debt of nearly half a million.

The Cairo and Pulton Railroad .- The last rail on the northern division of the Cairo and Fulton Railroad, connecting Little Rock, Ark., with St. Louis, was laid Jan. 2. The southern division of this road extends from Little Rock to Northern Texas, where connection will be made with the International Rallway, which in turn connects at Hearne, Texas, with a system of roads to the Gulf of Mexico. This division will be completed within the present year.

Cleveland, Mount Vernon & Delaware.-The necessary papers have been filed with the Secretary of State of Olio. to enable the company to construct a branch from near Oxford, in Holmes county, south through Coshocton and Muskingum counties to Dresden on the Pittsburgh, Cincinnati & St. Louis road, a distance of about 40 miles. The capital stock is to be increased \$1,000,000, making it \$3,000,000.

The first train on the Missouri, Kansas and Texas Railroad arrived at Denison, Texas, Wednesday night, amid general rejoicing of the people of Northern Texas.

RAILROADS OF OHIO.

We have obtained from official sources a tabulated statement of all the railroads of the State of Ohio for the year ending Juno 30, 1872. Although this is published at a comparatively late period, it has not yet been given to the public, and will not be published in the State report for some time to come. The total figures for the entire lines of all railroads, including the mileage without the State as well as in it, are as follows:

Capital atock paid in, \$219.161.127; junded debt. \$217.171.755 floating debt, \$10,738,180; total debt, \$227,902,935; length of road and branches, laid with rail, 6,599 miles; cost of read and equipment, \$338,113,494; gross earnings, \$65,603,078; operating expenses, \$45,034,708; net carnings, \$20,563,370; passengers carried, 12,068,832; freight carried, 20,983,068 tons; interest paid on bonds. \$9,726,359; dividends paid, \$7,554.032; persons killed, 192; persons injured, 358; animala killed, 1,926; amount paid for same, \$45,573; employes, 25,393; per cent increase gross earnings for year, 12.74; average cost (per cent) of operating, 68.32; per cent increase of net earnings, 11.93; increase of rail laid, including sidings, &c., 375 miles.

filed May 17, 1872.

Since the reorganization a first mortgage was executed for \$2,550,000, but no hoods were issued ander it at date of report (June 30, 1872). A second mortgage was also issued for \$1,000,000, of which \$500,000 were negotiated.

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, Jan. 10, 1873.

Trade opens the new year with many favorable aspects. Iu imported goods the improvement being especially marked, business having been so dull the past two months that the wants of the country now begin to be felt, stocks in the hands of dealers having been much reduced. Still, the condition of our streets is a serious drawback, causing delays, and increasing the cost of deliving merchandize. With an improvement in this respect, and milder weather throughout the Northern and Western States, a further increase in the volume of business will undoubtedly take place.

Cotton has been variable; an advance of 4c. early in the week has since been partly lost, middling uplands closing at 20 gc. Flour has become dull, shipping extras closing at \$7@7 40; wheat has also become dull and depressed, No. 2 spring closing at \$1 56@ \$1 65. Corn closed quiet at 64@661c. for prime mixed in store and affoat. Groceries have been in fair demand, but coffees have shown less buoyancy, while sugars have been scarce.

Freights have been more active, the result mainly, however, of some decline in rates. Nearly half a million bushels grain have been shipped to Liverpool at 7@71d. by sail, and 7108d. for wheat; with cotton 5-16@\$d. by sail, and 7-16@\$d. by steam; also by steam, cheese 60s. and bacon 55s. Grain to Cork, for orders, 7s. 6d., and petroleum 7s., with a few charters. to-day there was a firmer feeling; grain to Liverpool at 74@74d. by sail, and 71@8d. by steam; and to London by sail, wheat 9d. and flour 3s. 3d.

Tallow has advanced to 82c. for prime, with more activity. Whiskey declined to 92½c., but has recovered to 96c. Alcohol has seld for export at 47c. in bond. Strained rosin has been more active at \$3.70 for export, closing with an advance to \$3.80. Spirits turpentine was easier, with free sales at 59@59½c., but closing at 61c. Tar has declined to \$3.25. Crude petrolcum has declined to 10½c. on the spot and 10½c. for next month. Refined petrolcum is still nominal at 25@27½c. in bbls., but rather more demand. Naphtha has declined to 15½@16c. in bbls. Wool continues to rule dull. The stocks, except of domestic fleece, are about 30 per cent. in excess of last year. Clover seed has been quite active at 9½@9½c. Hops have ruled dull. East India goods quiet, except some sales of Calcutta lineed at \$2.50, gold.

Provisions have shown some advance in prices during the past week. Pork has been moderately active and prices have advanced; new mess has sold at \$13.75@14 in a jobbing way on the spot, and in wholesale lots for future delivery at \$13.75@13.80; Western prime mess in wood bound packages has sold at \$14. Lard has advanced and has been very active for future delivery, has seld for export at 47c. in bond. Strained rosin has been more

Lard has advanced and has been very active for future delivery, the sales in one day for March amounting to over 5,000 tierces, and a good brokens has also been done for Feb. and April; prime since the breaking of the "corner" become firmer, and there has been a good business done; long clear has sold at 6\frac{1}{3}\tilde{C}\tilde{T}\tilde{c}\ti and March at 100.32c. Cut Meats have been in good demand and business been done at 505 1-16c. for dry salted shoulders, closing with 5½c. asked. The market for hog products closed with some speculative buoyancy in lard and box meats. Beef has been quiet and rather easier. Butter has been very firm especially for fine grades. Cheese has been in more demand and higher, with sales of choice factories at 15015½c.

Tobacco has been rather quiet during the past week. Stocks are light and assortments poor; besides, it has been so difficult and expensive to transport merchandize for delivery or shipment that some orders have been held back. The sales of Kennett that some orders have been held back. and expensive to transport merchandize for delivery or shipment that some orders have been held back. The sales of Kentucky have been only about 200 hhds, nearly all for expert, including some new crop at 8½@10½c for lugs and low leaf; quotations must, for the time being, be omitted. Seed leaf tobacco has also had a rather slow sale. We notice the following: Crop of 1871—200 cases Connecticut, 45@55c.; 200 do. Ohio, 10½@11½c; 300 do. Wisconsin, 9@10c.; crop of 1870—200 cases sundries at 10½@12c. Spanish Tobacco remains dull: sales 300 beles Havana, \$1@1 07; 50 bales Yara, on private terms.

Dried fruits have been doing better for both foreign and domestic, sales including layer raisins, \$2; loose Muscatel do., \$2 50; Zante currants, 6½c; Turkish prunes, 7½c, and citron, 38c. Fish was active, with sales of No. 1 Halifax mackerel at \$16 50@\$18, ex ship, and cod at \$5 62½@\$6 50 for Bank. In fish eils there has been some improvement.

there has been some improvement.

Of metals, we notice a large movement in ingot copper at 3116 35½c. for Lake, spot and forward delivery, and 30½@3½c. for English. Block tin quiet, but in plates the sales have been lib eral, including charcoal tin at \$10 75@\$11, gold. Pig iron has declined to \$44@\$15 for No. 1 American, with 20,000 tons Grey Forge, sold at \$40, and 1,800 tons English scrap at \$50, which is material declined. a material decline.

Exports of Leading Articles from New York.

The following table, compiled from Custom House returns, shows the exports of leading articles from the port of New York since January 1, 1873, to all the principal foreign countries, and also the totals for the last week, and since January 1. The last two lines totals for the last week, and since January 1. t3

COTTON. FRIDAY, P. M., January 10, 1873.

By specialtelegrams received to-night from the Southern ports, By specialtelegrams received to-night from the Southern ports, we are in possession of the returns showing the receipts, experts, &c., of cotton for the week ending this evening, Jan. 10. It appears that the total receipts for the seven days have reached 133,235 bales against 104,703 bales last week, 103,443 bales the previous week and 125,337 bales three weeks since, making the total receipts since the first of September, 1872, 1,868,286 oxies against 1,571,498 bales for the same period of 1871-72, showing an increase since September 1, 1872, of 296,788 bales. The details of the receipts for this week (as per telegraph) and for the corresponding weeks of the five previous years are as follows:

F						
Received this week at-	1873.	1872.	1871.	1870.	1869.	1968.
New Orleansbales.	49,199 15,765	31,589 10,778	44,593 15,546	40,000 13,355	26,388 19,6-6	31,152 16,537

North CarolinaVirginia		8,633	1,631	2,466 5,897	4,5.6	3,590
Total this week	133,235	94,595	131,969	99,787	74,450	100,01
Total since Sept. 1	1,858,286	[1,571,498]	11,900.552	1,410,225	1119,201	947.09

The exports for the week ending this evening reach a total of 106,032 bales, of which 70,183 were to Great Britain, 3,743 to France, and 32,106 to rest of the Continent, while the stocks as made up this evening, are now 497,825 bales. Below are the exports and stocks for the week, and also for the corresponding week of last season:

	Ð	xported t	0	Totalthia	Gamawik	Stock.			
Week endlag Jan. 10.	G. Brit.	France	Cobtin't	- and	1872.	1873.	1872.		
New Orleans. Mobile	2,811 12,291 559 16,081	3,713	13,575 369 5,501 12,538	49,610 6,888 8,312 21,822 559 16,205 1,106	30,943 8,605 4,058 21,646 6,348 8,400 2,130	161,015 41,701 85,401 78,875 80,238 59,575 40,000	183,533 59,535 81,965 76,001 42,413 62,931 28,600		
Total		3,745 132,710	32,106 229,662	106,032	82,121 821,189	497,°25	495,868		

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase i the exports this week of 23,90% bales, while the stocks to night ar 1,957 bales less than they were at this time a year ago. The following is our usual table showing the movement of cotton a all the ports from Sept. 1 to Jan. 3, the latest mail dates.

The toudency of the market the past week has been down ards. This is due almost entirely to the increased receipts, W wards. This is due almost entirely to the increased receipts. Whave frequently pointed out the causes which have been operatin since the early part of November to check the free movement cotton. Liverpool has not accepted these explanations, but ha interpreted the decreased weekly arrivals as Indicating a smalerop; the activity and advance there has reacted upon our marke and the result has been a considerable rise in our quotation. and the result has been a considerable rise in our quotation. Now these conditions appear to be reversing themselves, and consequently with larger receipts larger crop estimates are made and lower prices rule. Still the downward movement has been slow, spot quotations being reduced only \(\frac{1}{2}\)c. during the week. To day the transactions were moderate, and the tone of the markedull; some support to prices has been imparted by the decide improvement in the money market at London. For future delivery there was a steady decline till Wednesday morning, whe tho lowest figures of the week were made, the market bein especially depressed for the later months, sales being made at 19\frac{1}{2}\cdot c. for January, 19.16\cdot c. for February, 19.13-16\cdot c. for March, an 20\(\frac{1}{2}\cdot c. for April, a decline of 1-16\(\frac{1}{2}\cdot c. for morths, while of Thursday there was a further advance of \(\frac{1}{2}\cdot 3.16\cdot c. for March, with the rimprovement, but a limited business. Too.lay there was some further improvement, but a limited business except for March, the sales for that month aggregating 4.600 bales, with 2,400 bales at one price for February. The price for futures last reported were (Lasis low middling 19\(\frac{1}{2}\cdot c. for January, 19\(\frac{1}{2}\cdot c. for June, and 21\(\frac{1}{2}\cdot c. for June) in the total sales of this description for the week are 99.90 bales, including — tree on board. For immediate delivery the total sales foot up this week 10,803 bales, including 6,219 for export, 3,122 for consumption, 1 262 for speculation, and 200 it transit. Of the above 1,831 bales were to arrive. The following are the closing quotations to-day: Now these conditions appear to be reversing themselves, and con ing are the closing quotations to-day:

The following exchanges have been made during the week 1-lec. paid to exchange 1,00 January for 1,00 February.
i.e. 100 February for 100 March.
13c. 50 February for 300 May.

WEATHER REPORTS BY TELEGRAPH.—There is very more importance to notice in our weather telegrams to night. Just at present the planters are beginning to make their preparations for the next crop. No indication can as yet, of course, be obtained in the preparations. The native control of the preparations. WEATHER REPORTS BY TELEGRAPH .- There is very little of present the plenters are beginning to make their preparations for the next crop. No indication can as yet, of course, be obtained or given as to the extent of the preparations. The natural inference is that with present prices the cultivation will be well kept up. The weather during the week has generally been cold and dry. At New Orleans they have had one heavy rain, but the rest of the week has been pleasant. There has been no rain at Selma, Montgomery, Savannah, and Augusta, but the weather has been cold. At Mobile it has rained on one day, with the rest of the week cold and pleasant. It has also rained on one day at Columbus, Macon, and Memphis, and in the early part of the week at Charleston. At Memphis the balance of the week has been alternately clear and cloudy. The thermometer at Memphis has averaged 35; Selma, 45; Montgomery, 50; Macon, 49; Columbus, 46; Charleston, 51, and Savannah 45.

BOMBAY SHIPMENTS.—According to our cable dispatch received to-day, there have been 6,000 bales shipped from Bombay to Great Britain the past week and 2,000 to the continent, while the receipts at Bombay, during the same time-have been 20,000 bales. The movement since the first of January is as follows. These are the figures of W. Nicol & Co., of Bombay, and are brought down to Thursday, Jan. 9:

Shipments this week to Great Con-Britain. Hient. Total. Britain. Hient. Total. For Total. Total. Total. Britain. Hient. Total. Britain. Hi

Britain of 17,000 bales, and that the total movement since Jan. 1

shows a decrease in shipments of 33,000 bales over the corresponding period of 1872.

Our cable dispatch to night states that crop reports are very favorable.

GUNNY, BAGS, BAGGING, &C.—The market for bagging has been quict and steady the past week. Some orders from the South come in daily, which dealers are filling at 13@13\frac{1}{2}c. Sales of 300 rolls in Boston at 12\frac{1}{2}c. cash, and possibly 500 rolls more might be had at same price. Futures from second hands for March and April delivery we quote at 13\frac{1}{2}@14c. It is reported that some 3,000 rolls were sold quite recently to a southern buyer at 14c. for future delivery. Bags are quiet and steady at 14\frac{1}{2}@14\frac{1}{2}c. asked. We hear of no sales the past week, and holders seem unwilling to yield in price. Butts have ruled quiet and steady. Recent heavy arrivals have relaxed the price from ship a little, and the price has fallen off from 2\frac{1}{2}@2 1-16c. cash and time. We do not note any marked change in the price of Butts from store, which we still quote at 2 3-16@2\frac{1}{2}c. cash and time. Sales since our last issue have been 380 bales Boston, at 2\frac{1}{2}c., 30 days; 300 bales Boston at 2\frac{1}{2}c., 30 days; 1,000 bales New York at 2\frac{1}{2}c. There are buyers at 2c. cash, but no sellers under 2\frac{1}{2}-16c. at the moment. GUNNY, BAGS, BAGGING, &c .- The market for bagging has

VISIBLE SUPPLY OF COTTON MADE UP BY CABLE AND TELE-GRAPH.—By cable we have to night the stocks at the different European ports, the India cotton affoat for all of Europe, and the American affoat for each port as given below. From figures thus received, we have prepared the following table, showing the quantity of cotton in sight at this date (Jan. 10) of each of the two past sessons:

	1873.	1872.
Stock in Liverpool bales.	446,000	552,000
Stock in London	220,000	166.670
Stock in Havre	220,000	161,000
Stock in Marseilles	13,250	16,000
Stock in Bremen	34,000	12,505
Stock in Amsterdam	72,000	27.800
Stock at Antwerp	36,000	12.343
Stock at Barceiona	28.000	55,000
Stock at Trieste	1.200	5,820
Afloat for Great Britain (American)	198,000	138,000
Afloat for Havre (American and Brazil)	33,000	83,000
Afloat for Bremen (American)	40,000	14.071
Afloat for Amsterdam (American)	4,000	11.600
Total Indian cotton affoat for Europe	60,000	196,000
Stock in United States ports	497,825	495,868
Stock in inland towns	83,116	93,944
Exports from United States this week	106,032	82,124
Total	2,092,423	2,123,745

These figures indicate n decrease in cotton in sight to-night f 31,322 bales compared with the same date of 1872.

MOVEMENTS OF COTTON AT THE INTERIOR PORTS.-Balow we give the movements of cotton at the interior ports—receipts and shipmen's for the week, and stock to-night and for the corresponding week of 1872:

ing week of 19	141					
	−Weck en			-Week er	ding Jan.	12, 172 -
		Shipmen	te. Stock.	Receipts.	Shipment	a. Stock
Augusta	4,534	5,833	12,203	4,036	5.006	18,721
Columbus *		2,262	10,153	1,474	1,596	10,306
Macon	. 1,835	1,491	13,651	1,570	2,304	13.991
Montgomery		1,345	10,949	1,277	1,898	10.630
Selma +	. 1,566	2,593	4.454	1,543	2,224	6.712
Memphis		14.408	28,324	16,530	12,051	28,433
Nashville ‡	. 1,539	2,093	3,382	1,120	460	5,151
	04.000	20.00*	00.110	00.550		
	24,663	30,025	83,116	27,550	25,539	93,944

[•] There was an error in our fivres for Columbus last week, our revular telegram having farled o reach us until Saturday morning. The stock should have been given at 10,399 and the receipts 1,216.

† Stock at Seims by actual count was found to be as above, being an increase of 933 bales over the running count.

† Stock at Asshville was counted to-day and found to be 1,500 less than the running count.

The above totals show that the interior stocks have decreased dur lng the week 8,408 bales, and are to-night 10,828 bales less than at the same period last year. The receipts have been 2,887 bales more than the same week last year.

The exports of cotton this week from New York show an in-The exports of cotton this week from New York show an increase since last week, the total reaching 16 205 bales, against 9,659 bales last week. Below we give our table showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1872; and in the last column the total for the same period of the previous year:

SHIPPING NEWS .- The exports of cotton from the United States Shipping News.—The exports of cotton from the United States the past week, as per latest mail returns, have reached \$1,302 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in THE CHRONICLE last Fridny, except Galveston, and the figures for that port are the exports for two weeks back. With regard to New York we include the manifests of all vessels cleared up to Wednesday night of his week:

Below we give all news, received during the week, of disasters to vessels carrying cotton from any port of the United States:

to vessels carrying cotton from any port of the United States:

T. D. Coleman, sunk at Hamilton. N. C., has been pumped out and towed to Norfolk Jan. 3d, with a large hole in her port bilge. She had on board 37 bales cotton badly damegad. The principal part of her cargo had been landed in lighters.

West Derrey (821 tone, of Liverpool, Uran, from Mobile Dec. 24, with 2,270 bales of cotton for Cork, for orders, was wrecked on the Tortugas prior to Jun. 7. Assistance was dispatched to her from Key West.

IBABELLA Hannerr (Br., 357 tons), Williams, New Orleans Nov. 3, with 1,101 bales of cotton, for Ohent, was abandoned at sea Dec. 28. Crew saved.

J. B. Dupfus (Br.), for Bremen, which caught firs at Charleston, Dec. 28, had on board about 2,249 bales Upland cotton, worth nearly \$200,000. This supposed to be fully covered by insurance in Northern and foreign offices, with a rise, at Charleston of \$20,000 gold in the Orlent Insurance Company. The origin of the 6re is unknown, as the part of the wessel in which it originated was completed in stowage about ten days, and had not subsequently been worked on.

QUEEN of THE SOUTH, Corson, loading at Galveston for New York, with cotton, beef and hides, was struck by lightning morning of Jan. 4. The cotton took fire, and at noon same day the vessel was being fluoded to put out the 5re.

SUNNY SOUTH, from Wilmington, N. C., with cotton and naval stores for New York, struck a wreck or bar off the Caveru Houses, Jersey coast pounded over, sprung a leak, and was towed on to the Jersey Flats, New York barbor, where she now lies with a good deal of water in her.

GOLD, EXCHANGE AND FREIGHTS .- Gold has fluctuated the past week between 111\$ and 112\$, and the close was 112\$. Foreign Exchange market is strong. The tollowing were the last quotations: London bankers', long, 109\$@109\$; short, 110\$@110\$, and Commercial, 108\$@109\$. Freights closed at 1104@1104, and Commercial, 1084@1094. Freights close 7-16@4d. by steam and 5-16d. by sail to Liverpool, 14@14c. by steam and 1c. by sail to Havre, and &d. by steam to Hamburg.
By Telegraph from Liverpool.

By TELEGRAPH FROM LIVERPOOL.—
LIVERPOOL, January 10—1 P. M.—The market has ruled quiet and steady to-day, with sales estimated at 10,000 bales, including 2,000 bales for export and speculation. The sales of the week have been 100,000 bales, of which 3,000 bales were taken for export and 9,000 bales on speculation. The stock in port is 446,000 bales, of which 91,000 bales are American. The stock of cotton at sea, bound to this port is 247,000 bales of which 198,000 bales are

BREADSTUFFS

Fuidat P. M., Jan. 10, 1873.

The market has been generally irregular during the past week, and closes somewhat unsettled in tone, with prices for the most part nominal.

Flour has come forward more freely by rail; with dull accounts from Liverpool and London the shipping demand fell off, and the local trade came forward for supplies, and made pretty free purchases, notwithstanding the difficulty of moving heavy goods. The result of these circumstances has been, that low grades have become dull and weak, while grades at \$8 and upward have had a full sale, and in some cases have brought more money; but this demand having been met in its immediate needs. the whole market closed yesterday dull and heavy. To-day, holders were firm, but the demand was quite limited.

Wheat opened the week with considerable buoyancy, especially for spring growths. There was a good export demand, favored by a slight decline in ocean freights. There was also some speculation. No. 2 spring Chicago and Milwaukee sold quite freely at \$1 60@1 67. But latterly foreign accounts have been dull, limits of orders have been reduced, and private advices state that the English trade is disconcerted by large receipts and the fact that the surplus of the world is moving toward their markets at relatively high prices; while the confidence of our holders was impaired by the continued excess of receipts over last year at the Western markets, and some weakness was caused by the pres. sure to sell the low grades of spring received by rail. Yesterday trade came almost to a stand still. To day, there was very little done, and prices quite unsettled; No. 2 Milwankee offered at \$1.65 afloat, with car loads of rejected spring quoted as low as \$1 40.

ludian corn has been selling more freely for export, and on Tuesday prime old mixed Western advanced to 64te in store and 67e afloat. But the market showed no strength. There is a fair amount of new corn arriving, and the condition and quality being good, it is preferred by the local trade. The close yesterday was to under the above figures The receipts at the West are considcrably increased, but are still smaller than last year. A severe snow-storm at the West this week, threatens to check supplies for a few days, but may alterwards increase them by providing good sleighing. To-day there were buyers of prime old mixed at 64c in store and 66c afloat, but these prices not readily accepted . choice new mixed in car-loads brought 67c.

Rye and barley have been firm but quiet.

Onts have latterly met a brisk demand from the local trade, and vesterday prime new Western advanced to 49@50c for mixed, and 52@53e for white. To day the market was quiet.

GROCERIES.

FRIDAY EVENING, Jan. 10, 1873.

The grocery market, in a general way, has shown signs of returning animation, and in most branches the business of the week has been more active than that reported in our last issue. The consumptive trade at this season is fairly active, and the distribution from second hands continues lively. Coffee is selling with especial freedom at the full rates quoted in our last, with better prices on some grades. Sugars are rather dull, and barely steady. Tea has shown a little more animation, but still rules quiet. Fruits are jobbing fairly and are fairly steady in all descriptions. Molasses is very strong and sells fairly at full former rates.

TEA.

The market is gradually becoming more active as the stock of new crop teas is increased, and buyers find more desirable selections and at the same time become convinced that prices are now as low as they can expect them to go. For some time past there has been a stand off on prices between buyers and scllers, but the former have refused to make any concession and buyers are beginning to come to terms under the pressure of their current requirements. There has been a moderate business during the week with a greatly increased demand for invoices toward the close, and several transactions are said to be The sales closed have been mostly for small invoices, but the aggregate is fair. Oolongs show more strength and are moving moderately from recently arrived cargoes. Japans are strong with a limited inquiry, and Greens are selling well at full rates. Large offerings have been made at auction during the week but the amounts moved were not heavy, though what sales were effected realized satisfactory prices. From Wednesday's sale we quote Oolongs, 41@89c.; Souchongs, 41@80c.; Japans, 52%@70c.; do. Oolongs, 26%@30c.; Hyson, 31@70%c.; Young Hyson, 35@85c.; Gunpowder, 33%@\$1 16; Imperial, 38@75%c.; Twankys, 29%@34c. Sales have been effected in a regular way include 4,300 half chests Greens, 6,100 do Japans, 9,100 do Oolongs.

Impurts at New York the past week have included 630,613 lbs. Japan, per "Etta Loring," from Yokohama; 767,762 do. do., per "Leander," from same part; 73,100 lbs. black and 8,500 do. green, per "Beemah," from Hong Kong; 1,300 lbs. black and 63,401 do. green, per "Beemah," from Hong Kong; 1,300 lbs. black and 63,401 do. green, per "Bt. Paul," from do., and 551,065 lbs, black, per "Benefactor," from Foo Chow. The receipts indirectly have been 100 pkgs. by steamer and 1,398 by rail overland.

The following table shows the Imports of Tes into the United States from January 1 to date, in 1873 and 1672:

Green. 107,906 Japan. 1.393.875 Atlantic ports, 1873...lba.

The indirect receipts at New York, principally overland receipts from San Francisco, have been 1,498 pkgs, since January 1, against 2,659 last year. Imports at San Francisco from Jan. 1 to Dec. 16, 1872, were 1,273,209 lbs. of China and 2,212,128 lbs. of Japan tea.

COFFEE.

We have had another active week in coffee, and the market shows additional strength in all grades. A good jobbing movement has been in progress during the entire week, and liberal amounts of the Brazil and India grades have been distributed. West India descriptions are now well sold out of first hands, and the remaining stock is very firmly held, prices, where quotable, showing an improvement on our last figures. The market for Ceylon and Java has also been very strong, with liberal sales of the latter into consumption, and both grades are held at improved rates. There is a continued active inquiry for the Brazil grades, with sales from first hands about as fast as anything is offered. Rio has moved very freely here and at the ontports, and the sales have been almost entirely into second hands. But little coffee has been bought up by speculators during the season of activity, which has lasted for some weeks, and the present firmness is based on strong grounds. The Rio telegrams are very strong, and in addition to reporting a rise, they indicate prospects of a short crop. The prices ruling there at present are above our market and the outlook is favorable for still higher rates here, though we repeat our last quotations. Sales include 3,002 bags Rio ex "Merrimack," here, 5,410 do., ex "Jennings," 914 ex "Lord Baltimore," 1,514 do. to arrive, ex "A Pendergast," 900 do. ex "Erie" 853 ex "Caroline." At the out ports we notice dergast, '350 do. ex "Frie" 853 ex "Caroline." At the out ports we notice 2,170 bags to arrive at Mobile per "Hannibal," 7,461 per "Juno," 3,000 residne per "Faramount," and 2,193 per "Amalia," ull at New Orleans; and at Baltimore 1,750 per "Maggie V. Hugg," and 3,503 per Clyde," both before arrival; 5,000 ex "Tarpean," and 2,600 ex "Amazou."

5,000 ex "Taipean," and 2,000 ex "Amazou.

Imports at this port the past week have included 5,410 bags Rio, per "F. H. Jennings," 5,20 do. do. per "Brazil," 4,511 do. do. per "Bessel," 6,031 do. do; per "Carolina," 4,050 do. do. per "Anguste," 4,000 do. do. per "Empereza," 3,160 do. Santos per "England's Rose:" 2,651 do. Maracaibo per "Nicola Maria," 2,053 do. do. per "Allemannia;" 1,451 do. St. Domingo per "Rece Horse," 850 do. do. per "Herry Middleton," 400 do. do. per "Oliver Cutts," and 212 do sundries.

The stock of Rio Dec. 26, and the imports since Jan. 1, 1873, are as follows:

STIGATE.

There has been a limited call for raw sugars during the week, but the dull condition of the market for refined grades prevents refiners from operating on a very liberal scale. There is a large portion of the refining machinery still idle, and the stock of angar is well reduced, but the absence of a demand prevents the market from becoming bnoyant, and prices are heavy, granulated being shaded a trifle from our quotations of last week. Softs are dull, but remain fairly steady at old rates. The few sales of raw sugars for refining purposes have been at about previously quoted rates, and the market manifests a moderate degree of steadiness, the range of quotations remaining on a basis of 2@9%c. for fair to good. Holders are steady at these rates, with the stock not heavy and well controlled, but it is difficult to effect sales, and prices cannot be regarded as stable until the inquiry becomes more active. Sales since our last foot up 1.900 hbds. Cuba, all grades, 45 do. Demerara at 10%@11c.; 700 boxes Havana, 9%@9%c.; 12,000 bags Pernambuco, 9c.

Imports at New York this week, and stock in first hands Dec. 26, were:

MOLASSES.

The market for foreign grades of molasses has been neglected during the past week, and very few sales have been effected either of grocery or boiling There has been a moderate inquiry from the trade for the latter, qualities. and the sales of good qualities of foreign stock are assisted by the extreme high rates which the market for domestic has reached. The demand for New Orleans stock continues unabated, and some choice goods have been placed during the week at 73@74c. The ruling range on prime new molasses, however, is about 68@72c., anything selling above the latter figures having to be very choice. These high rates have increased the demand for syrups, and the supply is well run down. There is no molasses syrup in the market, and the production of sugar stock is barely sufficient to keep pace with the liberal de. mand from the trade. Prices are very strong on all grades, and rather favor sellers, except on foreign stock. The latter is firm in grocery grades, but refining qualities are slow of sale, and are somewhat nominal. We note sales of 50 hbds. Porto Rico. 1,500 bbls. new domestic at quotations.

The receipts at New York this week, and stock in first hands Dec. 26, were:

THE DRY GOODS TRADE.

FRIDAY, P. M., Jan. 10, 1873.

Now that the yearly settlement of accounts has progressed far towards completion, there are some indications of an improvement in the demand for goods, buyers from the more remote sections having already begun their purchases of staples for the spring trade. The trade is confined to package transactions, and has not as yet extended much beyond some of the leading qualities of c'tton fabrics. California buyers purchase their heavy stocks as ear y as possible, in order to make shipments by the water routes at low rates of freight, and these, with buyers from other remote localities in the West and Southwest, are the only purchasers who are in the market at present. Local buyers have taken up a few goods and have placed contracts in some instances for goods to be delivered later in the year, but their operations are restricted to the leading qualities of staple cottons, which are held in small sup ply by the agents. The general market is steady and as active as could be reasonably hoped for at this period of the year. If the predictions of the weatherwise regarding the probabilities of an early spring be fulfilled, we may look for an early opening of trade, though it is thought by many that the searcity of money in the interior will restrict the retail trade of the winter, and leave dealers with such full stocks at the opening of the spring season as will make them very cautious purchasers until the consump tive demand sets in with considerable activity.

DOMESTIC COTTON GOODS .- There has been a fairly active trade in most of the leading styles of cotton fabrics toward the close of the week, including liberal sales of some of the more popular brands of both brown and bleached sheetings and shirt ings in original packages. The stock of these goods is very much smaller than is usually held at this period of the year, and many makes of the finer descriptions of brown 'cottons are largely contracted for to arrive. Prices have not varied much on brown goods, but bleached fabrics have taken an upward turn and nearly all brands of the grade of Lonsdales are 1c. higher in first hands, and the advance is fully maintained. The demand for colored cottons has been light. Some sales are made for shipment to the West, but the general trade lacks animation. There has been a moderate call from the same source for medium or light effects in prints, but the offerings are small and poorly assorted as yet, and the aggregate business is unimportant.

DOMESTIC WOOLEN GOODS.—The week opened with very little inquiry for any grade of woolens, but toward the close there have been more buyers in the market, and with clothiers making fairly liberal selections the trade has assumed appearances of more animation. The movement has not become very general as yet owing to the fact that agents are holding back their choice samples until jobbers begin to make their selections. The reductions of stocks of winter weights was so far effected as to leave the market well cleared of old stock, and in a good position for the opening of the spring trade. Prices are not much above those of last year, on sales that have been effected thus far, but holders consider the position of the market favorable, and are looking forward to an advance upon the better grades.

Foreign Goods.—The movement in imported fabrics has been very light, and the market has been without feature of

interest. The year has not advanced far enough as yet to cause any important demand for these goods, excepting for the most staple varieties which are sold to a fair extent for shipment to the interior, and have been taken up in some cases by local dealers in anticipation of future wants. Prices abroad are stiffening daily, and a stronger tone is noticeable here on worsted and silk fabrics, which manufacturers have advised their agents here to hold at an advance.

We annex a few particulars of leading articles of domestic manufacture, our prices quoted being those of leading Jobbers:

Industrial Exhibition.

The Estimated Income

OF THE

Industrial Exhibition Comp'y is \$2,645,400.

READ THE REPORT BELOW, AND YOU WILL BE SATISFIED THAT AN INVESTMENT MADE IN THE STOCK OF THE

INDUSTRIAL EXHIBITION COMPANY

IS SAFE. The first \$2,000,000 of the stock is offered at 80; after Feb. 1 no stock will be sold at less than par.

Note-Any bank in New York will receive subscription.

As the cost of each lot is about \$4,700, an investment of that amount in this stock will entitle the holder to a "Lot" value in the property.

We, the undersigned, members of a special committee appointed at a public meeting, presided over by John A. Dix, at the St. James Hotel, on Friday, December 13, 1872, were instructed to examine and report as to the desirability and practicability of securing for New York a permanent Industrial Exhibition , Building, Art Gallery, Public Library, and Garden of Plants, and more especially as to the value and fitness of the land contracted for, have the honor to report:

First-That the Industrial Exhibition Company is a properly organized corporation, under a special Act of the Legislature of the State of New York with full power to purchase land, ereet huildings, and to do all other things necessary for the completion of the objects above enumerated. The property of the Industrial Exhibition Company is exempted from taxes and assessments for five years, and its stockholders are free from personal liability, and generally all powers are granted to it that will facilitate its objects.

Sacona-That the Industrial Exhibition Company of 1870 contracted for the land between Ninetyeighth and One-Hundred-and-Second streets and Third and Fourth avenues, comprising in all eight blocks of ground, besides the unopened streets and avenue. The price agreed upon was \$1,700,000, of which \$200,000 have been paid; that there remains due \$1,500,000, which must be paid on or before Feb. 1, 1873, or the contract for the land will expire and all moneys paid be forfeited.

The deed of this land has been executed to the Industrial Exhibition Company, and is held in escrow by the Union Trust Company, to be delivered whenever \$1,500,000 shall he paid. Your Committee have consulted with eminent real estate men as to the value of the land, and the lowest estimate placed on it after deducting all the streets (which are as valuable for the purposes of this Company as any other portion), is \$1,829,000 (and the streets being valued, at \$2,428,000). As we understand, this is the only piece of land in one location, owned or controlled by individuals, large enough for a World's Fair, lying south of 110th st., and its central location is proved by the fact that all the steam railroads running into New York have a side track on this ground. As an engineering necessity, any rapid transit railroad that may in future be built must go within four hundred feet of this 'property, if not directly upon it. The property Is solid rock, and at Ninety-eighth street, Third avenue, and Onc-Hundred-and-Second street there is an abrupt slope. It is estimated that this peculiar formation will save at least \$1,000,000 in the preparation of this ground for such a building and building foundations as are proposed. The Industrial Exhibition Company contracted for this

and building foundations as are proposed. The Industrial Exhibition Company contracted for this land in 1870. It was regarded as a good purchase theo, and has increased in value since, and will continue to increase.

Third—The estimated cost of a suitable building is about \$7.000,000, and in such an edifice all New Yorkers will feel a just pride.

Fourth—A proposition has been made by an eminent New England firm to construct a dome over the conrt, which dome shall be the largest and most magnificent in the World. All this firm ask is that they be granted a perpetual lease of the doma, above the spring of the arch, subject to reasonable conditions. The estimated cost of this dome is \$3.000,000. Sufficient bonds will be given for the performance of their contracts.

Figh.—Your committee is of the opinion that, if a sufficient amount of the stock of this Company is sold to acquire a free and unlucun-bered title to the land, there will be no difficulty in raising all the money requisite to erect a building.

Sixth—If this land is purchased and work commenced at once on the building, we hope the Congress of the United States will so favor the enterprise that a World's Fair can be opened here in 1876, under the auspices of the United States Government, which would be commemorative of the One-Hundredth Birthday of this our great

Republic. This need not interfere with the proposed "centennial" celebration in Philadelphia, but as we New Yorkers cannot but feel that we may celebrate in our own way and in our own city so important an occasion, and we also feel that if the world is to be brought together in a grand competitive exhibition in that year, that New York, being the commercial metropolis of the whole country, such world's fair should be held here. At no other place could the millions of visitors be accommodated. Financially, we believe that the land is worth more than is to be paid for it; and if the enterprise is carried out as proposed we do not see any possible chance of loss. In view of these facts—

1. We recommend, first, that a series of meetings be held for the purpose of awakening the people to the importance of this enterprise.

2. That a committee be appointed who shall, without delay, prepare a suitable memorial and present the same to Congress, and that such Committee have power to ask Congress to give such delvisible.

3. Also, a committee who shall confer with the

indorsement as may in their opinion be thought advisible.

3. Also, a committee who shall confer with the Mayor and Aldermen, as well as the Department of Public Parks, with a view of obtaining such privileges as municipalities have ordinarily given to such enterprises.

4. Also, a committee to confer with the Covernor of the State and the Legislature, with a view of obtaining such endorsement as will add to the dignity of the enterprise.

5. Also, a committee to prepare an address to the people of New York, the country, and the world.

6. Also, committees selected from the different branches of industries, to obtain an ascriptions to the stock of the Company from their respective associates.

branches of the Company from their respective associates,
We far-her recommend that here and now subscription papers he circulated. Your Committee believe that this enterprise is sound fin neighly, and if it is carried out that it will benefit every person in New York and prove of great advantage to the whole country, and they do earnestly recommend it to the serious consideration of all the people.

All of which is respectfully submitted.

being a special Committee for the purpose of appointing committees from each branch of business, and for localities dir city interested in seeing the completion of the project which has been loaugurated by the Industrial Exhibition Company, viz., the establishing in New York of a crystal palace to be used as a perpetual world's fair, have the honor to announce the following appointments. Owing to circumstances beyond our control we have been unable to see each of the gentlemen below named, but we feel confident that none of those whom we have selected will refuse to spend a small portion of his time between now and the first day of February next, for the purpose of making, in this, the commercial metropolis of the Western Hemisphere, an institution which will tend to elevate all of the people.

We have made the committees to represent each trade and commercial pursuit.

If we have overlooked any branch of business was shall regard it as a special favor to be communicated with and a suitable committee recommended, which will be at once appointed.

Each committee named below is requested to meet, elect from among its number a chairman, and organize for active work.

Each committee may add members.

A full report of the work done should be forwarded to the special committee on Jan. 29, 1873, and we request that the original subscriptions be forwarded to the Union Trust Company, 73 Broadway, each day.

A full explanation has been sent each member of the committee.

WHY IS MONEY EASIER?

Two points of monetary importance which are closely connected together are the further relaxation of the rate of interest to 6 per cent. in transactions where no risk is involved; and secondly, the return of National bank notes from the country. Some of our city banks have been selling National bank notes for greenbacks, to the brokers, at 1 per cent. discount; and these brokers sell them again at 1 per cent. to supply country banks. This discount pays the express charges, which are \$1 per \$1,000 to Chicago, or about one-tenth per cent.; while to the chief points in Ohio the expressage is about 75 cents a thousand, or one-thirteenth per cent. The sudden accumulation of bank notes, and the resulting ease to the money market is not a novel movement. It was first noticed about four or five years ago, and it has gone on increasing till last year, when it reached its maxi mum. This year the plethora has been less noteworthy as yet. Its causes are partly the general settlement of accounts all over the country at the end of the year. With a view to these payments, currency has been accumulating in the pockets and hoards of the country people for many previous months. As these hoards are depleted and paid out, the currency finds its way very soon into the banks, and like the tributary streams of some vast river, when ones in motion. the mass in a short time begins to pour itself visibly this way.

Another cause is the payment of the local taxes in Ohio, Pennsylvania, Massachusetts and New York. These taxes, to the amount of 90 millions of dollars, are paid, for the most part, about the 1st January to the County Treasurers, who have, many of them, borrowed beforehand on the security of these maturing fiscal dues. The local banks, who are the official depositories, receive the currency thus coming in, and the total flow to this city thus acquires from all parts of the country a considerable volume. Towards the close of the month the incoming movement of currency is arrested, and does not begin again till summer; when, from the cessation of business in the country, less currency is wanted; and in obedience to well-known forces, it flows hither to swell the over-expanded resources of our summer money market.

There are thus two great tidal accumulations of bank-notes in this city-the greater one in July, when greenbacks accumulate here as well as bank-notes; and the lesser one in January, which is occurring now, and chiefly brings in National Bank currency without more than perhaps five to fifteen per cent of greenbacks. But why, it is asked, do the bank-notes thus predominate. The reason is well known. The banks all over the country pay out banknotes in preference to greenbacks. The people do the same. Thus the greenbacks are hoarded by the banks and by the public, and such greenbacks as get into the country banks at this season are not sent here unless in exceptional cases and to as limited an extent as possible. Should any adequate system of bank-note redemption be devised which could be efficiently worked, it would correct these spasmodic accumulations of currency at the financial centres, especially that of the summer, which is the most troublesome of all. The winter plethora, as we have said, is this year abating of itself; partly, perhaps, for the reason that the local taxes and other settlements are being paid by the people a little less promptly than in former years of greater prosperity. Money has been so tight all over the country that our people are indulging in more delay in their payments than usual.

indulging in more delay in their payments than usual. We have thus in full activity one of the great conditions of an easy money-market, namely, an abundance of cur rency. Another condition, the abundance of floating capital seeking to invest itself on call, is not quite so active. And this for several reasons. We have had very heavy drafts on our loan market during the past year. Our railroad building, for example, has absorbed 423 millions of dollars, while other permanent investments have swallowed up perhaps two or three times that sum besides. Now it has been believed that a less portion of this morey than formerly has been borrowed abroad. This opinion receives confirmation from the report of last year's foreign loans negotiated in the London money market. An elaborate statement, occupying three columns of the London Times, has been compiled by Messrs. Spackman & Sons, which shows that various municipal and other loans for thia country had absorbed nineteen millions sterling, or 95 millions of during the year. dollars does not include our shipments of U. bonds, railroad shares, and miscellaneous securities. What amount of these have been exported to Germany and England is doubtful. The demand fell off about July, but was active up to that time, so that we may perhaps set down the total at one-third as much more, making the aggregate of European capital lent here 125 millions of dollars. This sum, large as it seems, represents less than one-tenth of the capital we have in various ways invested during the year. Still it is a great relief of our burden that we have had so copious a stream of foreign money flowing this way and helping to protect our loan market from the well-known and dreaded results of too severe and too sudden a depletion. But how, it is demanded, do these streams of foreign capital reach us? The inquirer should look over the statistics of our foreign commerce. They show that we imported goods last year to the value of 428 millions, while we could not export more than 276 millions, specie included. For the balance, 152 millions, we partly exported securities, and we partly owe it still, on current accounts or otherwise. If the securities we have exported amount, as estimated, to 125 millions, we have 27 millions of foreign debt to begin the new year with, in addition to that running a twelvemonth ago. These facts disclose some of the causes why our money market shows signs of being depleted of floating capital, and they suggest reasons for believing that no serious trouble will come of it.

MR. SUERMAN ON SPECIE RESUMPTION.

The title to Mr. Sherman's bill is a misnomer. He should rather have called it an act to prevent resumption than to help it. As precented on Thursday, the bill contains six sections. The first orders the Secretary of the Treasury to sell his gold at par for greenbacks; but at his option he may refuse to sell gold to any applicant, and may compel that person to take 5 per cent bonds in exchange for his greenbacks. This section we give below as a curious waif of proposed legislation:

That on the 1st day of January, 1874, the Secretary of the

Treasury is authorized and required to pay on demand, at the office of the Assistant Treasurer in the city of New York, to any holder of United States notes to the amount of \$1,000, or any multiple thereof, in exchange for such netes, an equal amount of the gold coin of the United States; or in lieu of coin, he may, at his option, issue in exchange for said notes an equal amount of conpon or registered bonds of the United States in such form as he may prescribe, and of denominations of \$50, or some multiple of that sum, redeemable in coin of the present standard value, at the pleasure of the United States, after ten years from the date of their issue, and bearing interest payable quarterly in auch coin at the rate of five per centum per annum; and the Secretary of the Treasury may reissue the United States notes so received, or if they are cancelled may issue United States notes to the same amount, either to purchase or redeem the public debt or meet the current payments for the public services; and the said bonds and the interest thereon shall be exempt from the payment of all taxes or duties of the United States, as well as from taxation line any form by or under State, municipal er local authority; and the said bonds shall have set forth and expressed upon their face the above specified conditions, and shall, with their coupons, be made payable at the Treasury of the United States.

If any such provision should ever get itself enacted, it is easy to see how wide a door would be opened to jobbery and corruption. Any man to whom the Secretary chose to sell gold could get it at par. No other man could get it at all. It is also easy to see how soon the Treasury would be drained, and how its gold would pass as by magic into the hands of those whom the "option" preterred. The Secretary is bound to sell gold at par or not at all; for it would be insufferable that he should sell at par to some persons and at a premium to others. How long he could keep his gold balance on these conditions is a curious problem in financial dynamics. Several enthusiasts have at various times been extremely anxious to disperse the gold reserves of the Treasury. They would succeed by this law to their hearts' content.

Leaving the Treasury, this cormorant bill swoops down on the National Banks. Its second section aims at that young and not very vigorous system a fatal blow. After July 1, there is to be no limit imposed by law on the note issues. The banks may emit as many notes as they please on depositing bonds issued under the section given above, or under the last loan bill of July 14, 1870. How much per cent of currency may be issued on these bonds is a delicate question on which the bill is mute. But the work of despatching the National banks is not yet finished.

The next blow is against another vital part. It destroys the reserves. The third section of the bill declares that all banking associations which, after July 1, 1874, redeem their notes, shall be exempt from the obligation to hold reserves. An insignificant and unnessary exception is made in regard to gold banks. The gold reserves of the Treasury and the lawful reserves of the banks being thus dispersed and dissipated, the bill very significantly provides against the time when conservative bankers will be afraid to issue notes, and enacts that National banks may be organized without circulation on depositing at Washington \$10,000 or upwards of United States bonds.

Such is the newest product of financial reform at Wash. ington. In view of such crude and reckless schemes gravely proposed in the Senate of the United States is there any wonder that the credit of our Government bonds is so very low in Europe? Is it strange that although we have paid 300 or 400 millions of our public debt, a fiscal achievement greater than has ever been done by any other nation o ancient and medern times, still our bonds rule so low and take their place in the stock lists of Europe among poor company? Here is a bill proposed by the Chairmau of the Finance Committee of what foreigners would call our Upper House. And what this bill proposes to do is to sell off at ten or twelve per cent, below its present market value all the available gold in the vaults of the Treasury. But this is not all. Under the law of 3d March, 1863, the Treasury may issue \$120 of

coin certificates for every \$100 of actual coin. These phantom gold notes would no doubt soon be issued in payment of interest, and they would eventually be presented for payment at an empty Treasury under the pressure of some of those panics which seem as normal in this zone of the continent as earthquakes and tornados are in others—panics which, for half a century or more, have periodically desolated cur country, and which can never be safely left unprovided for in any financial system which aims to be of use among us.

Against the overwhelming force of such panics we have three safeguards. First, the gold in the Treasury, which gives stability to the government credit, ensures the prompt payment of the interest on the public debt, underlies the United States bonds which are the basis of our financial organism, and gives the whole fabric a solidity unsurpassed by any monetary system ever set up in this country.

Secondly, we have impassable bounds fixed against an increase of bank notes. Hence that currency is an instrument of commerce as stable in its value as it can be while it is a legal tender and is so imperfectly redeemed. Every country in Europe, except England and Germany, has now an irredeemable currency like outs. At present ours is the best of them all. Notwithstanding its defects it is a more efficient instrument than the paper money of Austria, Italy, Russia or France. Mr. Sherman would fasten on his country the blighting curse of sure, rapid depreciation. He would remove the breakwater which shuts out an inundation of legal tender paper-money, the course and end of which baffles the wisdom of man to foresee.

The third of our saleguards against panic is the reserves of the banks. These give to our commercial credits the same stability which the Treasury gold gives to the government credit, and which a limitation of the bank-notes attempts for the stability and standard value of that delicate instrument, the currency. Having dispersed the government reserves, the reserves of the banks next vanish at the bidding of this financial measure, and if our national credit and the stability of our government bonds do not suffer at home and abroad by this attack upon them, that result will be arrested only by the assurance that Congress legislates on finance much better that it talks. Moreover, the present session is so short that no financial measures whatever can easily get themselves enacted into laws; so that this lopeful prodigy which we have been looking at will be strangled as surely as others of the same pestiferous brood have perished so often before.

THE REPORT OF THE SENATE FINANCE COMMITTEE ON GREEN-BACK ISSUES.

The majority of the Senate Finance Committee have just reported that there is no law for the five million overissue of greenbacks in October. This report is thoroughly approved by public opinion, and stamps the seal of illegality on any inflating of the legal tender currency. For two reasons there is no positive blame charged upon the Secretary or his Assistant for the recent issue. Mr. Boutwell himself was absent at the time it was done, and his duties temporarily devolved on Mr. Richardson, who advised the overissue; backed, it is said, by the Cabinet, and approved by Secretary Boutwell on his return to his duties at Washington. But this emission, though unlawful, was urged by so many prominent persons who claimed to have given invaluable political aid to the government, and the consequences of refusing were depicted in such dark colors that a sort of semi-panic seems to have been stirred up at the Treasury. An examination of the laws suggested a superficial argument to favor its legality, and without due consideration the law was broken and the issue made. Exactly where the blame should be placed, and how it should be dis-

tributed, does not seem very easy to discover. And enough, perhaps, has been done, both in and out of Congress, to prevent such a semi-panic in Washington from repeating the same mischief again.

But, secondly, the Committee were not required to apportion the blame of the wrong-doing. All that they had to do under the resolution of the 6th inst. was to "inquire whether the Secretary of the Treasury has power, under existing law, to issue greenbacks in lieu of the 44 millions retired and cancelled under the act of April 12, 1866." With this "inquiry" their duties were at an end. The Committee voted 5 to 2 on the adoption of the report.

lt is now proposed that Congress shall pass a new law prohibiting the future issue of greenback currency. But why, it may be asked, should the Secretary be prohibited from doing this any more than any other unlawful act? If there is no man, and no body of men in this country who possess the power in time of peace to issue greenbacks, why make any penal law to prohibit it? The Supreme Court of the United States has virtually settled this question. The whole country accepts the doctrine almost without hesitation that the right to issue greenbacks can only stand on one ground, namely, that the power to issue was used by Congress as an incident to the war-power and to the ancillary powers of "borrowing money, coining money, and providing for the natural defence and general welfare." If we had not been at war not a dollar of leg il tender paper money could have been issued in 1862, or in any later year. From this doctrine it follows that since the establishment of peace in 1865 the power to issue greenbacks has lapsed, that no vestige of such power remained even in Congress, and that this paralyzed and abolished power could be quickened and made alive by nothing short of a new war. Even this authority has been disputed. Many persons of eminence have doubted whether Congress, even in time of war, and as an incident of the war-power, could, under the Constitution of the United States, issue legal tender paper money. Under the various decisions of the Supreme Court which we have heretofore reviewed in the CHRONICLE, the true doctrine may be held to be established as we have limited it, and while Congress is the sole depository of such powers to issue paper money as may be compatible with the Constitution, even Congress itself is debarred such powers and forbidden such issues of legal tender paper except under the pressing necessity of war.

But why, it has been asked, if this le so, did not the greentacks disappear with the war? For answer we will refer to the report before us, which shows how the power to issue legal tender money has been exercised and used by Congress.

It was first asserted and exercised by Congress Feb. 25, 1862, when to coin the public credit into money seemed the only expedient left to maintain the authority of the Government during a pressing war. This authority was again exercised July 11, 1862, and March 3, 1863. These several acts declared the United States notes to be lawful money and a legal tender in payment of all debts, public or private, within the United States, except for duties on imports and interest on the public debt, and were to be issued only if required by the exigency of the public service, for the payment of the army and navy and other creditors of the Government. The amount of each issue was carefully limited. The aggregate could not exceed \$450,000,000, and in fact nev exceeded \$433,160,569. The power thus exercised was felt to be a dangerous one, liable to abuse, and was carefully limited and guarded. Though the war continued two years and more after the passage of the act of March 3, 1863, and immense sums were borrowed upon various forms of security, the limit of United States notes was not enlarged. By the provise in section 2 of the act of June 30, 1864, under which the national debt was largely increased, it was provided among other limitations, "Nor shall the total amount of United States notes issued, or to be issued, ever exceed \$400,000,000, and such additional sum not exceeding \$50,000,000, as may be temporarily required for the redemption of temporary leans." It is apparent that this provision in a loan act was not only a limitation upon previous acts authorizing United States notes, but was a declaration of public authorizing United States notes, but was a declaration of public authorizing United States notes, but was a declaration of public authorizing united States notes, but was a declaration of public authorizing united States notes, but was a declaration of public authorizing united States notes, but was a declaration of public authorizing united States notes, but was a declaration of public authorizing united State

that their securities should not ever thereafter be impaired by any increase in legal-tender notes. The United States notes were regarded as a necessary medium or means to borrow money dur-ing war, and with full knowledge that in due time they were to be redeemed in coin, and that any increase would impair their value and affect the value of all public securities.

Here we have the data for answering the inquiry why the greenbacks did not vanish from circulation when the war was over. The reason was that the greenbacks were depreciated. They were payable in coin on demand, but the Government was unable to pay them in coin. This inability was due to two causes; first, that the Treasury had not gold enough to redeem these greenbacks from the channels of the circulation, and to supply their place with coin. Secondly, a more important reason still was that our paper money was depreciated. The greenback dollar was of less value than the specie dollar. This depreciation was due to over-issues and could only be properly corrected by contracting the issues, by retiring and cancelling the excesssive volume of greenbacks. These, then, are the reasons why the war-paper money did not die with the war. It was a legacy which lived after the conflict and lives and troubles us still. But this depreciation lives only till it can be shaken off by contraction of the volume of currency within its proper bounds and channels. The process of contraction began about the close of the war and till now no act has been done by the Treasury hostile to it. These points are well illustrated by the committee in the following paragraphs:

The close of the war was followed with measures, by both the executive and legislative branches of the Government, to still furexecutive and legislative branches of the Government, to still further limit and reduce the volume of legal tender notes. All forms of temporary lean, including the legal-tender interest-bearing Treasury notes, were funded into bonds. For this purpose a portion of the \$50,000,000 of reserved United States notes, under the act of June 30, 1864, was used for the redemption of temporary loans, but these notes were soon redeemed and cancelled, and with the usual policy of contracting the current. The same with the usual policy of contracting the currency. The act of April 12, 1866, referred to in the resolution of the Senate, was The act of of Mr. McCulloch, then Secretary of the Treasury, to retire all short-time liabilities by funding them into bonds and to reduce the volume of United States notes so that those remaining outstanding should be, from their scarcity, at par with gold. The only limitation made to this power of centraction was by the fol-

Provided, That of United States notes not more than \$10,000,000 may be retired and canceled within six months from the passage of this act, and thereafter not more than \$4,000,000 in any one month.

Why this policy of contraction, so needful for resumption of specie payments, was suspended we explained not long ago. On this subject our views are substantially the same as those of this report. It is important to notice that Congress has never attempted since the war to arrogate to itself the right to issue greenbacks. Still less has Congress attempted to confer that power by direct legislation on the Secretary of the Treasury or any other officer of the govern The Committee, in closing their report, sum up the whole question as follows:

Such a power, if given, would be by clear and unambiguous language, and should not be inferred by subtle reasoning or depend upon the pressure of interested parties or changing views of public policy. In all questions of construction as to the extent of powers conferred by law, in matters which affect the public credit or public securities, a reasonable doubt as to a grant of power should be held to exclude it.

After a careful review of the subject, your Committee are of the opinion that the Secretary of the Treasury has not the power to issue United States notes in excess of \$356,000,000 outstanding, when the act of Feb. 4, 1868, took effect, but he may replace, with new notes, all mutilated or defaced notes, and within the limit of \$356,000,000 may exchange or replace new potes for all ones and \$356,000,000 may exchange or replace new notes for old ones, and

poor, one may exchange of replace new notes for old ones, and your Committee report the following resolution:

Resolved, That in the opinion of the Senate the Secretary of the Treasury has not the power, under existing law, to issue United States notes for any portion of the \$44,000,000 of United States notes retired and cauceled under the act approved April 12, 1866.

RAILROAD EARNINGS FOR DECEMBER AND FOR THE YEARS 1872 AND 1871.

Railroad earnings for the month of December, 1872, so

general an increase in comparison with 1871 as several pre vious months have shown. It is to be remembered, however, in noticing the amount of increase or decrease, that December earnings are usually smaller in the gross amount than those of the preceding autumn months, and consequently the increase in the traffic on particular roads appears smaller in amount, although it may be quite as large a percentage compared with the corresponding month of last year. The Central Pacific, Union Pacific, and Lake Shore roads are most conspicuous for a large increase in earnings, and the Illinois Central is still noticeable for a decrease. A greater interest centres, at the present moment, in the earnings for the whole year 1872, which we notice at some length below.

Railroad earnings for the month of December were as follows:

RAILROAD EARNINGS IN DECEMBER.

^{*} Fourth week of December estimated. † Approximate by telegraph.

The whole year 1872, being now completed, it is possible to make a comparison with the previous year; in regard to some roads, also, the expenses have been reported, enabling us to see what the net earnings have been. The Central Pacific reports \$12,900,126 gross earnings in 1872 -\$5,375,000 operating expenses (November and December approximate) and \$7,525,126 net earnings, against \$5,171, 192 net earnings in 1871. The Union Pacific has now its complete reports to the end of November, and shows for the eleven months \$3,686,004 net earnings, against \$3,768,-597 tor the same time in 1871, but the gross earnings show a large excess, and part of the heavy operating expenses are due to large expenditures recently made to provide against snow blockades hereafter. The gross receipts of the Philadelphia & Reading Company in the year ending November 30, 1872 were \$12,125,038, and the net receipts \$945,444 less than last year.

The annual report of Cleveland & Pittsburg states the far as they have yet been reported, do not show quite as receipts for rental, interest and sinking fund at \$1,030,121

and disbursements at \$1,028,152, leaving \$1,768 balance uu-

The most important falling off in earnings is shown by the Illinois Central Railroad, amounting to the gross sum of \$478,499. This is, undoubtedly, owing to the circumstances set forth in the President's report last year; namely, the rapid increase in the construction of new lines, which drain the country formerly monopolized by the Central. This movement results in taking a great quantity of produce direct to the East from the interior of Illinois, which formerly went to Chicago before transportation to the East could be obtained.

The following is an estimate of the receipts, expenses, and

net earnings of the Central Railroad Company of New Jersey for the year 1872, compared with the year 1871:

The receipts and expenses for December are estimated, and the result will probably be better than shown.

A number of prominent roads have materially increased their mileage. Among these are the Central Pacific, Chicago & Northwestern, Milwaukee & St. Paul, and others; either by new construction or by leasing branch roads. We shall give hereafter a statement of the number of miles operated at the beginning of the year, upon which their earnings, as reported, were based.

THE INDIA COTTON CROP.

There appears to be a wide diversity of opinion here as to the extent of the present cotton crop of India and the time of its being marketed this year. We have from month to month set out in our cotton report the successive steps in its favorable progress towards maturity, and have also given our reasons for believing that the shipments after the present date and before the monsoon will be larger than is generally anticipated. To-day as a further guide to an Intelligent opinion upon the subject we have prepared the two following statements. The first is a compilation of semi monthly extracts from Bombay circulars respecting the weather and progress of the crop the past two years, beginning with the monsoon. The more thorough acquaintance we have with the surroundings of the India plant from the first preparation of the grond to its maturity, the more correct will be our judgement as to results: these extracts will help us o gain such information as to the present and previous crop. We begin with the monsoon, knowing that the extent of the monsoon is usually a pretty correct measurement of the extent of the crop:

1872.

1872-June 20th-The southwest monsoon burst on the 11th Instant, but there was no heavy fall of rain till the night of the 18th. The bulk of the receipta has come by railway, it being no longer safe for native craft to venture to sea. Holders have been able to atore their cotton this year comparatively free from rain damage. The estimate of the quantity put in Godowo is 116,000 bales, about 30,000 more than the estimate last year. No estimates from the districts as to the probable stocks held there at the commencement of the monsoon, but it is thought there is much less than last year. Rain has been general throughout the country and a beginning has been already made in some parts to prepare the ground for crops. The high prices that have been ruling throughout the past season will probably induce cultivators to devote as much land as possible to cotton.

July 4th-The rainfall so far has been very satisfactory, upwards of thirty inches having been guaged to date. From all the districts we hear the rain fall has been very satisfactory, and preparations for sowing are being rapidly pushed forward. It seems beyond a doubt that the stock of cotton still to come forward from the interior is very much less than last year, and much under the average quantity for some years back. In the port of Dhollera 1,500 hales against 15,000, and stocks in other parts of Kattywar are in about the same proportion. In Guzerat stocks are exhausted, and in the Berars there are 2,000 to 3,000 bales; in the Dharwar districts and ports the estimate of stock is 55,000 to 65,000.

July 18th-The weather has been more moderate, but rain has fallen daily Our advices from the districts report a continuance of favorable weather in all parts, and that the cotton plants in the carlier districts have come op, looking strong and healthy; should the rest of the season be as favorable as the commencement a large and fine crop may be expected.

August 1st—Receipts expected to be triffing till the monsoon is over and coast traffic can be resumed. Even after the monsoon it is generally considered that the figures will fall short of those of last year, as the stock in the interior is very small. The rain fall has been heavy both here and in the districts, and it is reported from some quarters that it has been excessive, and has washed away the young planta. There is, however, plenty of time for resowing. From the Oomrawutty districts we are advised that a break in the weather was much wanted to enable the cultivators to weed the cotton fields in some of which the young plants were being choked.

August 15th-The weather reports from all quarters continue to be very satisfactory. Comrawutty and Hingunghaut districts the weather has been fine enough to permit of weeding, which has been actively carried on. In some parts of Guzerat, particularly about Veerumgaam, some replanting will be necessary to replace damage done by excessive rains, which have, however, now cleared up. We are advised that, notwithstanding the decline in prices: the ryota are not taking advantage of having to resow to put down other crops than cotton.

August 29th-The stock of cotton in Bombay is estimated at about 50,000 bales, of which the greater part is of very poor quality and badly mixed with dirt, seed, etc. Accounts of the Hingunghaut and Oomeawatty crops are very favorable, and the weather so far has been all that could be desired. Weeding has been pretty generally completed and the plants look very floorishing. In Guzerat the plants were looking a little unhealthy on account of too much moisture, but of late have been steadily improving. In Kattywar cotton and

moisture, but of late have been steadily improving. In Katiywar cotton and all crops are said to be looking exceedingly well, and a correspondent advises as that, shouldthere te no unecasonable rain or blight from cold this year the cotton crop will be a very fine one, and that, judging from the fields in the districts he passed through, it should be a month earlier than last one.

September 12—The coasting trade has not yet reopened. The appearances of the weather indicate an early termination of the monson, but the reports from the interior are to the effect that the plants are so strong that they can do quite well without further rain. The plants are beginning to flower in early districts. Heavy rain fell in Broach at the beginning of the month, and It was feared some damage might have resulted, but telegrams from Broach and Snrat received yesterday advise "catton crops healthy." The picking season is expected to be late. From Katiywar the news continues to estisfactory. In Scinde cotton prespects are reported "fair." Locusts have done some damage to the young plants, but less to indigenous than exotic varieties

1871-June 20-The monsoon set in quickly on the evening of the 6th inst. and during the interval but little rain has fallen, only about eight inches having been registered to date. It is impossible to catimate with accuracy the quantity of last crop left in the country. The natives generally seem to calculate that not more than 85,000 bales have been put into Godown here, and that about 220,000 to 225,000 remain in the districts.

July 4-The weather during the fortnight has been comparatively five and open, and our rainfall up to date only amounts to about 14 inches, against 24 to same time last year. Arrivals by sea are now entirely stopped. mate of stock given in our last is now generally accepted. Above Ghant the rainfall has been more satisfactory than In the Concan, and planting appears to be going on freely. By latest accounts from the Dhollera districts, how-ever, the weather still continues fine.

July 18-During the early part of the fortnight the weather continued open.

to be going on freely. By latest accounts from the Dhollera districts, however, the weather still continues fine.

July 12—During the early part of the fortnight the weather continued open, but latterly we have had heavy rains and strong winds. Tha fall to date is 20 tochea, against 40 last year. In the Dhollera and Kattywar districts the fall has been guite triffing, and it is likely that much land which was asown in anticipation of the first rains will be the strength of the first rains will be a standard to the first rains will be a fall and the late of the first fall has been guite triffing, and the first fall has been guite triffing, and the first fall has been guite triffing and the first fall has been more favorable. We have no fland will be available for cotion, the early rains were insufficient to acre the first sowings, but the later fall has been more favorable. We have no reliable information as to the acreage planted as compared with last year, but present appearances do not favor the expectation of any increase in the total outturn of the crop.

August 1—The weather report of the Cotton Commissioner for the central provinces and the Berars was published on 25th uit., and reported more unfavorably of the condition of the crops in the early part of the season than the public expected, but later advices contain news of a more satisfactory fall of rain, and the prospects of the yield are more favorable; no important variations expected in acreage in these districts, and a slight increase in Higginghan. In the Khandeish districts and in Sholapore the rainfall has been acreased in the self strength of the season than the public expected, but later advices contain news of a more satisfactory fall of rain, and the prospects of the report here will turn four very bear ance of plant on the whole promising. Steady rain set in In Dharwar on 21st. Fall in Bombay 21@28 inches, against 50 to same time last year.

Ang. 15—The accounts from the up country on the whole have been more favorable. On the 12th instant

In the Sonthern Maratha country sowing has been nearly completed. A very violent storm passed over Bombay, and a heavy fail or rain took place. September in the cashed is not yet settled. The severe storm tow from alluded in our last caused serious loss of life and property in Bombay, Guzerat and Khandeish. Several bridges and a considerable portion of the railway to Ahmedabad were carried away and communication has not yet been reasoned. We are glad that cotton has not he case sorticuly tage best able to feared as the storms. The most injury has been done in the Broch districts, where late-sown fields have been washed away. In the Comrawutty and Hinghon; haut districts the plants are in full flower and lock very well. The season is, however, a late one and supplies are not looked for until were pivil become, and only very little Comrawutty the month later than last year. In Kattywar and Schilde locatiss are doing damage to the cercal crops, but cotton has not been touched. In Dharwar cotton sewing is said to be nearly floished. October 12—The menson appears to be over. No cotton has well been expected. We have been expected on the green, but dealers will probably begin to put out their stocks after the present native children are not and any flower and any store that all the contract of t

in in the Sholapore districts at the end of last month has not been so heavy as was honed for. A portion of the crops of cotton and grain will probably he naved, but we fear that the general feet will be entry unastance for From he have the sent and the general feet will be entry unastance. From the sent the general feet will be growing core. From the accommendation of the crops will be also districts there is a commenced under favorable circumstances, and with seasonable weather henceforward a large yield is looked for from that quarter.

The rainfall in Bombay so far is only 40 inches, and in the districts there is expected in the districts there is expected in the control of the

The foregoing statements show-First, that the crop of 1871 was shortened by several circumstances: 1. In many districts the Commissioners reported a decrease in acreage—for instance, 250,000 acres less are reported for three districts alone. 2. The low ange of prices ruling at the end of May, 1871, had a tendency to curtail the planting. 3. An abundance of rain during the monsoon is of vital importance for cotton in India, and the season of 1871 was very unfavorable in this respect. On the 1st of August, 1871, only 28 inches were guaged against 50 inches in 1870, and on the 30th of September it was remarked that the rain fall had been less than in any monsoon since the very short one of 1855. Replanting was necessary in some districts, and nearly all sections suffered from want of sufficient moisture. 4. After the monsoon, the accepted estimate of the last crop was about seven-eighths of an average, and less old cotton was reported in the country than in 1870. Second-As to the present crop, the following favorable circumstances appear: 1. The monsoon was satisfactory and abundant. 2. There was an increased acreage put under cotton this year. In this connection it is interesting to remember that the average prices in 1872 were fully 25 per cent higher in Bombay than in 1871. 3. The season since the monsoon has been highly satisfactory.

If then it is admitted, as at present the advices evidently indicate, that the crop now being picked is to be considerably larger than last year's crop, the only remaining question is, when will it be marketed? As throwing light upon this point we give the following table showing the monthly shipments from Bombay for seven years from 1866 to 1872, both inclusive. It will be noticed that for the five years, 1867 to 1871 inclusive, there is but a slight difference, comparing one year with another.

MONTHLY SHIPMENTS FROM BOMBAY FOR EUROPE FOR THE PAST SEVEN YEARS.

CHANGES IN THE REDEEMING AGENTS OF NATIONAL BANKS.

The following are the changes in the Redeeming Agents of National Banks approved since the 9th inst. These weekly changes are turnished by, and published in accordance with an arrangement made with the Comptroller of the Currency:

LOCATION.	NAME OF BANK.	REDEEMING AGENT.
Illinois— Joliet	tional Bank	ty National Bank of Chicago.
Rhode Island— Providence	The Globe National Bank	The National Exchange Bank of Bos- ton, approved as an additional Re- demption Agent.
Pennsylvania— Pittsburgh	The Union National Bank	The Importers and Traders National Bank of New York, approved in place of The Ninth National Bank of New York,
Colorado— Central City	The Rocky Moun- tain Nat'nal Bank	The Fourth National Bank of New York, approved in place of The Mer- cantile National Bank of New York.

New National Banks.

The following is the only National Bank organized during the past week, viz.:

Official No. 2,074—The Citizens' National Bank of the City of Yonkers, N. Y. Authorized capital, \$100,000; paid in capital, \$50,000. Chas. H. Hamilton, President; Jonathan Vall, Cashier. Authorized to commence business January 15, 1873.

[From our own correspondent.]

LONDON, Saturday, December 28.

The holidays have engaged so much of the public attention this week that there is very little that is fresh to report. As regards American affairs the week is almost without a feature; but in spite of the restricted character of the business in progress, a firm tone prevails. The rapid advance in Eric Railway shares has led to some difficulties in that market and one failure is reported, while another dealer is said to have to pay on Monday as large a sum as £24,000 in "differences" in connection with that stock alone. There have been additional failures, chiefly in the Manchester trade; but those recorded up to the present time, though naturally causing anxiety, can scarcely be considered as evidence of the unsoundness of our position. Indeed, taking into consider. ation the unprecedented bounds of our commerce, the high prices which were attained during the summer months for many commodities, and the recent considerable fall, the few suspensions which have been recorded justify the assertion that trade and speculation have not been conducted recklessly. There is no doubt that the commercial body believe in the sound and healthy condition of our trade, and hence they are anticipating a good and remunerative business in 1873.

The money market has again become easy. There is just new a large demand in consequence of the approaching close of the year and the usual desire which is shown to possess large balances at the banks on December 31. The fact, however, in no way affects the general condition of the money market. The supply of money has become more than ample for our requirements, and there is an impression that the rate will decline to 4 per cent. Gold continues to accumulate in this market, and the supply held by the bank is large, so that, in many respects, the commencement of the New Year will be satisfactory. For a few days, however, the rates in the open market are certain to be equal to the bank minl.

mum, after which period the question of a reduction would appear to be a simple subject for discussion. The following are the quotations for money:

Per cent.	Per cent.
Bank rate 6	4 months' bank bills 474@5
Open-market rates:	6 months' bank hills 4% 02.5
80 and 60 days' bills4%	4 and 6 months' trade bills, 5 @5%

In the stock and share markets a firm tone has been apparent; but in consequence of the holidaya and the settlement of the final account of the year, business has been restricted. British railway shares are decidedly better, the Christmas traffic being, it is thought, of an unusually extensive character, the weather having been mild and bright. Erie shares have fairly supported the recent improvement in their value. The following were the closing prices of consols and the principal American securities this afternoon:

In the corn market there has been extreme quietness, and scarcely any change in prices. For good and fine dry wheats the market is firm in tone, the scarcity of that quality of English produce being very great. The weather is still mild and open, and the heavy land farmers continue to suffer from the excessive moisture, but on light and chalky soils, the young wheat plant looks promising.

The following return shows the imports and exports of grain, &c., Into and from the United Kingdom since harvest, vis.

from September 1 to the close of last week, compared with the corresponding periods in the three previous years:

	IMPORT	78.

In the cotton market very little has been done this week owing to the intervention of the holidays. The following relates to the trade of Manchester:

to the trade of Manchester:

Considering that this market has been influenced during the past fortnight by a succession of heavy failures, which have always a more or less depressing effect, prices have remained very steady, and there has been an absence of that panic-stricken appearance which has senally been the case under similar circumstances on previous occasions. This, doubtless, is owing to the large orders which producers have on hand, and the absence of large stocks of eitner yarns or cloth. Fortunately, also, the tension on the money market has been relaxed before these failures occurred. Moreover, most of three failures have been of a sectional nature so far, many of the firms which have succumbed having been dependent upon each other. The discovery that there was so much had accommodation paper afloat has undoubtedly given a shock to credit; but, fortunately, this mischievous system of trading, or rather of reckless gambling, has not extended into the general trade of the district. That merchants trading upon their means have suffered heavy and successive losses is, we fear, too true; but, fortunately, they had a good deal of capital to fall back upon, and the best proof of the stability of many large and important firms is that they have been able to curtail their business for some time back.

This market has been quite to-day, but prices remain quite firm. Little business is now looked for during the few remaining days of the year. Owing to the holidays, this has been quite abroken week, and for the same reason, probably, the receipts of cutton at the American ports may have failen of considerably. However, the imports into Liverpool bave begun to increase materially, and spinners will have a better choice or elong. They have bought rather freely of late, and are not without stocks of cutton.

Export yaros have been little inquired for, hoth water twist and mule yarus are well engaged, some favorite spinnings being heavily so. Quotations of 16's to 24's water and 40's mule are unchanged since Tues

à week since, but they appear to be indifferent about taking further orders for the present.

In home-trade yarns there has also been a very limited business done during the week. In 32 a cop twist there is no change in price since Tuesday. Fine cop twist from 603 to 80 and corresponding numbers of weft yaros are still scarce, and command high prices.

The cloth market has been inanimate during the week; 40ln., 45ln. and 50ln. shirtings are all tolerably well sold, and remain steady. Printing cloth also keeps steady, but some makes are difficult to sell, and occasional stocks are to be met with. Coarse and heavy descriptions of cloth remain rather flat, and bad to sell at full prices.

English Market Reports-Per Cable.

The daily closing quotations in the markets of London and Liverpool for the past week have been reported by submarine telegraph. as shown in the following summarv:

London Money and Stock Market .- American securities close at an advance of $\frac{1}{4}$ on 10-40s and a decline of $\frac{1}{8}$ on 67s.

The bulllon in the Bank of England has increased £214,000 the past week.

COMMERCIAL AND MISCELLANEOUS NEWS.

IMPORTS AND EXPORTS FOR THE WEEK .- The imports this IMPORTS AND EXPORTS FOR THE WEEK.—The imports this week show an increase in dry goods and a decrease in general merchandise. The total imports amount to \$5,348,106 this week, against \$6,286,904 last week, and \$4,575,759 the previous week. The exports are \$4,454,423 this week, against \$3,513,906 last week, and \$4,107,290 the previous week. The exports of cotton the past week were 10,835 bales, against 16,205 bales last week. The following are the imports at New York for week ending (for dry goods) Jan. 9, and for the week ending (for general merchandise) Jan. 10:

Dry goods		YORK FOR 1871. \$1,811,342 3,829,450	THE WEEK. 1872. \$1,617,996 4,631,205	1878. \$1,562,478 3,785,628

CHRONICLE of Jan. 11, a gentleman who is a member of a firm of stock brokers in this city writes, us as follows:

"This explanation may possibly be satisfactory to the holders of the \$85,000 of bonds. Granting that it is so, that they accept the compromise offered by the company and surrender their mortgage, there will, nevertheless, still remain uncancelled yet another mortgage on all the property of the Atlantic, Tennessee & Ohio Railroad Company of prior date to that executed in favor of the holders of the company's 8 per cent. gold bonds. This mortgage—for \$2,000,000—was executed in the spring of 1869, to the State of North Carolina, to secure the State against loss on mortgage—for \$2,000,000—was executed in the spring of 1869, to the State of North Carolina, to secure the State against loss on her own 6 per cent. bonds for the same amount issued to the Atlantic, Tennessee & Ohio Railroad Company. About \$150,000 of these State bonds are outstanding, and the holders are endeavoring to have the State's lien transferred to them. The matter is now before the courts at Raleigh."

"A Holder of North Carolina State Bonds Issued to the Atlantic, Tennessee & Ohio Railroad Company."

The Chiagge Pailergy Page 1 gand 1 double number include.

—The Chicago Railway Review issued a double number including the weeks December 28, 1872, and January 4, 1873, in which they gave a statement in much detail showing the progress of railroad building in this country in the year 1872. The Review is now the principal railroad newspaper published at the West and has shown much enterprise in hydrogen states. and has shown much enterprise in business since the losses by Chicago fire, so that its annual statement will be received with much consideration by all who are interested in railroads.

The Railroad Gazette publishes this week an extended review of railroads constructed in the United States during the year 1872. The editors state that this record la not a mixture of guesses and ascertained facts, like most of the kind, but is made up from reperts made to them by railroad officers, compared with the information received weekly throughout the year; has been compiled with the utmost care and enormous labor, and is very nearly correct. This record makes the mileage completed in 1872, 7,364. The most careful record for 1871 gave 7,202 miles as the aggregate that year. We have always regarded the Gazette as one of the very best of our railroad exchanges, and we have much confidence in the statements of its editors.

—As will be seen by a notice in our advertising columns, the Phenix Insurance Company of Brooklyn—office 173 Broadway, N. Y.—will pay its usual semi-annual dividend of 5 per cent on the 20th inst. The Phenix in passing through the fiery ordeals of Chicago and Boston does not seem to have lost any of its energy.

BANKING AND FINANCIAL.

BANKING OFFICE OF FISK & HATCH.

New York, Jan. 17, 1873.

The CHESAPEAKE and OHIO, the CENTRAL and WEST-ERN PACIFIC BONDS, all of which have been negetiated by us, we believe to be among the best and most desirable Invest ment Securities in the market, which in time must become very scarce; especially as the Government will probably, during this year, pay off in gold another large lot of FIVE-TWENTIES, and issue in their place FIVE PER CENT. BONDS.

The CHESAPEAKE AND OHIO SIX PER CENT. GOLD BONDS, the total amennt of which is only \$15,000,000, are secured upon a property worth \$35,000,000 to \$40,000,000, and are fully equal in intrinsic value to the CENTRAL PACIFIC BONDS They are issued in denominations of \$100, \$500 and \$1,000, coupon or registered, and at their present market price, 86 and accrued interest, are very desirable.

The CENTRAL PACIFIC SIX PER CENT. GOLD BONDS are too well known to require description or commendation. Their total amount is \$25,885,000; they have for a long time ranged in market price near or above par.

The WESTERN PACIFIC SIX PER CENT. GOLD BONDS amount to \$2,735,000. This road is now consolidated with the CENTRAL PACIFIC, and the payment of its bends, principal and interest, is assumed by the latter. Coupon Bonds, \$1,000 each. Their market price to-day is 90 to 90‡. As they have recently been introduced on the Stock Exchange, we expect to see them rapidly rise to the price of CENTRAL PACIFICS, being substantially the same in character and value.

We buy and sell, as usual, Government Bonds, receive deposits, on which we allow interest, make collections, and conduct a general banking business in all its branches.

FISK & HATCH.

TO INVESTORS.

To those who wish to REINVEST JANUARY COUPONS OR DIVIDENDS, and those who wish to INCREASE THEIR INCOME from means already invested in other less profitable securities, we recommend the Seven-Thirty Gold Bends of the Northern Pacific Railroad Company as well secured and unusually productive.

The bonds are always convertible at Ten per cent. premium (1·10) into the Company's Lands at Market Prices. The Rate of Interest (seven and three-tenths per cent. gold) is equal now to about 8½ currency—yielding an income more than one third greater than U. S. 5-20's. Gold Checks for the semi-annual interest on the Registered Bonds are mailed to the Post Office address of the owner. All marketable stocks and bonds are received in exchange for Northern Pacifics ON MOST FAVORABLE TERMS.

JAY COOKE & CO., New York, Philadelphia, and Washington, Financial Agents Northern Pacific Railroad Co.

BANKING HOUSE OF HENRY CLEWS & Co., 32 Wall street, N. Y.

Bills of Exchange, Circular Notes, Travelers' and Commercial Credits issued available in all parts of the world.

Deposits received, subject to check on demand. Interest allowed on all Daily Balances, every accommodation and facility afforded usual with City Banks.

MONEY TO LOAN ON COTTON IN STORE.

R. M. WATERS & CO,, 56 Broad street.

TO GUARDIANS AND EXECUTORS.

THE EQUITABLE TRUST COMPANY—Capital, \$1,000,000—are offering First Mortgage Real Estate Bonds, guaranteed by themselves, at par and accrued interest. Every Bond is secured by Real Estate of double value, appraised under the most rigid rules, and approved by the following Executive Committee: ROBERT LENOX KENEDY, ADRIAN ISELIN, JOHN D. MAXWELL, CHARLES BUTLER, SAMUEL WILLETS, EUGENE KELLY, PETER McMartin, WM. REMSEN and HENRY P. HAVEN,

JONATHAN EDWARDS, President, No. 76 CEDAR STREET, N.Y.

FRIDAY EVENINO, Jan. 17, 1873.

The Money Market.—The decided tendency towards easier rates, both on call loans and commercial paper, which we noticed in our last report, has since been further developed, and for the first time in many weeks we are able to report the New York money market telerably easy. The ruling rates on call since Tnesday have been from 6 to 7 per cent., according to the collateral furnished. It is hoped, of course, now that we shall have a more healthy tone in monetary affairs for some time to come. Last year, however, rates began to harden again as early as February, and the relaxation which followed the January disbursements was of short duration.

Just at the present moment of the unfavorable features of partners began to barden again.

Just at the present moment one of the unfavorable features of our market is the plethora of national bank notes and scarcity of greenbacks, and this condition of affairs suggests, as usual, the necessity of a practical law providing for the redemption of these notes.

Commercial paper is more active and sells at lower rates; the standard quotation is 8@10 per cent, though some transactions have been made down to $7\frac{1}{2}$ for very choice paper, and the tendency is evidently towards better prices for sellers. It is noticeable that long paper sells quite as well as 60 days^2 paper.

able that long paper sells quite as well as 60 days' paper.

Advices from London report a continuance of ease in money, the bank rate remaining at 4½, and the gain in bullion this week

amounting to £214,000.

The last statement or our New York city backs (January 11) showed an increase of \$1,902,000 in the excess of reserves. The total liabilities stood at \$234,903,000; the total reserve at \$63,415,-

total liabilities stood at \$234,903,000; the total reserve at \$63,415,800, being \$4,690,025 more than 25 per cent of the liabilities.

The following statement shows the changes from previous week and a comparison with 1872 and 1871:

_		1873		1872.	1971.
	Jan. 1.	Jan. 11.	Differences.	Jan. 13	Jan. 14

United States Honds.—The principal feature of the market for Government Securities has been the prevalence of a good demand from both foreign and home purchasers, and a scarcity of bonds, which is very perceptible whenever attempts are made to purchase round lots. Without some material advance in the bids made for Governments, it seems hardly probable that foreign buyers will be able to obtain any very considerable amounts from our market. A material advance in prices would, of course, draw out bends from the hands of present helders. At the Treasury purchase on Wednesdsy \$218,600 were offered, and \$197,600 were taken as below par in gold, and paid for entirely with National Bank notes.

Closing prices daily, and the range since Jan. 1, have been:

State and Railroad Bonds.—There have been very few transactions in Southern State bonds, and the dealings in these securities must necessarily be attended with considerable uncertainty as long as the several Legislatures are in session and liable at any time to pass laws which might be prejudicial to the interests of bondholders. Louisiana and Arkansas are still in default on their January interest, though it has been rumored that the Louisiana interest would be paid soon. In Virginia the auditor, pursuant to a decision of the courts, will now direct the receivers of taxes that coupons must be taken in payment when offered. Coupons have sold here up to 83, but were not better than 80 bid this afterneon.

this afternoon.

Railroad bonds have been in good demand, and a well-distributed business has been done throughout the list. The New York Central & Hudson will issue \$10,000,000, or £2,000,000, of thier \$40,000,000 loan in sterling bonds. The Eric Railway directors have authorized \$10,000,000 new bonds, provided they can be sold at par, the bonds to be convertible into stock at par.

Closing prices daily, and the range since Jan. 1, have been:

Railroad and Miseellaneous Stocks .- The stock market has not yet shown a decided movement, and continues comparatively steady within a moderate range of fluctuations. There has been no sharp upward turn as yet, and we have frequently referred to the fact, that the leading speculators are not yet committed in favor of higher prices. It has been evident that prices were extremely well supported during the latter part of last year, considering the extraordinary severity of the money pressure, lasting for many weeks, and no basis for a strong upward movement in stocks has been furnished at this time by the existence of previous low prices. existence of previous low prices.

The market appears to be in a reasonably healthy condition, and a steady movement at or about the prices now ruling, may be preferable for the generality of dealers, to an unsettled market

and violent fluctuations.

The following were the highest and lowest prices of the active list of railroad and miscellaneous stocks on each day of the last week:

The Gold Market .- There have been more speculative purchases of gold this week, and the price has advanced.

cipal support to the market is apparently found in the fact that exports have recently been resumed, and exchange is ruling high enough to warrant further shipments. There are some parties also who believe very confidently that gold will go higher, in consequence of the large shipments during 1872; the trade balance against this country in merchandize; and the prespect, as they think, that American securities will not continue to be sent abroad

think, that American securities will not continue to be sent abroad in as large amounts as they have previously been.

The rates on gold loans to-day were 4, 4½, 5, 3, and 1 per cent. for carrying, and flat for borrowing. On Thursday the bids at the Treasury sale amounted to \$4,915,500, and the entire amount, \$1,000,000, was sold to one party at 112.52½. Customs receipts for the week amount to \$2,727,000.

The following table will show the course of the gold premium each day of the part week.

each day of the past week:

Foreign Exchange. The exchange market continues strong roday, though early in the week some leading bankers were drawing quite freely at 109½0109½ for 60 days' bills, probably against cotton exchange purchased South. Cotton has recently been coming in more freely, and as bills are purchased at the South by agents of our bankers, the effect upon this market always follows very closely the purchase of these bills. The general aspect of the market is strong, and unless checked by a higher range of gold or other unforeseen events the prospect seems good for continued firmness.

In regard to the negotistion of American securities, abroad the

higher range of gold or other unforeseen events the prospect seems good for continued firmness.

In regard to the negotiation of American securities abroad the London Times has published an interesting table showing the amount of various loans placed in that market in 1872, upon which the Post comments to-day as follows: "The amount paid on American State and city loans aggregated £4,936,445, while the amount actually put into American securities, being new issues of existing companies, which amount includes the railroad loans placed in London, was £12,876,713. The total of all these in dollars amounts to about \$95,000,000. This total does not include shipments of unknown amounts of miscellaneous stocks (like Erie) and bonds already current in this and the foreign markets, nor does it include the United States bonds sent abroad—a comparatively small amount. It is estimated that the total cash value of our securities sold in London last year amounted to at least \$110,000,000. And it is a fair estimate that the German markets took \$15,000,000 to \$20,000,000 more. The whole amount paid up at London on loans and stocks marketed there during 1872 is £133,000,000 or \$660,000,000, of which only \$15,000,000 was for home (or English) enterprises, with the remainder distributed between the United States and other foreign countries. It is proper to say that the greater of the American securities taken in London and Germany were marketed during the early part of the year, the European demand four securities for the past six months having been small although the American securities taken in London and Germany were marketed during the early part of the year, the European demand for our securities for the past six months having been small, although there are indications that it is now reviving. The figures given above throw some light on the question of how our excessive importations of foreign merchandise have been paid for, or, in other words, how our balance of trade has been settled."

STATE, CITY AND CORPORATION FINANCES.

EXPLANATION OF STOCK AND BOND TABLES.

1. Prices of the most Active Stocks and Bonds are given in the "Bankers' Gazette," previously. Full quotations of all other securities will be found on preceding pages.

2. Government Securities, with full information in regard to each issue, the periods of interest payment, size or denomination of bonds, and numerous other details, are given in the U.S. Debt statement published in The Chronicle on the first of each month

3. City Honds, and Bank, Insurance, City Raliroad and Gas Stocks, with quotations, will usually be published the first three weeks of each month, on the page immediately preceding this.

4. The Complete Tables of State Securities, City Securities, and Railroad and Miscellaneous Stocks and Bonds will be regularly published on the last Saturday in each month. The publication of these tables, occupying fourteen pages, requires the issue of a supplement, which is neatly stitched in with the usual edition and farnished to all regular subscribers of The Chronicle.

Debt and Fluances of New York State.—The following contains the principal points of State Comptreller Hopkins' report for the fiscal year ending September 30, 1872:

The following statements show the amount of the funded debt

of the State and the balances in the several sinking funds:

DEET.

On the 30th of September, 1871 and 1872, the total funded debt was as follows: 1872. \$3,988,526 Contingent Canal Bonaty 68,000 11,966,580 22,047,000 11,396,680 21,121,000 **\$36.574.206**

Actual reduction of the State debt during the fiscal year ending

September 30, 1872, by cancellation of matured stocks and those purchased on account of bounty debt sinking fund, \$1,547,400.

The following statement shows the amount of the State debt on the 30th of September, 1872, after deducting the unapplied balances of the sinking funds at that date:

General FnadContingent Canal Bounty	Debt on the 30th Sept., 1872. \$3,988,526 68,000 11,396,680 21,121,000	Balances of Sinking Funds on 30th Sept., 1872. *\$2,787,567 19,710 1,449,978 †6,930,224	Bal, of Debt after applying Sink'g Funds. \$1,200,958 48,289 9,946,701 14,190,775
Total	ved since the e .ed to October :	lose of the fiscal year 1, 1872, payable Janu	ary 1, 1873.
nnapplied balances of the On the 30th September, 1872	siaking funds,	amounted to	\$29,482,702

REVENUES.

The statement of expenditures for the last fiscal year shows an apparent deficiency of \$9,148,836 92. The account may be stated as follows:

Course and Loris in St.	
Deficiency as above	\$9,148,836 92
Comptroller's bonds for temporary leans to the Treasury	2,225,000 00
Accrned interest on same	35,000 00

\$11,408,836 92

The following sums are applicable to the reduction of this amount:

- \$6,599,913 97

Actual deficiency Sept. 30, 1872...... \$4,808,922 95

This is \$757,763 86 in excess of the estimates in the annual report of my predecessor, transmitted to the Legislature at its last session. This excess is due to a diminution in the receipts and the payment in part of large appropriations authorized by the Legislature of 1872, properly chargeable to the tax levy for the current year.

TAXATION.

There is no public question in which the people have so direct

an interest as that of taxation.

It is respectfully submitted that the legislature has seemed sometimes to have lost sight of the legitimate object of taxation. It has been the practice of the legislature to appropriate large sums of money for purposes of a strictly private character. A striking example of this is the appropriations which have been made to charitable institutions under the control and direction of

private corporations or individuals.

The increase in taxation has been so great, that widespread ap The increase in taxation has been so great, that widespread apprehension and solicitude has been created in the public mind. The rate has increased in the last ten years from five mills to nine and three-eighths mills on a dollar. The vicious practice has prevailed of passing bills making large appropriations at the close of the legislative ression, evidently without having received the examination and consideration which ought to have been given to them, and without, it is feared, the members of the legislature or many of them, knowing their purpose or extent. When the Comptroller entered upon his official duties, he found a deficiency in the treasure amounting to some \$6.500.000, which a deficiency in the tressury amounting to some \$6,500,000, which deficiency was produced, as above stated, by the excess of appropriations over revenues from all sources, including taxation.

TAXES. In 1862 the state tax was. In 1872 the state tax was. In 1872 the tax for all purposes known to this office was. In 1872 the tax for all purposes known to this office was.	19,580,882 30 19,456,288 40
	2,088,627,445 00
Increase in ten years	\$639,323,497 OO

Increase of valuation of 1872 over 1871, \$36,089,547. The state tax for the current fiscal year is 9g mills, for the fol-

	ing purposes:			
For	schools		13(n	nills
For	general purposes		134	64
For	bounty debt	8	2	6.6
For	new capitol		36	6.6
For	new capitol		9-80	6.6
l'ar	new work un canals and extra repairs		7-10	64
For	academies and union schools		1 16	8.6
For	canal and General Fund deficiencies		31/2	44

The above tax of 9\$ mills on the present valuation will yield \$19,580,S82 30.

It will be noted that the largest amount ever paid and received to meet the requirements of the government is the amount now in process of collection for the current year, and that the rate per

dollar upon the valuation of the property of the state is considerably larger than any rate ever before imposed.

Exclusive of extraordinary work on the canals and work on the new capitol the following rate will be necessary for the ensuing fiscal year:

For	general	fund.																								2	mi	lle.	
For	schools																									130		16	
For	bounty	loan																			 ď					2		16	
For	schools bounty floating	capal	deh	t, c	hs	p.	2	171	١,	1a	W	8	0	1	1	85	9			 		 ,				1/6	-	14	
																									-				
	Total.																									5%		L-B	

The above estimate is based on the assumption that the legisature will not sanction extraordinary appropriations for any new enterprize, however deserving, unless a corresponding tax is laid. The following statement shows the tolls received on each canal and the total expenditures for ordinary and extraordinary repairs

and new work during the fiscal year ending Sept. 30, 1872:

Canals.	Income.	Disbursements.
Erle Canal	\$2,760,147 70	\$1,657,021 11
Champlain Canal	150,614-28	489,083 08
Oswego Canal	90,795 57	313.458 76
Cayuga and Seucca Canal	17,892 58	64,586 25
Chemnug Canal	4,129 81	118,081-90
Chenango Canal	5,690-67	383,717 60
Black River Caual	10,838 86	119,479 35
Genesee Valley Canal	18,528 36	229,618 80
Oncida Lake Canal		5,710 0 0
Baldwinsville Canal		150 00
Oneida River improvement	650 00	
Seneca River towlng-path	154-86	
Cayuga Inlet	304 56	152 33
Crooked Lake canal	270 24	13,705 25
	\$3,060,329,89	\$3,374,701,96

Total disbursements on all canals in excess of all income... 314,873 00

Total income in excess of disbursements for ordinary repairs. 1,070,623 70

The following statement exhibits the receipts at lake ports as compared with the receipts at New York and at tide water by the Erie and Champlain canals. The receipts at each point include flour, reckoning each barrel of flour as equal to five bushels of wheat:

			Tide-water ly
Receipts at Years	Lake Ports.	New York.	N.Y. can's.
1868 busb	els. 115,297,465	70,068,428	52 426,300
1869	134,314,979	64,417,121	40,625.240
1870	136,996,800	68,895,632	38,116,600

Virginia Finances .- A special message to the Sepate from Gov. Walker, Jan. 13, recommends the reduction of the principal of the debt by the sale and application of the proceeds of the assets of the railroad, bonds and stock and non-productive proassets of the railroad, bonds and stock and non-productive property of the State, by which the proportion of the debt assumed by Virginia will be reduced to \$26,000,000; the annual interest on which will be \$1,560,000. It recommends certain changes and reforms in the State government, thereby reducing its annual expenses to \$600,000. It recommends the equalization and correction of assessments and the more thorough assessment of persection of the state of rection of assessments and the more thorough assessment of personal property, by which the total assessed valuation of real and personal property will reach four hundred millions of dollars, the annual tax upon which will be two millions. The tax from other sources is estimated at \$800,000, making the total revenue of \$2,800,000, of which \$400,000 is to be appropriated to schools, leaving a balance of \$2,400,000 available to pay the interest on the public debt and the current expenses of the State government.

The Governor says the interest upon the bonds funded under

the public debt and the current expenses of the State government. The Governor says the interest upon the bonds funded under the act of March 30, 1871, that is, the Funding act, must be paid, and no mode of avoiding it can be devised, even if we desired it. He shows that the interest due and unpaid on these bonds on the first of January, 1873, and that which will fall due by the first of January, 1874, will amount to nearly \$2,600,000, which amount, added to the other indebtedness falling due during the current year, makes a total of ever \$4,260,000 to be provided for by the first of January, 1874. first of January, 1874.

The resolution of the llouse of Delegates inviting the holders of Virginia bonds to a conference with a special committee of the General Assembly on the 3d of February has been amended so that if the resolution is approved by the Governor, or allowed to go into effect, the conference will be held in Richmond on the 15th of February.

Baltimore & Ohio Bailroad-Main Stem and Branches. Returns for the Fiscal Year Ending September 30, 1872

	CHARACTERISTICS OF ROAD.	
Main Stem-	Baltimore, Md., to Wheeling, W. Va. (double)379.6 miles	
	Winchester & Potomac Railroad—Harper's Ferry to Winchester & Strasburg Railroad—Winchester to	
Branches.	Strasburg Mairoad Waveston to Hagers	

The other leased lines, constituting portions of the B. & O. R. R. system, and operated under the same auspices, but reporting their operations separately, are as follows:

Washington Branch Railroad Relay House to Washington 30.0 r	nilea.
Parkersburg Branch Railroad - Grafton to Parkersburg	46
Central Ohio Railroad—Bel-Air to Columbus	44
Sandusky, Mansfield & Newark R. R Sandusky to Newark	11
Wheeling, Pittsburg & Baltimore R. R.—Wuceling to Washington, 32,0	44
Newark, Somerset & Straitsville R. RNewark to Shawnee Valley 41.0	14

The earnings, working expenses and net results of the main stem, and the other roads and branches, owned, leased and controlled by the Company, are shown aggregately in the following table, viz.:

		Gross	working	Ner
	of R.R.	Earnings.	Expenses.	Earnings.
Main stem and branches	. 454.6	\$10,654,472	\$6,122,400	\$1,532,072

Boston and Maine Railroad, (Returns for the Fiscal Year ended Sept. 30, 1872.)

On February 17, 1871, an act authorizing the extension of the B. & M. R. R. to Portland was approved by the Governor of Maine, and on March 16, 1871, accepted by the stockholders. The work was completed in December, 1872, and trains are now running on the Company's line from Boston to Portland. The original of the company of the compa nal estimate for construction was about \$2,000,000; but the actual cost will be nearly \$3,000,000.

Boston, Clinton and Fitchburg Railroad -(Returns for

Fiscal Year Ended Sept. 30, 1872.)

The Boston, Clinton and Fitchburg (formerly Agricultural Branch) Railroad, 28.97 miles, and the Fitchburg and Worcester Railroad, 13.90 miles, were consolidated July 1, 1869, under the then legal title of the first named railroad. More recently the theoretical states of the consolidated and now constant the Managell and consolidated company leased and now operate the Mansfeld and Framingham Railroad, 21.25 miles, and the Framingham and Lowell Railroad, 26.12 miles. Including these leases the company now operate 90.24 miles of railroad.

Richmond, Fredericksburg, and Potomac Hallroad. (Returns for Fiscal Year Ended Sept. 30, 1872.)

The Richmond, Fredericksburg & Potomac Railroad forms an important link in the coast line of railroads south of the Potomae important link in the coast line of rairboads south of the Potonae river. On the 18th day of July,, under arrangements with the Alexandria & Fredericksburg and the Baltimore and Potomac Railroad Companies, the night lines in both directions between Richmond and Washington were opened, and since then through cars have been run regularly between Weldon and Baltimore.

Although the amount of traffic in tons and number of passen-Although the amount of traffic in tons and number of passengers carried during the past year is greater than that of any previous year, yet the gross receipts derived therefrom are less than those realized from the smaller business of the preceding year, and the receipts per ton for coal transported in 1872 are less than those of any year since 1862. Had the company been able to maintain the same rates for tolls and transportation of coal as were either in force during 1871, or realized as the average charges of the past ten years, the profits for the year just closed would have been far in excess of those of any previous year.

During the year 50,190 shares of stock, representing a par value of \$2,509,500, were created and issued in exchange for a similar amount of convertible bonds of the company.

Of all former issues of convertible bonds there are yet out standing only the following:

The 7 per cent sterling loan of 1872, amounting as per last report to \$110,400, was retired during the year, and in its place \$110,000 of the consolidated mortgage bonds of 1911 issued. place

The Philadelphia and Reading Coal and Iron Company has continued to increase its ownership of lands, and now controls over 80,000 acres of anthracite coal lands, upon which there are 95 collieries. Most of these collieries are worked by lessees, but 27 of the largest of them are now owned and will be worked by the company.

The tonnage of these lands last year was 3,030,880 820 tons, and the rents derived from this tonnage amounted to \$346,774 69, Almost the entire issue of \$19,000,000 of the consolidated mortgage loan was applied to the purchase and development of the lands, in addition to which the bonds of the Coal and Iron Company, guaranteed by the Philadelphia and Reading Railroad Company to the extent of \$11121,000 large loan, issuad, but the Company, to the extent of \$11,131,000 have been issued for the same purpose.

The Coal and Iron Company will mine next year between two millions and two and a half millions of tons from its own lands, and including this product it is believed that the entire production

and including this product it is believed that the entire production of coal upon its estates will amount to at least four midion one hundred thousand tons during the year 1873.

For the purpose of aiding in the development of these lands, building additional steam collieries, extending some of the branch railroads, constructing additional rolling stock, etc., etc., the managers have issued a prospectus for a new debenture loan of \$10,500,000 of 7, per cent coupon bonds, payable in 1893, and convertible into the stock of the company at par at any time after the first day of July, 1876, and before the first day of January, 1892, giving to each stockholder the right to subscribe at par, not only for his proportion of the entire loan, but for his proportion only for his proportion of the entire loan, but for his proportion of such of the surplus as would not be taken by other stockholders.

The following statement shows the amount of subscriptions received:

	Whole amount of loan \$10,500,000
	Pro rata subscriptions \$ 4,513,000 Surplus aubscriptions 1,214,400
1	Total subscriptiona \$12.857,400

The whole loan was thus taken at par without the payment of by commissions by the Company. Of the entire subscription, any commissions by the Company. Of the entire subscr \$2,305,630 had been paid in cash up to the end of the year.

Erle Railway-New Bonds .- On Tuesday, Jan. 14, the Erle Board of directors met at the Eric offices, and after disposing of the usual routine business the directors went immediately into the discussion of the new loan. After some talk on the subject a resolution was proposed and carried which authorized the company to issue 7 per cent, convertible bonds for \$10,000,000, provided the same bonds can be negotiated at par, the proceeds to be used for the purpose of laying a third rail and a double track along the line of road. Part of the proceeds of the sale of the bonds will also probably be used in laying steel rails over the line. It is the intention of the directors to offer these bonds on line. It is the intention of the directors to offer these bonds on the English market, where they anticipate a ready sale, as English speculators appear to have recovered confidence in Eric since the change of management. The resolution defines very plainly that the bonds are not to be sold lower than par, and also sates that the interest on such bonds will be payable in both London and New York. On motion, the resignation of Mr. J. B. Hodgskin, the treasurer of the road, was accepted, and Mr. William Pitt Sherman was unanimously elected in his place. No other luminess of importance was transacted. business of importance was transacted.

N. Y. Central & Hudson.—The directors met on Saturday, Jan. 11, and authorized a change in the form of the \$40,000,000 bonds for the issue of which authority was given some time ago, bonds for the issue of which authority was given some time ago, it was originally intended to make the entire issue in dollar bonds, bearing 7 per cent currency. Authority was given at this meeting to issue instead £2,000,000 sterling bonds, bearing 6 per cent gold interest, equivalent to \$10,000,000 dollar bonds—and \$20,000,000 dollar bonds bearing 7 per cent currency. This action of the directors, together with semi-official statements to that effect show that there is no intention of raising the tender to that effect. show that there is no intention of raising the money necessary to lay two new tracks to Buffalo by making a scrip dividend and calling up a certain percentage of it in cash, as laid been runored of late by the speculators for a rise in the stock.

Harlem Extension.—This road is to be sold at Bennington, Vt., Jan. 20, by order of the Court of Chancery of Vermont, in a foreclosure suit, the Union Trust Company of New York Leiug plaintiffs in the suit. The amount claimed is \$4,655,000 and costs. The company which was formed by the consolidation of the Lehanon Springs, the Bennington & Rutland, and the Vermont & New York companies has a road from Chatham, N. V., to Bennington, Vt., 116 miles. For the year ending September 30, 1871, the last for which we have reports, the operating expenses of the road (including payments for car service) exceeded its receipts by \$9,885. The total mortgage debt is \$1,000,000.

Southern Trans-Continental Raitway Company. A meeting of the stockholders of this company is to be held on Harlem Extension .- This road is to be sold at Benning-

meeting of the stockholders of this company is to be held on the 22d day of January, 1873, for the purpose of ratifying the consolidation of this company with the Texas & Pacific Railway Company.

Central Pacific Railroad .- Messrs. Fisk & Hatch, the bankers of this company, have issued their usual annual statement of the business of the company, showing that the gross earnings for the year exhibit an increase of over 33 1-3 per cent.; and the net earn-ings over operating expenses have increased over 40 per cent. as compared with 1871.

The following comparison shows the per centage of operating expenses to gross earnings for the years 1871 and 1872:

Earnings, Expenses, Earnings, to Earn 1871. \$9,467,072 \$4,295,879 \$5,171,192 45 33-100 1872. *12,793,001 5,327,376 7,455,625 41 65 100	
---	--

The following table, exhibiting the earnings per mile of road operated for the past few years, shows that the increase in traff c and earnings for the year 1872 is largely in excess of the increased

Average No. of Miles		Earnings
Operated.	Gross Earnings.	per Mile.
1869 601	\$5,716,115 54	\$9,511
1870 865	7,995,116 18	9,243
1871	9,467,072 15	9,155
1872 1175	*12,793,001 91	10,896

*The actual earnings for 1872, published subsequent to the date of the report, were over \$100,000 greater, being \$12,900,126.

The bonded debt outstanding is given with every detail in the tables of the Chronicle published each month.

tables of the CHRONICLE published each month.

With the completion of the California & Oregon Branch the entire system of lines, composing the Central Pacific Railroad and branches will be finished, and the comprehensive plans of the company will be consummated. Upon this branch, as the work progresses, the company will have the right to issue \$7,200,000 additional first mortgage bonds, of which \$2,080,000 are now authorized by the terms of the mortgage upon the amount of work already done, and \$750,000 have been sold during the year.

The entire first mortgage debt of the company with its main

The entire first mortgage debt of the company, with its main line and branches completed, and the authorized amount of first mortgage bonds all issued, and the annual interest thereon, will be as follows:

oc as follows.

Net earnings for 1872

Surplus..... \$3,258,338 From the foregoing it will be seen that in 1872 the net earnings were sufficient to pay the annual interest on the entire bonded debt of the company outstanding, and on the remaining amount of bonds authorized to be issued upon the California and Oregon

branch when completed, and the unissued bonds of the San Francisco, Oakland and Alameda, and leave a surplus of over \$3,300,000, sufficient to pay a dividend of six per cent. on the issued cipital stock of the company.

The capital stock account of the company remains as stated in

our last report, viz.:
Authorized capital stock
Amount of capital stock subscribed

Amount of capital stock subscribed

Amount of capital stock paid in

54,283,190

No dividends have as yet been paid upon the capital stock, the surplus earnings, after paying interest and providing for the sinking funds in accordance with the terms of the mortgages, having been applied to the extension of the branch lines, increased equipment, improvement of water fronts, buildings, &c., thus adding largely to the value of the company's property, without a corresponding increase in the funded debt.

SAN FRANCISCO, January 14.—The Board of Supervisors of this city, last night, unanimously adopted a resolution expressing the willingness of the city to grant to the Central Pacific Railroad Company such facilities on Mission Bay as may be necessary to bring railroad cars and ships together; provided the company will withdraw the Goat Island bill from Congress, and make Mission Bay their permaneut terminus.

Chicago & Northwestern Raffroad. - The Chicago Northwestern Railway Company has completed its extension to the Lake Superior region, which is now closely connected with Chicago and the world at large. The same company has also completed two more of its extensions, that running from Geneva to Batavia, in Illinois, and that running from Stanwood, on its Iowa Division, to Tipton, Iowa. The Madison extension, in Wis-Iowa Division, to Tipton, Iowa. The Madison extension, in Wisconsin, is also substantially completed, supplying the only missing link for a through connection from Chicago to St. Paul. Four kundred miles of track are added to the Northwestern railway

by these extensions, giving the company a total of 2,000 miles of track. The first train from Milwaukee over the new steel-rail line of the Milwaukee and St. Paul Company has reached Chicago, but regular trains do not begin running until some time in January. The 6th day of January, Chicago and St. Paul were put in direct communication with each other.

Rockford, Rock Island, & St. Louis.—A supplement to the greement between the company and its bondholders has Rockford, Rock Island, & St. Louis.—A supplement to the agreement between the company and its bondholders has been agreed upon, to the effect that no pledge of the road may be made, or second mortgage issued, without the consent of a majority of the preferred stockholders (who are the bondholders). The chief points of the agreement are:

1. The bonded debt of \$9,000,000 to be reduced by one-half, and preferred stock of the same par value to be accepted by the bondholders for the other half. Gold interest at the rate of 7 per cent, to be paid on the reduced bonded debt, beginning with the half-yearly coupon due February 1, 1873. The preference shares are to receive 7 per cent, dividends before anything is vaid on

are to receive 7 per cent. dividends before anything is paid on common stock.

common stock.

2. For the three coupons, Nos. 6, 7 and 8, now past due, amounting to \$945,000, debt certificates bearing 4 per cent. interest are to be given, the interest to be first paid August 1, 1873.

3. The branch line from Sagetown to Keithsburg, 18 miles, which has no connection with the rest of the road, and hitherto could not be rented, to be sold or pledged, and the receipts therefor to be expended in fencing the line and increasing the rolling stock. stock.

In case the agreement should be accepted, and any part of the bondholders should determine to undertake legal proceedings, then all those bondholders who have accepted the agreement are to enter fully upon their original rights, and the bonds and coupons are to be good for their face, as at first .- Railroad Gazette.

St. Joseph & Denver City .- The Sheriff denies the truth of a report to the effect that an attachment has been placed in his hands to seize the effects of the St. Joseph and Denver City Railroad Company in this city to await the issne of a suit said to have been brought against the company by Jay Cooke & Co. to recover \$100,000 loaned the railroad company.

St. Panl & Pacific.—There have been recently some inquiries in Germany concerning the financial condition of this company, and investigations have been made which are reported to have

established the following facts:

460,417

While the main line from St. Paul westward to Breckenridge 217 miles, and the branch from a point 10 miles from St. Paul northwestward 66 miles to Sauk Rapids were constructed by the northwestward 66 miles to Sauk Rapids were constructed by the same company, they are now under separate organizations, the stockholders, however, being the same, and for the most part also controlling stockholders of the Northern Pacific. During 1871 the receipts of the Breckenridge line were \$383,973 35 (or \$1,770 per mile), its expenses \$254,973 91, and its net earnings thus \$129,099 44, or nearly \$600 per mile. The receipts of the Sauk Rapids line were \$265,896 68 (\$4,029 per mile), the expenses \$128,111 75, and the net earnings \$137,784 93, or \$2,688 per mile. The Sauk Rapids line received \$235,274 33 for sales of its land, and the Breckenridge line \$609,175 58. The former's mortgage debt is \$2,753,500; the latter's, \$13,453,000. The Sauk Rapids line (the company owning it is called, we believe, the St. Paul & Pacific Railroad Company, First Division) is constructing two extensions—one from the terminus at Sauk Rapids up the Paul & Pacific Railroad Company, First Division) is constructing two extensions—one from the terminus at Sauk Rapids up the Mississippi about 55 miles to a junction with the Northern Pacific at Brainerd, which will give the Northern Pacific, between the Mississippi and the Red River, a direct communication with St. Paul and the routes to Milwaukee, Chicago, St. Louis, and the rest of the country; the other from St. Cloud (two miles below Sauk Rapids) west by north, nearly parallel with the Breckenridge line, to the Northern Pacific at Glyndon, Minn., (10 miles jeast of the Red River) and thence nearly due north, not more than 10 or 12 miles from that river, to the borders of British Columbia at St. Vincent, a distance of about 300 miles. For the construction of these two branches \$15,000,000 in bonds were issued in London and Amsterdam last year. As the country on the new lines is very thinly peopled (though for the most part very fertile, it is said), it is not expected that the earnings will for some time be sufficient for the payment of coupons. But something is expected from sales of land, and the company reports that money for the interest for three years from the time of issue, intended to cover the period of construction, has been set aside, invested in United States bonds, and held by European set aside, invested in United States bonds, and held by European houses which negotiated the bonds. The company received from the State 62½ miles of old road-bed, considered worth \$2,500 a mile, and from the United States land grants amounting to 1,830,000 acres.

During the past season a good deal of grading was done from Sank Rapids towards Brainerd, and some from St. Cloud west ward; while about 65 miles of track was laid on the St. Vincent extension from Glyndon northward to Crookston.—R. R. Gazette.

Railroad Ald Bonds Declared Void.—OMAHA, Jan. 15.— The Supreme Court of this State to-day decided that the issue of bonds by counties and precincts in aid of railroads was void. The decision affects a large number of cases in various counties throughout the State.

—The Pittsburgh, Cincinnati & St. Louis Railroad Company leased the Jeffersonville, Indianapolis & Madison Railroad a year ago, with the privilege of cancelling the lease at the end of the year. The lease has been cancelled, and the stockholders have voted to lease the road to the Pennsylvania Central Company for ninety-nine years.

-Notice is given that \$80,000 of the Moultrie Co. Illinois bonds, dated December, 1872, issued to Mattoon, Sullivan & Decatur Railroad, are to be contested.

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, Jan. 17, 1873.

Mercantile affairs, while presenting many favorable features, are still suffering from the accumulation of snow in our streets, which renders many of the streets almost impassable to leaded vehicles . in consequence of which all purchases in a jobbing way are, if possible, postponed in the hope that the difficulty and additional expense of making deliveries will soon be removed. It is the general opinion that country dealers have very small stocks both of domestic productions and of fereign goods, and it is believed that with the restoration of the usual facilities for transportation, a writed of trade will take place.

that with the restoration of the usual facilities for transportation, a revival of trade will take place.

Cotton has declined under free receipts at the ports and dull accounts from abroad, middling Uplands closing at 20½c. Flour has been irregular, low grades being in demand for export and higher, at \$7 20@7 60 for shipping extras, but family grades close weak. Wheat has also advanced for the Spring growths, with a moderate business for export at \$1 60@1 68 for No. 2 Spring, but Winter wheats have remained dull. Corn has been dull and lower at 63@66c for Western mixed in store and afloat. Coffee has been active and higher, and the grocery trade generally has been better.

Freights have been dull and rates have shown a downward

generally has been better.

Freights have been dull and rates have shown a downward tendency for general business, but there has been a marked increase in petroleum charters. To Liverpool by sail late engagements have been at 7@7½d. for grain, ½@9-32d. for cotton, and 25s @27s. 6d. for provisions; and by steam, cotton ½@7-16d., grain ½@7½d., bacon 50s., and cheese 55s. To London by sail an exceptionally large business has been done at 2s. 6d. per bbl. for flour and 24s. per ton for oil cake, and wheat at 8d., all at call of ship and delivered alongside. The charters embrace naphtha to Cork for orders at 8s.@8s. 3d., and grain at 7s@7s. 6d., and petroleum from Philadelphia to the Continent at 6s. To-day there was a fair business; grain to Liverpool by steam 7½@7½d.; corn to London by sail, 8d.

Tallow has ruled firmer at 8½@8½c. for prime. Whiskey has declined to 93c, with free sales. Strained rosin has further advanced, but closes quiet at \$3 80@3 85. Spirits turpentine has been in demand, and advanced to 64½@65c.. Tar has been more salable at \$3 25@ 50. Wool continues dull, and since the publication of the statement of stocks, prices have shown a downward tendency. Hops have remained quiet.

The combination in petroleum seems to have been wholly Freights have been dull and rates have shown a downward

tendency. Hops have remained quiet.

The combination in petroleum seems to have been wholly broken up, attended by a marked decline in prices, which has led to a very large business. Refined in buls, has declined to 21½@22c. Naphtha in shipping order is down to 14½@15c, and crude petroleum has been sold freely at 8½@9c in bulk. The transactions in petroleum and its product during the past few days have been fully 100,000 bbls.

Provisions have been a little irregular during the past week. Pork has remained dull. For beef the demand has been more active, the sales including extra India mess at \$30 per tierce. But the chief feature of the trade has been the activity and buoyancy in lard, in which the transactions for immediate and early delivery have averaged about 5,000 tierces per day, and prices at the close in lard, in which the transactions for immediate and early delivery have averaged about 5,000 tierces per day, and prices at the close show a recovery of fully ½c. per 1b from the lowest figures of the season. The closing prices yesterday, for prime Western steam, were 8½c. for January and February, 8½c. for March, and 8½c. for April. Box meats have also been active, especially long clear bacon at 6½c @ 7c. spot and February, and 7½c. for March, and dry salted shoulders at 5@5½c. spot and future. Meats for home consumption have been dull. Butter has shown an upward tendency, especially extremes of qualities. Cheese is also higher on the tavorable foreign advices. To-day pork was more active, including new mess, at \$13.75 on the spot, and \$13.80 @ \$14 for March and April, and old mess on the spot, and \$3.25. Lard was not salable at over 8½c. for prime steam on the spot, but brought 8.5-16c. for February, 8½c. for March, and 8½c. for April, with a good business. Bacon was firm, with buyers at 7½c. for long and short clear for February; long clear sold on the spot at 6½c and short clear 7½c. on spot and 7.7-16c. for February. Dry salted shoulders sold at 5½c. for January. Cheese quoted at 15@16c. for good to choice factory.

Kentucky tobacco has been more active, and the sales for the week aggregate about 1,000 hhds. common to good leaf at 10½@ 14c. At the close, stocks of the old crop are much reduced, being 14c. At the close, stocks of the old crop are much reduced, being smaller than for several years past, little being left on hand suitable for shipping orders. Seed leaf has been in but moderate demand. Sales have been, crop of 1871, 300 cases Connecticut, at 45@60c.; 400 cases New York, partly at 9c.; 100 cases Pennsylvania, at 20c.; 200 cases Wisconsin, at 9@10c.; also, 300 cases, crop of 1870, sundry lots, at 9@15e. Spanish tobacco doing better, with sales of 700 bales Havana at 98@\$1 10.

Calcutta linseed has advanced to \$2.57½@2 60, gold, on the spot, and has sold at \$2.67½, gold to arrive. The transactions thus far, this month, aggregate about 100,000 bags. Other East India goods dull.

goods duit.

Hides are firmer at 27½@28c., gold, for dry Buenes Ayres. Linsect oil has advanced to 93c., but fish oils have been a little weak, and crude aperm sold early in the week at \$1 52½. Cloverseed has had a free sale for export at 9½@9‡c. Fish in good demand, but fruits quiet.

Metals have been less active. Some business is reported in lngot copper at 34½@35c. for American, and 30½@31c. for English. Straits tin quoted nominally at 31½c., gold; charcoal tin plates \$11@11 25, gold. Pig iron quiet.

Exports of Leading Articles from New York.
The following table, compiled from Custom House returns, shows The following table, complied from the port of New York since January 1, 1873, to all the principal foreign countries, and also the totals for the last week, and since January 1. The last two lines show total values, including the value of all other articles besides

COTTON.

FRIDAY, P. M., January 17, 1873. By special telegrams received to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, Jan. 17. It appears that the total receipts for the seven days have reached 136,225 bales against 133,235 bales last week, 104,703 bales the pre-130,325 bales against 133,235 bales hat week, 104,703 bales the previous week and 103,443 bales three weeks since, making the total receipts since the first of September, 1872, 2,003,525 bales against 1,703,000 bales for the same period of 1871-72, showing an increase since September 1, 1872, of 300,525 bales. The details of the receipts for this week (as per talegraph) and for the corresponding weeks of the five previous years are as follows:

Received this week at-	1973.	1372.	1871.	1870.	1869.	1968.

The market the past week has ruled dull, and the tendency of prices has been downwards. This is due principally to the very liberal receipts at the ports, which early took the lead of the large week's totals of a year ago, with which the comparison must be made. At the same time foreign accounts have been dull, and the demand, whether for export and home consumption, has been limited. Tuesday, quotations were reduced \(\frac{1}{2}c\), without stimulating the demand, and last evening the close was again in buyers' favor. To-day there was a revision of quotations, though the general features of the market remained nuchanged, good ordinary being reduced \(\frac{1}{2}c\), strict good ordinary reduced 1-16c., ordinary and low middling unchanged, and middling and good middling advanced \(\frac{1}{2}c\), with more business reported for both export and home consumption. For futures there has been considerable alling advanced \$\frac{1}{4}c\$, with more business reported for both export and home consumption. For futures there has been considerable lregularity. Early in the week there was a uniform decline in the later months, and the closing prices of Tuesday showed \$\frac{1}{4}c\$, decline from the previous Saturday on the early months, and 5-16@\$\frac{1}{4}c\$, for the later months. The reduction, however, did not increase the demand, but owing mainly to the limited offerings there was a recovery for April and May of \$\frac{1}{4}c\$, and for June of \$\frac{1}{4}c\$. in face of a decline in Liverpool and liberal receipts at the ports. To-day, however, the market was dull and drooping, and the closing prices were among the lowest of the week. The prices for futures last reported were (basis low middling) \$194c\$, for January. 194c. for February, 194c. for March, 204c. for the closing prices were among the lowest of the week. The prices for futures last reported were (basis low middling) 19½c. for January, 19½c. for February, 19½c. for March, 20½c. for April, 20½c. for May, 21c, for June, and 21 7-16c. for July. The total sales of this description for the week are 67,600 bales, including — free on board. For immediate delivery the total sales foot up this week 10,255 bales, including 6,382 for export, 3,343 for consumption, 430 for speculation, and 100 in transit. Of the above 2,026 bales were to arrive. The following are the closing quotations today: ing are the closing quotations to-day:

WEATHER REPORTS BY TELEGRAPH.—There has been rain on one day the past week at New Orleans—a heavy thunderstorm. At Mobile there has also been one rainy day: our correspondent states that plowing has now commenced for the next crop. It has rained on three days at Selma and two days at Montgomery. At Macon and also at Columbus there has been rain on one day: our correspondent at Macon adds that over three-fourths of the crop in that vicinity has been marketed. At Savannah it has been warm, sultry and wet. It was clear and pleasant the early

part of the week at Charleston, but the latter part was rainy. They have had rain on three days at Memphis; the crop is being sent to market freely; much competition is demoralizing the labor, and wages are going up. The thermometer at Memphis has averaged 47, at Charleston 50, Columbus and Macon 49, Montgomery 51 and Selma 54.

RECEIPTS AND PROSPECTS OF THE CROP.—There seems to be no little surprise expressed by many that cotton is coming in so freely. We have so often and decidedly given our opinion with regard to the matter, that it is not necessary to repeat it; so freely. and yet we must admit that it is satisfactory to see it being confirmed so fully, now that some of the difficulties in the way of the free movement of the crop have been removed. We have never for a moment seen any reason for changing the opinion we originally expressed, that the year's total cannot be less than the minimum we gave in our estimate, Our advices to-night are that the receipts for next week will continue to be liberal, and that New Orleans will show a larger total than for the past week.

New Orleans will show a larger total than for the past week.

INDIA CROP.—On an editorial page we give some interesting compilations with regard to India cotton. The advices by mail from Bombay this week are to Dec. 7, and they contain an account of the storm which was cabled to the CHRONICLE and published in our issue of the same day, Dec. 7. It seems that this rain extended from the 1st to the 5th of December, and was heaviest about Kbamgaum, where nearly two inches were registered. Our dispatch stated that considerable damage was feared, and we see by the mail reports received this week that such was the prevailing opinion at the time at Bombay; but our later cable reports state that the damage was much overestimated, and that the crop is now progressing very favorably. and that the crop is now progressing very favorably.

BOMBAY SHIPMENTS.—According to our cable dispatch received to-day, there have been 11,000 bales shipped from Bombay to Great Britain the past week and 15,000 to the continent, while the receipts at Bombay, during the same time have been 19,000 bales. The movement since the first of January is as follows. These are the figures of W. Nicol & Co., of Bombay, and are brought down to Thursday, Jan. 16:

Shipmenta this week to—Great Con. Britain, thent. Total. Firstin, thent. Total. Britain, thent. Total. Britain, thent. Britain, thent. Britain, thent. Britain, thent. 15,000 26,000 17,000 17,000 34,000 19,000 19,000 17,000 17,000 17,000 49,000 9,000 58,000 47,000 19,000 From the foregoing it would appear that compared with last BOMBAY SHIPMENTS .- According to our cable dispatch received

From the foregoing it would appear that compared with last year there is a decrease this year in the week's shipments to Great Britain of 4,000 bales, and that the total movement since Jan. 1 shows a decrease in shipments of 24,000 bales over the corresponding period of 1872.

Gunny Baos, Bagging &c.—Bagging has ruled quiet during the past week. We hear of sales of 600 rolls Boston at 12½c. cash, and more can be had at same price, both in Boston and New York. Contracts (second hand), April and May delivery, can be bought at 13½@14c. c.o.d. At the close we note some anxiety to sell on holders' part. The market for bags is also quiet and without animation. There are several inquiries in the market, but we do not hear of any transactions having occurred. We quote 14½@14½c. as price asked. Butts.—Arrivals have further affected the market, and we note a sale of 2,500 bales ex ship at 2c. cash, 1,600 bales in store at same price, 500 bales more at 2c. cash, 1,600 bales at 2½c. on time. The price now asked is 21-16@2c. cash, and an offer of 21-16 would buy one or two parcels. Contracts are dull and neglected; can buy April and October delivery at 21-16@2 1-8c. gold, or equivalent in currency.

VISIBLE SUPPLY OF COTTON MADE UP BY CABLE AND TELE

VISIBLE SUPPLY OF COTTON MADE UP BY CABLE AND TELE-GRAPH.—By cable we have to night the stocks at the different European ports, the India cotton afloat for all of Europe, and the American afloat for each port as given below. From figures thus received, we have prepared the following table, showing the quantity of cotton in sight at this date (Jan. 17) of each of the two past seasons:

•	1873.	1872.
Stock in Liverpoel bales.	455,000	519,000
Stock in London	216,000	179,000
Stock in Havre	223,000	160,000
Stock in Marseilles	12,500	16,000
Stock in Bremen	36,000	12,505
Stock in Amsterdam	70,000	24,800
Stock at Antwerp	36,000	12,343
Stock at Barcelona	28,000	55,000
Stock at Trieste	1,200	5,820
Afloat for Great Britain (American)	231,000	169,000
Afloat for Havre (American and Brazil)	29,000	56,000
Affoat for Bremen (American)	89,000	13,974
Afloat for Amsterdam (American)	7,500	16,000
Total Indian cotton affoat for Europe	81,000	204,000
Stock in United States ports	503,918	511,226
Stock in inland towns	87,520	96,706
Exports from United States this week	87,854	87,666
Total	2,144,492	2,139,040

These figures indicate an increase in cotton in sight to-night of 5,452 bales compared with the same date of 1872.

MOVEMENTS OF COTTON AT THE INTERIOR PORTS.give the movements of cotton at the interior ports—receipts and shipments for the week, and stock to-night and for the corresponding week of 1872

THE HOUL OF 1						
	-Week end			-Week ea	ading Jan.	19. '72 -

SHIPPING NEWS .- The exports of cotton from the United States the past week, as per latest mail returns, have reached 104,709 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in The Chnonicle last Friday, except Galveston, and the figures for that port are the exports for two weeks back. With regard to New York we include the manifests of all vessels cleared up to Wednesday

Below we give all news, received during the week, of disasters to vessels carrying cotton from any port of the United States:

to vessels carrying cotton from any port of the United States:

The British sbip Mont Eagle, Captain Scott, from New Orleans, January 4, for Bremen, with a cargo of cotton, was wrecked on Great Andrews, one of the Bahama Banks. Her mate and four sailors arrived here in a boat yesterday, and report that the captain and the rest of the crew were in another boat, and are probably saved.

Ship British Flag, fron, 1,265 tone, Capt. Symes, sailed from New York Nov. 8, of and fur Liverpool, with 69,221 bushels corn, 41 pkgs. and 15 hhds. tobacco, 200 bales cotton, 22 bales leather chips and 1,800 staves, and has not since been heard of.

The steamer Cherokee, from Pine Binff for New Orleans, with 380 bales of cotton, saved from the wreck of the steamer Little Rock, sank in Silver Lake, last Wednesday, and will prove a total loss. The boat was valued at \$16,000, and was insured for \$8,000 in Cincinnati and Louisville companies.

at \$16,000, and was insured for \$8,000 in Cincinnati and Louisville companies.

Tuscanora, 1,449 tons, of Philadelphia, Dunlevy, from Mobile, Nov. 18, with 3,653 bales of cotton for Liverpool, sunk or foundered at sea near Cadiz prior to Jan. 14.

Leone (Fr.), Lemencier, from New Orleans for Havre, was at the wharf at Key West Jan 7, reloading the cotlon which was taken out of her while ashore on Tennessee Reef.

Zim (Br.), Hatfield, which cleared at New Orleans Jan 7, with 2,926 bales of cotton for Liverpool, is reported by telegraph to be on fire below New Orleans on the 14th.

Queen of the South, at Galveston for New York, before reported, was strick by lightning near the head of the mizzenmast, and proceeding downward, it entered the bold of the vesset through the coping around the mast, and fired the cargo. The lower hold was filled with barrels of mess beef, while the upper hold contained ninety bales of cotton. The hold of the vessel was filled with water. The flames were subdued sufficiently to enable the cotton to be taken out and landed on the whatf. The loss will not amount to more than \$2,500, as the vessel was cant through by

will not amount to more than \$2,500, as the vessel was damaged but slightly.

EMILY, from Roanoke River, with a full cargo of cotton, was cut through by the ice at Norfolk, and sunk in ten feet of water. About 60 bales were in the hold, Jan. 8, badly damaged by water and mud.

West Derry (Br.), Uran, from Mobile for Cork, before reported ashore on the Tortugas, and subsequently gotafioat, went on night of Jan. 4, near East Key. Capt. Uran arrived at Key West morning of 7th, io schr. In Time, which brought 50 bales of cotton from the vessel.

Gold, Exchange And Market is steady. The following were the last quetations: London bankers', long, 109\$@109\$; short, 110\$@110\$, and Commercial, 108\$@109\$. Freights closed at 5-16@\$d. by steam and \$d. by sail to Liverpeel, 1\$@1\$c. gold by steam and 1c. by sail to Havre, and \$d. by steam to Hamburg.

by steam and 1c. by sail to Havre, and *d. by steam to Hamburg.

By Telegraph from Liverpool..—

Liverpool, January 17-5 P. M.—The market opened dull and closed heavy to-day, with sales footing up 8,000 bales, including 1,000 bales for export and apeculation. The sales of the week have been 49,000 bales, of which 2,000 bales were taken for export and 3,000 bales on speculation. The stock in port is 455,000 bales, of which 98,000 bales are American. The stock of cotton at sea, bound to this port is 285,000 bales of which 231,000 bales are American.

Trade Report.—The market for yarns and fabrics at Manchester is beavy and depressed.

BREADSTUFFS.

FRIDAY P. M., Jan. 17, 1873.

The markets for flour and grain have been somewhat irregular the past week, and close with an unsettled feeling.

Receipts of flour have been quite moderate. The demand early in the week was small. Shippers held off, and the local trade did not give any steadiness to the demand. Still, with the limit ed offerings, there has been some hardening of prices, it being known that stocks are undergoing a steady reduction. Yesterday, however, developed some irregularity. Shippers took 5@ 6,009 bbls., mainly at \$5 for good No. 2, \$6 50 for prime superfine, and \$7,40 for good extra Western, and these grades were 10@15c. higher, but in the better grades, especially family flours, there was some presture to sell, with an occasional concession of 25c. per bbl., a line of choice Oregon flour being sold at \$10. Te-day the demand was moderate, and the only transaction of moment was 1,000 bbls. round hoop Western extra, at \$750, delivered from store.

The wheat market also ruled dull and heavy until Wednesday, when there was some business at \$1 61 for No. 2 Chicago, \$1 65 for do. Northwest, and \$1 68 for do. Milwaukee, all afloat, and yes-

loads, afloat, at \$1 54 @ \$1 541, and No. 2 Milwaukee in stere at \$1 65 @\$1 66. Winter wheats have ruled dull. Receipts of wheat at the Western markets have been moderate, and the quantity reaching this market by rail is much below our wants. there was a falling off in the demand, and holders contributed to a quiet market by asking advanced prices. No. 2 Northwest sold at \$1 65 afleat, and No. 2 Milwaukee at \$1 66 in store.

Indian corn has ruled dull, and prices show a slight decline. The expert demand has been fair, but the home trade have bought sparingly, finding their wants mostly supplied by the new corn received by rail. To-day, there was a limited business in prime mixed at 651 666c for both old and new afloat.

Rye has been dull and droeping. In barley there has been a large movement, mainly at \$1 16@1 17 for Canada West, the market ruling very firm. Oats have been in better supply, and for two or three days past prices have been drooping, closing to. day quiet.

GROCERIES.

FRIDAY EVENING, Jan. 17, 1873.

There has been an improved demand for raw sugar during the past week, and with a continued fair activity in tea and molasses, and a very excited demand for coffee, the general market for groceries has shown a fair degree of animation. The distributive outlet for all goods remains fairly active, and second hands are purchasing to a fair extent. The tea trade is not very active as yet, but the supplies in the country are very light, and there is likely to be a more liberal movement as soon as the spring trade fairly sets in, which will not be until money becomes somewhat easier.

TEA.

The strength manifested by holders, and their indisposition to sell except at full rates, have made buyers rather more ready to operate, especially as their wants have become somewhat pressing. The result has been an increased huslaess during the current week, and a good inquiry continues up to the close. The latest news from the Chinese markets report settlements for the United States light and the market somewhat depressed in consequence of the unfavorable advices from this country. Some settlements had been effected at a shade easier rates, and there seems to be a slight probability now that we will be able to land some teas here upon which importers can at lenst realize cost. The country is undoubtedly pretty bare of stock, and a steady demand for lines is looked for. The demand for invoices is lucreased both on account of immediate necessities and to supply future wants. Ociongs shown marked improvement in the demand, and are also stronger, though still moving at about last figures. Greens have sold freely, and are held at full rates. Japans rule steady, and have sold fairly since our last. Included in the transactions made public are 10,245 half chests Oolongs, 5,100 do. Greens, 4,256 do. Japans and at action 800 half chests Oolongs and Japans at 25@67c.

Imports at New York the post week have included 843,152 lbs. green and 18,857 lbs. Japan, per "Coshmere," from Shanghai; 49,231 lbs. black and 707,-321 lbs. green, per "Conquerer," from Shanghai; 44,800 lbs. black, and 34,300 lbs. green per "Archos," from Whampoa. At Boston, 174,979 lbs.black, per "Kin Lin," from Amoy. The receipts indirectly have been 250 pkgs. by steamer and 2,751 by rall overland.

The following table shows the imports of Tea Into the United States from January 1 to date, in 1873 and 1872:

	Black.	Green.	Japan.	Tota'.

COFFEE.

Continued activity in the jobbing and involce demand, with further advices of a favorable character from Rio have been very beneficial to our market for Brazil coffees during the past week, and the firm tone noted in our last report is still apparent, with prices fully 1½c. higher on all grades, the advance occurring chiefly during the closing days. The transactions have been liberal both here and at the outports, and the supply is not large. The bulk of the sales have heen on consumptive account, only one cargo, so far as reported having been taken upon speculation. The "Asterla" brought 4,200 bags of Rio, and this was taken up by a speculator at 17%c., gold. This cargo is retained in our figures of stock. The burning of the "Erle" off Pernambuco with 28,000, bags of Rio on board, helped to cause the udvance in our market, and with the strong speculative feeling that now exists it will not be surprising if prices go higher. The India grades had sold freely since our last in a jobbing way, but sales from first hands have been restricted by the Illiberal offerings. Java's have sold to a fair extent in a jobbing way, and close very firm with rumors of some buriness from first hands, but no particulars obtainable as yet. A cargo of Singapore is said to have been sold in Boston, but we are without the details. The sales were 1,033 bags Rio ex "Adelaide Pendergast;" 2,000 ex "Merrimack," 4,000 ex "Favorite," 4,511 ex "Bessel," 4,200 ex "Asteria," at 17½c., on apeculation. 1,281 Santos ex "Antelope," 4,400 bags Rio ex "Auguste," 5,178 ex "Caroline," and 800 ex "Spain," all here. At the outports, 3,200 Rio ex "Asta," 3,600 do. ex "Sjognsten," at Hampton Roads. 1,500 do to arrive at Mobile per "Hannibal," 300 per "Tre Sostre," and 4,300 per "Hansa," at New Orleans. 1,000 per "Amazon," and 2,000 per "Lapwing," hoth at Baltimore.

Imports at New York the past week have included 4,092 bags Rio, per "Adelide Pendergast," 4,200 do. do., per "Asteria," 4,000 do. do., per "Favorite," 25,157 mats Java, per "Competitor:" 5,241 bags Maracaibo, per "W. A. Heney," 1,811 do., do., per "Loniss D., "6,759 do. St. Domingo, per "Oliver," 686 do. do., per "C. F. Mayo," and 1 654 do. snudrles.

The stock of Rio Jan. 11, and the imports since Jan. 1, 1878, are as follows:

SUGAR.

At the opening of the week and for a few days following the demand for raw sugars was extremely light, the same indisposition to operate being apparent on the part of refiners in the absence of pressing necessities on their part. Holders did not press sales to the extent of offering concessions, but the market was far from being strong, and the basis of 96,9%c, for fair to good refining Cuba was chiefly nominal. For the part two days there has been a little more inquiry from refiners, whose wanta have become somewhat mor pressing by the reduction of their stocks and a slight improvement in the trade in refined sugars. The increased sales have steadled the market, and holders show more firmness at the close. For refined sugar the oatlet is limited, but hards have become somewhat stronger, and are quoted at full previous rates. Softs continue steady, and are selling in a limited way. The transactions in raws since our last report include: 104 hids, melasses sugar at 8%c.; 800 Porto Rico, 8%@9%c.; 2,241 bxs. Derosne at 100,10%c.; 60 hids, clarified St. Jago, 9%c.; 1,133 hids., 7 tes., and 35 bbls. Martialque at 8%c.; 10 hids. Demerara at 9%c.; 5,500 bags. brown Pernambuco, 8%c.; 250 hids. new crop Muscovado, 9%c.; 2,153 bxs. Havana, 8%@9c.; 4,340 bags Paranyba at 8%@8%c.

Imports at New York and stock in first hands Jan. 11, were as follows:

MOLASSES.

The principal feature of the market has been the demand for demestic qualities which continues active, and is about all the trade there is to report Refiners are in the market and would be moderate buyers if the offerings of stock included anything sultable for their uses. As it is there is nothing offering except the low grades, which are too poor for refining purposes. The call for foreign grocery qualities is extremely limited, the demand for this grade being supplied mainly from domestic stocks. There have been a few small lots of English Islands grocery seld at full prices, but the call for most foreign descriptions is barely sufficient to establish rates. There has been a liberal movement in New Orleans molasses, both from auction and in a regular way. The extreme high rates of last week have not been reported this week, and the sales are principally within a range of 68c. @ 72c. Syrups remain very strong, with very little molasses stock and the production of sugar syrups barely sufficient to meet the current trade requirements. The high price of domestic molasses is increasing the demand for syrups and supplies are kept well reduced. We note sales to the extent of 70 hhds. Porto Rico at 38@50c., in lots, and 1,500 bbls. New Orleans at 64@72c.

The receipts at New York, and stock in first hands Jan. 11, were as follows:

#### THE DRY GOODS TRADE.

FRIDAY, P. M., Jan. 17, 1873

There has been a very slight improvement in the demand for unbroken packages during the current week, and the volume of trade is wholly devoid of any semblance of speculation. Agents are firm holders of nearly all descriptions of goods, both cotton and woolen, and the present range of values offers but little margin for speculative purchases. This has the natural conse. quence of restricting jobber's purchases to about actual requirements, and few are purchasing with any degree of freedom excepting those from remote cities. The Texas and California trade are buying moderately, through their representatives here, of staple goods that they can ship by slow and cheap routes, and there is some disposition shown by some of the larger houses here and in other near-by cities to lay in supplies of the leading makes of cotton goods, which are in very small supply for this period of the year, and are not likely to be offered in very liberal amounts. There is a good degree of firmness in the market for all descriptions of goods, with prices somewhat higher on leading makes of bleached fabrics. The recent failures abroad, coupled with some small failures here, have created an uneasy feeling in the trade, though more confidence is felt now, and there is no apparent probability of further troubles.

DOMESTIC COTTON GOODS.—There has been a limited call for brown sheetings and shirtings, the demand coming mainly from the jobbing trade of the more distant cities. Local buyers have not shown much disposition to purchase, although they are picking up a few goods, principally of the leading makes, which are in short supply, and consequently likely to advance. The market is already stronger on many of the fine grades, and agents are asking a slight advance, but for the most part quotations are not changed. Bleached sheetings and shirtings are very strong, and some of the finer grades of light weights are held at an advance of 1c. per yard. The supply of bleached goods has seldom been so light as it is at the moment, and the strong tone is fully justified. Cotton drills are not inquired for to any extent for the export trade, and the market is only moderately active on home account. Canton flannels remain dull. Colored cottons are selling in a limited way, and bring very full prices. There has not been much activity in the demand for prints, and the only sales effected are of a few choice dark effects for current distribution, and of medium colorings for the interior, to make up spring stocks. All goods are firmly held at full quoted rates..

DOMESTIC WOOLEN GOODS.—There has been more inquiry from the clothing trade for goods for the manufacture of their spring stocks, but excepting this very little demand is reported. Agents are showing their samples of spring goods more freely, and a few sales of choice goods have been made to jobbers. Cassimeres are held very firmly, and the current prices will be fairly remunerative if maintained. Cloths and doeskins are not selling very freely as yet, but what sales are making realize full prices. It is too early for any very liberal offerings of fancy spring woolens, and the market is, therefore, without important feature of interest.

Foreign Goods.—The inactivity which has marked the trade in foreign goods throughout the portion of the year which has expired continues, and no improvement was observed in any department. Some of the importers are withdrawing their spring importations from bond, but evince no disposition to to offer them for sale during the present dull spell, and none of the jobbers show any movement as yet. Staple silks and worsted fabrics are held firmly in price, but are quiet and in light request. Thus far our imports have not been so heavy as they were last year, and it is thought that the amount will be somewhat restricted during the entire year.

We arrive few particulars of leading articles of domestic manufacture, r prices quoted being those of leading Jobbers:

#### Industrial Exhibition.

#### THE ESTIMATED INCOME OF THE

Industrial Exhibition Comp'y is \$2,645,400.

READ THE REPORT BELOW, AND YOU WILL BE SATISFIED THAT AN INVESTMENT MADE IN THE STOCK OF THE

## Industrial Exhibition COMPANY

IS SAFE.

The first \$2,000,000 of the stock is nffered at 80; nfter Feb. 1 no stock will be sold at less than par.

Note—Any bank in New York will receive sub-

As the cost of each lot is about \$4,700, an investment of that amount in this stock will entitle the holder to a "Lnt" value in the property.

We, the undersigned, members of a special committee appointed at a public meeting, presided over by John A. Dix, at the St. James Hotel, on Friday, December 13, 1872, were instructed to examine and report as to the desirability and practicability of securing for New York a permanent Industrial Exhibition Building, Art Gallery, Public Library, and Garden of Plants, and more especially as to the value and fitness of the land contracted for, have the honor to report:

First-That the Industrial Exhibition Company is a properly organized corporation, under a special Act of the Legislature of the State of New York, with full power to purchase land, erect buildings, and to do all other things necessary for the completion of the objects above enumerated. The property of the Industrial Exhibition Company is exempted from taxes and assessments for five years, and its stockholders are free from personal liability, and generally all powers are granted to it that will facilitate its objects.

Second-That the Industrial Exhibition Company of 1870 contracted for the land between Ninetyeighth and One-Hundred-and-Second streets and Third and Fourth avenues, comprising in all eight blocks of ground, besides the unopened streets and avenues. The price agreed upon was \$1,700,000, of which \$200,000 have been paid; that there remains due \$1,500,000, which must be paid on or before Feb. 1, 1873, or the contract for the land will ex-

pire and all moneys paid be forfeited.

The deed of this land has been executed to the Industrial Exhibition Company, and is held in escrow by the Union Trust Company, to be delivered whenever \$1,500,000 shall be paid. Your Committee have consulted with eminent real estate men as to the value of the land, and the lowest estimate placed on it after deducting all the streets (which are as valuable for the purposes of this Company as any other portion), is \$1,820,000 (and the streets being valued, at \$2,428,000). As we anderstand, this is the only piece of land in one location, owned or controlled by individuals, large enough for a World's Fair, lying south of 110th st., and its central location is proved by the fact that all the steam railronds running into New York have a side track on this ground. As an engineering necessity, any rapid transit railroad that may in future be built must go within four hundred feet of this property, if not directly upon it. The property is solid rock, and at Ninety-eighth street, Third avenue, and One-Hundred-and-Second street there is an abrupt slope. It is estimated that this peculiar formation will save at least \$1,000,000 in the preparation of this ground for such a building and building foundations as are proposed. The Industrial Exhibition Company contracted for this land in 1870. It was regarded as a good purchase then, and has increased in value since, and will

then, and has increased in value since, and will continue to increase.

Third—The estimated cost of a sultable building is about \$7.000.000, and in such an edifice all New Yorkers will feel a just pride.

Fourth—A proposition has been made by an eminent New Eagland firm to construct a dome over the court, which dome shall be the largest and most magnifecut in the World. All this firm ask is that they be granted a perpetual lease of the dome, above the spring of the arch, subject to reasonable conditions. The estimated cost of this dome is \$3.000.000. Sufficient bonds will be given for the performance of their contracts.

Fifth—Your committee is of the opinion that, if a sufficient amount of the stock of this Company is sold to acquire a free and unincumbered title to the land, there will be no difficulty in raising all the money requisite to erect a buildiog.

Sixth—If this land is purchased and work commenced at once on the building, we hope the Congress of the United States will so favor the enterprise that a World's Fair can be opened here in 1876, under the auspices of the United States of the United States of the United Birthday of this our great

Republic. This need not interfere with the proposed "centennial" celebration in Philadelphis, but as we New Yorkers cannot but feel that we may celebrate in our own way and in our nwn city so important an occasion, and we also feel that If the world is to be brought together in a grand competitive exhibition in that year, that New York, being the commercial metropolis of the whole country, such world's fair should be held here At an other place could the millions of visitors be accommodated. Financially, we believe that the land is worth more than is to be paid for it; and if the enterprise is carried out as proposed we do not see any possible chance of loss. In view of these facts—

1. We recommend, first, that a series of meetings he held for the purpose of awakening the people to the importance of this enterprise.

2. That a committee be appointed who shall, without delay, prepare a suitable memorial and present the same to Congress, and that such Committee have power to ask Congress to give such indorsement as may in their opinion be thought advisible.

3. Also, a committee who shall confer with the

indersement as may in their opinion be thought advisible.

3. Also, a committee who shall confer with the Mayor and Aldermen, as well as the Department of Public Parks, with a view of obtaining such privileges as municipalities have ordinarily given to such enterprises.

4. Also, a committee to confer with the Governor of the State and the Legislsture, with a view of obtaining such endersement as will add to the dignity of the enterprise.

5. Also, a committee to prepare an address to the people of New York, the country, and the world.

6. Also, committees selected from the different branches of industries, to obtain subscriptions to the stock of the Company from their respective associates.

associates.

We further recommend that here and now subscription papers be circulated. Your Committee believe that this coterprise is sound financially, and if it is carried out that it will benefit every person in New York and prove of great advantage to the whole country, and they do carriestly recommend it to the serious consideration of all the people.

All of which is respectfully submitted.

#### COMMITTEES APPOINTED.

The above report was unanimously adopted, and subscription papers were distributed among those

The above report was unanimously adopted, and subscription papers were distributed among those present.

Action was then taken in reference to the appointment of committees, and the following gentlemen were unanimously appointed:

General Committees, A. S. Diven, S. Slosh, Richard Schell, H. B. Crosby, J. L. Jackson, Edw. Roberts and Paul N. Spofford.

COMMITTEE TO MEMORIALIZE CONGRESS—C. K. Garrison, A. S. Diven, H. B. Claffin, Gouverneur Morris, W. H. Appleton, W. H. Webh, J. J. Astor, W. B. Ogden and E. D. Morgan.

COMMITTEE ON New York—George Opdyke, Jonathan Sturges, Anson Phelps Stokes, Paul N. Spofford, Ambrose C. Kingsland, Ch. H. Russell, John H. Sherwood, Geo. Bliss, H. M. Taber, and Robert McCafferty.

Committee To Prepare an Address—Elliot C. Cowdin, William Cullen Bryant, George Wm. Curtis, J. M. Bundy, Fletcher Harper, William M. Evarts, William Barnes, S. B. Chittenden, W. W. Phelps and Oswald Ottendorfer.

THE COMMERCIAL AND FINANCIAL CHRONICLE is issued on Saturday morning, with the latest news up to midnight of Friday.

#### TERMS OF SUBSCRIPTION-PAYABLE IN ADVANCE.

TERMS OF SUBSCRIPTION—PAYABLE IN ADVANCE.

THE COMMERCIAL AND FINANCIAL CHRONICLE, delivered by carrier to city subscribers, and mailed to all others (exclusive of postage), For One Year. \$10.00 For Six Months. \$10.00 The Chronicle will be sent to subscribers until ordered discontinued by letter. Postage is 20 cents per year, and is paid by the subscriber at his own post-office. WILLIAM B. DANA, \$10 WILLIAM B. DANA & CO., Publishers, JOHN G. FLOYD, JR. \$10 and 61 William Street, NEW YORK. Post Office Box 4,592.

Subscriptions and Advertisements will be taken in London at the office of the Curonicle, No. 5 Austin Friers. Old Broad street, at the following rates:

Annual Subscription (inclinding postage to Great Britain). £2 2s. Half-Yearly \$10 and \$

The Publishers cannot be responsible for Remittances unless made by Drafts or Post-Office Money Orders.

To A neat file for holding current numbers of the Chronicle is sold at the office for 50 cents; postage on the same is 20 cents. Volumes bound for subscribers at \$150. The first and second volumes of the Chronicle are wanted by the publishers.

#### THE RAILWAY MONITOR.

The first number of the RAILWAY MONITON (monthly) was published January 15, 1873.

The characteristic feature of the Moniton consists in its furnishing the most complete reports and freshest intelligence concerning every railroad in the country, so classified and indexed that each item of information can always be referred to with the utmost convenience.

A Handsome File Cover or Binder for current numbers, is furnished gratis to every new subscriber for one year.

A Standing Index is continued from number to number, so that all railroad matters published within the year can be referred to by the last number issued.

The Monitor is in no respects intended to take the place of the Railroad Department of the Chronicle, but is expressly intended to supply a want long felt by the readers of that department, in giving numerous reports and details of railroad information, which could never be given in the limited space allowed in the columns of the latter.

## Terms of Subscription-(Payable in Advance.)

#### MONETARY PRESSURE AND THE EXPANSION OF CREDITS.

Two financial movements are just now attracting notice, The first is the easing up of the money market, which is making itself more visible in regard to mercantile paper. Capital continues to accumulate here, as the bank statement to-day will probably show. Last week the rise was five millions in deposits, and the tide is still flowing in. This concentration of money in New York is checked in some degree by the stringency in the money markets of the interior, which is already causing an outward flow of currency from this city.

This pressure on the monetary movements all over the country is ascribed by some persons, on insufficient grounds, to the obligation of the banks to hold 25 per cent of reserve. The banks, if they were not compelled by law to keep idle so large a mass of greenbacks, could lend this money, we are told, and could thus relieve commerce and trade, which have been sorely distressed for the past three or four months!

As relief from other sources cannot be had, why, it is asked, cannot this method be tried of letting loose the greenback reserve? Why cannot the banks be left to their own judgment to hold less or more of reserve just as they please? The persons who thus argue forget the lessons of experience which we have so dearly bought in this country. Experience does not show that the banks can safely be left free of restriction in this matter, or that the reserves of the banks are a source of weakness, or that the power of those institutions to give assistance to commerce and industry is capable of enhancement in the way proposed. Since 1857 our banks have been more free from panies than ever before, and their freedom has been due chiefly to their ample reserves. To weaken the reserves of a bank is to place that bank in danger, and to do this to our banks generally is to undermine the foundations of the whole financial machinery of the country.

The true sources of the general stringency which has pervaded the financial movements of the past year are not to be sought in the excessive reserves of the banks, but in the over-expansion of our credit system. The banks have held less reserve during the last year than ever before in the course of our banking history under the National Currency law. If the reserves are justly chargeable with being the cause of the stringency, the latter should have decreased es the former fell. But the stringency has done just the contrary. With obstinate tenacity, it has been much more severe since the reserves were defective than in former years, when ample reserves were held. It is well known that the chief cause of our banking stringency is overexpansion; and this being so, the weakening of the reserves of the banks could give only a temporary ease. It would mock us with a destructive and disappointing relief. Still although these facts are generally acknowledged, such is the monetary pressure which obtains throughout the country that a considerable number of persons are tempted to grasp at any expedient which promises mitigation. With the growing ease of money they will not be so liable to be thus led astray; and, as has heretofore happened, the popular feeling on the subject will subside.

A second point is the rise in gold and governments yes terday. The advance in the Ten-forties is doubtless due to the announcement of the Syndicate operations, which are discussed elsewhere. But the rise in gold has been produced by a large complexity of causes. Prominent among these is the agitation for enlarged issues of cuarency. the inflationists can only succeed in this scheme, the price of gold must inevitably go up. In regard to new issues of greenbacks, Congress does not seem so pliable as was expected. The chief hopes of the inflationists rest in the increase of national bank notes. This expansion they hope to obtain; and the prospect, however doubtful, has exerted, with other forces, a noteworthy influence on the gold market for some days past.

There are a'so indications of an accumulation of bank notes, which are selling at a discount, but the influx is not so great as earlier in the month. The accumulation of bank notos at this centra gives us a foretaste of the effect of the free banking scheme. This project proposes to flood the country with bank notes, and to remove the present limit to their issues. At present 354 millions is the highest aggregate of notes allowed in this country. Till 1870, the limit was 300 millions, and since the increase to 354 mil lious, and the agitation for further expansion, gold has gone up from 109 to 114.

On the methods for contracting the National Bank circulation we have often written, and discussion of this matter will become more important every year. Some pertinent suggestions are made in the following letter from an esteemed correspondent in Boston:

Much has been said about making our National Currency more elastic. Would it not be well to have the law give some advantage to those banks which will contract their issues in the dull season? Thus the law might compel each national bank to vantage to those banks which will contract their issues in the dull season? Thus the law might compel each national bank to pay taxes of two per cent a year, but only on the arerage amount kept out by itself. Or the Government might charge at the rate of two per cent. a year to each bank on the amount actually in circulation, and nothing to each bank on the amount of its authorized circulation kept in its vaults. This last plan would require a reorganization of the banks, I think, so far as to have frequent and perhaps weekly reports, and also that the country banks should become branches of large banks in the redemption cities. The head banks only might be required to make the weekly reports as in Scotland, where each head bank has forty or fifty branches. fifty branches.

#### THE THREE HUNDRED MILLION LOAN.

A final agreement was made on Thursday at Washington, by which Mr. Boutwell sold 300 millions of new fives to a Syndicate of bankers. The purchasers are Jay Cooke & Co., and Morton, Bliss & Co. The former firm are associated with the Rothschilds and others, and the latter firm with the Barings and others. There is thus a broader combi nation than that of August, 1871, which was under the sole control of Jay Cooke & Co. How long a term the new Syndicate are allowed in which to pay for these 300 mil lions is not announced. But the report is that they expect to complete the whole negotiation in a year, and perhaps before. With this view it is said the legal 90 days' notice will be given by Mr. Boutwell, to expire in May, for paying off the first 100 millions of Five-Twenties; while a second lot of 100 millions are proposed to be called in for 1st June, and a third lot for the 1st July. Of these 300 millions of outstanding Five-Twenties, about 100 millions are believed to be held in this country. This fact seems to

here; and that the foreign part of the negotiation will not comprise more than two-thirds or three-fourths of the whole. In this anticipation a large number of applications have been already made by bankers in various parts of the country to be allowed to take a share. The present arrangement is, however, to confine the business to the same central agencies by which it was managed before. The chief of these were, if we mistake not, Messrs. Fisk & Hatch, Henry Clews, the Fourth National Bank, and the First National Bank. What compensation these agenta are to be allowed by the Syndicate has not transpired, but we believe that on the last occasion they gained about 14 per cent; though their profits depended, in part, on their adroitness in taking advantage of the movements of the market. The present Syndicate is the result of the union of two separate parties, that of Morton Bliss & Co. and that of Jay Cooke & Co., each of whom had been making proposals to the Secretary. If there is to be any such operation, the people are well satisfied that Mr. Jay Cooke should be prominent in it, for twe reasons. First, he has had more experience than any other individual in negotiating the loans of the United States from the first five-twenties of 1862 to the present time. Among the services which in some of the war loans he conspicuously rendered to the country, it is not the least, that the Treasury was, at a critical period of the war, almost wholly dependant on its receipts from Mr. Cooke's extensive agencies, for the funds needful for the carrying of the struggle to a successful close, when other means for raising these funds had disappointed expectation. It is also remembered that by the one thousand millions of bonds or more which Jay Cooke has at various times negotiated, the Treatury has never lost a dollar; but the payments to the government have always been made promptly according to his contract. Such being the public view of the case, it is gratifying to find that if there is to be a Syndicate Messrs, Jay Cooke & Co. are to be in it, and that they are backed by such powerful associates.

As to the  $4\frac{1}{2}$  per cents, the expectation is that they will be taken up next by the Syndicate, and that the four per cents will follow, a few months interval being allowed between each loan. The present loan, as we have said, is for three hundred millions, which exhausts all the fives authorized by the law of July 14, 1870, as amended Jan. 20, 1871. These laws authorize 300 millions of 41 per cents and 700 millions of 4 per cents, of which the former, it is supposed, can be negotiated during the year 1874, if the present loan is satisfactorily carried through.

These are the main facts we have been able to ascertain as to the new Syndicate. There are, however, a number of points on which information is wanted. The first has regard to the rate of commission which Mr. Boutwell has agreed to pay. The law specially limits the appropriation to 1/2 per cent, which includes "the expense of preparing, issuing, advertising and disposing" of the bends. If the Secretary of the Treasury has agreed to pay more than this ½ per cent, Congress may refuse to make the appropriation or to allow the disbursament. There are conflicting opinions as to what Congress is likely to do in the matter. The recent report of the Committee of Wavs and Means leaves the question in some doubt. What is certain is, that the committee could not agree to affirm either the lawfulness of the Syndicate arrangement or the contrary. A non-committal resolution was, therefore, the only alternative. Whether Congress will be equally divided in sentiment. and what shape the matter will assume when it comes up, as it inevitably must, admits of great uncertainty. A large number of members of the House will, no doubt, agree with suggest that a part of the loan will have to be negotiated the view held by The Chronicle, that the law as it at present

stands does not allow Mr. Bontwell to pay more than ½ per cent for the expenses of this negotiation. Congress has hitherto refused to enlarge this commission. The Committee of Ways and Means have refused to report in favor of any such increase. In view of these facts, the question is whether Mr. Boutwell has really agreed, as reported, to give besides the ½ per cent three months' interest as a bonus to the Syndicate, equal to 1¼ per cent. It he has so agreed, and the agreement is ultra vires, what is to be done about it?

Another question is, whether if these difficulties can be remedied, the present time is a favorable one for the negotiation. It has been argued that the recent stringency in the European money markets is unfavorable to such an operation, and that the French indemnity payments this year will increase the trouble. The Syndicate on the contrary argue that the present time is an unusually good one. They point to the fact that the monetary stringency in England and Germany is over. The bullion in the Bank of England is above 24 millions sterling. Letters from London capitalists declare that so favorable a time has not for years been observed in England for marketing American securities. As to Germany, the Syndicate declare that the situation has wholly changed. France now agrees to make larger pay. ments than were expected during the first five months of this year. In order to emancipate her territory from German occupation France is to pay \$40,000,000 a month from now till May next. This will complete the second milliard almost a year in advance of the stipulated time of payment, and will release the whole of France except the fortress of Belfort. With regard to these prodigious payments the Syndicate argue that they will so enlarge the mass of capital seeking investment as to offer us an opportunity for pl cing our new bonds, which we ought not to lose.

(From our own correspondent.)
LONDON, Saturday, January 4, 1873.

This has been somewhat of a broken week, and business can be scarcely said to have been fully resumed; but although transactions are small, a firm tone prevails in most departments of trade. In Manchester a certain degree of anxiety exists, owing chiefly to the diverse estimates of the American cotton crop, while the recent failures are an additional cause of uneasiness. It is hoped however, that there will be no further suspensions of importance. The opening stock market of the year was characterised by a feature for which but few persons were prepared. The market for British railway shares was considerably depressed, nearly all the leading stocks having declined in value 1 to 1½ per cent. It is well known that the value of English rallway shares has

materially improved during the last few years, and it was generally believed that the sharea of the dividend-paying companies were, in nearly all cases, at their legitimate value, that is to say that the price had been forced up to a point which would reduce the dividend to  $4\frac{1}{2}$  or 5 per cent. But latterly, coal and iron have become much dearer, and the rate of wages has been advanced; and it is expected that as these additional charges will form a prominent feature in the half year's accounts, the dividends which which will soon be declared will, in some cases, be disappointing. This week, nearly all accounts which were open for the rise appear to have been closed, and rather an extensive "bear" account has supplied their place.

The closing Stock Exchange settlement for 1872 witnessed some failures in the Erie market. The unexpected announcement of Jay Gould's restoration of so large an amount of property to the company embarrassed, as a matter of course, the "bears," of whom there appeared to be many; but it is satisfactory to notice that the suspensions were only three, of whom only one was of importance. The letters delivered this week contain the details of the movement, and as there appears to be every indication that the present directors will employ every effort to make the line a success, there is now as much confidence in the future of the undertaking as there was distrust in it before.

It would be a good thing for American finance, as far as the raising of money in Europe is concerned, if similar measures could be adopted in regard to certain other enterprises. The revelations which are now and then made naturally make investors cautious of American railroad bonds, and militate agalast their success. A loan appeared some months back for the Alabama & Chattaneoga Railroad Company. To the bondbolders the investment has been a great loss, and the following, which has been communicated by the Conacil of Foreign Bondbolders, gives them but little hope of a satisfactory management of their interests:

The following is an extract from a letter of Mr. F. de Neufolile, of New York, to Dr. Levita, agent of the Council of Foreign Bondholders at Frankfort, in relation to the Alabama and Chattannoga Railway: "The present state of the company is the following: The first purchaser of the railway mader the decree of the Bankruptey Court was the State of Alabama itself, and it has to pay about \$313,000; of this, however, it only paid \$100,000. The State, on its part, sold the railway to Stanton and colleagues for about \$100,000. With which amount Alabama intended to cover the \$100,000, and the amount which it still had to pay. Stanton has, as yet, only paid about \$70,000, and it is very questionable whether he can or will pay the remainder of the purchase money. Meanwhile the railway is, as at the commencement, atill in bankruptey, and in the hands of Judge Bustead, of the United States District Court in Alabama, and he can at any moment, if he wishes, sell it at any price, and to any one, in order to cover the indigment costs. It is even possible that in the case of another sale he will disregard the hondholders if they are not represented here. I hegynu, therefore, as soon as possible, to form a committee and to nominate some one here as your representative."

There has been a good demand for money during the week, but

There has been a good demand for money during the week, but it has been chiefly of a temporary and provisional character. The increase in "other securities" at the Bank of England is £5,280,-000, and in "other deposits," £4,445,020. It is evident, therefore, that the desire to possess large bankers' balances on the 31st of December has still to be fulfilled; but as the accommodation is only temporary the bank account is likely to be soon reduced to its normal state. There is at present no demand for gold for expert, and as the Australian mail steamer has arrived with £494,000, rather a considerable supply has been sent into the bank. Hence the stock of bullion shows an increase of £317,441 compared with that given in the preceding return. Next week the dividends on the public funds will be distributed, and it is anticipated that the next bank account will afford grounds for believing in an early reduction in the bank rate. There are some indeed, who believe in a revival of the German demand for gold though there are at present no signs of it. The French indemnity operations will undoubtedly render the course of the money market uncertain, and numerous changes in the official minimum are therefore anticipated during the year. The tendency just now is clearly towards ease, but the vast operations of Germany, if England should be the medium through which they are conducted, would quickly check the downward movement and produce considerable firmness. The quotations for money are now as follows:

Bank increase Open-market rates: 30 and 60 days' bills	4%@4%	4 menths' bank bills 6 menths' bank bills 4 and 6 menths' trade bills.	48 9643
9 months' bills			

The rates of interest allowed by the joint stock banks and discount houses for deposits are subjoined:

Per cent.

Joint stock banks	4
Discount honeon of roll	45
Discount houses at can 7 days' notice	4.5
Discount houses with 14 days' notice	.,,,

The following are the quotations for money at the leading Comtinental cities;

	rate.	Open market.		rate.	Open marke
per	cent. t	er cent.	per	cent.	per cent

Frankfort	5	5	Rome	6	5
Vienna and Tricete	734	734	Antwerp		
Madrid, Cadiz and Bar-			Belgium	• •	
celona	6	6			

Excepting British railway shares, the stock market has been firm, and the quotations have had an upward tendency. The value of foreign stocks has improved, and American descriptions have been in active request at an advance. Eris shares have been in demand, and the quotations are firmer; and there has also been a better demand for Illinois Central. In the consol market there has been no important movement.

There has been an active demand for foreign bills of exchange, and the rates are less favorable to this country. Gold continues to accumulate in this market, but silver and dollars are rather firmer, the supply on offer being very limited.

The following statement shows the present position of the Bank of England, the Bank rate of discount, the price of Consols, the average quotation for English Wheat, the price of Middling Upland Cotton, of No. 40 Mule Yarn fair second quality, and the Bankers' Clearing House return compared with the four previous years:

^{*} Io both departments.

The opening core markets of the year have shown indications of considerable firmness, especially for good wheat. The tendency of prices has been decidedly upward, and the stocks on hand are only moderate. In France wheat continues to be sparingly offered, and the trade is firm, with an upward movement in the quotations. The weather continues very wet and unsettled, but on light soils the wheat plant looks well, though perhaps it is too forward for the time of year.

The following is a return of the stocks of grain, etc., in the port of Liverpool:

	Dec. al,	Sept. 1,	Dee. 31.
	1871.	1872.	1872.

		•	,

Since I completed the above letter an important failure has been announced, viz., that of Messrs. J. F. Pawson & Co., Warehousemen, of St. Paul's Church Yard. The firm have conducted a large business for more than half a century, and the liabilities are estimated at from £600,000 to £700,000. It is believed, however, that on the realization of the assets there will be a surplus remaining.

#### English Market Reports-Per Cable.

The daily closing quotations in the markets of London and Liverpool for the past week have been reported by submarine telegraph, as shown in the following summary:

London Monsy and Stock Market.—American securities excited at the close, with a large business doing, and wide fluctuations. It is reported on the Stock Exchange that prices have been forced to float the new loan.

The bullion in the Bank of England has increased £432,000 the past week.

The Bank rate has been reduced 1, and is now 4 per cent.

#### CHANGES IN THE REDEEMING AGENTS OF NATIONAL MANKS

The following are the changes in the Redeeming Agents of National Banks approved since the 16th iost. These weekly changes are turnished by, and published in accordance with an arrangement made with the Comptroller of the Currency:

LOCATION.	NAME OF BANK.	REDEEMING AGENT.
Iowa— Charles City	First National Bank	First National Bank, New York City, approved as ar additional Redeeming Agent.
Minnesota Northfield	First National Bank	Ninth National Bank. New York City, approved.
Indiana Goshen	City National Bank.	Third National Bank, New York City, approved.
Pennsylvanis— Glen Rock		First National Bank, New York City, and National Exchange Bank, Balti- more, approved in place of Union National Bank, Philadelphia.
Michigan— Msrshall	City National Bank.	Fourth National Bank, Chicago, ap- proved as an additional Redseming Agent.
Michigan Grand Haven	First National Bank	Approval of Commercial Bank of Chic- ago as Redeeming Agent revoked.
	First National Bank	Ninth National Bank, New York City, approved.

#### New National Hanks.

The following is the only National Bank organized during the past week, viz.:

Official No. 2,075—The City National Bank of Griffin, Ga. Anthorized capital, \$50,000; paid in capital, \$30,000. Gliman J. Drake, President; J. G. Rhes. Cashier. Authorized to commence business Jan. 20, 1873.

#### COMMERCIAL AND MISCELLANEOUS NEWS.

IMPORTS AND EXPORTS FOR THE WEEK.—The imports this week show an increase in both dry goods and general merchandise. The total imports amount to \$11,282,162 this week, against \$5,348,106 last week, and \$6,286,904 the previous week. The exports are \$4,586,333 this week, against \$4,454,423 last week, and \$3,513,906 the previous week. The exports of cotton the past week were 12,163 bales, against 10,335 bales last week. The following are the imports at New York for week ending (for dry goods) Jan. 16, and for the week ending (for general merchandise) Jan. 17:

Dry goods		YORK FOR 1871. \$2,045,948 8,544,585	THE WEEK. 1872. \$2,261,722 8,873,016	1873. \$3,485,699 7,846,468
Total for the wesk. Previously reported		\$6,590 534 5,640,792	\$6,734,788 18,744,808	\$11,282,162 11,635,010
Since Jan. 1	\$8,910,413	11.231.826	\$19,879,548	\$22,917,172

In our report of the dry goods trade will be found the imports of dry goods for one week later.

The following is a statement of the exports (exclusive of specie,

The following is a statement of the exports (exclusive of specie, from the port of New York to foreign ports, for the week ending Jau. 21:

Total since January 1, 1873. \$53,609

Same time in Same time in 1872. \$61,540 | 1869. \$169,905

1871. 159,416 | 1868. 95,049

1870. 270,377 | 1867. \$23,388 — In regard to the recent sale of stock of the South Side (L. I.) Railroad, the Secretary of the Company states, in a circular, I.) Railroad, the Secretary of the Company states, in a circular, that "the purchasers are anonymous clients of the Banking House of Jacob R. Shipherd & Co., 24 Pine street, and include capitalists in New York and Boston, who believe the stock cheap at the price paid, and were offered, as it is reported, \$200,000 bonus for their stock within twenty-four hours after its transfer. The negotiations were only consummated by an agreement between the principal shareholders to sell each a bare majority of his interest and retain the rest. Not a single individual was 'bought out,' and the corporation retains as large shareholders every capitalist heretofore connected with it. 

* * * The rumor that Oliver Charlick was at the bottom of the transaction is entirely without Charlick was at the bottom of the transaction is entirely without foundation. The effect of the transaction upon the Company's new loan now on the market, has been to give a great impetus to sales."

-The Canada Southern Railroad is now finished, and it is expected will be in operation at an early day. The Chicago Canada Southern is being pushed as rapidly as possible, with a view to finishing it during 1873. Messrs. Leonard, Sheldon & Foster, 10 Wall street, are offering the 7 per cent, gold bonds of the latter company at 90 and accrued interest.

— Messrs. Jay Cooke & Co., financial agents of the Northern Pacific Railroad Company, report that there is a good investment demand for the First Mortgage 7:30 gold bonds of the road, and that the sales since the first of January amount to nearly \$1,000,,000.

—The annual statement of The New York Mutual Insurance Company will be found in this number of The Chronicle, showing assets amounting to \$794,337 40. The Trustees have directed the payment of six per cent interest on all outstanding scrip on and after Feb. 11th, and have also declared a scrip dividend of 40 per cent on the net earned premiums for the year, certificates for which will be ready for delivery March 1.

-The Pacific Mutual Insurance Company. -By the annual state-—The Pacine Mutual Insurance Company.—By the annual statement of this company, which appears in another part of this paper, it will be observed that during the year just closed its receipts for premiums on Marine risks were \$673,365 08, and on January 1 its total assets were \$1,021,091 59. Interest on the outstanding certificates of profits, at the rate of 6 per cent, will be paid on and after Feb. 4.

-The thirty-ninth semi-annual statement of the Home Insur-The thirty-ninth semi-annual statement of the Home Insurance Co., which is given in our advertising columns, shows the assets of the company on the 1st of January to be \$4,446,858 78, while the liabilities (consisting of claims for losses and dividends unpald) are only \$590,914 19. Such a showing, after the experience of the last fifteen months, reflects great credit on the officers of the company, and is proof of the strong confidence which the public has in this staunch old institution.

—The coupons of the First Mortgage 8 per cent gold bonds of the Logansport, Crawfordsville, and Southwestern Railway Com-pany, due February 1, 1873, will be paid on and after that day at the office of Meesrs. Jones & Schuyler, Financial Agents, 12 Pine street, N. Y.

#### BANKING AND FINANCIAL.

Banking House of Henry Chews & Co., 32 Wall street, N. Y.

Bills of Exchange, Circular Notes, Travelers' and Commercial Credits issued available in all parts of the world.

Deposits received, subject to check on demand. Interest allowed on all Daily Balances, every accommodation and facility afforded usual with City Banks.

RAILROAD BONDS .- Whether you wish to BUY or SELL. write to

> HASSLER & CO.. No. 7 Well street, New York.

BANKING OFFICE OF FISK & HATCH,

New York, Jan. 24, 1873. The CHESAPEAKE and OHIO, the CENTRAL and WEST ERN PACIFIC BONDS, all of which have been negotiated by us, we believe to be among the best and most desirable luvest ment Securities in the market, which in time must become very scarce; especially as the Government will probably, during this year, pay off in gold another large lot of Five Twenties, and issue in their place FIVE PER CENT. BONDS.

The CHESAPEAKE AND OHIO SIX PER CENT. GOLD BONDS, the total amount of which is only \$15,000,000, are secured upon a property worth \$25,000,000 to \$40,000,000, and are fully equal in intrinsic value to the CENTRAL PACIFIC BONDS, They are issued in denominations of \$100, \$500 and \$1,000, coupon or registered, and at their present market price, 86 and accrued interest, are very desirable.

The CENTRAL PACIFIC SIX PER CENT, GOLD BONDS are too well known to require description or commendation, Their total amount is \$25,885,000; they have for a long time ranged in market price near or above par.

The WESTERN PACIFIC SIX PER CENT, GOLD BONDS amount to \$2,735,000. This road is now consolidated with the CENTRAL PACIFIC, and the payment of its bonds, principal and interest, is assumed by the latter. Coupon Bonds, \$1,000 each. Their market price to-day is 90‡ to 90‡. As they have recently been introduced on the Stock Exchange, we expect to see them rapidly rise to the price of CENTRAL PACIFICS, being substantially the same in character and value.

We buy and sell, as usual, Government Bonds, receive deposits on which we allow interest, make collections, and conduct a general banking business in all its branches.

FISK & HATCH.

#### TO INVESTORS.

To those who wish to REINVEST JANUARY COUPONS OR DIVIDENDS, and those who wish to INCREASE THEIR IN-COME from means already invested in other less profitable securities, we recommend the Seven-Thirty Gold Bonds of the Northern Pacific Railroad Company as well secured and unusually produc-

The bonds are always convertible at Ten per cent. premlum (1.10) into the Company's Lands at Market Prices. The Rate of Interest (seven and three-tenths per cent. gold) is equal now to about 81 currency-yielding an income more than one-third greater than U.S. 5-20's. Gold Checks for the somi-annual interest on the Registered Bonds are mailed to the Post Office address of the owner. All marketable stocks and bonds are received in exchange for Northern Pacifics ON MOST FAVORABLE TERMS. JAY COOKE & CO.,

New York, Philadelphia, and Washington, Financial Agents Northern Pacific Railroad Co.

FRIDAY EVENING, Jan. 24, 1873.

The Money Market.—The money market has been slightly irregular at times during the week, and closed this evening quite active at times during the week, and closed this evening quite active at the highest point made, namely, 1.32 per day, in addition to 7 per cent, interest. This rate, however, is quite exceptional, and only took place on a sharp turn late in the afternoon, when no apparent cause for it was developed. Regular rates for money have been 6@7 per cent, with exceptions as high as 7 gold, and down to 4 and 5 per cent, on several days in the atternoon, when howers' accounts had caparally been made up brokers' accounts had generally been made up.

The experience of former years has encouraged an expectation

that money will continue easy for several months after the first of the year, and the sharp advance in call loans this evening is not considered as having any special significance.

For prime commercial paper the demand continues good at 8@

10 per cent., while some very choice paper has been sold as low as 7 per cent.

Reports from the London market are quite favorable, bullion in the Bank of England showing a further increase this week of £432,000, and the discount rate having been reduced to 4 per cent.

The Bank of France shows a decrease in specie this week of

500.000 francs

The last statement of our New York city banks (January 18) showed an increase of \$809,075 in the excess of reserves. The total liabilities stood at \$240,130,400; the total reserve at \$65,531,700, being \$5,499,100 more than 25 per cent. of the liabilities.

The following statement shows the changes from previous week

and a comparison with 1872 and 1871:

_	1878					
	Jan. 11.	Jan. 18.	Differences.		Jan. 21.	
Loans and dia			lnc., \$2,656,800	\$273,032,900	\$270,253,791

United States Bonds.—The market for governments has been quite active and buoyant. The higher range of gold and the more definite information in regard to the syndicate operations have been favorable to higher prices. A Washington despatch to the Herald gives the following in regard to the agreement

to the Herald gives the following in regard to the agreement made with the two syndicates:

"The parties to the two proposals which have been pending before the Secretary of the Treasnry having united, the Secretary has completed a contract for the negotiation of the remaining \$300,000,000 five per cents funded lonn, with Messrs. Jay Cooke & Co., representing N. M. Rothschild & Sons, Jay Cooke McCulloch & Co. and themselves; and with Messrs. Morton, Bliss & Co., Drexel, Morgan & Co., representing Messrs. Baring Brothers & Co., J. S. Morgan & Co., Morton, Rose & Co. and themselves.

"The terms are substantially the sume as the first contract, the Secretary reserving the right to determine when he will place the honds and what amount shall he placed."

The immediate result of this agreement has been to advance the 5 per cent bonds, and both 10-40s and the funded 5s are materially higher than last week, 10-40s having been quoted to day at 114½ against 111½ last Friday, and funded 5s at 114½@115

against 111½ last Friday, and funded 5s at 114½@115 against 111½ last week. This is a remarkable advance for government bonds, and has strengthened the whole market. Transactions have been large, and the amount of sales gesterday and to-day at the stock exchange were the largest recorded for some time past.

At the Treasury purchase of 5-20s on Wednesday the offerings amounted to \$666,400, and the bonds accepted to \$546,400.

Closing prices daily, and the range since Jan. 1, have been:

State and Railroad Bonds.-Southern State Bonds have been State and Kaliroad Bolius.—Southern State Bolius have been more active than last week, and some considerable transactions have taken place in Tennessees, North Carolinas, Virginias, Missouris, and to day several sales of Alabama 8s were recorded at 83 to 84. There is no further intelligence from the Southern

Capitals beyond that which we have previously given in regard to the various messages and financial reports.

Railroad bonds have been quite active both for the old bonds and the new issues. Sales at the stock exchange show a large business in the bonds of Central and Union Pacific, in consedustries in the bonds of Central and Union Pacinc, in consequence of proposed legislation in Congress, and as to the latter, the excitement attending the Credit Mobilier investigation. The income bonds of the Union Pacific, depending for their value upon the current earnings of the road, have been particularly sensitive and fluctuated considerably. There has been a well distributed business at the Board for the railroad bonds sold there and the miscellancous list embracing a leave number of there, and the miscellaneous list, embracing a large number of bonds sold only by brokers, has received much attention. In regard to this latter class of bonds, the best information as to prices, &c., can be obtained by addressing reliable brokers and dealers in stocks and bonds.

Railroad and Miscellaneous Stocks.—The general market has moved with more buoyancy, particularly on Wednesday and Thursday, prices on the latter day having made quite a sharp advance, with large transactions in Ohios, Lake Shore, Rock Island, New York Central, and Pacific Mail. The highest point of most stocks was touched on Thursday afternoon and this morning, but subsequently there was some reaction, and prices close this evening lower than yesterday in consequence of some considerable sales made to realize the advance. The movement here noticed in the market is said terday in consequence of some considerable sales made to realize the advance. The movement here noticed in the market is said to be without the assistance of the leading stock speculators, and the support of outside purchasers is considered an important element. No new developments have transpired affecting the value of particular stocks; the Toledo and Wabash Company have authorized \$5,000,000 of new bonds for the purpose of laying steel rails; reports have been current that the Eric Company may be successful in placing their new bonds in London at par; Union Pacific is unfavorably influenced by the Congressional investigation and the possibility of adverse legislation; Pacific Mail has been strong, notwithstanding the telegram that the steamer Alaska was four days overdue at Hong Kong.

The following were the highest and lowest prices of the active list of railroad and miscellaneous stocks on each day of the lastweek; eaturday Monday, Thereday, Wednesdy Thursday, Friday,

The Gold Market.—Gold was pretty strong early in the week, but was checked for a time in its advance by the Syndi cate reports from Washington and the prospect of a further negotiation of 5 per cent. bonds. The check was temporary, however, and to-day the price was again buoyant, touching at 114; and closing at 114. In addition to the influence of speculative purchases the marting of the control of the contr 114. In addition to the influence of speculative purchases the market received support from the large amount put up for shipment to-morrow, which footed up \$2,000,000; though, exchange being weaker, it is possible that some of it may be withdrawn. On loans the rates paid for carrying to-day wers 3, 4, 1, 2½, 4½ and 5 per cent. At the Treasury sale of \$1,000,000 on Thursday the bids amounted to \$3,963,000, at prices from 112.51 to 113.63½. Customs receipts for the week amount to \$2,632,000.

The following table will show the course of the gold premium each day of the past week:

Foreign Exchange.—The exchange market has been pretty active, particularly on Thursday, when prices were quoted up to 109 for 60 days' sterling, and 110 for short sight. The high prices made and the prospect of specie shipments, as noticed above, checked activity, and to day the market was more quiet, though rates were nominally maintained by the leading bankers.

There have been some borrowed bills on the market, but there

has also been a demand for short sight to pay back 60 day bills previously borrowed, and the latter transactions are now probably quite equal to the former, as there is little inducement to

borrow sterling when money is easy.

The transactions for the week at the Custom House and Sub-

Treasury have been as follows:

## Investments

AND

STATE, CITY AND CORPORATION FIVANCES.

## STATE SECURITIES, CITY SECURITIES, HALLHOAD STOCK AND BOND LIST, CANAL AND MISCEL-LANEOUS STOCK AND BOND LIST.

[Entered according to Act of Congress, in the year 1878, by William B. Dana & Co., in the office of the Librarian of Congress, Washington, D.C.]

THE CHRONICLE monthly tables of stocks and bonds will be found to-day on this and following pages.

In the present and several ensuing months, the tables have the year, when a great number of states, cities and railroad compage of Chroncile where more detailed information has been published, is also indexed in the same place.

Since the first of January, 1873, the publishers of THE COM-

MERCIAL AND FINANCIAL CHRONICLE have issued the first num. ber of "THE RAILWAY MONITOR," a monthly journal devoted to railroad intelligence. There has been some misapprehension as to the character of THE MONITOR and the ground which it is intended to cover, and the publishers desire that it should be very clearly understood that the Railroad Department of THE CHRONICLE will not be superseded nor changed in any respect except that it may be enlarged and improved. No subscriber of the CHRONICLE will obtain less railroad news than heretofore, but in addition to the financial news and the necessarily brief reports published in these columns, he can obtain for a moderate price, in THE RAILWAY MONITOR, the most complete details of more than the usual interest, on account of the numerous addi-information about each railrond in the country, thoroughly classitions and corrections which are made to them after the close of fied and indexed for ready reference. The Chronicle tables of stocks, bonds, prices, &c., will not be published in THE panies issue their annual financial reports. The most essential MONITOR. The subscription price of THE RAILWAY MONITOR figures from these reports will be found in the "remarks" opposis \$4 per year, and to subscribers of THE CHRONICLE \$3; these site to the statement of bonds in the tables, and the volume and prices including a neat file furnished to every new subscriber. A sample copy of THE MONITOR will be sent free of charge on application by letter.

#### CANAL AND MISCELLANEOUS STOCK AND BOND LIST.

Norg.—The figures aometimes given by brackets, at the end of remarks, refer to the volume and page of Chronics containing fuller information. The letters of mean "sinking fund," and l. gr. "land grant." Companies consolidated with, or leased to others will often be found under the consolidated or lesses's name.

For stocks, this means the miles of road operated; for bonds, the miles covered by the mortrage.

Thase figures are doll irs, tayoning the denominations or par value of each issue of stocks, and bonds.

The interest ner annum is given on bonds, but the last divident on stocks; given in an angular transfer annum is given on bonds, but the last divident on stocks; given in an angular transfer of Jan. et al., the stock of scrip.

J. & J. stands for Jan. et al., Teb. & Aug.: M. & S., Mar. & Bept.: A. & O., April & Get. M. & N., Miy & Nov. J. & P. June & Pec. — J. quarterly from January; Q.—F., quarterly from Feb.; Q.—N., quarterly from Marca.

Toese dates about the parlod when the principal falls Jue of bother; but the fine when the last dividend was paid on stocks.

Subscribers will confer a				y givle	ig us	imme	diate notice of a	ny error	discovered in our Tables.

## The Commercial Times.

#### COMMERCIAL EPITOME.

FRIDAY NIGHT, Jan. 24, 1873.

The markets for merchandize during the past week have shown a good degree of activity—fully as much as could be expected under the circumstances; and prices, with a notable uniformity, have had an upward tendency. This state of affairs may be attributed, in part, to the advance in gold, the better coudition of the streets, lower ocean freights, and an easier money market; but it is also due to some extent to the approach of the time when dealers begin to prepare for the spring trade, and to speculation based upou relatively low prices or deficient supplies, present or prospective. The inability of the railways to furnish the needed facilities for transportation from the West to the seabeard is taken advantage of to secure higher prices for Western products in this market. And yet what is known as the "jobbing trade" has been inactive, and on all sides complaints are heard of "dull times" and difficult collections.

Provisions have been active, and almost uniformly close firmer. Early in the week there was a slight re-action from the advanced prices noted in our last, but with the advance in gold, which eccurred on Tuesday, there was renewed activity and buoyancy, and yesterday something of a "corner" began to be felt in contracts for bacon to deliver this month, supplies due by rail being still detained by various circumstances. Yesterday pork was in demand at \$14 for new mess on the spot, and for the early future \$13 50 for old mess, \$13 871 for Western prime mess, and \$11 50 for extra prime. Beef also firmer, with City India mess as high as \$32 50, and in demand for export. Bacon has been irregular. yesterday short clear advanced to 7%@Sc., while long clear remained at 7c. Dry salted shoulders have been salable at 51c. for January and February. Pickled meats have advanced, with sales of bellies at 74@85c. in bulk and boxes, shoulders at 54@6c., and hams at 10@11c.; smoked meats have also shown an upward tendency. Butter and cheese have been firm, but more freely offered at the recent advance in prices, there being a disposition to reduce stocks at this stage of the season. To day perk was firmer and more active, the sales including 2,000 bbls. new mess at \$14 for January and February, \$14 05 for March, and \$14 10 for April. Lard ruled firmer at 8 3 @8 7.16c. for prime Western steam. Bacon sold at 8c. for short clear. But there was a quieter feeling at the close. [Full details of cotton, breadstuffs, and groceries will be found in our special reports.]

Freights have been more active, but at lower rates. To Liverpeol, by steam, grain has been shipped at 7d. for corn, and 7½@ 7½d. for wheat, the higher rate ruling; cotton, 5-16@§d., and bacon 50s.; and by sail, wheat, 7d., and lard, 27s. 6d. A Glasgow steamer filled up at 7½d. for corn. A few vessels were chartered to load grain to Cork for orders at 7s.@7s. 6d. Petroleum charters have been quite active, mainly at 6s.@6s. 6d. to continental ports. To-day a Liverpeol steamer took corn at 7½d., and a vessel of 2,800 quarters grain was re-let to Cork for orders at 7s. 3d. Wool has been dull, and prices show decided weakness. Tallow

2,300 quarters grain was re-let to Cork for orders at 18. od.

Wool has been dull, and prices show decided weakness. Tallow has been selling at \$\frac{3}{6} \omega \beta_{5}^{2} \omega \beta_{5}^{2} for good to choice. Whiskey has been more active, and advanced to 96°. Strained rosin has remained about steady at \$3 80@3 85. Spirits turpentine is held higher at 66°c. Hops have declined under free offerings of English, which are queted at 35@42°c.; American, 45@53°c. Oils have been without essential change; crude sperm has sold at \$1 50, and Northern whale at 68°c. Calcutta linseed is easier, with sales for arrival here at \$2 60, gold. Cloverseed has been active, and closes firmer at \$\frac{3}{2}\omega \omega \frac{3}{2}\omega \cdot \text{.} Hides have ruled firm, late sales including dry Montevideo at \$27\omega \cdot \text{.} gold. Fish have been very active for all the leading descriptions, at very full prices. Fruits of all kinds have been quiet.

for all the leading descriptions, at very law places kinds have been quiet.

Petroleum has been more steady, being less freely effered, and the combination is apparently inclined to force up prices; closing quotations are 9½c. for crude in bulk, 21½@21¼c. for refined in bbls., and 14½@15c. for naphtha in shipping order. To-day, 1,000 bbls refined sold for February at 21¼c.

bbls., and 14½@15c. for naphtha in shipping order. To-day, 1,000 bbls. refined sold for February at 21½c.

Copper is quoted at 35c. for American inget, but rather quiet; English sold at 30½@31c. Tin is easier, with sales of straits at 30½@31c., gold. Tin plates quiet, but steady; charceal tin, \$11, gold. Pig iron very quiet; No. 2 American \$44@48, according to brand; Scotch very scarce. Spelter was active early in the week at about 7½c. gold, for Silesian.

Tobacco was steady for Kentucky, with the demand still good; lugs quoted at 9½@10c.; leaf 10½@15c.; the sales for the week have been 600 hhds., of which 450 hhds. for consumption, and 150 hhds. for export. There is a poor assortment of shipping tobacco. Seed leaf tobacco has been quiet, a disposition to hold for higher prices has checked the demand; sales have been: Crop of 1871, 200 cases Connecticut, 50@75c.; 125 cases Pennsylvania, private terms; 100 cases Wisconsin, 9½@9½c.; also, crop of 1870, 200 cases sundry lots at 10@14c. Spanish tobacco in good demand, with sales 500 bales Havana, 95@1 15, and 50 bales Yara, private terms.

The following table, compiled from Custom House returns, shows the exports of leading articles from the port of New York since January 1, 1873, to all the principal foreign countries, and also the totals for the last week, and since January 1. The last two lines shew total values, including the value of all other articles besides those mentioned in the table.

#### COTTON.

FRIDAY, P. M., January 24, 1873.

FRIDAY, P. M., January 24, 1873. By special telegrams received to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, Jan. 24. It appears that the total receipts for the seven days have reached 135,493 cales against 136,325 bales last week, 133,235 bales the previous week and 104,703 bales three weeks since, making the total receipts since the first of September, 1872, 2,138,808 cales against 1,824,045 bales for the same period of 1871-72, showing an increase since September 1, 1872, of 314,763 bales. The details of the receipts for this week (as per telegraph) and for the corresponding weeks of the five previous years, are as follows:

Received this week at-	1873.	1872.	1871.	1870.	1869.	1863.
New Orlcansbales. Mohite	55,400 12,383 12,969	57,936 9,867 9,638	53,019 18,109 13,417	48,419 6.457 5.925	28,127 10,511 8,566	20,285 15,575 7,808
Savannah	19,133 11,879	17,727 7,632 5,343 1,276	29,353 10,961 11,787 514	15,951 6,322 7,33	14,859 4,386 9,232 273	17,983 2,812 4,657 2,709
Virginia	1,2×2 16,671	10,193	2,231 11,429	1,408 6,219	1,446 6,185	1,918 4,593
Total this week Total since Sept. 1	135,493	120,813	2,194,218	98,851	1 290 785	77,690

The exports for the week ending this evening reach a total of 71,550 bales, of which 52,272 were to Great Britain, 4,932 to France, and 14,346 to rest of the Continent, while the stocks as made up this evening, are now 544,853 bales. Below are the exports and stocks for the week, and also for the corresponding week of last sesson .

	E,	mported t	0-	Total this	Sama wit	Stock.		
Wask ending Jan. 24.	G. Brit.	France	Contin't		1872.	1973.	1872.	
New Orleans. Mobile. Charl ston Savanash Texas New York Other ports	5.952 3,180 3,886 15,214 12,163	4,922	4,833 725 3,275 5,518	20,656 6,077 6,455 9,849 15,244 12,163 1,606	26,701 9,599 10,602 17,110 5,846 10,676	195,018 51,610 34,082 81,669 65,794 73,785 48,000	215,161 61,328 29,860 71,559 48,731 91,947 27,600

tuture delivery. The main strength has evidently been speculative. There has been a fair business for export, and yet reports from Liverpool and Manchester have been dull, and at times weak. The demand for home consumption has been with times weak. The demand for home consumption has been with in narrow limits, while the receipts at the ports have shown a very considerable increase. Yesterday, when the quotations for cotton on the spot were advanced ic., the receipts, as reported to the Cotton Exchange, were nearly 30,000 bules. The views of holders, however, have been very strong and the offerings so limited that those having orders to execute have been compelled to advance their hids. The interaction to day of his restriction. limited that those having orders to execute have been compelled to advance their bids. The improvement to day of \$\frac{1}{2}\$c, was more nominal than real, the official quotation having been for some days hardly up to the actual sales. The principal business was in transit. For future delivery the improvement was more decided than for spot cotton. There appears to be something of a corner in contracts for January, and yesterday the price was \$\frac{3}{2}c, higher than on Monday last. To day there was a further decided advance in January contracts, with a large business doing for this month and February, and the whole market following in an irregular improvement. The prices for futures last reported were (tasks low middling) 20-1-16c, for January, 20\frac{1}{6}c, for June, and 22\cdot c, for July, Tho total sales of this description for the week are 77,650 bales, including — tree on board. For immediate delivery the total sales foot up this week 15,966 bales, including 9,561 for export, 3,991 for consumption, 54 for speculation, and 2,360 in transit. Of the above 1,877 bales were to arrive. The following are the closing quotations to-day: ing are the closing quotations to-day:

WEATHER REPORTS BY TELEGRAPH.—They have had one slight rain at New Orleans this week. At Mobile it has rained on two days, the balance of the week being clear and cold. It has also rained on two days at Montgomery, Columbus, Macon has also rained on two days at Montgomery, Columbus, Macon and Augusta, and one day at Selma and Charleston. At Nashville it has rained on two days, and the remainder of the week has been cold and very disagreeable. At Memphis it has rained on one day, and the rest has been cloudy. The crop now has all been saved, except what has been wasted, and as rapidly as the weather will permit is being brought to market. The thermometer at Memphis has averaged 32; at Charleston 45, Selma 47, Columbus 45, Montgomery 41, and Macon 39.

The consumption of American Cotton in Great Britain.—The course of the cotton, market, the past, two years well illust.

The course of the cotton market the past two years well illustrates the effect of price on consumption. We refer to this point now, as it may help our readers to appreciate the force, or lack Mohile 209,497 209,286 41,981 1,073 4,089 47,062 15,783 48,281 95,481 183,88 1,073 4,089 47,062 15,783 48,281 95,481 183,81 932,171 105,901 27,215 75,833 28,895 124,785 72,715 128,81 123,810 55,505 35,515 12,851 72,785 42,781 123,810 55,505 35,515 12,851 72,785 42,781 123,810 55,505 35,515 12,851 72,785 42,781 123,810 55,505 35,515 12,851 72,785 42,781 123,810 55,505 35,515 12,851 72,785 42,781 123,810 55,505 35,515 12,851 72,785 42,781 123,810 55,505 35,515 12,851 72,785 42,781 123,810 123,810 55,505 35,515 12,851 72,785 42,781 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 123,810 averaging this year 10.86d, for Middling Orleans at Liverpool,

averaging this year 10.86d. for Middling Orleans at Liverpool, against 8.77d., the average for the previous year.

A leading Liverpool circular of January 1, as a basis for its argument with regard to the future, misstates—of courae, unintentionally—the past. It says: "The actual consumption of American cotton this past year (allowing for reduction of spinuers etock) has been about 28,000 bales per week, and the year before 34,800 bales per week." Evidently this statement is an oversight, for according to it the consumption is increased this year above the takings by the amount of the decrease in spinners stock, but there is an omission to decrease the takings of 1871 by the amount which went into spinners stocks that year. The actual consumption would, therefore, with this correction, average for the two years only 30,000 bales as we have given it above. Then, again, this same writer gives the continental consumption of American at 859,000 bales last year, and increases it to 950,000 bales for this year. According to Ott-Trumpler, the total takings of American for the continent (his ports) for three years, have only been 2,028,000 bales, being an average of 576,000 bales; or for the last two years of an average of 710,000 bales. The past year the takings were only 501,000 bales. Adding to these averages for the two and three years 90,000 bales, the amount used by Russia and other ports, not included in his figures, and we have the average continental takings for the past two years 800,000 bales, or for the past three years 766,000 bales. As to the coming year, u nless prices here are going down to 15 cents, as they did in 1870, the supposition that the takings would equal that year's takings, when so large an amount went into stock, would appear unreasonable.

In discussing then this question of future consumption in sonable.

In discussing then this question of future consumption in Europe it strikes us that the past and present surroundings of the Europe it strikes us that the past and present surroundings of the market cannot be too closely scrutinized. A year of the cheapest cotton since 1360-61 certainly cannot be our guide for an estimate. Nor will the past three years furnish us a correct standard, as those years cover a period of far larger spinning capacity than was ever before attained, and during thirty of the thicty-six months the activities of English machinery were stimulated to the highest ever known for a continuous twelvemonth. This spindle capacity is still increasing under contracts not complete; but are not the conditions adverse to an increased, or even a sustained employment of the spindles? Cotton is comparatively dear; the mill expenses enhanced; profits have almost or quite ceased on the production of all but the finer fabrics; the tendency is continually toward finer yarns, and a lighter consumption of cotton tinually toward finer yarns, and a lighter consumption of cotton per spindle; and the general features of the trade, as reported, are dullness and disaster in the place of activity and good re-

Nothing but lower prices cau restore the desirable conditions—full activity with profit—which prevailed for about two years prior to the midsummer of 1872. Either the production of cotton goods and yarns must be shortened so as to force au advance of goods and yarns must be shortened so as to force au advance of prices by deficiency of supply, or prices must fall so far as to enlarge the distribution of those goods. When high prices follow upon an excessive distribution of goods among the consumers, who are chiefly of the world's poor people, the alternative of lower prices or restricted markets is inevitable. It has been shown repeatedly that the consuming world can for months deny itself the purchase of high-priced fabrics. Lower prices of goods imply lower prices of raw cotton, or disaster to the manufacturing interests and stopping work. Whether England shall increase or diminish her consumption of cotton during 1873 is therefore a question of price. price.

We abstain for the present from making any exact estimate of

the probable consumption this year. The figures for the past twelve months are not all in yet, and besides a very short time will throw much light also on the question of supply. What we have said, however, would indicate that, in our opinion, with cotton at 10d., the circular in question has considerably over-

estimated European consumption.

BOMBAY SHIPMENTS.—According to our cable dispatch received to-day, there have been 9,000 bales shipped from Bombay to Great Britain the past week and 1,000 to the continent, while the receipts at Bombay, during the same time have been 18,000 bales. The movement since the first of January is as follows. These are the figures of W. Nicol & Co., of Bombay, and are brought down to Thursday, Jan. 23:

Shipments this week tonger of Control of Great C

Total, receipts. 44,000 18,000 72,000 34,000 49,100 12,000 **15**72.... 9,500 4,500 14,000 1871... 15,000 4,300 19,300 9,500 13,500 7,800 58.500 41,300

From the foregoing it would appear that compared with last From the foregoing it would appear that compared with most year there is a decrease this year in the week's shipments to Great Britain of 500 bales, and that the total movement since Jan. 1 shows a decrease in shipments of 28,000 bales over the corresponding period of 1872.

Gunny Bags, Bagging, &c.—The market for cloth has ruled quiet the past week, and no large sales have transpired. There

Gunny Bags, Bagging, &c.—The market for cloth has ruled quiet the past week, and no large sales have transpired. There are still a number of small orders coming in from the South, which dealers are filling at 13@13½c. The asking price is 12½c. cash for large parcels, immediate delivery, but we doubt if much could be done at over 12c. cash. Future contracts for March, April and May delivery we still quote from aecond hands at 13½ @14c. For bags there is more inquiry, and if that be any indication of the market, there will yet be considerable purchases for account of consumers. We hear of sales of 450 bales last week, but prices have not transpired. Holders atill ask 14½@14½c. Butts have not ruled very active; 1,000 bales landing ex "Calcutta" sold part at 2 1-32c. and part at 2c. cash; latter price is offering for more, without finding sellers. We quote prices

2 1-16c.@2\frac{1}{2}c., cash and time, latter being for prime bagging quality. Should vessels now on the way be delayed, we shall look for better prices and firmer market. The receipts since January 1 have been 22,000 oales, while the amount to arrive up to April 1 is under 14,000 bales, of which part are sold to consumers. Future contracts we quote at 2\frac{1}{2}c2 1-16c. gold.

VISIBLE SUPPLY OF COTTON MADE UP BY CABLE AND TELE-GRAPH.—By cable we have to night the stocks at the different European ports, the India cotton afloat for all of Europe, and the American affoat for each port as given below. From figures thus received, we have prepared the following table, showing the quantity of cotton in sight at this date (Jan. 24) of each of the

quality of cotton in sight at this date	(0000 21) 02	OLCOL OL DILO
two past seasons:	1873.	1872.

Below we give all news, received during the week, of disasters to vessels carrying cotton from any port of the United States:

Below we give all news, received during the week, of disasters to vessels carrying cotton from any port of the United States:

Minnesota (Br.) The fire on board the steamer Minnesota, from New York, at Liverpool Jan. 1, occurred four or five days after leaving New York. It broke out on the steerage deck hefore the engine-room; shout 120 hales of cotton were either thrown overboard or destroyed; damage to vessel chiefly confined to a limited space underneath the main deck. Potomac (Br.), from Philadelphia for Liverpool, with 773 hales cotton, which put back to Philadelphia for Liverpool, with 773 hales cotton, which put back to Philadelphia for Liverpool, with 773 hales cotton, which Perham, Vickery, from Savannah for Bremen, with 2,365 bales upland cotton, put into Falmouth Dec. 30, for sails and provisions.

John L. Dimmock, from Savannah for Bremen, with 2,365 bales upland cotton, put into Falmouth Dec. 30, for sails and provisions.

John L. Dimmock, from Savannah via Crookhaven for Bremen, with 3,307 bales upland cotton, passed Dover Jan. 7, in tow for Loudon, with loss of hewsprit and topmsate.

Wert Denny (Br.), Uran, from Mobile for Liverpool, which was towed into Key West after heiog ashore at Tortugas, was lightened by the wreckers taking out 400 bales cotton, when the U. S. revenue entiter Northerner towed her head around. The wreckers then crowded sail on the abip, and forced her off the shore. She arrived at Key West Jan. 9, when a diver was sent under her, who reported the hottom in good condition, with the exception of false keel. The surveyors then recommended that a authmarine diver be sent ander her to make a more thorough examination, which was done on the 11th. The diver had not rendered his report on the evening of the 11th, but it was almost certain that she would not be compelled to discharge. The case would be heard as soon as the Admiralty Judge returned, he being absent from the city. The West Derby was discovered on fire in the between decks Jan. 17. The deck was cut, and water was thro

By TRLEGRAPH FROM LIVERPOOL.—
LIVERPOOL, January 24-5 P. M. - The market opened quiet and closed heavy to-day, with sales footing up 8,000 bales, including 1,000 bales for export and apeculation. The sales of the week have been 64,000 bales, of which 4,000 bales were taken for export and 3,000 bales on speculation. The stock in port is 445,000 bales of which 96,000 bales are American. The stock of cotion at sea, bound to this port is 328,000 bales of which 265,000 bales are

American.	-

trade took from Liverpool alone, between Sept. 1 and Dec. 31, 1,174,100 bales this year, against 1,094,850 bales the same time last year.

## BREADSTUFFS.

FRIDAY P. M., Jan. 24, 1873.

The markets for flour and grain have generally improved during the past week; rye being the exception; flour and wheat showing the most activity at a decided advance; closing, how ever, inactive and somewhat unsettled.

There has been an improved export demand for flour, part fo future delivery, and, with some speculation in shipping grades. prices have shown a decided advance. Early in the week there were large sales of common extra Western and State from spring wheat at \$7 40@\$7 50 for January and February delivery. Some embarrassment has been caused by the inability of the Great Trunk lines of railways, communicating with the West, to meet the demands upon them, and flour has had to give way for more perishable freight. To-day the market was dull, and flour was not salable except at inside prices.

& Wheat has also advanced materially. During Tuesday a large number of beat loads sold at \$1 66@1 67 for No. 2 Chicago and Northwest, and \$1 68@1 70 for No. 2 Milwaukee in store. But yesterday, with Liverpool reported quiet, a decline in gold, and a firmer market for ocean freights, shippers retired, and the mar. ket became dull at nominal prices. Receipts at the West show some falling off. To-day, No. 2 Milwankee was offered at \$1 70 in store, but bids were reduced to \$1 67@1 68.

Corn has been only moderately active, but old being sparingly offered, and new coming forward in small quantities, prices have been firmer; late sales include old mixed at 641/@65c. in store, and 664@674c. afloat, with prime new mixed at 664c. afloat, and fair new Delaware yellow at 66c. But the close yesterday was

fair new Delaware yellow at obc. But the close yesterday was rather weak. To-day, however, the market was firm, with sales of prime old mixed afloat at 67c., but not much activity. Rye has declined to 87@90c. for Western and State. Barley has been active and closes higher; last Tuesday, 85,000 bush. Canada West sold at \$1 16@1 18, and since then \$1 20 has been paid. The advance is attributed to the impossibility of getting forward supplies by rail.

Onte have been higher, being scarce; but for the past few days the market has ruled dull and weak. To-day, prime new mixed oats were quoted at 52@53c.

The following are closing quotations:

## GROCERIES.

FRIDAY EVENING, Jan. 24, 1873.

There has been a fair business in progress during the week in all lines of groceries. Sugars have shown rather more activity. but the business has been restricted by the small trade doing in refined, and the consequent limitation of refiners requirements. Prices remain about as last quoted, but lack strength. Coffee has been very active and is buoyant both on the Brazil and India descriptions. Quotations are higher on the latter. Tea has been in moderate request at very full rates. Melasses is selling fairly and rules strong, especially on the domestic grades.

TEA.

There has been a steady call for lines during the past week, and this outlet has stimplated a better call for invoices, resulting in some good-sized transactions. The demand continues at the close of the week with a good business under way, but holders manifest extreme firmness, and there is a little more difficulty experienced in working off stocks in consequence, as buyers whose wants are not urgent show some reluctance in meeting the views of holders. The duliness for the past few months and the heavy condition of the tea market has led buyers, in many instances, to look for easier rates than they are now able to obtain. The position of the market is favorable for holders, however, and no further reductions in values are likely to be effected, especially so since the ruling prices are really noremunerative. We have nothing but high cost teas in the market now, and it will be some time before the arrivals embrace any of the purchases that have been made at the triffing decline which has recently occurred in the Chinese markets. Oolongs are steadler, and sales have been effected in some cases at a slight improvement. Japans and Greens are strong with a fair activity. The sales during the week are 1,800 half chests oolongs, 6,500 do. greens, 8,600 do. Japans, 1,200 do. Southerness

are 1,800 half chests oolongs, 0,000 do. greens, 0,000 do. 5 aps. 1,200 do

COFFEE.

The market for all grades of coffee has been extremely active during the past week, and, although not quotably higher on the Brazii grades, has been very much excited, and the advance at the close of last week is fully maintained. There has been very little Rio or Santos coffee offering here, either on the spot or to arrive at a near date, and sales have been restricted in con The supply is now pretty well cleared up, and the market closes with a fair inquiry, but very little doing except in a jobbing way. The last Rio telegram reports the market advanced to 9\$800, and the statistical position of the market is entirely favorable for holders here. It was feared that the rise in Rio would check shipments to this country, as our markets did not respond at once; but the advance here has placed us more nearly on a level with the Brazil markets again, and the news of the improvement when it reaches Rio will doubtless stimulate a further rise there. West Indis grades have been in fairly liberal request, and are pretty well sold out. The closing rates are above those of last week, and the market is very strong. There habeen a great deal of excitement in East India coffee, and sales bave been effected by first hands of all the Java held by them here or in transit. effected by first hands of all the Java held by them here or in transit. Ther have also been liberal sales of coffee held in Batavis on American account, but are strongly in holders' favor. Sales have been made of 1,000 bags Rio, ex "Contest." 2,265 do., ex "Iona," 1,000 do., ex "Empreza;" 13,669 mats Java, 17,674 do. Singapore, 5,536 bags Maracaibo, 500 do. Java, 200 do. Curacoa, 147 do. Laguayra—all here. At New Orleans, 3 500 bags Rio, ex "Frances Jane." At Baltimore, 3,000 do., ex "Gray Eagle." Imports at New York the past week have included 7,000 bags Rio, per "Iona." 4,000 do do, per "Traveler," 3,470 do do, per "Gisnce," 3,300 do do, per "Asta; "16,932 mats Java, per "Nederland," 3,326 do do, per "Surprise;" 1,655 bags St. Domingo per various vessels, and 3,417 do sundries. ## SUGAR.

The demand for raw sugars has been rather more active since our last, and fairly liberal purchases have been made for refiners' uses. for refined sugars has not become active as yet, and the distribution of stock is slow; but refiners' supplies are becoming reduced gradually, and the market is fairly steady at former quotations. Refiners are not liberally supplied with raw sugars, and some of them are showing an inclination to stock up in an inclination of future requirements. The position of stocks and affoats for the United States, as well as most of the foreign markets, are rather favorable for holders. There is nothing beyond the current dulness to create any lack of confidence in the stability of prices. The market for raws remains at our last quotations, the basis being 9@9%c. for fair to good refining Calas. The principal activity during the week has been in bag augars, which have sold to a very large extent. The qualities have been principally Pernambucos, from 8%c. to 9c. Several large sales of box angars have been made at full prices on entrifugals, and fair rates for Havanas, though the latter have been chiefly of he lower qualities. The sales include 351 hhds. Centrifugal and Demerara at

#### MOLASSES.

The absence of liberal offerings of refining grades of molasses checks the sale of these qualities, for which there is still a maderate inquiry. Many refiners have closed their works almost entirely, as there is not much inducement to run just at present, and with the difficulty there would be in obtaining stock to work on, but few care to chance it beyond what they are sure of in the way of supplies. The call for grocery qualities continues active, and liberal sales of domestic are effected in a jobbing way and from first hands-Anction sales have been effected of liberal amounts at extreme rates, some lots going as high as 72c. The range of prices is about 68@72c. for good and prime, and 73@15c. for very choice stock. Few sales have been made at the higher extreme. The high cost of molasses is creating a renewed demand for syrups, but transactions on a large scale are prevented by the absence of slock. There is no sugarhouse molasses here, but sales from stock held in Philadelphia have been made at 21@22c, for bbls. and 18@19c. for hhds. Sugar grades below about 40c. are searce and in brisk demand. We note sales of 50 hhds. Porto Rico, 30 English Island, 75 Cuba, 200 bbls. New Orleans, in lots at 71@74c., and 300 do.. at anction, at 61@72%c.
The receipts at New York, and stock in first bands Jan. 23, were as follows

## THE DRY GOODS TRADE.

do Wil.g'd to heat de 1 (0 61

Brazii Nuis new ...... it of 11%

FRIDAY, P. M., Jan. 24, 1873
There has been a more general call for full package lots of dry goods since our last report, the number of buyers in the market having been increased by the arrival of Western jobbers and some of the larger marchants from near by cities. There is comparatively little call for goods for current consumption, excepting woolens, which are being taken out more freely by the clothing trade. The very severe weather in some scetions of the Weat has prevented buyers from that section from coming into the market at all, and nnless the Spring turn out early, the demand from that section is likely to be extremely backward. The California and Texas trade are buying moderately of full pack I Total entered at the port. 16,173 \$3,109,101 14,620 \$5,735,456 11,556 \$4,368,59

ages, and the trade is becoming more general. The ontlook is more encouraging, and the collections are coming in freely, so that our dealers are looking forward to a better business during the Spring than was done last season. Our importers are preparing for a heavy season, and their imports are very large. Prices are strong on all lines, without essential changes.

DOMESTIC COTTON GOODS .- The market continues active, with an increasing demand for full packages from large Western buyers, and from the South and Southwest. The demand for heavy brown cottons and for standard sheetings has been fair and fine browns are very strong at an advance of 1c on some of the leading brands. The supply of these goods is unusually small, and the advanced rates established on the different grades within a few months are fully maintained. There has been a liberal call for bleached goods, and a further advance has been made in fine light weight qualities. Leading makes are well sold up and rule strong, with the tendency of the market favoring sellers. Canton flannels have sold in a small way, and are with out change. Colored cottons are not in very liberal request as yet, but the stock is well controlled, and prices rule firm. Prints are dull at the moment with small offerings. There have been light sales of autumn effects at old prices, and in some cases at a concession. But little new work has been opened as yet, but quotations are strong so far as established.

DOMESTIC WOOLEN GOODS.—There is no call for heavy weight goods, excepting to supply the very limited requirements of tailors. There has been a more general inquiry for spring fabrics, and the sales since our last report show considerable improvement. Sales are still below the usual volume at this period of the year, but the steady increase in the business since the first of the year is encouraging to dealers, and a fair spring trade is looked for. Clothiers have been backward in making their purchases this season, and do not yet show as much freedom in their purchases as might reasonably be looked for. Agents are not getting as full prices as they had hoped for, but the tone of the market is fairly steady, and there is some probability of prices being forced up on the better grades. Dress goods are steady, but rather quiet at the moment, owing to the light offerings of new spring atyles in first hands.

Foreign Goods.-The imports continue heavy, and provisions. are evidently making for an active trade in imported fabrics during the season just opening. Nearly all the buyers have new returned from Europe, and agree in reporting the market abroad as very firm for most descriptions of goods, but with a comparatively light demand at current rates. Linen goods were in moderate request for clothing and tailoring purposes, but the demand was restricted to the supply of immediate necessities, and was devoid of a speculative character. Woolens continued in light demand, and was mostly confined to small assortments of spring suitings. Silk goods were quiet with importers and jobbers Dress materials of spring styles have not yet come forward with any freedom, and few of the jobbers are displaying any novelties as yet. Black alpacas and mohair lustres continued to meet with favor, but were not conspicuously active. Hosiery was in fair inquiry, but only for actual requirements and in small selections.

# 1MPORTATIONS OF DRY GOODS AT THE PORT OF NEW YORK.

The importations of dry goods at this port for the week ending January 23, 1873, and the corresponding weeks of 1872 and 1871 have been as follows:

## Industrial Exhibition.

#### THE ESTIMATED INCOME OF THE

Industrial Exhibition Comp'y is \$2,645,400.

READ THE REPORT BELOW,

AND YOU WILL BE SATISFIED THAT AN INVESTMENT MADE IN THE STOCK OF THE

## INDUSTRIAL EXHIBITION COMPANY

IS SAFE.

The first \$2,000,000 of the stock is offered at 80; after Feb. I no stock will be sold at less than par.

Note—Any bank in New York will receive sub-

ecription.

As the cost of each lot is about \$4,700, an investment of that amount in this stock will entitle the holder to a "Let" value in the property.

We, the undersigned, members of a special committee appointed at a public meeting, presided over by John A. Dix, at the St. James Hotel, on Priday, December 13, 1872, were instructed to examine and report as to the desirability and practicability of securing for New York a perena-nent Industrial Exhibition Building, Art Gallery, Public Library, and Garden of Plants, and more especially as to the value and fitness of the land contracted for, have the honor to report:

First-That the Industrial Exhibition Company is a properly organized corporation, under a special Act of the Legislature of the State of New York, with full power to purchase land, erect buildings, and to do all other things necessary for the com-pletion of the objects above enumerated. The property of the Industrial Exhibition Company is exempted from taxes and assessments for five years, and its stockholders are free from personal liability, and generally all powers are granted to it that will facilitate its objects.

Sxona--That the Iednstrial Exhibition Company of 1870 contracted for the land between Ninetyeighth and One-Huodred-and-Second streets and Third and Fourth avenues, comprising in all eight blocks of ground, besides the usopened streets and The price agreed upon was \$1,700,000, of which \$200,000 have been paid; that there remains due \$1,500,000, which must be paid on or before Feb. 1, 1873, or the contract for the land will ex-

pire and all moneys paid be forfeited. The deed of this land has been executed to the Industrial Exhibition Company, and is held in escrow by the Union Trust Company, to be delivered whenever \$1,500,000 shall be paid. Your Committee have consulted with eminent real estate men as to the value of the land, and the lowest estimate placed on it after deducting all the streets (which are as valuable for the purposes of this Company as any other portion), is \$1,820,000 (and the streets being valued, at \$2,428,000). As we understand, this is the only piece of land in one location, owned or controlled by individuals, large enough for a World's Fair, lying south of 110th st., and its central location is proved by the fact that all the steam railroads running into New York have a side track on this ground. As an engineering necessity, any rapid transit railroad that may In future he built must go within four hundred feet of this preperty, if not directly upon it. The property is solid rock, and at Ninety-eighth street, Third avenue, and One-Hundred-and-Second street there is an abrupt slope. It is estimated that this peculiar formation will save at least \$1,000,000 in the preparation of this ground for such a hullding and building foundations as are proposed. The Industrial Exhibition Company contracted for this land in 1870. It was regarded as a good purchase then, and has increased in value since, and will

then, and has increased in value since, and will continue to increase.

Third—The estimated cost of a suitable building is about \$7,000,000\$, and is such an edifice all New Yorkers will feel a just pride.

Fourth—A proposition has been made by an eminent New England firm to construct a dome over the court, which dome shall be the largest and most magolificent in the World. All this firm ask is that they be gravided a perpetual lease of the dome, above the spring of the arch, subject to reasonable conditions. The estimated cost of this dome is \$3,000,000. Sufficient bonds will be given for the performance of their contracts.

Fifth—Your committee is of the opinion that, if a safficient amount of the stock of this Company is sold to acquire a free and anincumbered title to the land, there will be no difficulty in raising all the money requisite to erect a building.

Sizih—If this land is purchased and work commenced at once on the building, we hope the Congress of the United States will so favor the enter prise that a World's Fair can be opened here in 1876, under the auspices of the United States Government, which would be commemorative of the One-Hundredth Birthday of this our great

Republic. This need not interfere with the proposed "centennial" celebration in Philadelphia, but as we New Yorkers cannot but feel that we may celebrate in our own way and in our own city so important an occasion, and we also feel that if the world is to be brought together in a grand competitive exhibition in that year, that New York, heling the commercial metropolis of the whole country, such world's fair should be believe. At no other place could the millions of victors be accommodated. Financially, we believe that the land is worth more than is to be paid for it; and if the enterprise is carried out as proposed we do not see any possible chance of loss. In view of these facts—

that the land is worth more than is to be paid for it; and if the enterprise is carried out as proposed we do not see any possible chance of loss. In view of these facts—

1. We recommend, first, that a series of meetings be held for the purpose of awakening the people to the importance of this enterprise.

2. That a committee be appointed who shall, without delay, prepare a suitable memorial and present the same to Congress, and that such Committee have power to ask Congress to give such indorsement as may in their opinion be thought advisible.

3. Also, a committee who shall confer with the Mayor and Aldermen, as well as the Department of Public Parks, with a view of obtaining such privileges as municipalities have ordinarily given to each enterprises.

4. Also, a committee to confer with the Governor of the State and the Legislature, with a view of obtaining such endorsement as will add to the dignity of the enterprise.

5. Also, a committee to propare an address to the people of New York, the country, and thes world.

6. Also, committees selected from the different branches of industries, to obtain subscriptions to the stock of the Company from their respective associates.

We further recommend that here and now subscription papers be circulated. Your Committee believe that this enterprise is sound financially, and if it is carried out that it will benefit every person in New York and prove of great advantage to the whole country, and they de carnestly recommend it to the serious consideration of all the people.

All of which is respectfully submitted.

BL B. CROSEY. JAMES L. JACKSON, PAUL N. SPOFFORD, EDWARD ROBERTS being a special Committee for the porpose of appointing committees from each branch of business, and fcr localities directly interested in seeing the completion of the project which has been inaughrated by the ledustrial Exhibition Company, viz., the establishing in New York of a crystal palace to be used as a perpetual world's fair, have the honor to announce the following appointments. Owing to circumstances beyond our control we have been unable to see each of the gentlemen below named, but we feel confident that none of those whom we have selected will refuse to spend a small portion of his time between now and the first day of Febreary next, for the purpose of making, in this, the commercial metropolis of the Western Hemisphere, an institution which will tend to elevate all of the people.

We have made the committees to represent each trade and commercial pursait.

If we have overlooked any branch of business we shall regard it as a special favor to be communicated with and a suitable committee recommended, which will be at once appointed.

Each committee named below is requested to meet, elect from among its number a chairman, and organize for active work.

Each committee may add members.

A full report of the work done should be forwarded to the special committee on Jan. 29, 1873, and we request that the original subscriptions be forwarded to the Union Trust Company, 73 Broadway, each day.

A full explanation has been sent each member of the committee.

## TERMS OF SUBSCRIPTION-PAYABLE IN ADVANCE

The Publishers cannot be responsible for Remittances unless made by Drafts or Post-Office Money Orders.

A nest file for halding current numbers of the Chronicle is sold at the office for 50 cents; postage on the same is 20 cents. Volumes bound for subscribers at \$159. The first and second volumes of the Chronicle are wanted scribers at \$1 50. by the publishers.

## THE RAILWAY MONITOR.

The first number of the RAILWAY MONITOR (menthly) was published January 15, 1873.

The characteristic feature of the Moniton consets in its furnishing the most complete reports and freehest intelligence concerning every railroad in the country, so classified and indexed that each item of information can always he referred to with the utmost convenience.

A Handsome File Cover or Binder for current numbers, is furnished gratis to every new subscriber for ous year.

A Standing Index is continued from number to number, so that all railroad matters published within the year can be referred to by the last number isened.

The Monitor is in no respects intended to take the place of the Railroad Department of the Chronicle, but is expressly intended to supply a want long felt by the readers of that department, in giving numerous reports and details of railroad information, which could never be given in the limited space allowed in the columns of the latter.

## Terms of Subscription-(Payable in Advance.)

The Railway Monitor for one year, (including File Cover with first sub-	
scription)	\$4 00
Chronicle.  The Commercial and Financial Chronicle alone (with File Cover first	8 00
The Commercial and Fibancial Chronicle alone (with File Cover first year)	10 00

WILLIAM B. DANA & CO., PUBLISHERS, 79 & 81 William Street, New York.

Specimen Copies Sent on Application.

## THE "RAILWAY MONITOR,"

The demand for THE MONITOR has been so much larger than we anticipated that the edition published is entirely exhausted. We have however concluded to reset the paper and issue another edition, in order that our subscribers may be able to begin with the first number. Those therefore who have written for, but have failed to receive the paper will understand the reason for the delay. The new edition will be ready for delivery on Monday morning.

## THE SYNDICATE. THE BANKS, AND THE MONEY MARKET.

The reduction of the Bank of England rate to 31 per cent, offers a new illustration of the remarks we offered last week as to the position of the European money markets and the fevorable apportunity they present for the work of the new Syndicate. These gentlemen, taking encouragement from the plethora of unemployed capital in London, have determined to open subscriptions on Tuesday next for the whole of the three hundred millions of five per cents. There is an obvious advantage in this plan which will doubtless be much more satisfactory to all parties than the slow, tedious method a lopted for disposing of the former to hundred millions. The books will be open for three days, both here and in Europe, and the cash subscriptions will probably be made in instalments so as to prevent the money market or the foreign exchanges from being disturbed by the payments. We are informed that Mr. Boutwell insisted on one condition which is very important, namely, that the national banks should be allotted the full amount of the bonds which they subscribe for, even if the agregate subscriptions in Europe shall exceed, as they probably will exceed, the whole three hundred millions offered. In that event the general public here and abroad will of course receive an allotment of only a part of the whole amount subscribed for, as was notably the ease with the last five milliard loan of the French government. Whatever may have to be done in such a contingency with the other subscriptions, our National Banks, by this order of the Treasury, will receive their allotments of the full aggregate subscribed for. On this account the New York members of the Syndicate have issued a circular informing the banks of this arrangement with the government, and inviting them to give timely notice of their subscriptions. As this negotiation is probably the last in which five per cents will be offered by the government, this arrangement enabling the banks to take advantage of the opportunity to substitute five per cent bonds for the sixes now deposited in Washington will probably be accepted to a considerable extent. Still the notice we think, ought to have been more widely published by the Syndicate beforehand, as the banks are 1,942 in number, of which a large proportion are situated in the more distant parts of the country, and will be likely to find the three days in which the books remain open too short a period to admit of the needful arrangements for subscription. This wide notice was the more important because, if the banks fail to obtain fives at the present offer they may have to surrender their sixes for 4 or  $4\frac{1}{2}$  per cents at no very distant day.

Except that the gold market has been somewhat depressed by the expectation that a considerable amount of foreign exchange will be made in carrying out this operation, no special disturbance has been caused by the announcement of the Syndicate. The government list has however shown considerable strength, as will be seen from our report else where. The money market exhibited yesterday some signs of stringency; and loans were quoted at 1.32 in exceptional cases. The general monetary position has not been compromised on this occasion as it was by the smaller negotiation of 1871. The stringency must rather be ascribed to specula tion and temporary causes, and the money market is rapidly resuming an easy tranquility.

National bank notes have for some days ceased to pass at a discount, showing that the accumulation is not so rapid, and that the tidal movements of the currency are more evenly balanced. This favorable monetary condition has stimulated business, which is becoming more active. The movement in the market for provisions and produce is also hopeful, and all the departments of industrial enterprise are shaking off the lethargy into which they had sunk in consequence of the protracted period of tight money repression. The deposits of the banks are rising, but the reserves are still slow to keep pace with them. The confidence of the public in the monetary situation will be much improved if the reserves of the banks show to-day, as is expected, a more ample reserve on rising averages of greenbacks.

## FINANCIAL DANGERS.

One of the most suggestive signs of the times is the fear which finds expression in well-informed quarters that some financial crisis must before long occur in this country. We have not much sympathy with these dark apprehensions. Four or five years ago such forebodings of trouble were more prevalent than they have since been. The evil omens were so often contradicted by the event, that they gradually ceased to be heard. At present, however, they seem to be reviving; and now, as heretofore, we may with profit in vestigate these prognostications of panic with a view to learn their nature and the reasons on which they rest.

Among these reasons three or four are all we can mention to-day. The first of these is the inflation of credits. Our whole credit system is fast returning to the expansion which was rife before 1857. During the past ten years our freedom from widespread panics has been in part due to the cash system and short credits which established themselves early in the war. The past year or two have been dull years for business, and credit facilities have been offered by sellers to their customers to induce purchases to a much higher degree than is safe. To the large mass of credits thus originating is attributed the expanded state of the banks. Another cause which has co-operated in the same direction is the heavy burden of railroad paper which is afloat, and adds notably to the pressure on our banking machinery. Moreover, the prodigious destruction by the fires at Chicago and Boston has caused a demand for floating capital to take the place of that annihilated in those conflagrations. These, with other circumstances, have partly caused the credit expansion to which we have referred, and they have otherwise tended to increase the trouble arising from that source.

Such is the general course of the argument, and it is

impossible to deny that this expansion of credits exposes us to grave dangers. But the very anxiety which we are suffering is a hopeful symptom. If it only acts as a safe-guard to warn our people against going too far it is useful. But it does more than this. It has a tendency to contract these over-expanded credits; and as they are running off every day, if we can prevent others from being made, or can diminish the ratio of their increase, we thus in a gentle and healthy way restore the tone of the financial organism. It is this principle that is embodied in the axiom that "a panic which everybody foresees nobody need fear." This credit expansion, if it prevail as extensively as rumor affirms that it does, may ruin many individuals, even if we are right in thinking that it cannot work a general revulsion. Those persons who are trading beyond their assured means will do well to be warned in time and to curtail their ventures within safe limits.

A second class of alarmists are troubled about the attempts likely to be made to resume specie payments. We have now affoat, they say, seven hundred and fifty millions of paper money. This vast mass of circulating cur. rency it is absolutely impossible to keep at par with gold, or even as near to par as it is at pres-The reason is that we could not keep so ent. large an aggregate of coin in circulation; and by a wellknown law, paper money, if it is to be kept at par, must always equal in volume the aggregate of coin which could be kept outstanding if the circulating mass were wholly of coin. The inference from all this is that our efforts to resume, whatever be their nature will, of necessity, contract the volume of our currency. Such a contraction must work disaster, and could not fail to disturb the money market with destructive spasms. These views are enlarged upon by a correspondent, for whose letter we cannot find space. We agree with him that on 700 millions of currency it is impossible to resume specie payments with the coin dollar at 25.8 grains, and that contraction of the currency is, therefore, iudispensable to resumption. But we do not think there is much danger at present that Congress will pass any r esumption law involving an early spasmodic contraction of the currency, notwithstanding all that is said about specie payments. The great danger of the moment seems rather from currency expansion than from violent contraction.

This very danger of expansion constitutes a third ground of alarm with certain persons who are not particularly in favor of the national banks. The banks, it is said, are to be allowed to issue 25 to 50 millions more of notes under oae of the several bills which have been introduced into Congress for this purpose. For purposes of currency inflation this issue of notes would be equivalent to legal tenders, and would expand and derange the circulating money of the country just as much as 25 or 50 millions of greenbacks. Such an inflation of the currency would no doubt have all the serious results apprehended from it. But there is one thing which is forgotten-namely, that no financial legislation of this sort is at all likely to be passed by Congress this session, and that in any new bill affecting the banks, Congress would certainly introduce a stringent redemption clause which will in part neutralize the evil of present inflation, besides preventing others from developing themselves.

Finally, another danger is in respect to our scanty supplies of foreign capital. The heavy masses of railroad paper which are floating in our money market owe their origin in part to the falling off in the foreign demand for our railroad bonds. Will that demand revive? If not, how are we to obtain capital for the heavy railroad engagements of the past, and for the heavier projects of the future. To this question we do not at this moment see a positive answer.

The probabilities point, however, to a brisk demand for our securities in Europe. Capital is being disengaged, and is pouring itself into the Continental and English money markets with rapidity and in amounts never paralleled before in the history of finance. Their recent disappointments with some of our securities have made foreign investors cautious and very discriminating. The attraction, however, of a considerable volume of the idle capital of Europe nto our best railroad securities is a mere question of time.

On the whole, then, we may safely infer that the chief dangers of panic on which so much stress is laid are not so serious as many persons would have us believe. Expanded credits, Congressional tinkering with the currency, bank note inflation, too rapid absorption of capital, and many other evils, have for many years past concurred in causing occasional uneasiness. But there is nothing to lead to the belief that any of these dangers are specially threatening us with a financial revulsion, though they may well inspire us with salutary caution.

## REPEAL OF THE MORTGAGE TAX.

Mr. Isaac Sherman, with several other gentlemen, was at Albany on Thursday before the Committee on Waya and Means, to urge the passage of the bill for the exemption of bonds and mortgages from taxation. In no other country, we believe, except our own, does this tax exist. Such a monstrosity of fiscal legislation, if attempted at all, has soon perished from the rude shocks of experience.

This is one of the most mischievous of all taxes, because it is a double tax; and not only so, but it doubles itself on the wrong man, and at the worst time. Its blow falls on the borrower in his hour of need. Pretending to be a tax on the rich creditor, it leaves him free; but rebounds with crushing weight on the poor debtor who wants money and must borrow. In the State of New York many years of trial have fully proved this tax to be an illusion. The persons escape whom it was designed to force to pay, and those whom it was to relieve have their burden doubled. Any tax which is so oppressive to borrowers and so paralyzing to material growth ought to be swept from the statute book, and the deputation to the Legislature urged the objections to it with great practical force. They showed that our citizens find it so easy, so safe, and so remunerative to invest money in Western States that the only way to keep our surplus capital for our home enterprises is to make it just as profitable for capital to invest itself here as elsewhere. If it be impossible for us to make as liberal offers of interest as can be realized from distant investments with greater risks, we should at least beware how we incline the balance against ourselves by crude taxation and other bad iaws

In this point of view it is to be regretted that our State revenue being derived from taxes on real and personal estate, mortgages, under a delusive idea of impartiality, have been assessed with other property, so that when a man lends his money on mortgage at seven per cent., three per cent. of that sum has been taken from him in the shape of taxation, thus reducing his profit to four per cent. Now as no capitalist can afford to lend his money at four per cent when with equal security he can get eight or ten per cent, two things have happened. First, it has become much more difficult than formerly to borrow on mortgage. A farmer in the interior of this State owning property worth fifteen or twenty thousand dollars cannot borrow five thousand upon it except with the greatest difficulty, and if he succeeds it is only by submitting to conditions which make his lean cost him ten per cent or more.

A second consequence of this tax on mortgages has been that capital has been driven out of this State to invest itself in bond and mortgage in other States, where it either escapes Our legislators have been anxious to do their duty in this

this double taxation, or at least earns large rates of interest without the fear of penalties for usury. Fifty millions of dollars of capital from this centre are said to have been lent on mortgage and otherwise, at 10 to 12 per cent., in Chicago during the last year. Much of this money would have been lent here if it could have been as remuneratively and as safely invested. That it has been driven away is due in part no doubt, to other causes, and especially to the usury laws; but still it is largely driven away by this system of taxation. Public opinion is, however, getting enlightened on the question. Thus, Mr. Mann, of Troy, told the committee that all classes there were in favor of repeal. Mechanics and other small borrowers were unable to borrow money for building, while interest on money borrowed on mortgages was at rates of 10 to 15 per cent., being enhanced by the double burden of the tax. Mortgages were a drug on the market, and something should be done to bring them up to the same value as securities as Government and railroad bonds. It was far more profitable now to take a Government bond at 5 per cent, than a mortgage at 10. The present tax was so onerous that small borrowers could not get money. Mr. Hoffman, from Albany, said he had been in the real estate business for twelve years. In that time he had had hundreds of applications from small borrowers owning houses, such as mechanics, for money to be raised on mortgage; but the tax on them reduced the interest to 3 per cent., and people would not lend money at this rate. If the law exempted mortgages from taxation, he would say that within a fortnight there would be \$50,000 ready to loan out on houses, whereas now no one can borrow a dollar on them.

A still more interesting point was made by a man of great experience, Mr. Mathews, of this city, who said that the tax on mortgages does not now yield more than \$500,000 revenue to the State, and if they were exempted from taxation the disposition to invest in mortgage in New York would revive and would acquire so great an impetus that money to build could be borrowed at 6 per cent., and the additional buildings would add millions to the taxable property of the State. Loans of estates and trusts made on them had been called in; it was no longer the custom to loan money to be invested in mortgages; and, from lack of funds and other causes, the amount of building going on this year was from ten to fifteen millions less than in 1871.

But why, it may be asked, has not all this evil been long ago removed? The reason is that the Legislature has been under the influence of an old error which was raised by one of the Committee on Thursday. He said that to repeal the mortgage tax would place fixed capital at a disadvantage with floating capital. The farmer investing in real estate woold be placed at a disadvantage with a neighbor who invests in bond and mortgage. If A and B have each \$10,000 in eash, and A buys a farm for \$20,000, getting half the purchase money from B on mortgage, then is it not a hardship for A to pay tax on double his interest in the farm, while B, who has an equal interest, pays no tax at all? This plausible argument admits of an easy answer. It has often been explained to the country members that the capitalist can refuse to lend on mortgage here, and can put his money into bonds paying 6 to 8 per cent, above all taxation, or into Western mortgages paying 10 or 12 per cent., with perfect security. As the capitalist cannot be compelled to lend his money to our farmers at any less rate than he can get elsewhere, it follows that if the mortgage is taxed the farmer must pay the tax directly or indirectly. Otherwise he cannot borrow at all, and the money will go West in mortgage or stay here and invest itself in bonds. matter; but they have failed to see that no taxable thing is so easy to drive away and so hard to control as capital.

## THE DISTRIBUTION OF THE ALABAMA INDEMNITY.

General Butler's bill for the distribution of the fifteen millions of Indemnity has not had a very welcome reception, and several of the objections to it are certainly well taken. Not only is the measure founded on a grave error of principle, but it is disfigured by numerous faults of detail. It assumes that the sum awarded by the tribunal at Geneva will become, when paid, the absolute property of the Government. It will be, says Mr. Butler, "the money of the United States, to be disposed of at its pleasure, subject to no trust, and especially to no legal rights in any individual or corporation by whom a legal or equitable claim can be set up, or maintained to any part of the sum awarded, as against the United States." This proposition is ingeniously discussed in the report which accompanies the bill, and which has just been laid before the House of Representatives from the Judiciary Committee. elaborate efforts with which this doctrine is supported by General Butler and his committee offer simply so many proofs of their distrust of it. Of course it may have a plausible ambiguous semblance of truth; for in one sense there is no doubt that the United States will have a qualified ownership over the indemnity money during the interval between its receipt from England and its disbursement to its true owners. Moreover, there is at present no civil process known to our law by which any private citizen can recover a single dollar of it. In the language of the early Roman law, there is no actio, no appointed method of pro cedure. But this defect it is the very aim and purpose of the bill to supply. The proposed statute would also fail of its object if it did not give effect to this new procedure by erecting a new tribunal or else by giving jurisdiction to the ordinary courts of law, which at present have no control over the allotment of these indemnity monies. Nothing is more clear to a thoughtful mind than that the United States will hold these funds simply as a trustee. The beneficiaries on behalf of whom the indemnity was awarded are its true owners: but they cannot sue the Government, or get, by this means, possession of their money in any ordinary court. Hence the need for an extraordinary tribunal to examine the claims of each person, to allot his equitable share, and to disburse the aggregate fund where it

By leaving out of sight this simple principle General Butler entangles himself in a web of sophistical speculation and illogical ressoning. In denying the personal claims of our citizens to the indemnity, he really cuts away the foundation for any damages having been awarded to us at Geneva. We need not follow out this singular chain of argument. It is summed up in the report in the following paragraph, which sufficiently shows the general tenor of that document, and justifies the dislike which it has provoked in the popular mind:

It will be thus seen that it was claims on the part of the United States that were submitted by the treaty to the tribunal and passed upon by the arbitrators, and not claims of individuals; for if the

upon by the arbitrators, and not claims of individuals; for if the arbitrators had intended individual claims, as such, should be passed upon by any tribunal under the treaty, they would have referred the same to the Board of Assessors, where the individual could be heard as to the validity and amount of his claims.

This view is further strengthened by the fact that in the Johnson-Clarendon treaty the claims "generically known as the Alabama claims," now under consideration, were described "as claims on the part of the citizens of the United States upon the government of Her Britannic Majesty." But the treaty of Washington assumes that no individual could have any claim, because of the destruction of his property by a hostile power in war or its ally so that they are described "as the claims of the United States." If the estimate be correct which fixes these losses at eight millions, there would remain seven and a half millions for other claims. The chief of these deferred claims are con other claims. The whole insurances on property was "that the United States had sustained a great wrong."

From these and other considerations which might be presented.

your committee have come to the conclusion that the amount awarded at Geneva is the money of the United States, to be disposed of at its pleasure, subject to no trust, and especially to no legal rights, in any individual or corporation by whom a legal or equitable claim can be set up or maintained to any part of the sum awarded, as against the United States.

Such is General Butler's account of the indemnity money and its owners. If, as we have said, this fund really belongs: to the United States in its own right, and not as trustee for private citizens, he would find it hard to show why it was. given at all, and by what means the Geneva Board committed such a blunder as to award it after deciding that no claims but those founded on direct losses would be entertained at all. It is equally hard to see how, on this hypothesis, a distribution should be made to any citizens whatever. If nobody has any valid claim to this money, why should not the Government keep the war indemnity and employ it in liquidation of the war debt? The fact is that Mr. Butler's arguments here, as in some other conspicuous instances, prove too much. He is over-auxious to carry his point. What he wanted was an argument to justify some method of dividing the money among the claimants, which would give a preference to some claims over others. If every claimant stood on the same common ground, as a joint owner of a fund of which the United States is the Trustee, this scheme would be defeated. No citizen who was ruined or impoverished by the depredations of the Alabama and her piratical consorts would be liable to have his claims jostled aside by more favored suitors. All just claims would stand on the same level, and would enjoy an equal right to redress and compensation. How adroitly the bill is contrived to disturb these equal rights is evident from the most cursory inspection.

First of all it divides the mass of claims which the indemnity represents into two great classes. In one classare comprehended some eight millions of losses. These are to be preferred and every claim is to be paid or the money set apart for payment before the second or deferred order of claimants can receive a dollar These preferred claims comprehend four several kinds of loss which the bills describes as follows:

1st. To all actual owners of property at the time of its destruction, whether ships or cargoes, outfit advanced or other wages paid to officers and seamen, or freighte actually earned lost by capture or destruction by the cruisers for whose acts said arbitrators have found the government of Great Britain liable, shall be paid an actual indemnity where they were not insured thereupon or the insurance not received.

2nd. In all such vessels, to the officers and crews, all the wages which had been actually earned by them up to the time of their capture, loss or destruction by such cruisers, together with the destroyed in the vessel so captured, who have not received the insurance thereupon; and to such officers and crews, or to any person on board either of said vessels, an indemnity for damages actually sustained from such capture or detention, and the amountexpended in returning to their homes or the place where they engaged in business or took employment, respectively, not including any prospective profits or wages not earned at the time of

capture.

3rd. Where the owners, officers, or seamen of such vessels so captured and lost or destroyed were insured for less, and received insurance in less amount than the actual value of the vessel or other property above described, captured and lost or destroyed, a further indemnity shall be made for their loss beyond the sum so

insured and received. 4th. To the United States for all vessels the property of the 4th. To the United States for all vessels the property of the Government, or which were under charter to the United States, and for the destruction or loss of which the United States, by the terms of the charter-party, was liable, which were captured and destroyed and lost, by said cruisers, together with the property of the United States on board, and the same indemnity to the officers and crews of said vessels, respectively, as hereinbefore

classes the whole of this second group of deferred claims arising out of insurance losses:

5th. All persons who had paid a premium for war risks on vessels after the sailing of either of said cruisers, to the amount of such extra or war premiums paid by them, whether they suffered loss by capture of their vessels or otherwise: Provided, that in case of such premiums paid or secured to mutual insur-ance companies, the indemnity shall be the difference between the premium paid or secured and the returned security or pre mium therefor.

6th. To all insurers, being citizens or corporation of the United States, respectively, having insured or re-insured property so destroyed, who shall show by an exhibit of their books of acdestroyed, who shall show, by an exhibit of their books of account and business, that the war premiums actually received by them after the sailing of either of said cruisers did not equal in amount the losses paid by them, because of property thereafter ward captured and lost or destroyed by either or all of said cruisers, provided the amount paid to any such insurance company for losses so sustained shall be apportioned by the company among the members thereof at the time of the losses paid by them, respectively, in proportion to the stock or interest then owned by each member thereof.

A subsequent section of the bill directs the Secretary of the Treasury not to pay any of these deferred claims until the 1st July, 1874; those of the preferred order being first paid, or a sufficient sum set apart for their payment. If the indemnity money be not exhausted in the payment of the latter, and if an insufficient sum be left over, then the deferred claims are to be paid a pro rata share of the residue. Hence it appears that the claims for insurance will not in any event be paid till after considerable delay, and wilnever be paid at all until the aggregate of the claims of the preferred class can first be fully satisfied. This vexatious and unjust discrimination against a very important class of claims is sufficient of itself to confirm the strong opposition elicited by the measure. Not to mention other reasons for this it is notorious that the heavy payments by the under writers for marine losses were officially presented to the Board at Geneva. That tribunal passed them. They form a part of the award itself, and the damages were ex pressly given to reimburse these specific losses with others We might also refer to the well known and invariable usages of mercantile law, that any underwriter who paysa total loss is subrogated to the rights of the assured in all property saved or recovered after the insurance money has been paid. For some reasons which cau only be in part conjectured, these and other fundamental principles of commercial jurisprudence are wholly disregarded, and a precedent is set up by the new bill, of a most unjust, insidious, and mischievous character.

The last objection to the bill we shall mention is the costliness of its machinery. The claimants will be muleted in twenty or thirty per cent. of law expenses at least. Claims are to be established by petition filed in a United States Court, where such suits are to be prosecuted by the usual proceedings, and are to have precedence over the ordinary business of the Court. It is easy to see how strong a temptation will be offered to disappointed and needy claimants to sell their claims, and what an active business is likely to spring up in property so inviting to certain well-known pettifoggers and claim agents. The Senate bill introduced by Mr. Edmunds attempts to obviate some of the woret of these defects in distributing the indemnity money. But a much simpler measure than either may be and must be devised, by which the United States as trustee can at small expense distribute the indemnity money to its rightful owners.

## EUROPEAN COTTON MOVEMENT FOR 1872.

From official sources we lave obtained the following figures and statements. They will be found of use for future reference.

GREAT BRITAIN .- The Liverpool Cotton Brokers' Circular

for last year will be found in THE CHRONICLE of Jan. 20, 1872' page 88.

In 1871, with an extraordinary degree of activity, our consumption was at the rate of 11,808 bales average weight of American per month, the mills being at work night and day, equal to 2,208,096 kilos. During the first four months of 1872 an equal quantity was used monthly; but with the month of May our spinneries censed to work at night in view of the politically discrete the first whole transfer the country. At that we can estimate the first turbed state of the country. Att that we can estimate the first six months consumption at is thus reduced to 67,428 bales Ameristates the imports, exports, consumption, &c., of cotton for the six months consumption at is thus reduced to 67,428 bales Ameriwhole of Great Britain for the year 1872, as below The figures can weight, or 12,609,036 kilos. Since then things from bad have

rown worse, our manufacturers being unable to sell their cotton grown worse, our maintacenters send that the fabrics, transportation inland being extremely difficult and hazardous. In consulting with persons thoroughly informed, we find that during the remaining six months only 56,425 bales, equal to 10,551,475 kilos, have been consumed, making a total of 123,853 bales, equal to 23,160,511 kilos; in other words, the monthly average has been 10,321 bales, or 1,930,027 kilos, the deficiency per month thus being 1,487 bales, or 278,069 kilos. Reducing everything to American bales of 187 kilos, each, we find the stock to have been as follows:

On the 1st of January, 1872 Import in 1872, also thus reduced, is	31,223 131,412	bales,	equal	to 6,399,701 25,099,883	kilos
Leas reshipments abroad	165,635 7,598	**	**	31,499,189 1,420,452	64 44

In the hands of spinners 7,000, and the balance on hand in this city, 12,000 of which are American, 7,500 Brazil, 9,850 Levantine, 350 East India, and the balance West India.

BREMEN-The Bremen Associated Brokers' Review states that the imports of cotton at Bremen show a considerable decrease as compared with 1871 From the East Indies, it is true, there has been a marked increase, but in long stapled cotton, especially from the United States, the deficiency has been of a strik When the season opened, prices in the United ing nature. States seemed too high, and the importers here, apprehending a tumble in values, were shy of the staple. But, instead of a decline, we had a further rise, principally owing to a short crop. This rendered our importers all the more cautious in touching the article, and especially since inland consumers were equally afraid of it. The following is a comparative table of imports, sales and stocks at Bremen the past four years:

			-		-

[From our own correspondent.]

LONDON, Saturday, January 11, 1873.

The numerous failures which are taking place amongst the Manchester warehonsemen have caused a great deal of surprise, as there was a very general impression that our trade was sound, and that the disclosures which had to be made would have been publicly announced previously to the opening of the new year Such, however, has not been the case, and there is too much reason to believe that between the present time and the 4th of February (the date of the month on which a large amount of inland paper falls due), there will be many suspensions. The stoppage of Mrssrs, Pawson, of St. Paul's Churchyard, with liabilities amounting to between £700,000 and £800,000, has naturally excited much comment. The firm conducted an extensive business, and being the support of several linea drapers, &c., in London, the difficulties occasioned have been very considerable. This week, Messrs, Drakeford Brothers, in the silk trade, have suspended payment, with liabilities amounting to £90,000, and a more extensive failure is that of Messrs. Vivanti & Co., also in the silk trade, the liabilities in that case being about £700,000. These, however, are only the failures reported in London. In Manchester they are of more frequent occurrence, and it is believed that there are yet some important suspensions to be recorded.

It seems difficult to assign a reason, or reasons, for the changed aspect of affairs. To a large extent, however, it has been produced by the depression of the silk trade, and that depression has been evidently caused by high cost of provisions and the wetness of the season. It is very clear that as food is indispensable, where incomes are fixed, and of restricted amount, some article of luxury in the household must be abandoned; and therefore silks, wines, &c., are consumed in smaller quantities. Again, the season has been unprecedentedly wet, and consequently in many households purchases have been deferred, and will not probably be made until the spring. There is no doubt that dear food has an immense and prejudicial effect upon the consumption of luxuries, and I think that the failures now taking place are to be greatly attributed to the difficulty experienced by the manufacturers in reducing their stocks, owing to the indisposition or inability of the public to consume them. If, however, the embarrassments do not extend beyond the mannfacturers of fancy articles, or articles of luxury, the position cannot be considered as critical; but the fact is that "living" has now become so dear in this country that retrenchment has become necessary in every household.

With the distribution of the dividends a large supply of money has been released, and the directors of the Bank of England have in consequence reduced their minimum rate of discount to 4½ per cent. The movement was anticipated, and the effect, therefore has been scarcely perceptible upon the markets. The position of the bank has improved, the proportion of reserve to liabilities being now about 49 per cent. The following are the present quotations for money;

| Per cer                    |                                                        |

In the bullion market the chief feature has been a demand for gold for export to Spain, in connection evidently with the recent Spanish loan. There has also been an inquiry for ailver for the same purpose. As regards the Continental exchanges, there has been a scarcity of bills, and money being easier on this side, the tendency is against this country. The following prices of bullion are from the circular of Messrs, Pixley, Abell, Langley & Blake:

| Bar Gold per oz. standard, lust price.    | 77  | 9  | 60 |    |    |
|-------------------------------------------|-----|----|----|----|----|

A want of animation has been apparent in the stock markets. United States Government Securities, however, have continued very firm, and have further advanced in price, and Eric Railway shares have been as high as 51½. Other American railway stocks have also been firm in value. Consols are firmer owing to numerous investments of the dividead money, but most foreign atocks have been dull. Spanish stock has been prominently depressed, and the scrip of the new loan has been at 2½ discount, ex-dividend. On the other hand, Egyptian Government securities have been in special favor, and have considerably improved in value. Several foreign loans are spoken of. In the course of a few days a Hungarian loan for £5,400,000 will be introduced, and an Egyptian as well as a Russian loan, is expected at an early date. Loans for other quarters, including Mexico, if diplomatic relations are reestablished with that country, are considered probable.

The following statement shows the present position of the Bank of England, the Bank rate of discount, the price of Consols the average quotation for English Wheat, the price of Middling Upland Cotton, of No. 40 Mule Yarn fair second quality, and the Bankers' Clearing House return compared with the four previous years:

In addition to the loans referred to, it is stated that a Japanese loan for £2,400,000 will be introduced by the Oriental Bank next week.

The principal feature in the corn trade during the week has been a demand for the better descriptions of wheat, both English and foreign, at higher prices. The total value of our importations of cereal produce last year was estimated at £50,988,741, against £42,597,363 in 1871, and £34,051,726 in 1870.

It appears that the estimated value of our importations of grain last year was as much as £50,988,741, being nearly £8,500,000 more than in the previous year, and nearly £17,000,000 more than in 1870. The following particulars show that wheat, barley and Indian corn were the commodities on which the increase was the largest:

|             | 1870.<br>£ | 1871.<br>£ | 1872.      |
|-------------|------------|------------|------------|
| Wheat       | 16,264,027 | 23,345,630 | 26,046.876 |
| Barley      | 2,831,844  | 8,407,425  | 6.194.155  |
| Oats        | 4,381,607  | 4,141,687  | 4,212,086  |
| Peas        | 751,192    | 459,624    | 561,007    |
| Beans       | 648,755    | 1,269,424  | 1,186,066  |
| Indian Corn | 5,790,550  | 6,470,789  | 8,696,862  |
| Flour       | 3,383,751  | 3,502,784  | 4,092,189  |
| Total       | 34,051,726 | 42,597,368 | 50,988 741 |

The traffic receipts of railways in the United Kingdom for the year 1872 amounted to £49,914,552, and for 1871 to £46,171,125, showing an increase of £3.743.427. The total increase in the published traffic receipts since the panic year 1866 amounted in the six years to £12,988,625, or au average of £2,164,770 per annum.

The colliers in South Wales to the number of 60,000 have recently struck, and the determined attitude of masters and men seems to indicate the possibility of a protracted struggle, and great sufferings on the part of the colliers' families. The cause of the dispute is the announcement of the masters that in conse quence of the reduction in the price of iron the wages of the men must be lowered ten per cent. It appears that the masters have offered their books to delegates from the men, who have admitted their incapacity to understand the accounts; and the present deplorable state of things exists partly from that cause and partly from the fact that the masters consider themselves the best judges of their own interests, and therefore refuse arbitration.

Messrs. Grant Bros. & Co. announce that they are authorized by the Northern Extension Railway Company, with the concur rence of the Northern Railway of Canada, the lessees of the line, to offer for public subscription £129,500 first mortgage six per cent. bonds of £100 each. The price of issue will be 93 per £100 bond, and interest will be payable half yearly in London, commencing from the 1st of January last. The due payment of the interest for the whole term of the bonds-viz., to July 1, 1893is guaranteed by the Northern Railway of Canada, the earnings of which last year were about £78,000.

## English Market Reports-Per Cable.

The daily closing quotations in the markets of London and Liver pool for the past week have been reported by submarine telegraph as shown in the following summary:

London Money and Stock Market.—American securities show a considerable advance on the prices of last Friday.

The bullion in the Bank of England has increased £285,000 th past week.

The Bank rate has been reduced 1, and is now 31 per cent.

—We invite the attention of shippers to the statement of the Orient Mutual Insurance Company, which will be found in The Chronicle this week. The total receipts for premiums during the year were \$1.746,418 46, of which \$1,411,804 90 was marked off as earned. The company paid \$912,344 23 en losses, and \$251,445 83 for return premiums and expenses. The assets of the company Dec. 31, 1872, amounted to \$2,035,680 88. Six per cent interest on outstanding scrip certificates will be paid on and after March 1, at which date the scrip of 1859 will be redeemed in cash. A diridend of ten per cent on earned premiums has in cash. A dividend of ten per cent on earned premiums has been declared, scrip for which will be ready for delivery April 3. The Orient has a very strong list of Trustees, and officers thoroughly devoted to the interests of the company, who have shown their fitness for the positions they hold by their success in steering clear of the breakers which have so nearly ruined many other of our marine companies during the past two years. Mr. Eugene Dutilh is President, Mr. Alfred Ogden, Vice-President, and Mr. Charles Irving, Secretary.

-Messrs, Winslow & Wilson, No. 70 William street, New York, —Messis. Whistow & Wilson, No. 70 William street, New Lors, offer in another column of the Chronicle a list of securities which they state are very desirable for investors—the issue of Carmi Town of \$14,000, and that of Orayville, \$15,000, being their entire debt, with the exception of current expenses. These bonds are issued in full compliance with the Registration law of Indiana, and therefore have all the safety which that law provides.

New Haven and Northampton Rallroad Company have petitioned the Massachusetts Legislature for authority to increase their capital stock by \$2,000,000, for the purpose of laying steel rails and making other necessary repairs,

Chesapeake and Ohlo Rallroad Completed .- The Cheapeake Chesapeake and Ohio Railroad Completed.—The Chesapeake and Ohio Railroad is completed. The track-layers from both ends of the line met at a point near Miller's Ferry, in West Virginia, on Friday last, and the last apike having been driven by Mr. Masen, the contractor, the lirat through train from Richmond to Huntingdon passed over the line to its destination amid the rejoicing of the State authorities, railroad officials and citizens who had gathered to witness the event. During the present week the road will probably be opened to general traffic, the rolling stock, locomotives and other requirements having been already provided in anticipation of the final completion of the track laying. We have not time and space to notice fully this important enterprise this week, but shall probably give an extended review enterprise this week, but shall probably give an extended review of the road in our next leave,

Erie Rallway.—The following resolution was passed Jan. 21: Eric Railway.—The following resolution was passed Jan. 21: Whereas, By a notice issued on behalf of this company on the 15th day of February, 1871, the holders of either of the five classes of the mortgage bonds of the New York & Eric Italiroad Company were notified that they might exchange the said bonds for the bonds secured by the mortgage made by the Eric Railway Company to the Farmers' Loan and Trust Company, called the consolidated honds; and Whereas, in view of the pending negotiations of the bonds of this company in Europe, it is deemed to be for the interest of this company that for the present no further exchanges of said bonds he made; therefore, Resolved, That the president give notice to the Farmers' Loan and Trust Company, to the Stock Exchange, and to the agents of the Company in London, that until the further order of the board all further exchanges of the eid mortgage bonds of this company for such new consolidated bonds shall cease.

Des Moines Valley Rullroud.—Notice is given that the agreement between the holders of the first and second mortgage bonds of the Des Moinea Valley Railroad Company has been signed by the holders of about two millions of each class of bonds, which renders the agreement operative.

All first mortgage bondholders who have not signed, and who desire to avail themselves of the provisions of the agreement, are requested to sign same at the office of J. Augustus Johnston, Esq., 24 Exchange place, room 14, within thirty days from date.

Grand Trunk.—This company has offered in London, at 95, £147,300 of Atlantic & St. Lawrence third mortgage bonds, bearing 6 per cent. interest, the interest being payable as part of the working expenses of the road. This is a reissue. At the same time it offered £90,000 of Island Pend debentures at 941, being a reissue of bonds which matured and were paid December 2.

The New Mariposa Company held a meeting recently, at which they elected the following gentlemen trustees of the organization: F. B. Wallace, Chauncey Vibbard, George W. Butts, and Mark Brumagim.

Cazenovia and Canastota Rallroad was sold at acction on Saturday last, and purchased by Mr. C. S. Fairchild for Mr. Horace F. Clark, son in law of Commodore Vanderbilt. The price paid was \$283,000 in bonds of the road, and \$206 in currency.

Atlantic Mutual Insurance Company.—The annual statement of this company for the year ending December 31, 1872, is published in this number of the Chronicle. During the year just closed the company received for premiums on marine risks \$7,988,679 40, of which snm \$5,776,518 70 was marked off as earned. The company paid losses during the year to the amount of \$2,389,844 82, and return premiums and expenses, \$1,055,707 63. The total assets now amount to the very large sum of \$15,571,206 13. Six per cent, interest on all outstanding certificates and certificates of 1869 will be paid in cash on and after Feb. 4. A dividend of 50 per cent, on net earned premiums has been declared, certificates for which will be ready April 1. After giving the dend of 50 per cent, on net earned premiums has been declared, certificates for which will be ready April 1. After giving the statement as presented by the company, we have no need to say anything in favor of the management of its officers, which has proved so successful, and which is thus so fully indicated by results. The officers are the same as for many years past, viz: John D. Jones, President; Charles Dennis, First Vice-President; W. H. H. Moore, Second Vice-President; J. D. Hewlett, Third Vice-President and J. H. Chapman, Secretary. Vice-President, and J. H. Chapman, Secretary

## BANKING AND FINANCIAL.

## TO INVESTORS.

To those who wish to REINVEST JANUARY COUPONS OR DIVIDENDS, and those who wish to INCREASE THEIR IN-COME from means already invested in other less profitable securities, we recommend the Seven-Thirty Gold Bonds of the Northern Pacific Railroad Company as well secured and unusually produc-

The bonds are always convertible at Ten per cent. premium (1·10) into the Company's Lands at Market Prices. The Rate of Interest (seven and three-tenths per cent. gold) is equal new to about 81 currency—yielding an income more than one-third greater than U. S. 5-20's. Gold Checks for the semi-annual inter est on the Registered Bonds are mailed to the Post Office address of the owner. All marketable stocks and bonds are received in exchange for Northern Pacifics ON MOST FAVORABLE TERMS

JAY COOKE & CO., New York, Philadelphia, and Washington, Financial Agents Northern Pacific Railroad Co.

## BANKING OFFICE OF FISK & HATCH, 5 NASSAU STREET.

NEW YORK, Jan. 30, 1873.

The CHESAPEAKE and OHIO, the CENTRAL and WEST-ERN PACIFIC BONDS, all of which have been negotiated by us, we believe to be among the best and most desirable Invest ment Securities in the market, which in time must become very scarce; especially as the Government will probably, during this year, pay off in gold \$300,000,000 more FIVE-TWENTIES, and a large amount of the money thus released from investment must find its way into this class of securities.

The CHESAPEAKE AND OHIO SIX PER CENT. GOLD BONDS, the total amount of which is only \$15,000,000, are secured upon a property worth \$35,000,000 to \$40,000,000, and are fully equal in intrinsic value to the CENTRAL PACIFIC BONDS. They are issued in denominations of \$100, \$500 and \$1,000, coupon or registered, and at their present market price, 86 and accrued interest, are very desirable.

The CENTRAL PACIFIC SIX PER CENT. GOLD BONDS are too well known to require description or commendation. Their total amount is \$25,885,000; they have for a long time ranged in market price near or above par. Their market price price to-day is 102@102\frac{1}{4}.

The WESTERN PACIFIC SIX PER CENT. GOLD BONDS amount to \$2,735,000. This road is now consolidated with the CENTRAL PACIFIC, and the payment of its bonds, principal and interest, is assumed by the latter. Coupon Bonds, \$1,000 each. Their market price to-day is 91 to 91\frac{1}{4}. As they have recently been introduced on the Stock Exchange, we expect to see them rapidly rise to the price of CENTRAL PACIFICS, being substantially the same in character and value.

We buy and sell, as usual, Government Bonds, receive deposits, on which we allow interest, make collections, and conduct a general banking business in all its branches.

FISK & HATCH,

Banking House of Henry Clews & Co., 32 Wall street, N. Y.

Bills of Exchange, Circular Notes, Travelers' and Commercial Credits issued available in all parts of the world.

Deposits received, subject to check on demand. Interest allowed on all Daily Balances, every accommodation and facility afforded usual with City Banks.

FRIDAY EVENING, Jan. 31, 1873

The Money Market.—The money market early in the week showed a continuance of the activity and higher rates noticed on Friday the 24th inst., at the date of writing our last report. The prevailing rates were 7 per cent to 7 gold, and in some cases a commission of 1-64 per day was added, but the tendency subsequently was towards easier rates, and a fair quotation for call loans yesterday and this morning was 6@7 per cent; this afternoon there was another sharp turn, and before 3 o'clock money commanded 1-32 and interest.

The higher range for money above noticed does not seem to be regarded as having any special significance indicative of a future stringency, but it operates as a remind r that our market has not yet settled down into a healthy condition of permanent case.

In commercial paper there is a fair business doing, and the best

bankers' acceptances of 30 to 60 days time have passed as low as 7 per cent; but this is better than the general market, which may be fairly quoted at 8 to 9 per cent for prime paper and 9 to 12 for that of lower grade.

Advices from London continue to be quite favorable, and the Bank of England minimum rate has been reduced another ½ per cent to 3½ the present figure; the bank gains in bullion this week £285,000. The Bank of France reports a gain in specie of 500,000 frances.

The last statement of our New York city banks (January 25th), showed a decrease of \$203,400 in the excess of reserves. The total liabilities stood at \$241,200,000, the total reserve at \$66,345,700, being \$5,295,700 more than 25 per cent of the liabilities.

The following statement shows the changes from previous week and a comparison with 1872 and 1871:

| _             | 1872.         | 1971.         |                   |               |               |
|---------------|---------------|---------------|-------------------|---------------|---------------|
|               | Jan. 18.      | Jan. 25.      | Differences.      | Jan. 27.      | Jan. 28,      |
| Loans and dis | \$278,209,600 | \$281,159,100 | Inc., \$3,949.500 | \$230,8S1,100 | \$270,280,810 |

United States Bonds.—Government securities have showed a strong tone, and business has been pretty active under the stimulus furnished by the new syndicate operations. Prices, however, had so sharply advanced that they have not been fully maintained at the highest point reached. The subscription books for the \$300,000,000 new 5 per cent bonds to be negotiated will be open in this country and in Europe next Tuesday, the 4th proxime, and will probably be closed within three or four days from that date. It is estimated that about \$50,000,000 of the 5-20's to be called in are held in this country, and it is thought that most of them will be exchanged for the new five per cents.

The new bends will retire the whole of the five-twenties of 1862 now outstanding, and also about \$35,000,000 of the 1864's, equal to one-half of that issue. The proportions of coupon to registered stock—the former held chiefly in Europe and the latter at home—to be redeemed, are as follows:

| Coupons of 1862                              | \$235,000,000 |
|----------------------------------------------|---------------|
| Coupens of 1864                              | 17,000,000    |
| Registered of 1862                           | . 32,000,000  |
| Registered of 1864                           | 16,000,000    |
| 1408-04010-1-0-1-0-1-0-1-0-1-0-1-0-1-0-1-0-1 | ,,            |

Total. \$300,000,600
At the Treasury purchase on Wednesday the offerings amounted \$208,900, and the bonds accepted to \$169,350.

State and Railroad Bonds.—Southern state bonds have not shown a large business, if we except some considerable transactions in Tennessees. The period of the year when the various Legislatures are in session is not favorable for dealings in Southern State bonds, as the uncertainties in regard to possible legislation are so great as to discourage purchasers.

Railroad bonds have been in much favor. The prospect of a

Railroad bonds have been in much favor. The prospect of a further negotiation of U. S. bonds, and the calling in of \$300,000,000 more of five-twenties furnishes a stimulus to the market, and suggests to the holders of government securities the necessity of looking for other substantial investments. Pacific Railroad bonds have been particularly active on account of the proceedings at Washington. Central Pacifics have advanced over 2 per cent, and Union Pacific bonds are also higher to-day than last Friday, though the incomes have been much depressed in the meantime. These latter bonds appear to be the only ones which can, in any event, be materially affected by the proposed legislation in Congress.

Closing prices daily, and the range since Jan. 1, have been:

Railroad and Miscellaneous Stocks.-The stock market has shown no decided feature this week, and the temporary buoyancy and activity, which seemed for a time to be the commencement of and activity, which seemed for a time to be the commencement of a general bull movement, have not been followed by a comparative dullness. There have been some speculative favorities, including Atlantic & Pacific, Ohio & Mississippi and Union Pacific, the latter having been depressed by the news from Washington. Pacific Mail was stronger to-day, on the receipt of intelligence that the over-due steamer "Alaska" has arrived at Hang Kong. No cause for her delay is stated. The general Hong Kong. No cause for her delay is stated. The general market closed dull, but tolerably steady.

The following were the highest and lowest prices of the active list of railroad and miscellaneous stocks on each day of the last week:

|                                               |                  |                      |                     | ay or price in |            |

The Gold Market.—The general tendency of gold has been towards lower prices, the closing rate to day being 113\$. The large shipment of last week, amounting to over \$2,000,000, appears to have had more influence before than after it was made—or, in the language of Wall street, the effect was discounted. It

or, in the language of Wall street, the effect was discounted. It is possible that the Syndicate operations have checked a further rise in gold, or that lower exchange has had some influence on it. The rates paid for carrying to-day were 3½, 5, 6, and 2 per cent, and flat for borrowing. Time loans were quoted on Wednesday as follows: 30 to 60 days, flat; 90 days, ½ for u e; 4 to 6 months, 4 for use; all the year 1873 at 1½ for use.

At the Treasury sale of \$1,000,000 on Thursday the total bids were \$2,740,000. Customs receipts for the week amount to \$2,210,000.

The following estimates of the coin product of 1872, and remarks thereon, are made by the general superintendent of Wells

& Fargo's express:

"The product for the year, \$62,236,913, is \$3,952,884 in excess of 1871, which was \$58,284,059. The increase is confined to Utah and Nevada alone, some of the other localities falling off slightly. It is proper to state that our express communication is so limited, and knowledge so imperfect of Arizona, that we do not consider the figures given for that territory as reliable for the product of that section.

Foreign Exchange.—The exchange market has been less strong this week, the chief causes for this being found in the influence of cotton bills, borrowed bills offered on our market, and possibly the effect of the syndicate operations. Actual business was done at lower rates than the nominal quotations given below.
